HOW THE COOKIE CRUMBLES IS UP TO YOU.

This advertisement is intended for Pennsylvania Medical Society members and auxiliary. PAMPAC is a separate segregated fund established by the Pennsylvania Medical Society. Voluntary political contributions by individuals to PAMPAC shou written on personal checks; corporate contributions can be used only for administrative purposes. Contributions are not limited to the suggested amount. Neither PAMPAC nor its AMA affiliate, AMPAC, will favor or disadvantage anyone based upon the amounts the failure to make, PAC contributions. Voluntary political contributions are subject to the limitations of FEC Regulations, Section 110.1, 110.2 and 110.5 (Federal regulations require this notice). A portion of your contribution will be forwarded to AMPAC to su candidates in Federal elections. Contributions to PAMPAC and AMPAC are not deductible as charitable contributions for Federal Income tax purposes.

WHEN ACID REFLUX ERUPTS

Zantac® 150 Tablets
(ranitidine hydrochloride)

BRIEF SUMMARY

Zantac® 300 Tablets
(ranitidine hydrochloride)

Zantac® Syrup
(ranitidine hydrochloride)

The following is a brief summary only. Before prescribing, see complete prescribing information in Zantac® product labeling.

INDICATIONS AND USAGE: Zantac® is indicated in:
1. Short-term treatment of **active duodenal ulcer.** Most patients heal within 4 weeks.
2. **Maintenance therapy** for duodenal ulcer patients at reduced dosage after healing of acute ulcers.
3. The treatment of **pathological hypersecretory conditions** (e.g., Zollinger-Ellison syndrome and systemic mastocytosis).
4. Short-term treatment of **active, benign gastric ulcer.** Most patients heal within 6 weeks and the usefulness of further treatment has not been demonstrated.
5. Treatment of **gastroesophageal reflux disease (GERD).** Symptomatic relief commonly occurs within 1 or 2 weeks after starting therapy. Therapy for longer than 6 weeks has not been studied.

In active duodenal ulcer; active, benign gastric ulcer; hypersecretory states; and GERD, concomitant antacids should be given as needed for relief of pain.

CONTRAINDICATIONS: Zantac® is contraindicated for patients known to have hypersensitivity to the drug.

PRECAUTIONS:

General: 1. Symptomatic response to Zantac® therapy does not preclude the presence of gastric malignancy.
2. Since Zantac is excreted primarily by the kidney, dosage should be adjusted in patients with impaired renal function (see DOSAGE AND ADMINISTRATION). Caution should be observed in patients with hepatic dysfunction since Zantac is metabolized in the liver

Laboratory Tests: False-positive tests for urine protein with Multistix® may occur during Zantac therapy, and therefore testing with sulfosalicylic acid is recommended.

Drug Interactions: Although Zantac has been reported to bind weakly to cytochrome P-450 *in vitro*, recommended doses of the drug do not inhibit the action of the cytochrome P-450-linked oxygenase enzymes in the liver. However, there have been isolated reports of drug interactions that suggest that Zantac may affect the bioavailability of certain drugs by some mechanism as yet unidentified (e.g., a pH-dependent effect on absorption or a change in volume of distribution).

Increased or decreased prothrombin times have been reported during concurrent use of ranitidine and warfarin. However, in human pharmacokinetic studies with dosages of ranitidine up to 400 mg per day, no interaction occurred; ranitidine had no effect on warfarin clearance or prothrombin time. The possibility of an interaction with warfarin at dosages of ranitidine higher than 400 mg per day has not been investigated.

Carcinogenesis, Mutagenesis, Impairment of Fertility: There was no indication of tumorigenic or carcinogenic effects in lifespan studies in mice and rats at dosages up to 2,000 mg/kg per day.

Ranitidine was not mutagenic in standard bacterial tests (*Salmonella, Escherichia coli*) for mutagenicity at concentrations up to the maximum recommended for these assays.

In a dominant lethal assay, a single oral dose of 1,000 mg/kg to male rats was without effect on the outcome of two matings per week for the next 9 weeks.

Pregnancy: ***Teratogenic Effects: Pregnancy Category B:*** Reproduction studies have been performed in rats and rabbits at doses up to 160 times the human dose and have revealed no evidence of impaired fertility or harm to the fetus due to Zantac. There are, however, no adequate and well-controlled studies in pregnant women. Because animal reproduction studies are not always predictive of human response, this drug should be used during pregnancy only if clearly needed.

Nursing Mothers: Zantac is secreted in human milk. Caution should be exercised when Zantac is administered to a nursing mother.

Pediatric Use: Safety and effectiveness in children have not been established.

Use in Elderly Patients: Ulcer healing rates in elderly patients (65 to 82 years of age) were no different from those in younger age-groups. The incidence rates for adverse events and laboratory abnormalities were also not different from those seen in other age-groups.

ADVERSE REACTIONS: The following have been reported as events in clinical trials or in the routine management of patients treated with Zantac®. The relationship to Zantac therapy has been unclear in many cases. Headache, sometimes severe, seems to be related to Zantac administration.

Central Nervous System: Rarely, malaise, dizziness, somnolence, insomnia, and vertigo. Rare cases of reversible mental confusion, agitation, depression, and hallucinations have been reported, predominantly in severely ill elderly patients. Rare cases of reversible blurred vision suggestive of a change in accommodation have been reported.

Cardiovascular: As with other H_2-blockers, rare reports of arrhythmias such as tachycardia, bradycardia, atrioventricular block, and premature ventricular beats.

Gastrointestinal: Constipation, diarrhea, nausea/vomiting, abdominal discomfort/pain, and rare reports of pancreatitis.

Hepatic: In normal volunteers, SGPT values were increased to at least twice the pretreatment levels in 6 of 12 subjects receiving 100 mg q.i.d. intravenously for 7 days, and in 4 of 24 subjects receiving 50 mg q.i.d. intravenously for 5 days. There have been occasional reports of hepatitis, hepatocellular or hepatocanalicular or mixed, with or without jaundice. In such circumstances, ranitidine should be immediately discontinued. These events are usually reversible, but in exceedingly rare circumstances death has occurred.

Musculoskeletal: Rare reports of arthralgias.

Hematologic: Blood count changes (leukopenia, granulocytopenia, thrombocytopenia) have occurred in a few patients. These were usually reversible. Rare cases of agranulocytosis, pancytopenia, sometimes with marrow hypoplasia, and aplastic anemia and exceedingly rare cases of acquired immune hemolytic anemia have been reported.

Endocrine: Controlled studies in animals and man have shown no stimulation of any pituitary hormone by Zantac® (ranitidine HCl) and no antiandrogenic activity, and cimetidine-induced gynecomastia and impotence in hypersecretory patients have resolved when Zantac has been substituted. However, occasional cases of gynecomastia, impotence, and loss of libido have been reported in male patients receiving Zantac, but the incidence did not differ from that in the general population.

Integumentary: Rash, including rare cases suggestive of mild erythema multiforme, and, rarely, alopecia.

Other: Rare cases of hypersensitivity reactions (e.g., bronchospasm, fever, rash, eosinophilia), anaphylaxis, angioneurotic edema, and small increases in serum creatinine.

OVERDOSAGE: Information concerning possible overdosage and its treatment appears in the full prescribing information.

DOSAGE AND ADMINISTRATION: (See complete prescribing information in Zantac® product labeling.)

Active Duodenal Ulcer: The current recommended adult oral dosage is 150 mg or 10 mL (2 teaspoonfuls equivalent to 150 mg of ranitidine) twice daily. An alternate dosage of 300 mg or 20 mL (4 teaspoonfuls equivalent to 300 mg of ranitidine) once daily at bedtime can be used for patients in whom dosing convenience is important. The advantages of one treatment regimen compared to the other in a particular patient population have yet to be demonstrated.

Maintenance Therapy: The current recommended adult oral dosage is 150 mg or 10 mL (2 teaspoonfuls equivalent to 150 mg of ranitidine) at bedtime.

Pathological Hypersecretory Conditions (such as Zollinger-Ellison syndrome): The current recommended adult oral dosage is 150 mg or 10 mL (2 teaspoonfuls equivalent to 150 mg of ranitidine) twice a day. In some patients it may be necessary to administer Zantac® 150-mg doses more frequently. Dosages should be adjusted to individual patient needs, and should continue as long as clinically indicated. Dosages up to 6 g per day have been employed in patients with severe disease.

Benign Gastric Ulcer: The current recommended adult oral dosage is 150 mg or 10 mL (2 teaspoonfuls equivalent to 150 mg of ranitidine) twice a day.

GERD: The current recommended adult oral dosage is 150 mg or 10 mL (2 teaspoonfuls equivalent to 150 mg of ranitidine) twice a day.

Dosage Adjustment for Patients with Impaired Renal Function: On the basis of experience with a group of subjects with severely impaired renal function treated with Zantac, the recommended dosage in patients with a creatinine clearance less than 50 mL/min is 150 mg or 10 mL (2 teaspoonfuls equivalent to 150 mg of ranitidine) every 24 hours. Should the patient's condition require, the frequency of dosing may be increased to every 12 hours or even further with caution. Hemodialysis reduces the level of circulating ranitidine. Ideally, the dosing schedule should be adjusted so that the timing of a scheduled dose coincides with the end of hemodialysis.

HOW SUPPLIED: Zantac® 300 Tablets (ranitidine hydrochloride equivalent to 300 mg of ranitidine) are yellow, capsule-shaped tablets embossed with "ZANTAC 300" on one side and "Glaxo" on the other. They are available in bottles of 30 (NDC 0173-0393-40) tablets and unit dose packs of 100 (NDC 0173-0393-47) tablets.

Zantac® 150 Tablets (ranitidine hydrochloride equivalent to 150 mg of ranitidine) are white tablets embossed with "ZANTAC 150" on one side and "Glaxo" on the other. They are available in bottles of 60 (NDC 0173-0344-42) and 100 (NDC 0173-0344-09) tablets and unit dose packs of 100 (NDC 0173-0344-47) tablets.

Store between 15° and 30°C (59° and 86°F) in a dry place. Protect from light. Replace cap securely after each opening.

Zantac® Syrup, a clear, peppermint-flavored liquid, contains 16.8 mg of ranitidine hydrochloride equivalent to 15 mg of ranitidine per 1 mL in bottles of 16 fluid ounces (one pint) (NDC 0173-0383-54).

Store between 4° and 25°C (39° and 77°F). Dispense in tight, light-resistant containers as defined in the USP/NF.

YOU CAN IMPROVE TECHNOLOGY AND STILL BE STUCK IN THE SAME JAM

Technology is supposed to make your people more productive, your practice more competitive. We anticipate how technology will affect not only processes, but the structure of your practice as well. The Valley Medical Management concept revolves around a team of reimbursement specialists, managers, systems analysis and CPA's. This is the formula for our success. Our approach is scientific, comprehensive, and informative. Services provided include:

- ✦ Practice Reviews
- ✦ Administrative & Financial Management
- ✦ Billing
- ✦ Hardware/Software

Our objective is to make you a more successful professional.
Call us for more information.

SPECIALISTS IN MEDICAL PRACTICE MANAGEMENT

"Unfortunately,

he was already sitting in my examining room. This guy was a walking liability suit looking for a victim. He was angry, non-compliant. It was one of those rare, no-win cases and, well, I guess my number was up.

Then I remembered PMSLIC. So I stepped into the next room and gave them a call. They put me in touch with a member of their Risk Management team, who advised me of the relevant legal issues and the implications of each of my alternatives. Right on the spot. As a result, I was able to make the best medical recommendation with the peace of mind that comes from knowing my legal interests were also protected. I guess that's what it's all about. Peace of mind. The kind you only get from people who really take the time to help. That's excellent service. I'll never change carriers."

22 Understanding Durable Powers of Attorney

Many physicians will encounter the use of durable powers of attorney in medical practice as patients become more informed and more prepared for end-of-life decisions. This article differentiates the durable power of attorney and the living will, and explains the authority granted to the DPA holder.

> *"While both are considered types of advance directives, a durable power of attorney differs from and is not interchangeable with a living will."*

GOVERNOR CUTS WELFARE BENEFITS, SOCIETY RESPONDS: Governor Robert P. Casey announced in late July a plan to cut Medical Assistance benefits for approximately 80,000 recipients of General Assistance. The state proposes to institute an 18-medical-visit-per-year limit and a coupon payment system. Final draft regulations released August 12 also propose to eliminate routine dental services to adult welfare recipients. The governor has opted for a regulatory route that bypasses the legislature. The State Society responded by: 1) providing input at a September 2 Independent Regulatory Review Commission public hearing; 2) working with the Department of Public Welfare to address concerns over the means by which restrictions will be accomplished and monitored; and 3) suggesting which medical conditions should be included in a list of exemptions from the 18-visit-per-year proposed limit. At press time, the Society was planning how to advise the membership on the new rules, which may take effect October 1.

SOCIETY MEETS WITH SECRETARY OF AGING ABOUT PACE: State Society Vice President Martin A. Murcek, MD, and other Society representatives met with Secretary of Aging Linda Rhodes in mid-August to discuss the Society's concerns with proposed cuts to the state's Pharmaceutical Assistance Contract for the Elderly (PACE) program. The Society sent a follow-up letter to Secretary Rhodes outlining commitments made at the meeting, and it will continue to try to keep communications with Aging open. For more information, see page 36.

CLIA STANDARDS, ENFORCEMENT EFFECTIVE SEPTEMBER 1: Quality standards and enforcement regulations implementing the Clinical Laboratory Improvement Act of 1988 (CLIA) became effective September 1. Physicians who have not filed a Health Care Financing Administration (HCFA) 109 form should do so immediately so that HCFA may assign a CLIA number and continue to pay claims without delay. HCFA has said as long as a physician's application is in process, and the physician has a personal identification number (PIN) and "remains active" in the administration's computer, claims will continue to be paid. Physicians with questions regarding their CLIA status should call the CLIA inquiry hotline at (410) 290-5850.

HOUSE OF DELEGATES CONVENES OCTOBER 23-25: The Pennsylvania Medical Society's House of Delegates will meet for its annual business meeting October 23-25 at the Adam's Mark Hotel, Philadelphia. A special feature this year will be a forum on health care reform scheduled for Friday. President Elect Donald G. Ferguson, MD, will be installed as president Saturday evening. The deadline for submitting resolutions is September 23.

STATE LEADERS INVITED TO MEET WITH GOVERNOR ON WORKERS' COMP: House and Senate leaders have been invited to meet with Governor Casey in mid-September to discuss possible resolution of pending workers' compensation legislation. The Society maintains that it will support concurrence in the Senate amendments to House Bill 2140, Printer's Number 3913 (see Government, page 31).

NOONAN SWORN IN AS HEALTH SECRETARY: Allan S. Noonan, MD, MPH, was officially sworn in as Pennsylvania's Secretary of Health on August 13, 1992. He has been acting health secretary since October 1, 1991.

CONGRESS VOTES ON "GAG RULE," ANIMAL PROTECTION ACT: The U.S. House of Representatives in early August voted 251-144 to overturn the "gag rule" that restricts abortion information at federally funded family planning clinics. The vote was short of the number of votes needed to override an expected Bush veto. The bill now goes to the Senate where passage is likely. Also in August, the House and Senate passed the Animal Enterprise Protection Act of 1992, legislation that provides criminal penalties for acts of violence against research efforts. The bill has been sent to the President for approval; there has been no indication to date that he will veto the bill.

"**N**early ¾ of the malpractice lawsuits that doctors lose reflect poor patient communication," according to a recent article in the *Wall Street Journal* (March 17, 1992). Did you know something as simple as empathy could help protect you against medical malpractice litigation?

Curing and Caring—a half-day seminar sponsored by PMSLIC—addresses this vital component of medical care and how it could make a difference in your own practice.

And to demonstrate how important this seminar can be to your practice, PMSLIC is offering its insured participants a 10% credit on 1993 policy premium. Any other physician attending the seminar also is eligible for the discount upon obtaining 1993 malpractice coverage with PMSLIC.

Curing and Caring will be presented at the following locations, with a morning and afternoon session at each:

Harrisburg—
Wednesday, September 23

Erie—
Wednesday, September 30

Pittsburgh—
Thursday, October 1

Wilkes Barre/Scranton—
Tuesday, October 20

Philadelphia—
Wednesday, November 4

King of Prussia—
Thursday, November 5

For registration information contact the PMSLIC Risk Management Department at 800-445-1212 (PA) or 717-558-7500

THE PRACTICE OF MEDICINE: KNOWLEDGE, SKILL, EMPATHY.

THE STRENGTH OF YOUR PRACTICE DEPENDS ON HOW WELL YOU COMBINE ALL THREE.

IF YOU'RE NOT PAYING ATTENTION TO EMPATHY, YOU MIGHT AS WELL HANG IT UP.

PMSLIC

Turn claims into cash. Fast.

We've perfected a paperless, electronic claims processing system that cuts through the clutter, bypasses the bureaucracy and ends up getting your money where it belongs. Twice as fast. 7 days instead of 14, for the average claim.

Why? Because by continually making Pennsylvania's healthcare system more efficient, we help ensure affordable access for more than six million Pennsylvanians.

Taking the physician's view of practice perfection.

During the past five years, we've talked with hundreds of physicians and their office managers to find out how Pennsylvania Blue Shield could become more "practice friendly." Overall, they wanted us to be more sensitive to their individual practice management needs.

They told us that faster payment was important. But they also wanted more control over how they accessed Blue Shield to get information relevant to their practices.

We listened. Here's what we did.

- We made preparing and filing claims more convenient, more than twice as fast.
- We provided immediate confirmation of claims received, with a hard copy follow-up sent through the mail.
- We made access to claims status seamless, fast and precise so that providers could accurately project their cash flow, streamline collections and avoid filing unnecessary duplicate claims.
- We provided instant access to patient information, including group number, coverage, eligible dependents, benefits explanations — and more.
- We made it possible to reconcile accounts and post to accounts receivable in minutes, instead of hours or days.
- And most importantly, we kept the price of participation at low cost to providers without computer automation — at no cost to providers with compatible computer systems.

Go electronic.

What you need.
Estimated cost.

High performance.
High return.

Support when you need it. Free.

Any electronic system needs expert support. We've got it — men and women committed to making Blue Shield responsive to your needs. Call Kathy Smith: ***1.800.992.0246***. She's got great news to share with you and your office manager.

▲ *"Why go electronic? The doctor operates in the morning. The claim is entered into the computer and transmitted by evening. Payment arrives 6 days later."*

Reflections On Our First Board Retreat

John W. Mills, MD
Medical Editor

"All physicians, not just the Board members, need to take the time for some self-examination... and have the grace to know where our expertise lies."

Between the House of Delegates meetings each October, your Board of Trustees wrestles with some very sticky issues in trying to provide strong leadership to the State Society.

This has become a formidable task. Many issues facing our profession today require intensive study; consultation with experts on aspects of medicine or socio-economics in which we, as physicians, are not specialists; and many hours of probing debate in order to arrive at defensible positions. These positions must then be promoted to the legislature and to the citizens of the Commonwealth as our leadership stance. But I know that, as a Board, we're not always going to bat 100 percent—who does?

The Board meets formally about seven times each year, but early this July we met for a separate "retreat". For over a year, we had batted around the idea of a retreat—a session set aside from the often jam-packed agendas of complex Society business and dedicated to more in-depth discussions, self-examination, and personal soul-searching.

While our first attempt was too formal for my taste, I hope subsequent "retreats" will offer even more time for self-examination and discussion. We heard formal presentations on extremely important topics such as health care reform, legislative effectiveness, and Society structure. We listened, questioned the experts, discussed the issues. We tried to grasp and digest as much as possible. And while we have to stand for re-election, like the legislature, that doesn't occupy a priority position in our deliberations. We put leadership above re-election because that's why we chose to serve on the Society's Board in the first place.

Several things kept recurring throughout the retreat. They're basic, but so important that I believe they should be of more than passing interest to readers:

• *Image*: Of the State Society, of organized medicine, and of the profession. The State Society is still viewed as an all-white, male organization, partly because our Board is just that. This issue of PENNSYLVANIA MEDICINE is devoted in part to "women in medicine"—something our Board now lacks, since two Board seats formerly filled by women were assumed this year by men. The presence of Dr. Betty Cottle, who was a trustee for nine years, has been especially missed.

We have a credible Board doing a good job—but that's not enough to project an image that reflects our membership today. And it's not enough to attract a broad, changing spectrum of membership. We need some diversity on the Board to dispell that mirror-image stereotype of the make-up of Society membership.

Recruitment of women and minority members is a top priority this year. But we also need to encourage their participation and volunteerism, and place them in leadership positions.

• *Grassroots lobbying*: We talked about how to improve our efforts in the legislative arenas, but formal lobbying is only part of the picture. Our Senators and Representatives need to hear from each Society member on a regular basis, not only about specific issues and bills, but also on a personal level, about what it's like to practice medicine in this difficult time, about our personal concerns for public health and welfare.

• *Grassroots activism*: Looking at the "big" issues facing the Society only emphasizes more the importance of individual members, not how important Board decisions are. Each physician needs to become involved in lobbying, recruiting members, and helping to decide policies affecting the future of medicine.

Remember this basic tenant: physicians know how to manage illness and treat patients. But we are also well-educated citizens who carry a responsibility to use that education to understand the issues and become active in our local communities.

All physicians, not just the Board members, need to take the time for some self-examination...and have the grace to know where our expertise lies.

Commencement

Robert N. Moyers, MD

As students return to their classrooms this month, I am reminded of how honored I feel to have been elected to a three-year term on the American Medical Association's Council on Medical Education at the AMA's 1992 annual meeting. At the same time, Lee H. McCormick, MD, was elected chairman of the AMA's Hospital Medical Staff Section, and Maria Simbra was elected to the national governing council of the Medical Student Section.

As the practicing physician representative to the medical education council, I have the chance to make a difference by carrying the thinking of Pennsylvania's physicians to the national agenda. I also will bring to the table insights gained from an active practice and from what I've learned at the Pennsylvania Medical Society over the years.

Self-governance is the hallmark of any profession, yet in medical education, as in other areas of medicine, non-physicians are seeking to make more of the rules. Here in Pennsylvania, our governor has warned that the Commonwealth's medical schools should produce more family physicians or risk losing state funding. The mix of physician specialties concerns us all, but it is physicians, not government, who should be out in front, working to ensure that our medical schools meet the needs of patients in the years ahead.

Pennsylvania's medical schools function according to their own unique needs and concerns, and we would certainly not want to see a "one-size-fits-all" approach. Nevertheless, we who are in the front lines of medical care delivery must work to narrow the gap between academia and private practice. We have mutual goals; unity, not fragmentation, will make those goals achievable.

Lines are being drawn at the national level. The Council of Graduate Medical Education, which is appointed by Congress, said it would like to see 50 percent of all residents in primary care medicine. Last March, the Association of Professors of Medicine endorsed a similar goal—that half of internal medicine residents should be generalists. That same month, the U.S. Bureau of Health Professions called for 50 percent of all residents to be in primary care by the year 2000.

But even today, many primary care residencies go unfilled. Will government legislate quotas? Medical schools are testing curriculum reform, but they cannot, and should not, control their students' choices. It's clear that the best solution for our profession is based on incentives and encouragement from within: today's physicians reaching out to tomorrow's.

Specialty mix is one educational concern. Medical student debt is another. The average debt for a medical student is now more than $46,000. A new federal law has addressed some issues of loan deferment and forbearance, but there are ways physicians can help. This year, the Society's Educational and Scientific Trust has outstanding loans of nearly $480,000 to 197 medical and allied health students. These are *your* contributions at work to help *your* future colleagues.

We need to see changes in resident hours to create more humane and ultimately more productive working conditions. We need to facilitate the licensing and acceptance of qualified international medical graduates and work against even subtle discriminatory attitudes and practices. Also, we are concerned about continuing medical education (CME) and are working to uphold high standards in the granting of CME credits.

I see my role on the council during the next three years as a great opportunity for Pennsylvania physicians to influence national policy on these and other important issues in medical education. Education and ethics are the two foundations of organized medicine. Our hopes for the future of our profession rest in our students; and the future of our students and patients rests on the quality and integrity of our academic system.

ou're on solid ground with the Dodson Plan.

More than 75 years ago, Bruce Dodson, Sr. pioneered the concept of the dividend plan for workers' compensation insurance. Dodson Group has been helping businesses like yours save on premium costs ever since.

The Dodson Plan gives you the opportunity to earn a dividend each year, depending on the claim experience of all insured members. We carefully select those who participate, creating the greatest potential for you to save.

Pennsylvania Medical Society endorsed the Dodson Plan in 1973. Since then, participating members have earned a total of **$2,309,240** in dividends. Share in the savings!

You're on solid ground with Dodson.

LETTERS TO THE EDITOR

OBJECTION VOICED TO LEADERSHIP STRUCTURE

At the 1992 Leadership Conference of the Pennsylvania Medical Society, our president, Robert N. Moyers, MD, called for greater participation by physicians in the affairs and activities of the Society. Such a goal is both logical and worthy, as well as necessary, if physicians and patients are to be preserved from the pressures being brought by government. There is little argument or discussion that could dissuade one from trying to attain this valuable goal.

A review of the current structure of the Pennsylvania Medical Society, including boards, the AMA delegation, councils, and committees, indicates that there are 358 positions in the hierarchy of the Society which can be held by physicians. Each physician in a State Society position can contribute significantly to Society strength in three ways:

1) The physician brings his or her ideas to the State Society and adds to the total "knowledge pool" available to solve problems.

2) The physician at work in his or her home area is an ambassador of the Pennsylvania Medical Society, able to better explain what the State Society does, able to better recruit new members, and able to better act as a liaison when the member at home has a question or a problem.

3) Last, but not least, by direct involvement in activities of the State Society, the physician is one more member with a better grasp on the problems of medicine, and the physician is more effective as a direct contact person with members of the legislature.

Thus, in a society with over 20,000 members, surely we will have 358 individual doctors involved in these positions. As Dr. Moyers has recommended, we should encourage the maximum number of physicians to participate directly in the affairs of the Society.

But we don't do that! Sixty (60) people hold a total of 182 positions. *Yes...60 people...182 positions.* An average of three-plus positions per person. Over 50 percent of all positions held by just 60 people. What one finds is: 35 persons with two positions; 10 persons with three positions; three persons with four positions; seven persons with five positions; four persons with six positions; and would *you believe*, one person with 11 positions!

Granted, isn't it nice that so few are willing to do so much for so many? And granted, that while not every position requires a lot of time, many are very time consuming. But considering the problems we are having, shouldn't we be utilizing the interest and intelligence of as many different doctors as possible? I suggest we need all the help we can get. We have 240 doctors working in Society positions. Let's add another 120 doctors. Let's give our president what he asked for: the help, the support, and the involvement of as many physician members as possible.

Charles Heisterkamp III, MD, FACS
Lancaster

Editor's Note: Dr. Heisterkamp's letter was further researched by him and also by your medical editor. As noted below, the majority of positions in the Pennsylvania Medical Society are appointed as follows: by the president-elect—130, by the Board of Trustees—65, by the chairman of the board—65, and by the speaker of the house—7. The remainder, 83, are elected by the House of Delegates, for a total of 358 positions.

Dr. Heisterkamp neglected to include a number of positions which are appointed by the speaker of the house each year, namely members of Reference, Rules, and Credentials committees, as well as the tellers. In addition, each separate section of the Society (medical student, resident physician, young physician, HMSS, and interspecialty) elects their own boards from their delegates. So, in reality we have about 1,000 individual physicians involved directly in the business of the State Society. If you also count all the delegates and special committees, plus the boards of KePRO, PMSLIC, and The Educational and Scientific Trust, that figures to about one-twentieth of the membership—not bad, I'd say!

The Society's by-laws mandate many positions, including three others held by the secretary. The by-laws also are quite definite about who appoints the various committees and councils, both of the House and the Board.

Each year the president elect sends to each trustee and component medical society a request for names of members who would be willing to serve on councils and committees. The number of responses is usually abysmal. Perhaps that's the reason the by-laws stipulate a six-year limit for service on a council or commission. Also note:

- *Four of seven members with five positions are board members, three are not.*
- *All of the members with six positions are board members.*
- *Six of the members with five or six positions have at least two positions elected by the House.*
- *The secretary with 11 positions should be understandable.*

Dr. Murcek will be looking for volunteers early next year as the president elect. The chairman of the board and the speaker of the house are also in need of volunteers annually. Please call them and indicate your interest or expertise.

And finally, the House of Delegates may amend the by-laws any time they see fit.

John W. Mills, MD
Medical Editor

DEA NUMBERS: STATE SPECIFIC OR NOT?

I am writing in reference to the response by Medical Editor John W. Mills, MD, to the Letters to the Editor section in the April issue of PENNSYLVANIA MEDICINE. Dr. Mills made the statement that DEA numbers are not state specific. I do not believe this is, in fact, the case based upon my experience with the state of New Jersey and their requirements for narcotic registration. I was required to have federal DEA registration for the state of New Jersey, in addition to the one I had in the state of Pennsylvania, for the many years of my practice. The substance of my communications on this matter was that the federal DEA is issued for use in an individual state. This may or may not be a matter requiring further study or clarification for your readership.

Charles D. Tourtellotte, MD
Philadelphia

Editor's Note: According to DEA, the DEA identification number is unique and physician specific nationwide. It was explained that if a physician practices in two different states, the physician is assigned two different DEA numbers. Likewise, if a physician practices on two sites within the same state, he or she is assigned a number for each site. Thus, Dr. Mills and Dr. Tourtellotte are both

correct: while the DEA number is not necessarily state specific, it is location *specific.*

IN SEARCH OF ASSISTANCE FOR CZECHOSLOVAKIA

Dr. Gordon MacLeod has suggested I write to PENNSYLVANIA MEDICINE to solicit the State Society's help in a project of mine. I recently visited Czechoslovakia under the auspices of the American Czechoslovak Society of Washington to identify possible projects for myself and for members of Pennsylvania's health care community to assist that country (perhaps soon to be two countries) in reforming and improving its health care system.

I visited a large number of health care facilities—large and small hospitals, specialty hospitals, and clinics—and met with many health care providers, including physicians, administrators, and nurses. Almost everyone expressed great interest in having visits from their peers in the United States to assist them in restructuring their delivery system, identifying ways to improve the delivery of care, and bringing them up-to-date on developments in their professional fields. For decades they have been severly limited in their ability to travel abroad, and the system has been so poorly funded that they haven't had access to journals and other means of keeping current in their specialties.

I wonder if the Pennsylvania Medical Society, through its publications, could alert the physicians and other providers in Pennsylvania of the need Czechoslovakia has for persons who might be willing to volunteer a couple of weeks, or longer if possible, to visit Czechoslovakia to conduct seminars and to consult one-on-one with their peers throughout the health care system. The Ministries of Health in both the Czech Republic (Prague) and Slovakia (Bratislova) would be more than willing to help with all arrangements or contacts.

This would be a volunteer effort, though the American Czechoslovak Society of Washington has a method of assuring that the expenses of volunteers are deductible. I feel certain that the hosts would be most helpful in arranging transport within the country, interpreter services, and perhaps in some cases accommodations in homes or staff residences.

A fringe benefit of such a commitment is the opportunity to see a beautiful and interesting country and to observe the dramatic changes that have been, and continue to be, taking place. Several Pittsburgh physicians have already volunteered. I'm sure they will have a rewarding experience.

If there is a way of advertising this opportunity of service to your members, the American Czechoslovak Society of Washington and I would much appreciate it. Interested persons could contact me at: 190 Crestvue Manor Drive, Pittsburgh, PA 15228, (412) 531-1764; or Mr. Charles Warr, Chairman, Health/Environment Committee, 2831 27th Street NW, Washington, DC 20008, (202) 265-4545, Fax - (202) 483-5323.

Thank you very much.

Geisinger

As an organization accredited by the Pennsylvania Medical Society for its continuing medical education program, the Geisinger Clinic designates these activities as meeting the criteria for Category I credit for the American Medical Association's Physician's Recognition Award and the Pennsylvania Medical Society membership requirement. Please refer to each individual program flyer for registration fees, starting times, and number of credit hours. For further information or for copies of individual programs, call Sharon Hanley, RMP, at 1-800-272-6692. There is a 24-hour answering service available. You may also write to her at North Academy Avenue, Danville, PA 17822-1350.

Legacy and Future

Doris G. Bartuska, MD, FACP

September is Women in Medicine Month and an appropriate time to recognize the heritage and the future of women physicians.

The number of women physicians in the United States has more than quadrupled since 1967. In 1990-91 there were 104,194 women physicians and 511,227 male physicians. More than 42 percent of all women physicians are under age 35, and 41 percent of all medical students are women. When I was a medical student, only six percent of medical students were women.

Women physicians are entering all specialties, including surgery, neurosurgery, plastic surgery, and orthopedics. The majority are in internal medicine, pediatrics, general and family practice, psychiatry, and obstetrics/gynecology.

Women physicians are receiving active support from state, county, and specialty societies to increase their involvement in organized medicine at the local and national levels. Organized medicine has much to gain from including women physicians in the mainstream. It also has much to lose if our creative ideas and women's and family health concerns are not aired and resolved on local and national policy agendas.

Where do women stand in academic medicine? Almost 19 percent of medical school faculty members are women, but 67 percent of those are in the entry-level ranks of assistant professor, research instructor, or clinical instructor.

In 1985, five percent of professors were women; in 1990, 9.5 percent were women. In 1991, there was one medical school woman dean.

Women students may find inspiration and role models more easily now that more women physicians are assuming leadership positions on medical school faculties. We are beginning to equalize the opportunities for women in medicine.

We must encourage our talented women physicians by recognition, support, and financial assistance to enter and succeed in academic careers. More academic women physicians should be in leadership roles—delivering scientific papers and chairing sessions at medical meetings, earning important positions in specialty societies, being politically active, chairing departments, being deans, and having a role in organized medicine to influence health care policy. Certainly, department chairs must monitor career paths and discuss the criteria for promotion in academic medicine with junior faculty members.

We *must* address the needs and concerns of our women physicians in solo and group practices. The American Medical Association database has important statistics. With regard to family characteristics, 77 percent of women physicians and 84 percent of male physicians under the age of 40 are married. Of these, 45 percent of the women and 10 percent of the men are married to physicians.

Women physicians work 47.2 weeks per year; male physicians work 47.4 weeks. While young women physicians work nearly a week less per year than young male physicians, mature women physicians work almost a week more than their male colleagues.

Regarding income, women physicians' income has been one-third less than men; however, in most primary care specialties, women's earnings and visit charges are within 10 percent of male physicians'.

The charge of the editor of PENNSYLVANIA MEDICINE requested personal vignettes from our women physicians. I was privileged to be one of 10 women physicians honored at the Women in Medicine dinner held during the 250th celebration of the founding of the University of Pennsylvania, where I did graduate education in molecular medicine. I quote from a citation I received there:

Dr. Bartuska has been active in organized medicine since her graduation from the Woman's Medical College of Pennsylvania (MCP) and continues to act as an advocate for women physicians as they attain

According to current Sate Society statistics, 8,039 women in Pennsylvania place an MD or DO after their name. An estimated 1,500 of those are residents.

Dr. Bartuska is professor of medicine and director, Division of Endocrinology, Diabetes and Metabolism, Medical College of Pennsylvania, Philadelphia; and vice chair of the Society's Educational and Scientific Trust. She is the mother of six children; her youngest is in the medical field.

major leadership positions in American medicine.

Dr. Bartuska was named Outstanding Educator of America; is a past associate dean of the Medical College of Pennsylvania; and has been named to the World Who's Who of Women in Education, Who's Who of American Women, and the World Who's Who of Women. She is past president as well as a delegate to the American Medical Women's Association.

Her research has been primarily in the area of endocrinology of aging with a special emphasis on prevention and treatment of osteoporosis. A major focus has been on the genetic and autoimmune polyglandular disorders that involve the thyroid, adrenal, and gonads.

Dr. Bartuska, the only woman to receive the Father Clarence E. Shaffrey Award from St. Joseph's University, is a "Distinguished Daughter of Pennsylvania," as cited by the governor, and is past president of the Philadelphia County Medical Society.

SOCIETY PROJECTS HONOR WOMEN IN MEDICINE

AMA Board member Palma Formica, MD, was the featured speaker at a Pennsylvania Medical Society reception honoring women physicians. This year's reception was held at the Philadelphia County Medical Society on September 10. It was one of the State Society's special projects for Women in Medicine this month.

The Society's membership department, later this month, will launch a special recruitment effort aimed at increasing the number of women physicians in organized medicine.

For additional information about Women in Medicine month, call the Society's Division of Communications and Public Affairs at 1-800-228-7823.

YOCON®
YOHIMBINE HCl

Description: Yohimbine is a 3a-15a-20B-17a-hydroxy Yohimbine-16a-carboxylic acid methyl ester. The alkaloid is found in Rubaceae and related trees. Also in Rauwolfia Serpentina (L) Benth. Yohimbine is an indolalkylamine alkaloid with chemical similarity to reserpine. It is a crystalline powder, odorless. Each compressed tablet contains (1/12 gr.) 5.4 mg of Yohimbine Hydrochloride.

Action: Yohimbine blocks presynaptic alpha-2 adrenergic receptors. Its action on peripheral blood vessels resembles that of reserpine, though it is weaker and of short duration. Yohimbine's peripheral autonomic nervous system effect is to increase parasympathetic (cholinergic) and decrease sympathetic (adrenergic) activity. It is to be noted that in male sexual performance, erection is linked to cholinergic activity and to alpha-2 adrenergic blockade which may theoretically result in increased penile inflow, decreased penile outflow or both.

Yohimbine exerts a stimulating action on the mood and may increase anxiety. Such actions have not been adequately studied or related to dosage although they appear to require high doses of the drug. Yohimbine has a mild anti-diuretic action, probably via stimulation of hypothalmic centers and release of posterior pituitary hormone.

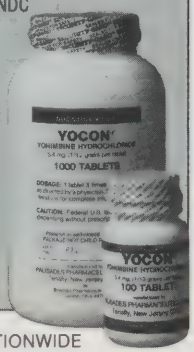
Reportedly, Yohimbine exerts no significant influence on cardiac stimulation and other effects mediated by B-adrenergic receptors, its effect on blood pressure, if any, would be to lower it; however no adequate studies are at hand to quantitate this effect in terms of Yohimbine dosage.

Indications: Yocon® is indicated as a sympathicolytic and mydriatric. It may have activity as an aphrodisiac.

Contraindications: Renal diseases, and patient's sensitive to the drug. In view of the limited and inadequate information at hand, no precise tabulation can be offered of additional contraindications.

Warning: Generally, this drug is not proposed for use in females and certainly must not be used during pregnancy. Neither is this drug proposed for use in pediatric, geriatric or cardio-renal patients with gastric or duodenal ulcer history. Nor should it be used in conjunction with mood-modifying drugs such as antidepressants, or in psychiatric patients in general.

Adverse Reactions: Yohimbine readily penetrates the (CNS) and produces a complex pattern of responses in lower doses than required to produce peripheral a-adrenergic blockade. These include, anti-diuresis, a general picture of central excitation including elevation of blood pressure and heart rate, increased motor activity, irritability and tremor. Sweating, nausea and vomiting are common after parenteral administration of the drug.[1,2] Also dizziness, headache, skin flushing reported when used orally.[1,3]



Dosage and Administration: Experimental dosage reported in treatment of erectile impotence.[1,3,4] 1 tablet (5.4 mg) 3 times a day, to adult males taken orally. Occasional side effects reported with this dosage are nausea, dizziness or nervousness. In the event of side effects dosage to be reduced to ½ tablet 3 times a day, followed by gradual increases to 1 tablet 3 times a day. Reported therapy not more than 10 weeks.[3]

How Supplied: Oral tablets of Yocon® 1/12 gr. 5.4 mg in bottles of 100's NDC 53159-001-01 and 1000's NDC 53159-001-10.

Women at the Top: Liability Insurance With Innovation

Maria T. Montesano
Assistant Managing Editor

Betty L. Cottle, MD

Sarah H. Lawhorne, JD

In light of Women in Medicine month, celebrated each September, PENNSYLVANIA MEDICINE takes a look at the two women at the helm of the State Society's Liability Insurance Company.

The Pennsylvania Medical Society Liability Insurance Company (PMSLIC) prides itself on leadership and innovation. In the medical profession, approximately 65 percent of those trained are men. Yet, two women of diverse backgrounds have been chosen to lead the doctor-run Society subsidiary offering liability coverage to more than 7,000 Pennsylvania physicians. Those women—Betty L. Cottle, MD, chairman of the board, and Sarah H. Lawhorne, JD, president and chief operating officer—along with a team of dedicated physicians and staff members, this year helped PMSLIC maintain its position as "the largest writer of individual physicians in the Commonwealth."

Dr. Cottle, a Hollidaysburg anethesiologist, became involved in PMSLIC in the early 1980s as a board member. At that time she was a member of the Society board who "saw the merits of the organization" and thought it served a purpose that she believed in. Today, as chairman of the board of PMSLIC, she wants to see the company "continue its tradition of excellence" and serve the changing needs of the physician: "We need to meet the challenges of changing medical practice, and protect physicians with insurance."

Dr. Cottle was born in St. Louis, Missouri, but moved to New York City at an early age. There she grew up and was educated, all along knowing she wanted to be a doctor. With the encouragement of her family, she pursued the field, but it was not an easy road for a woman during World War II: "Women were not that plentiful in the medical profession...there were a lot of problems in applying to medical school." Yet she persisted and was accepted to the New York University School of Medicine.

The ratio of male-to-female medical students at NYU at that time was approximately 32:1. According to Dr. Cottle, "It was lonesome and rough-going, but it was a wonderful experience." Remaining in New York for her residency, she chose anesthesiology as a specialty because it was the clinical application of the two sciences she most liked—pharmacology and physiology. She then went into private practice for 20 years in New York and held clinical teaching jobs. Of teaching, she says, "If you really believe the Hippocratic Oath, you really have to believe that you owe something back to the profession."

Dr. Cottle is a long-time leader of organized medicine. Her involvement began in 1952, when she joined the Kings County and New York Medical Societies, and the American Medical Association. Upon moving to Pennsylvania in 1970 with her husband and three children, she joined the Blair County Medical Society (BCMS) "to get to know the doctors in the town and to continue my relationship with organized medicine." Soon after joining, she was named BCMS secretary, and since then has held several positions, including membership on various State Society councils and committees, and as a delegate to the Society and the AMA. As for the nine years spent on the Pennsylvania Medical Society Board of Trustees, she says, "I enjoyed it. I enjoyed being able to participate in the process of the politics of medicine."

Dr. Cottle was appointed chairman of the PMSLIC board in April 1989. Her commitment to the company stems from her faith in it: "PMSLIC helps a physician in crisis—protects the physician, educates the physician, and upholds the high standards of medical practice. We will defend any doctor who practices good medicine." Lawhorne concurs, "What PMSLIC is trying to do is defend a doctor's right to a day in court, particularly when their medicine was right."

Lawhorne joined the company as secretary and general counsel in November 1980, was made a vice president in April 1990, and named president in September 1991, when PMSLIC's first president, John

Smither, retired. Originally from Delaware County, she graduated from Kalamazoo College, Michigan, with a degree in psychology. Hailing from a law family—her father is a lawyer, and her mother worked in the juvenile courts—she received her Juris Doctor from Hastings School of Law in San Francisco.

After law school, she returned to Pennsylvania to practice in her father's firm "just long enough to argue a murder case appeal to the Pennsylvania Supreme Court," she says. Feeling she was "riding" on her father's accomplishments, she started looking for other work and became assistant attorney general with the state's Medical CAT Fund. A year later, she was hired away from the fund by PMSLIC.

Of her commitment to the company, she says, "I did not go to law school to enter the business world. The fact that I've stayed at PMSLIC since 1980 is reflective of a couple of things—it's an insurance company with integrity, and what PMSLIC is trying to do makes sense to me."

She also credits the principle to defend doctors' rights and reform the system from within for her continued commitment: "John Smither, Dave Masland [past chairman of the board], and then Betty Cottle created an environment here that never got jaded...We have an extremely high level of awareness of our goal throughout the entire employee population." Such an awareness has helped Lawhorne encourage a sense of teamwork among employees in her first year as president.

"I have learned this past year that we have a superlative staff," she says. "As a colleague, I just saw the staff as how I related to them as legal counsel...But in the new position, I see them in their full light, and I am really impressed by the people we have." Lawhorne adds, "I think there's an on-going benefit to the fact that John [Smither] purposely hired people who didn't have medical malpractice insurance backgrounds. He didn't want to do things the way they had always been done...didn't want to be bound by the old patterns. I see that now, even though we've become quite expert and respected, there's still that creative edge; we all remember why we're here."

Under Lawhorne's direction, PMSLIC is implementing a new planning process: "We are breaking down departmental views, and we're looking at how we can do things better and where we want to be." But, she says, that doesn't discount where PMSLIC has come from. "We have stability and expertise, and it's having physician input and guidance—a physician board, a physician claims committee, access to the State Society—that really differentiates us in terms of what our product is."

Physician Claims Committee

In 1991, PMSLIC reviewed 1,056 medical malpractice claims. Of that number, 653 "smaller" cases were reviewed by individual PMSLIC board members or independent consultants. However, the other 403 claims required more intensive review due to their complexity and "more catastrophic nature." Enter the PMSLIC Claims Committee.

Eight physicians on PMSLIC's Board of Directors are assigned to the committee annually. According to Fred C. Thistle, vice president of claims at PMSLIC, the committee consists of members of several specialties and generally meets once a month to review, on the average, 25 cases. "There is a summary sheet for each case which gives a synopsis of the allegations, medical issues, and legal issues; and explains where the case is pending, who the plaintiff attorney is, who the defense attorney is, what the demand on the case is in terms of money, and so forth. This is accompanied by copies of medical records, test results, correspondence from defense expert counsel, and information about the insured's view of the case. The job of the Claims Committee," he continues, "is to analyze the information and make a decision as to whether each case is one to settle or defend. The review may be a one-shot procedure, or it may involve more than one review."

The review process contains extensive physician-communication measures; and for physicians who may disagree with the committee's decision, there is an appeals process. A PMSLIC-insured physician may be requested, or may request, to attend a Claims Committee meeting to present his or her position. If a lack of agreement still exists, the matter is referred to the Pennsylvania Medical Society Professional Liability Insurance Appeals Committee (PLIAC), which exists for the purpose of resolving disputes between PMSLIC and its policyholders. The decision of PLIAC is final and binding on both parties.

According to Thistle, "Only 19 claim disputes have been submitted to PLIAC in our entire history of nearly 15 years." That statistic, he notes, is significant. "In all other instances, we have been able to resolve any potential disagreement at the Claims Committee level." He also says that although the Claims Committee's initial directive was to make decisions based solely

"What PMSLIC is trying to do is defend a doctor's right to a day in court, particularly when their medicine was right."

— Sarah H. Lawhorne, JD

on the acceptability of the medicine practiced, the review process has evolved into a much more sophisticated one which takes into account *all* aspects of each case.

"Doctors who serve on the PMSLIC Claims Committee have developed a keen sense of what constitutes negligence, whether there is causation, and what the likelihood is of winning at trial," according to Thistle. "Best of all is that in over 90 percent of the cases, the Claims Committee's decision to settle or defend is right on target with the ultimate disposition." Lawhorne says the Claims Committee process is one of the benefits of being a PMSLIC insured: "Medical professionals sit and talk about each case. That's just not done anywhere else. Giving physicians the opportunity to be reviewed by and to meet with peers to discuss their medicine in a non-hostile, non-confrontational environment is an immeasurable benefit."

An Innovative Project to Support Risk Management

PMSLIC is currently receiving national and international attention for its involvement in the Physicians Insurers Association of America (PIAA) data-sharing project. PIAA, organized in 1977, is a national association of 44 physician-owned or physician-directed medical professional liability insurance companies.

PIAA's data-sharing project was developed to provide member companies with current and credible statistics about medical malpractice claims to be used in risk-management programs. As data manager for the effort, PMSLIC is responsible for compiling and reporting information on the more than 83,000 claims received from 20 PIAA companies since 1985. Among the data collected is causation information; expense and indemnity payment amounts; claim severity; and demographic features pertaining to policyholders, claimants, and institutions.

Asked to explain the benefit of such information, Lori Bartholomew, PMSLIC's acting director of governmental relations and research, says, "Basically, the information is broken down by specialty group, so physicians can see what claims are causing problems for their specialty, at what expense, and which are costing the most money. Doctors can use the information as a guideline, especially in large-group practices, to see what claims they might expect to have indexed against them...It's a risk-management tool."

PMSLIC President Sarah H. Lawhorne feels the information is "very useful," providing statistical support for that which could only be assumed before. And Chairman of the Board Betty L. Cottle, MD, says the data "helps physicians develop an understanding of where they need to look at themselves critically...so they will know where the pitfalls are, where things are happening, where they need to pay attention, where they need to change their ways, where they need to beware."

The reports are updated semiannually and provided to the member companies participating in the project and to subscribers. The latest update, released in July and reporting information through December 31, 1991, "includes enhancements to make it easier to read and more useful for physicians," according to Bartholomew. Though outbranch reports on breast, colon, and lung cancer have been released in the past two years, only one full report has been available to date. For the future, however, Batholomew says PIAA is considering specialty-specific packets to make the information even more useful, accessible, and affordable for more people.

For additional information about the PIAA data-sharing project, call PMSLIC at 1-800-445-1212.

The 1992 Member-Get-A-Member Program

The Champions of the Profession

Just as tall buildings are made a brick at a time, so strong organizations are built by individual members. Special thanks to each of these "builders" for the contribution each has made to the American Medical Association and to the profession we all serve. As physicians who answered our call to volunteer their time and their service to increase AMA membership, they are the champions of our profession.

Understanding Durable Powers of Attoney

Susan M. Weber, Esq.

Many physicians will encounter the use of durable powers of attorney in their medical practices as patients become more informed and more prepared for end-of-life decisions. Be aware, however, that these documents vary in the authority they grant the holder, and that they differ significantly from living wills.

The Patient Self-Determination Act, a federal law which became effective December 1991, requires hospitals and other institutional health care providers to supply adult individuals with information concerning their rights under state law to accept or refuse medical treatment. Under that mandate, facilities must provide a description of state law with respect to advance directives. (For an in-depth discussion of the federal law, refer to "Implementation of Self-Determination Act Begins," PENNSYLVANIA MEDICINE, November 1991.) The class of "advance directives" includes living wills, durable powers of attorney for health care, and hybrid documents which include both.

Living wills were discussed in detail in the June 1992 issue of PENNSYLVANIA MEDICINE. This article will explain the durable power of attorney for health care and its implications for medical practice.

A power of attorney is a legal document in which a person (the "principal") nominates another individual to act in his or her stead and make decisions for him or her (the "attorney-in-fact"; for simplicity, shall be referred to as "agent"). The decisions of the agent are treated as if they had been made by the principal. The principal may confer a general power of attorney, but Pennsylvania statutes limit the agent's ability to make certain specific decisions by the powers granted in the document.

For example, if the instrument grants the powers to buy or sell stocks and to make financial gifts but not to create a trust, the agent may not create a trust, but may sell stocks if he or she deems it proper to do so. Similarly, if the power of attorney does not grant certain specific medical powers, the appointment of the agent is not effective as to medical decision-making.

The Pennsylvania statute sets forth the language that must be used in order to grant the agent the appropriate authority for medical decisions. That law permits the principal to authorize the agent to: admit the principal to hospitals, nursing homes, or similar residential facilities; enter into agreements for the care of the principal; arrange and contract for nursing care; and arrange for and consent to medical treatment, including surgery and the administration of drugs.

The statute does not explicitly permit the agent to refuse, reject, approve, or withhold treatment. Pennsylvania appellate courts have not yet addressed this issue. Some attorneys argue that implicit in the power to consent to treatment is the power to refuse or reject treatment. Others believe that since no case law has been reported which would lend credence to this position—and the legislature chose not to include the power to refuse or withdraw treatment in the statute—individuals may not grant that authority to agents. Suffice it to say that the legal community is divided, and the issue is still under debate.

A power of attorney will not survive the incapacity of the principal unless the document specifies that the principal intended its survival. Typically, the document will contain words similar to "this power of attorney shall not be affected by my subsequent disability or incapacity." The principal may indicate that the power will only become activated if he or she should become incapacitated by the use of a phrase similar to "this power of attorney shall become effective upon my incapacity." Without words showing that the powers are to extend beyond incapacity of the principal, the power of attorney is not considered "durable"; the agent, in reality, has no authority to render decisions after the principal's incapacity.

In a situation in which the agent who holds a non-durable power of attorney at-

"Some attorneys argue that implicit in the power to consent to treatment is the power to refuse or reject treatment."

Ms. Weber is assistant general counsel for the Pennsylvania Medical Society.

tempts to make health care decisions for an incapacitated patient, the physician involved should consult an attorney. It may in fact be appropriate for this person to make necessary decisions. For example, the person who holds the power of attorney may also be the patient's next of kin, who would normally make decisions in the absence of a legal document granting that authority to another person.

Complicating the issue, Act 24 of 1992, in addition to enacting Pennsylvania's living will law, amended the state's guardianship statute. Under previous law, when a person was found by a court to be "incompetent," a guardian was appointed who would make all decisions for the incompetent person. The amendments, however, provide for varying levels of "incapacity" and require participation of the incapacitated person to the maximum extent possible in all decisions in which he or she is able to participate.

Thus, a person may be incapacitated for some purposes and not others. A court may appoint a guardian to handle the incapacitated person's finances, but not his or her health care decisions. Even when a guardian has been appointed for health care, the guardian must encourage participation in decisions to the extent the incapacitated person is able.

Durable power of attorney vs. living will

While both are considered types of advance directives, a durable power of attorney differs from and is not interchangeable with a living will.

A living will is used to inform health care providers about the medical treatment which the individual desires or wishes to avoid at the end of life. It is applicable only in narrowly drawn circumstances, generally when a person becomes incompetent and either terminally ill or permanently unconscious. A living will may also be utilized to appoint a proxy or surrogate decision maker, but the proxy may only make medical decisions and may make them only after the living will has become operative, that is, after a physician determines that the patient is incompetent and either terminally ill or permanently unconscious.

A durable power of attorney, by contrast, merely appoints an agent to make decisions for the principal and can be activated whenever a person becomes incapacitated. For example, an agent may make decisions during the time the principal is under anesthesia if any medical decisions arise. Of course, the power of attorney must first grant medical decision-making authority to the agent. And unlike the living will, the durable power of attorney does not offer any guidance to the agent with respect to the decisions he or she is expected to make.

Legislative update

The Pennsylvania Bar Association (PBA) has approved and will be seeking amendments to Pennsylvania's Power of Attorney Statute which would specifically relate to health care powers of attorney. Proposed amendments address such issues as:

- The scope of power that can be granted to an agent.
- How and by whom is a principal's incapacity to make medical decisions determined.
- Criteria an agent should use in making a health care decision.
- How health care powers of attorney are revoked.
- Whether a physician or health care provider can, on grounds of conscience, refuse to follow instructions that are contained in a health care power of attorney or given to an agent.

PBA intends to introduce these and other health care durable power of attorney amendments to the Senate this fall.

"Physicians, be aware"

As patients become more knowledgeable about their choices in health care decisions, and they choose to use durable powers of attorney more frequently in the coming years, physicians need to be aware that not all powers of attorney are equal. Routinely inspect powers of attorney with which you are presented, for language granting medical decision-making powers as well as that which makes the powers "durable" beyond a patient's incapacity.

"...physicians need to be aware that not all powers of attorney are equal."

PAMPAC SURVEYS LEGISLATIVE CANDIDATES

In June, the Pennsylvania Medical Political Action Committee (PaMPAC), with the technical assistance of The Educational and Scientific Trust of the Pennsylvania Medical Society, conducted a survey of federal and state legislative candidates on their views on medical issues. The survey was conducted under the guidelines of a resolution adopted by the Society's House of Delegates in 1990. This is the first survey of candidates' opinions for the Pennsylvania Medical Society.

Federal candidates and state candidates received separate surveys. Each questionnaire listed eight policy statements. For each statement, the candidate was asked to mark a response of Strongly Agree, Agree, Disagree, Strongly Disagree, or No Opinion. Those candidates who did not respond by June 30, 1992, received a second survey. The specific policy statements and the views of the 250 respondents are printed on the following pages.

There were several candidates who courteously responded by indicating that it is their personal policy not to respond to these types of surveys. Most cited the large number of surveys which they receive. Those individuals are:

Federal:
Bill Clinger - 5th District
Curt Weldon - 7th District

State Senate:
Vincent J. Fumo - 1st District
Richard A. Tilghman - 17th District

State House:
Ron Brandon - 11th District
David J. Mayernik - 29th District
Lynn B. Herman - 77th District
Richard A. Geist - 79th District
Patricia H. Vance - 87th District
Ellen A. Harley - 149th District
Joseph R. Pitts - 158th District
Nicholas A. Micozzie - 163rd District
William W. Rieger - 179th District

If a candidate did not return a survey, there is no listing under the appropriate legislative district.

PaMPAC also received three questionnaires without names to identify the candidate.

Interviews with U.S. senatorial candidates Arlen Specter and Lynn Yeakel had been planned for the summer. Interview highlights are scheduled to be published in the October issue of PENNSYLVANIA MEDICINE.

FAST FACTS:
1992 General Election

Federal - President*
Vice President*
1 U.S. Senator*
21 U.S. Representatives

State - 25 State Senators
203 State Representatives
Attorney General*
Auditor General*
Treasurer*

Last Day to Register to Vote with County Election Bureaus - October 5, 1992.

Federal Legislative Candidates

KEY

SA - Strongly Agree **A** - Agree **SD** - Strongly Disagree **D** - Disagree **NO** - No Opinion **NR** - No Response

Federal District	Candidate * Indicates Incumbent	1. Pennsylvania physicians should be granted an exemption from the federal Clinical Laboratory Improvement Act, 1988, because Pennsylvania regulations are as stringent as federal regulations.	2. The new RBRVS Medicare physician payment system should be fully implemented without further Medicare payment restrictions.	3. Medicare reimbursement mechanisms should not be expanded into the private sector.	4. The Medicare Physician Regulatory Relief Amendments of 1991 (H.R. 2695, S. 1332) should be adopted as they would greatly reduce the administrative burden of the practice of medicine.	5. As the state's Medicare carrier, Pennsylvania Blue Shield should be required to reevaluate in-state locality designations as part of Medicare payment reform.	6. Separate physician reimbursement for the professional component of EKG analysis should be restored.	7. Medical liability reform could be a prominent factor in containing health care costs.	8. Physicians should be allowed to test patients for HIV, maintaining their privacy but without explicit consent, when a health care worker has been placed at risk by exposure to body fluids.

State Representative Candidates (cont.)

KEY

SA - Strongly Agree
A - Agree
SD - Strongly Disagree
D - Disagree
NO - No Opinion
NR - No Response

State House District	Candidate * Indicates Incumbent	1. Medical liability reform could be a prominent factor in containing health care costs.	2. The Certificate of Need process should be abandoned and the health care community should be permitted to operate as a free market.	3. The Health Care Cost Containment Council is unable to appropriately measure quality of care.	4. Linking any third party reimbursement other than care of the elderly to Medicare rates is inappropriate and unfair to physicians.	5. Reimbursing physicians for workers' compensation claims at a rate permanently tied to Medicare rates will eventually lead to a reduction in access to appropriate health care for injured workers.	6. Physicians should have the right to conduct HIV testing at their discretion, without obtaining a patient's consent.	7. A physician's decision to treat or not treat indigent patients should in no way be linked to licensure.	8. A thorough legislative review should occur before any professional health care group's licensed scope of care is expanded.

ON THE LEGISLATIVE CALENDAR THIS FALL

Several medical issues are likely to appear on the legislative calendar when the Senate and House reconvene on September 21 in Harrisburg. Among the most important issues affecting medicine are workers' compensation; indigent care; supplemental funding for private medical schools; and the generic drug reimbursement policy of PACE, the lottery's prescription drug program.

The following is an update of the issues and the Society's position on each.

Workers' compensation

Legislation revising the Commonwealth's workers' compensation law was again amended by the Senate and is now pending before the House. The Senate, in a rare procedural move, chose not to insist on previous Senate amendments to House Bill 2140 (Workers' Compensation Act).

The new amendments, offered by Senators Roger A. Madigan (R-Bradford) and Robert J. Mellow (D-Lackawanna), varied from the previously passed version in the following areas:

- removal of language stipulating ownership of coordinated care organizations (CCOs);
- sunset of the fraud provisions on January 31, 1995;
- clarification of language denying a 52 percent rate increase request and the file-and-use system for rate filings; and
- request of prior approval of future lost cost filings.

During discussions which led to the revised Madigan/Mellow amendments, there was a significant attempt to further limit medical costs, but Senators Madigan and Mellow said they could not support additional cuts and refused to consider further changes. Thus, the basic medical language was untouched. As it stands now, the bill would:

- provide for reimbursement for the remainder of 1992 for health care providers the lesser of 120 percent of the appropriate Medicare payment or the provider's usual customary and reasonable fee, or 80 percent of the usual customary and reasonable fee of like providers where no Medicare allowance exists;
- provide that on January 1, 1993, and annually thereafter, allowances would be updated by the percentage change in statewide average weekly wage;
- permit employers or insurers to negotiate different fees with certain providers;
- require the labor secretary to hire a consultant to perform an annual accessibility study of medical care under workers' compensation;
- require payment allowance to be reviewed when it is more than 10 percent less than the average payment by a coordinated care organization;
- permit formation of coordinated care organizations (CCOs), and allow one or more CCOs to be included on the list of providers posted by an employer;
- lock an employee in for up to 45 days of initial visit to one of the listed providers;
- provide exemption from Medicare limits for trauma and burn services performed in designated facilities; and
- provide for use of utilization review organizations for review of reasonableness or necessity of services with employer paying the cost of initial review and the party requesting reconsideration paying, subject to reimbursement if successful.

If the House considers House Bill 2140 when they return, the Society will call for a vote to concur with the Senate amendments, thus approving the bill in its current form (Printer's Number 3913). While the Society dislikes the tie to Medicare, it is only temporary under the current language.

Any major revisions could lead to further attempts to remove the allowance update which, in the long run, would be less beneficial for physicians and their patients. In the meantime, the Society will continue to pursue other initiatives to achieve improvements to the workers' compensation system.

Indigent care

As House Bill 20, introduced by Representative Allen G. Kukovich (D-Westmoreland), passed the House in December, the Society worked successfully to remove language tying licensure and medical staff privileges to mandated Medicaid participation. The Society then offered an amendment to revise remaining language of concern and participated in meetings called by Senator John E. Peterson (R-Venango) to revise the bill before it was considered.

House Bill 20 is now in the Senate Appropriations Committee, and the language requested by the State Society has been amended into the bill. A conference committee is likely to resolve differences between the House and Senate versions of the bill if new language proposed by Democratic legislators is not acceptable.

Supplemental funding for private medical schools

The vehicle for this year's General Appropriation Budget Act, House Bill 1320, was signed by the governor on June 30, at which time he "line-item vetoed" 45 items. Among those items maintained was the governor's 3.5 percent cut for medical schools at Pittsburgh, Penn State, and Temple. However, the legislature rejected an additional 3.5 percent cut in current funds.

At this time, legislation providing funds for private institutions, including medical schools, has not been passed for the 1992-93 fiscal year. The Society supports supplemental funding and will continue to work for such legislation.

Generic drug reimbursement policy

House Bill 2442 originally required that senior citizens participating in the PACE program automatically be given generic drugs, when suitable. As approved by a vote of 187-8 in the House, the bill now includes language permitting payment for non-generic drugs when the patient has an allergic reaction.

The Senate also approved new language allowing physicians to prescribe brand-name drugs by writing "brand necessary" or "brand medically necessary" on the prescription. The Senate, prior to June recess, passed the bill 45-3. Supported by the Society, the bill now faces a concurrence vote in the House on the Senate amendments.

The Society will continue to update members on movement of these issues and others after the legislature convenes this month.

Donald N. McCoy, the Society's director of regulatory affairs and specialty legislation, contributed to this page.

HCFA TAKES ON "HASSLE FACTOR"

The Health Care Financing Administration (HCFA) has released an advisory report making recommendations to reduce administrative burdens on physicians. The report, published by an advisory panel on Medicare-physician relationships, addressed the administrative "hassles" that physicians deal with in working with the Medicare program.

The panel included HCFA's senior medical advisor, Nancy E. Gary, MD, and seven practicing physicians from various disciplines. Secretary of Health and Human Services Louis W. Sullivan, MD, formed the panel in 1991 in response to complaints by providers that Medicare's administrative workload had become too great, adding unduly to office overhead costs and interfering with the relationship between physicians and their patients.

The panel recommended that Medicare carriers set up physician advisory committees to consider physician concerns about Medicare. These committees will be composed of medical directors of state medical associations, physicians who treat Medicare patients, and Medicare beneficiaries.

The report also expressed concerns about the peer review process. HCFA has developed a new strategy—the Health Care Quality Improvement Initiative—which will move the peer review organization (PRO) program from its emphasis on individual clinical errors to helping providers improve the mainstream of medical care. Under this new initiative, PROs will shift their focus from individual case review to analysis of patterns of medical care and outcomes, using an educational rather than punitive approach.

The panel also recommended that HCFA review the language used on the Explanation of Medicare Benefits form to ensure that it is easily understood and presented in a neutral tone. This process has been underway for some time within HCFA. Other recommendations included coordinating quality review of physician and hospital services, re-evaluating medical review procedures, and taking further steps to improve communications between physicians and carriers.

For a copy of the report, call the HCFA Philadelphia Regional Office at (215) 596-1351.

Diane C. Moskal
Acting Regional Administrator, HCFA Philadelphia

PHYSICIANS ADVISED ABOUT MA PROCEDURES

Editor's Note: The Pennsylvania Department of Public Welfare (DPW) has supplied the following information about Medical Assistance (MA) procedures affecting physicians and patients.

Automated admission certification

DPW implemented an Automated Admission Certification Process effective August 1, 1992. This process will automate the Diagnosis Related Group (DRG) review process for urgent and emergency admissions, and the Concurrent Hospital Review (CHR) process for all admissions to hospitals and units excluded from the DRG payment system. This change merged these two processes with the already automated Place of Service Review (PSR) Program for elective admissions to acute care hospitals, free-standing ambulatory surgical centers, and hospital short procedure units.

Prior to the Automated Certification Process, hospitals were required to submit a Hospital Admission DRG/CHR Certification (MA 87) form to DPW for urgent and emergency admissions and for all admissions to CHR facilities. Under the previous process, the patient may have already been discharged before the admission was reviewed by the department, placing the provider at risk of providing services with no commitment for payment from DPW.

Effective August 1, *facilities must call* DPW to certify all urgent or emergency admissions of MA recipients under the prospective payment system (provider types 06, 08, and 11), and all admissions of MA recipients to cost-reimbursed (CHR) hospitals and units (provider types 12, 13, and 53). Hospitals must contact DPW within two working days of the admission to the facility. A nurse reviewer obtains the information and issues a Hospital Admission DRG/CHR Certification Notice which will be sent to both the facility and the *attending practitioner*. The notice will include the department's decision on certification, and if approved, the 10-digit certification number.

For admissions on or after August 1, physicians and podiatrists are required to enter the 10-digit admission certification number in item 43 of the Physician's Invoice or Medical Services/Supplies Invoice (MA 319/MA 319C) for all primary care services provided to medical assistance recipients. The admission certification number is required when billing for types of service 20—Surgical, 25—Surgical Diagnostic, 60—Medical, 70—Pshyciatric, and 30—Obstetrical. The admission certification number is not required for consultations or other ancillary services.

Urgent or emergency admissions will continue to require that the emergency indicator "1", or the urgent indicator "2", be entered in items 29F, 30F, 31F, and/or 32F of the MA 319/319C invoice in addition to the admission certification number in item 43 of the invoice. Physicians are reminded that the facility is responsible for contacting DPW to have an admission certification number generated for urgent or emergency admissions or for all admissions to cost-reimbursed hospitals. The physician or podiatrist *cannot* call for an admission certification number in these instances.

The PSR process for elective admissions to acute care hospitals, free-standing ambulatory surgical centers, and hospital short procedure units remains unchanged. The attending practitioner still has the primary responsibility to initiate PSR requests. However, requests can be initiated by either the attending practitioner or the facility.

An Admission Certification Section will be issued for provider handbooks in the near future. In the meantime, information about certification can be found in the MA bulletin, "Automated Admission Certification," issued effective August 1, 1992.

Physicians should direct any questions to DPW at 1-800-537-8862.

Outpatient billing

Chapter 1101, Section 1101.63(b) (7), relating to co-payment for MA services, states that no provider may waive the co-payment requirement or in any way compensate the recipient for the co-payment amount.

If the recipient does not pay the co-payment, the provider *must* enter *visit code 11*, co-pay not collected, in the applicable visit code item of the invoice. Otherwise, DPW will have incorrect or incomplete data on which to base its co-pay rebate process. This will result in DPW issuing a co-pay rebate check to a recipient who had not paid the co-pay in the first place.

MA forms

DPW reminds providers that maintaining an adequate supply of MA forms will help ensure that providers can bill the department promptly for services rendered to MA patients. It also ensures that any special services required by the patient through the Prior Authorization or Administrative Waiver processes can be requested promptly.

The Medical Services/Supplies Prior Authorization Request (MA 97) is required for a provider to prescribe a service or item which requires prior authorization, and the 1150 Administrative Waiver Request (MA 325) form is used to request the department to consider payment for items or services not on the MA Fee Schedule.

All MA forms are ordered using the MA Provider Order Form (MA 300X). Although MA 325 is not listed on the current MA 300X, these forms may be ordered from the forms contractor in packs of 25. To order forms, complete the MA 300X and send it to DPW MA Forms Contractor, P.O. Box 717, Mechanicsburg, PA 17055.

For more detail on forms reordering, see the General Information Section of the *Physicians' Services Handbook*. Become familiar with this section and make sure an adequate forms supply is always on hand, even of seldom-used forms. Direct questions about reordering to the Division of Outpatient Programs, P.O. Box 8046, Harrisburg, PA 17105.

AHCPR PUBLISHES FIRST THREE PARAMETERS

The Agency for Health Care Policy and Research (AHCPR), U.S. Public Health Service, has published three clinical practice guidelines, also known as practice parameters. The guidelines include information of proven clinical value relating to *Acute Pain Management; Urinary Incontinence in Adults;* and *Prediction, Prevention, and Early Intervention of Pressure Ulcers*.

The parameters are the first in a series of such documents which cover a wide variety of medical topics. They are designed to give physicians scientifically validated information which can positively affect patient outcomes. Some highlights:

- Standard practice for pain control may fail to relieve pain in about half of post-operative patients.
- Unrelieved pain or trauma can delay recovery.
- When pain is controlled, patients tend to be discharged from hospitals earlier and may have fewer chronic problems, such as phantom limb pain after amputations.
- Most cases of urinary incontinence can be significantly improved or cured, yet half of those affected never seek medical help.
- Most pressure ulcers can be prevented with careful attention to patient risk factors.

Guidelines are developed by private panels of recognized experts representing a broad spectrum of physician/specialties and other health care professionals; panels also include representation by patients/consumers. A total of 16 topics have been identified for guideline development.

The parameters are published in three formats, including a clinicians' version, a quick-reference guide for health professionals, and a patient/consumer pamphlet (also available in Spanish) suitable for distribution by hospitals or physicians' waiting rooms.

All guidelines are available without charge from: AHCPR Publications Clearinghouse, P.O. Box 8547, Silver Spring, MD 20907.

HCFA and the Political Scene

Donald E. Harrop, MD

Will the fact that this is a presidential election year affect the philosophy and direction of the Health Care Financing Administration as it relates to health care financing in general and the peer review organization program in particular? Perhaps.

Some people seem to think that if a particular presidential candidate is elected in November, they can expect to see some dramatic changes in the U.S. health care system—changes which will be beneficial to themselves and the nation as a whole. I'm not sure it will be that simple.

We have to keep in mind that the overwhelming majority of the people who administer the financing and oversight of programs such as Medicare, Medicaid, Maternal and Child Health, etc., are federal employees—career bureaucrats who are not responsible to any political party. Of course, the heads of the various departments and agencies, such as the secretary of Health and Human Services, are usually political appointees who often have specific agendas. But even then, changes in direction do not occur overnight.

Changes in the appointments, however, do occur quite often, some by choice and some by political pressure. For example, in just the last few years, we have seen several different administrators of the Health Care Financing Administration (HCFA), from William Roper to Gail Wilensky to now Acting Administrator William Toby.

Dr. Harrop is president of the Keystone Peer Review Organization.

Recently, there have also been a number of changes in other top management positions within HCFA, especially those directly involved with the PRO program. This type of musical chairs does not usually allow for quick and easy implementation of new policies.

Meanwhile, the career federal bureaucrats go along doing things mostly their way. Even Congressional mandates are not always carried out in accordance with the intent of the lawmakers and sometimes are not carried out at all. For example, PRO denials for substandard care, required by the Omnibus Budget Reconciliation Act (OBRA) of 1985, were never implemented and probably never will be.

PROs will implement the Fourth Scope of Work during 1993, with some significant changes scheduled for the overall structure of the program regardless of whom is elected. HCFA has proposed the formation of Clinical Data Abstraction Centers (CDACs) which would do the abstraction of medical records using the Uniform Clinical Data Set (UCDS). Cases that fail the UCDS screens would be returned to the PRO for traditional review. Another important shift in operating philosophy will reduce emphasis on individual case review in favor of analysis of trends.

The one major change which could occur as a direct result of the presidential election would, of course, be the development of a national health insurance program. Every candidate has expressed concern over the costs of health care and the need for insurance coverage for all citizens. A sound method of financing any of the proposed solutions to the problem has yet to be offered. Therefore, although I believe we will eventually have a national program of some type, I doubt that it will be enacted during the tenure of the president who is elected in the fall of 1992.

As I see it, there will be one constant: the move toward managed care which the present administration and many government officials perceive to be a viable approach to cost control. I certainly hope they also consider the necessity for controlling and assuring quality of care.

QUARTERLY REPORTS FROM KEPRO OVERSEERS

The House of Delegates, through Resolution 86-44 (Amended), has mandated the Society to provide regular reports on Keystone Peer Review Organization (KePRO) findings. The following report from the Ad Hoc Committee on KePRO Oversight covers the period April 1 through June 30, 1992. It shows the number of Medicare discharges, cases reviewed by KePRO physician reviewers, pending denials issued, final denials issued, and DRG changes made by KePRO.

KePRO Data for All Pennsylvania Hospitals—04/01/92 - 06/30/92

Medicare Discharges	*169,832	DRG Changes	1,484
Cases Reviewed	41,082	PPS Hospitals Under IR	0
Admission Denials	685	Generic Screen Failures	34,279
Adminstrative Denials	212	Pending Quality Problems	6,546
Total Denials	897	Confirmed Quality Problems	452

** Reflects total discharges received by KePRO for the reporting quarter.*

One to One.

One to One is a series that invites physicians to ask questions about Pennsylvania Blue Shield.

We've designed *One to One* to be another open line of communications between physicians and Blue Shield. Our goal is to give you the opportunity to ask questions — and to give us the chance to provide physicians with information about both our Private Business and Medicare operations.

Your questions will be addressed by Joseph A. Ricci, M.D., Blue Shield's Vice President of Medical Affairs. If you have a question, please write Dr. Ricci at Pennsylvania Blue Shield, P.O. Box 890089, Camp Hill, PA 17089.

What is Medicare's PAL process?

PAL is the acronym for Provider Audit List. The PAL process is one of Medicare's methods of reducing misreported services on claim forms and reflects each carrier's responsibility to protect the fiscal integrity of the Medicare program.

This process identifies providers whose practice patterns indicate the potential for misreported, over-utilized or misutilized services. The PAL process compares a provider's practice patterns to his peers and when necessary, educates the provider and his office staff about any claims reporting mistakes they are making.

The Health Care Financing Administration (HCFA), the federal agency that administers Medicare, requires all of its carriers to conduct five PAL audits for every 1,000 active Medicare providers for whom it provides reimbursement for medical services. Pennsylvania Blue Shield is the Medicare Part B carrier for Pennsylvania, New Jersey, Delaware and the Washington, D.C. metropolitan area. With 56,160 active Medicare providers in this region, Blue Shield is carrying out 281 audits during 1992.

How are the providers chosen for the PAL?

If you have been slated for a PAL audit, Blue Shield picked you after reviewing your practice patterns and the amount of reimbursement you receive from Medicare. The practice patterns are compared to other providers in your specialty, who practice in the same geographic region. If you have a higher than normal rate of utilization for one or more procedures, then Blue Shield will take a closer look at this utilization through an audit.

When Blue Shield decides to audit your practice, the Company is merely searching for reasons why these abnormal swings in utilization have occurred. In doing so, we make every effort to examine all the facts that pertain to the case, to ensure a fair audit.

And, although we routinely request refunds from providers who have received over-payments due to the misreporting of services, the main thrust of a PAL audit is educational. Blue Shield wants providers and their office staffs to be aware of what services are eligible under Medicare and what reimbursements they can expect.

How is the audit conducted?

Blue Shield notifies you that it is planning an audit and asks for patient records that pertain to the potential problem. In most cases, the review focuses on specific services or procedures.

Many times we can resolve the issue simply by examining the patient records. If further data is needed, however, it will be collected and then reviewed by one of Blue Shield's Professional Consultants. These consultants are active practitioners in the same specialty as the provider under review.

Then, based on a review of the data collected and the consultant's recommendations, Blue Shield determines what, if any, action should be taken.

Do you have any suggestions for providers who may be audited?

Yes, please remember that this process was not designed to "hassle" physicians. Our goals are to educate providers and their office staffs on proper billing procedures and to ensure that Medicare funds are used properly — and only for medically necessary services.

Also, in order to protect yourself and to make sure that any review or audit can be conducted easily, you should keep complete, explicit notes on every procedure or service you perform. Well-documented records clearly detail each medical visit. They also allow reviews to go smoothly — irrespective of the reviewing entity.

Pennsylvania BlueShield

The right information. Right away.

COMMISSION APPROVES PUBLIC HEALTH PLAN

The Commission on Public Health, at its June 18 meeting, approved a public health plan for the State Society. This is the Society's first attempt to create a plan to guide its efforts in the public health arena.

The plan was created in response to recommendations made by Robert N. Moyers, MD, Society president, in a speech to the 1991 House of Delegates. He suggested four planning phases: 1) focus on education and community based programs, and maternal and infant health; 2) identify ways in which the Society can help to solve a number of public health problems; 3) develop the Society's plan of attack; and 4) build a coalition to help with implementation.

The commission's plan addresses the first two phases of the process outlined by Dr. Moyers by identifying priorities—education and community based programs, maternal and infant health, tobacco usage, alcohol and drug abuse, violent and abusive behavior, unintentional injuries, HIV, and environmental health—and outlining general actions which the Society could undertake.

The plan was presented to the Society's Council on Education and Science in August, and, assuming approval, will move to the Board of Trustees and House of Delegates for review and consideration. If both these groups accept the plan, the commission will then begin work on phases three and four.

PACE EXPANDS ProDUR PROCESS

The Pennsylvania Department of Aging, on August 16, 1992, extended its PACE Prospective Drug Utilization Review (ProDUR) to H_2-Receptor Antagonists and Nonsteroidal Anti-Inflammatory medications. Until August, the process, operational since February, had only been used for Halcion.

The State Society had previously expressed serious concerns with the expansion proposal, some of which were addressed by the following changes made to ProDUR in August:

- The criteria implemented are somewhat less stringent than those originally proposed.
- While the override mechanism has not yet been fully defined, a "Dear Physician" letter—dated July 17, 1992, and explaining the changes—contained a toll-free phone number for use by physicians and pharmacists when exceptional circumstances exist.
- One of the Society's nominess has been selected to PACE's Pharmacy and Therapeutics (P&T) Committee.

Though encouraged by the changes, Society representatives will continue to talk with the department about the adverse impact of ProDUR on medical practice. Physicians encountering problems with the process should call the Society's Department of Education and Science at 1-800-228-7823 with details.

CLIA RAISES TESTING COSTS

Federal regulations for implementing the Clinical Laboratory Improvement Amendments (CLIA) of 1988 are likely to increase the cost of medical testing both for physicians and patients, according to the CLIA Study Coalition.

The coalition—consisting of the AMA, American Hospital Association, Health Industry Distributors Association, and Health Industry Manufacturers Association—sponsored a study that found the regulations could increase the costs for physician office laboratories and hospitals by $409 million to $728 million during the first year. After the third year, the average cost of performing a single test could be 62 cents to $1.16 higher than it would have been without the regulations.

The coalition's study also estimates that about 4,000 of the nation's 88,400 physician office and clinic laboratories may be forced to close or confine their testing to a very few waived tests.

HEALTH EDUCATION COALITION TO FORMALIZE

As reported in March, the State Society is working with a coalition to mandate stronger school health education programs in Pennsylvania. Current law directs that each school district design its own curriculum.

The official adoption of coalition by-laws is expected during a fall meeting. Specific goals proposed include:

- to provide a statewide forum for awareness, communication, and information exchange to promote comprehensive school health education;
- to encourage continuing education programs for teachers to strengthen the teaching of health in grades K-12;
- to promote professional preparation of programs that will ensure the availability of well-qualified health educators to teach comprehensive health education to Pennsylvania students in grades K-12;
- to initiate and support legislation and public policy that will enhance comprehensive school health education; and
- to encourage development of local coalitions to advocate comprehensive school health education.

Currently supported by health care and education groups, the coalition hopes to broaden participation at the fall meeting. It will then use guidelines for health education to meet its goals, as well as seek support from state policymakers and lobby for mandated school health programs.

AMA ASKS CONGRESS TO MODIFY OSHA REGS

In response to a policy adopted at its recent annual meeting, the AMA has asked the House Labor/HHS Appropriations Committee to require the Occupational Safety and Health Administration (OSHA) to make changes in the implementation of the bloodborne pathogen standard.

The AMA wants OSHA to: reconsider the current penalty structure, conduct a cost/benefit analysis of the standard as it applies to physician practices, reduce the 30-year record-keeping requirement, and adopt a one-year grace period for physicians who are making good-faith efforts to comply with the standard.

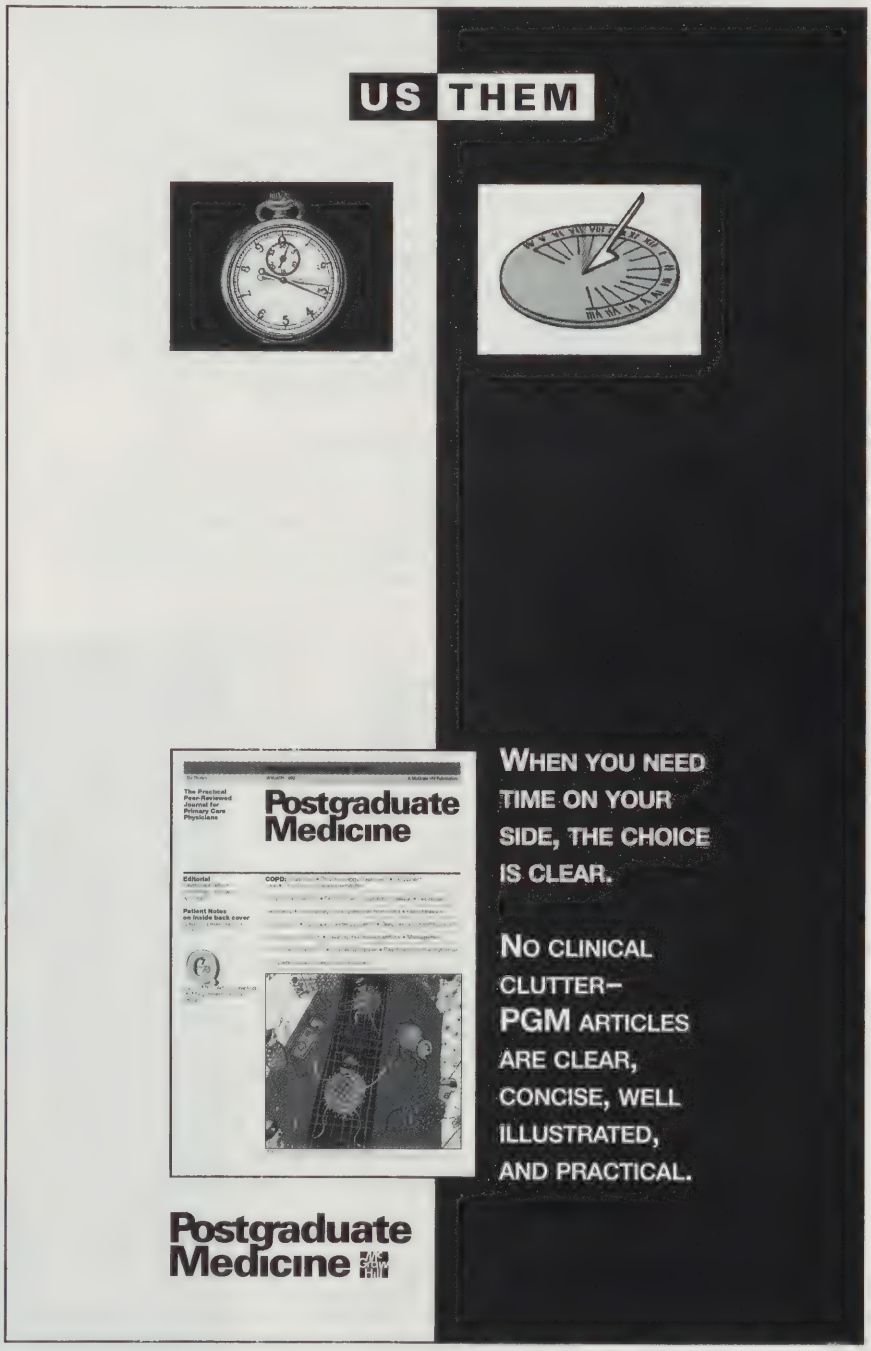
The request was made by James S. Todd, MD, AMA executive vice president, in letters to Representative William Natcher (D-KY), chairman of the House Labor/HHS Appropriations Subcommittee, and Representative Carl Pursell (R-MI), ranking minority member.

SOCIETY TO HELP WITH CANCER EDUCATION STUDY

The State Society will help the National Cancer Institute of the National Institutes of Health with a study to determine the effectiveness of an educational program for physicians. The program is designed to help them counsel their patients on how proper nutrition and smoking cessation can reduce the risks of cancer.

Approximately 1,000 of Pennsylvania's primary care physicians were contacted this summer to participate in the study, which will review and test the program. One-third of participants will receive a formal continuing medical education (CME) program presenting counseling techniques, while the remaining two-thirds will receive materials and advice, without formal training, about counseling. The institute will then compare the opinions of the two groups to determine the effectiveness of the CME program.

The Society's primary role in the study is to review the CME program content so Category I credit may be offered to seminar attendees. The Society is also encouraging Pennsylvania physicians who were contacted by the institute to participate in the study.



USP OFFERS REPORTING SYSTEM

The United States Pharmacopeia (USP) offers a nationwide reporting system enabling health care professionals to relay concerns regarding the quality, safety, or performance of the products used in their practices.

The USP Practitioners' Reporting Network (PRN) is comprised of four programs: 1) the USP Drug Product Problem Reporting Program; 2) the Medication Errors Reporting Program; 3) the Medical Device and Laboratory Product Problem Reporting Program; and 4) the USP-SNM Drug Product Problem Reporting Program for Radiopharmaceuticals. Each accepts observations and suggestions from physicians and other health care professionals on the four topics. After reviewing input, USP relays pertinent information to the appropriate organizations and agencies developing and revising standards. Thus, physicians' input may directly impact quality improvement.

For additional information about the network, for reporting forms, or to report concerns over the phone, call the USP-PRN at 1-800-638-6725. Also, to report medication errors confidentially and anonymously, if desired, call 1-800-23-ERROR.

Robert J. Lilley, the Society's assistant director of educational and scientific affairs, contributed to this page.

Developing A Patient Communications Plan

The Health Care Group

With today's trend toward consciousness-raising among physicians regarding good patient relations, many medical practices are giving increased attention to developing patient communications plans.Traditionally, this involves revisiting the appointment scheduling system, to be sure it is patient-oriented as well as an efficient use of time and resources. Next, well-managed practices adopt automatic patient recall systems, with accurate tickler and appropriate message content.

All too often, however, a formal communications plan stops there, with the rest of patient communications left to chance and good intentions. Unfortunately, this well-meaning proverbial paving may be filled with hazards to the office's communications vehicles.

Telephone systems

Perhaps no communications link offers more potential for success—or damage—than your telephone system. How many times have patients called medical offices and been greeted by busy signals? The answer is obvious, and yet we often wonder what would happen if the unsuccessful caller were a patient in an emergency. The office's mechanical unresponsiveness is simply one of the most grating experiences patients can have—certainly one that makes them feel the doctor is too busy to care.

A practice must have enough incoming telephone lines to serve its patients adequately. This is an obligation which should not be avoided by some casual feeling that the patients can keep trying until they "get through." Even if the office receptionist cannot handle any more lines, a variety of solutions exist, including adding a second receptionist, creating a separate insurance and/or business office line(s), and adding additional outgoing lines to clear the "in" lines. Even if the solutions carry additional costs, they should be acceptable both to properly serve existing patients and avoid real embarrassments.

Several absolute rules should be implemented regarding incoming phone calls. First, no calls should ever be placed on "hold" before the callers have had an opportunity to announce themselves and any special reason for their call. Second, no lines may be kept on "hold" for more than 30 seconds without someone speaking to the callers, if only to assure them that they have not been forgotten. In offices where one person has primary responsibility to answer the phone, there must be a clear identification of one or several of the assistants who have secondary responsibility to pick up and recontact callers on blinking "hold" buttons.

Publications

A brochure describing the practice, the services available, and credentials (in non-technical language) of the medical and other professional staff can prove immensely helpful and reassuring to patients.

A periodic newsletter can disseminate timely health education as well as practice-specific information. Physician newsletter materials are widely available commercially and usually provide for inclusion of personally prepared input.

And don't forget other publications. Why not set up a lending library of books, magazines, and cassette tapes about general health and topics within your medical specialty?

Patient surveys

Patient surveys are an important tool to identify aspects of a practice which need attention and improvement to better satisfy patients. Many doctors and managers agree with the concept but have trouble drafting questionnaires that they believe will get useful results. Since wrong or poorly worded questions can have a negative effect, try to:

- Keep it brief. Be sure each question is asked in a short sentence capable of a quick and simple reply.
- Avoid vague questions. Some survey questions fail to identify what the practice wants to learn.
- Avoid "yes-no" answers. Most people will answer favorably unless they are extremely dissatisfied, so a "yes" answer might not reveal the true situation. Give readers a range of choices or a graded scale (usually 1 to 10) from which to select.
- Don't plant bad seeds. While you may wonder if your practice fees are considered too high, we doubt they will be lowered in response to survey replies. If you won't or can't act on something, don't ask about it.
- Make signature optional. Some patients will prefer leaving their names so the practice will know their observations.
- Leave space for comments. Those comments will probably be the most useful of all.
- Have it nicely printed.

Service recovery

In the service sector, making things right in the face of complaints is called "recovery:"

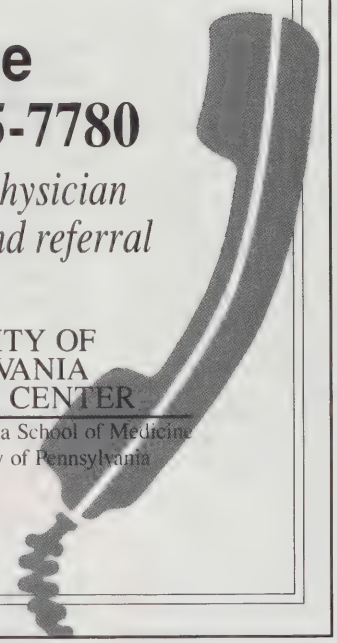
- Detection. Though some employees may want to stifle complaints, that's the wrong attitude. Complaints point out areas of discontent which may be overlooked. Knowing about them gives the practice the opportunity to right a wrong.
- Correction. By righting the wrong, the practice presents itself more favorably to future patients. Thus the recovery system helps improve service.
- Reselling. By attempting to solve the problem a patient complained about, the practice "resells" that person on its values. The recovery process retains a patient's loyalty, and the recovered patient is more likely to praise the practice to others.

The importance of recovery may seem obvious. But how can you make the principle actually work in your office? Here are some ideas.

- Managerial emphasis. The physician(s) and the manager/administrator are basically responsible. They must make it clear to all employees that complaints are welcome. The job of the physician or manager is to make sure the staff understands this. Make it clear in job descriptions and performance evaluations that patient satisfaction is as important as efficient work.
- Complaint report. Develop a simple printed form that must be

completed for each patient complaint. Make sure each report is turned in to a designated person—perhaps the manager—to track problems and their handling.

• Reparations. Formalize a process by which each complaint receives some sort of special response. Whether it be a gift certificate, a dozen roses, or a personal apology letter or phone call from the doctor or manager, the gesture helps save the patient's loyalty. Assign the reparations task to one person—probably the office manager—so the gestures will actually occur.



Properly administered, service recovery strategies do more than just save face. Patients feel more secure when they know the entire practice cares: their confidence and trust increases. And the staff benefits by having solid guidelines for concern, from which they feel pride in being part of a quality organization.

A Courtroom Lesson in Physician-Assisted Suicide

Mark V. Caliendo
Geoffrey E. Leber

Physician participation in euthanasia and assisted suicide has been the subject of long-standing debate and is unlikely to be resolved easily or soon. The Pennsylvania Medical Society's Medical Student Section explored this topic recently in a second "mock trial" held in conjuntion with the Temple University School of Law and cosponsored by the Pennsylvania Medical Society Liability Insurance Company. This is an account and essay from that trial.

The trial of Dr. C

The highly charged issue of physician-assisted suicide provided the scenario for the second annual medical issue mock trial. Medical and law students from across the state came to Philadelphia to participate in the trial of the hypothetical case of "Patient K" and "Dr. C" (see sidebar next page).

The trial pitted defense and prosecution teams of law students against each other, with medical students portraying the defendant, coroner, physician-expert witnesses, and jurors. Among the witnesses called were ethicists, oncologists, and psychiatrists. High school students interested in careers in law and medicine were the audience.

John Whyte, third-year medical student at Hahnemann University, and Temple-LEAP attorney David Trevaskis collaborated on creating this year's problem. "It was easy to write the problem," Trevaskis noted, "because all we had to do was outline the main issues. The really hard work of providing the facts of the case was done by the students."

Mark V. Caliendo serves as student representative to the State Society Board of Trustees. Geoffrey E. Leber is a member of the Society's Medical Student Section. Both are fourth-year students at Hahnemann University School of Medicine, Philadelphia.

Newspaper headlines have been occupied recently with accounts of retired pathologist and self-proclaimed "Dr. Death," Jack Kevorkian, MD. Dr. Kevorkian gained notoriety in the summer of 1990 for his role in helping 54-year-old Janet Adkins kill herself with his infamous "suicide machine."

Dr. Timothy Quill followed suit in March 1991 by revealing his participation in the suicide of his patient, Diane, who was diagnosed with acute leukemia. Dr. Quill prescribed, at Diane's request, the barbiturates she used to end her life after electing not to undergo chemotherapy.[1] In 1988, "It's Over, Debbie," an essay describing the actions of a resident hastening the death of a young woman dying of ovarian cancer, appeared in a major medical journal.[2]

The Public Health Service reports that approximately 75 percent of all deaths in 1987 occurred in hospitals and long-term care institutions, up from 50 percent in 1949, 61 percent in 1958, and 70 percent in 1977.[3,4,5] Public awareness and concern regarding medical decisions that lead to patients' deaths are heightened as a result of this move of the locale of death from the sanctity of the home to medical institutions, e.g., decisions made at these facilities are more subject to review and thus more likely to enter public consciousness.[5] Moreover, American Hospital Association statistics estimate that many of the nearly 6,000 daily deaths in the United States are somehow planned by patients, families, and physicians, while a remarkable 53 percent of respondents in a recent *New York Times*-CBS poll believe that doctors should be allowed to assist a severely ill person in taking his or her own life.

Author Kurt Vonnegut went so far as to envision "ethical suicide parlors" set up around the country to encourage people to end it all. Although seldom as eccentric as Vonnegut's vision, instances in which physicians might act to hasten death or refrain from prolonging life generate a variety of feelings from members of the medical profession and lay community alike, and should be the basis for further individual and collective evaluation.

Physicians and the legal process

The need for a familiarity with the legal process has long been a fact of professional life for physicians, and contact with the courtroom is more prevalent now than ever before. During the Roman Empire, a physician named Antistius examined the bloody remains of Julius Caesar and later performed superbly on the witness stand: of the 23 stab wounds inflicted, he testified, only one was mortal—perforation of the thorax.

A significant number of contested cases at the trial level require medical evidence, compelling practically all physicians to testify in court at some time during their careers. For some medical specialties a court appearance is a regular occurrence.

Furthermore, the specter of malpractice liability suits has haunted the medical profession since at least the code of Hammurabi in early Mesopotamia. Today's penalties for malpractice are still a source of anxiety and frustration for many physicians, particularly those who will soon sink or swim in the murky waters of twenty-first century practice. Thus, the opportunity to participate in the mock trial (see sidebar at left) is as important to efforts to become well-rounded, knowledgeable future physicians as learning how to write a prescription.

This year's mock trial is an indication of how ethical-medical decision making has moved beyond the realm of academic medicine to the mass media, from behind the closed doors of physician's offices

onto the front pages. In Washington state last November, a controversial and bitterly fought proposal to legalize euthanasia failed narrowly; similar efforts were launched in California.

Likewise, Dr. Kevorkian again made national headlines with an outline of his proposal, published in the *American Journal of Forensic Psychiatry*, for a new medical specialty of euthanasia practitioners. This specialty would be called "obitiartry": the practice—"medicine"; the practitioners—"obitiatrists."

Suicide vs. euthanasia

In this country, euthanasia is commonly defined as an act or method of causing death painlessly to end suffering, particularly as a way to deal with persons dying of incurable, painful diseases. However, euthanasia differs from assisted suicide in the extent of physician participation. For instance, in euthanasia the physician performs the immediate life-ending action (e.g. administering a lethal injection), while assisted suicide occurs when the patient performs the life-ending action facilitated by the physician offering the means.

Withdrawal of life-sustaining treatment, or "passive euthanasia," as well as the over-administration of palliative treatment to relieve pain and suffering and allow death as a foreseeable side effect, are being performed less infrequently in many medical settings. Of course, the ultimate question is: Where do we draw the line?

Dr. Kevorkian is viewed by many as the nation's most radical proponent of euthanasia, though he is certainly not without his supporters. Proponents often cite the Netherlands, for example, where euthanasia is performed openly and commonly, under the auspices of the Dutch Medical Association and the government, as a proven model of euthanasia.

Euthanasia is permitted in the Netherlands when four conditions are met: 1) severe suffering exists without the hope of relief; 2) a financially and emotionally uncoerced, informed, and consistent choice has been made by the patient; 3) other treatment options are not available; and 4) second opinions have been obtained from other professionals.[6] Estimates reveal that 5,000 to 10,000 Dutch die annually by euthanasia.[7]

Another argument in favor of euthanasia is based on the constitutional rights of the individual. Those who oppose sanctioned euthanasia consider the civil rights not just of those who would want euthanasia themselves, but of all citizens. They argue that euthanasia is an unacceptable public policy because of the inevitability in involuntary euthanasia of persons being killed without consent.

Singer and Siegler cite four examples of how voluntary euthanasia could lead to involuntary euthanasia: 1) "crypthanasia" or secret euthanasia involves killing vulnerable patients without their consent; 2) "encouraged" euthanasia, whereby chronically ill or dying patients may be pressured to choose euthanasia to spare their families or friends financial or emotional strain; 3) "surrogate" euthanasia, which permits euthanizing incompetent patients on the basis of substituted judgment or burdens versus benefits; and 4) "discriminatory" euthanasia, or coercing vulnerable groups in society to request euthanasia, such as the elderly, disabled, indigents, or those with the acquired immunodeficiency syndrome.[8]

Also, some argue that euthanasia violates fundamental standards of medicine, because it diverts attention from central issues in the care of dying patients—including better pain control and improved management of the dying process as in hospice care—and subverts the time-honored role of physician as healer outlined in the Hippocratic Oath.[8]

Physicians might act to hasten death through assisted suicide when conflicts occur between the duty to relieve suffering and the duty to preserve life. Advocates suggest that assisted suicide is a natural progression of the principle that hopelessly ill patients may refuse life-prolonging medical care. Society has increasingly recognized the right of patient autonomy, which entitles each person to decline life-sustaining treatment in order to eliminate prolonged suffering. Theoretically, suicide would also put an end to suffering that could be considered needless and would be a fulfillment of the patient's desires.[9]

On the other hand, opponents contend that the primary purpose of assisted suicide is to cause death, while drawing the distinction that withdrawal of treatment permits death to take its natural course. Once again, they argue that assisted suicide, like euthanasia, might undermine the basic foundation of the physician-patient relationship, the patient's trust that the physician is wholeheartedly devoted to caring for the patient's health. Physician-assisted suicide creates the risk of "slippery slope" abuses or mistakes resulting in a potential deterioration of public respect for physicians.

Another scenario raised by those against assisted suicide is that of patients whose disease or pharmacological treat-

The case of Patient K

Patient K was a 55-year-old woman with a lifetime of memories, dreams, and reflections. She also had a 30-year history of smoking more than a pack of cigarettes a day. The smoking gave her a certain pleasure at times in her youth; in her early fifties, however, the smoking led to small-cell lung carcinoma. Indeed, at the time she took her life, her cancer had progressed to stage IV: weight loss, bone pain, and a general malaise—not to mention side effects from chemotherapy and radiation therapy—had overtaken her prior to her death.

Dr. C had been her primary care physician for a number of years, and watched recent suffering. She and Dr. C had talked openly of her pain and of her desire to take her own life. Although he had deep reservations about any patient giving up the fight for life, Dr. C was convinced that Patient K knew best about the choices she was making.

Dr. C had refused to help when Patient K asked him for the first time to provide her with drugs to take her life. He had been struck by her knowledge that a proper dose of potassium could take a life without much trace of evidence. As time passed and they discussed cases involving the doctor in Michigan and his "suicide machine," Dr. C realized that he wanted to help Patient K end her pain and suffering.

Finally, after being asked nearly 20 times over the period of a year for assistance in taking her life, Dr. C told her that he would help her do whatever she chose to do. He prepared a lethal dose of potassium for her and explained she could inject herself with it through her Hickman catheter. He gave Patient K the syringe and told her to take it home and think over her decision.

Patient K went home, wrote a long note to her family and friends, and killed herself with the potassium injection. In her note she explained that she did not want anyone to blame the physician for giving her the potassium, as "he was only following my wishes." Police found the note and the syringe. After an investigation by the coroner, Dr. C was arrested and charged with aiding a suicide, a form of criminal homicide under 18 Pa.C.S. section 2505.

ments have progressed to impairing their decision-making capacity, making it difficult to ensure that a competent decision is being made. Finally, some patients may choose death because they feel that others might consider them an emotional or financial burden, or that society might prefer to spend increasingly limited health care resources on more compelling needs.

Thoughts on euthanasia

The Wall Street Journal reported recently (February 26, 1992) that one in every seven health care dollars spent annually is on the last six months of someone's life, raising questions of effective allocation of health care resources. With 12.5 percent of the American population over the age of 65, and life-prolonging technologies accounting for as much as 25 percent of our annual health care cost inflation, some proponents of assisted suicide assert that critical care, originally intended for patients with treatable illnesses and a reasonable chance of recovery, is a "sinkhole for resources."

By allowing our terminally ill population the alternative to seek a voluntary, conscientious, and dignified death, and at the same time ease health care cost escalation, we are providing a noble service to society as a whole. There are those that feel that a patient's motivation to spare family and friends the emotional and financial burden of watching his or her slow, painful demise does not appear to be unquestionably irrational.[10] Perhaps physicians are not always empowered to supply patients with health, but rather to supply them with help. However, opponents warn that legalizing assisted suicide places elderly patients in nursing homes at risk: those who become financially strapped or over-burdensome may be subtly influenced to request suicide.[11]

We are also reminded that as the debate proceeds, we must avoid romanticizing suicide, regarding it simplistically, by allowing negative attitudes toward aging to influence its course or by confusing the right to die with the equally important debate about allocating limited health resources to terminally ill patients. It has also been suggested that as we contemplate the ethical dilemma of assisting someone toward death, we must consider three nonpartisan prerequisites: 1) the request to die must not stem from a treatable depression; 2) the request must not stem from treatable discomfort, symptoms, and pain; and 3) the request must take place within the context of a relationship between physician and patient of some duration, depth, and intimacy.[11] It seems clear that we need to address the access to expert care of distressing symptoms including pain and psychological illness, in addition to the overall quality of life of this patient population, before we can fully weigh the options for terminating life.[12]

The medical community must improve its understanding of major predictors of patient outcome. Rapidly expanding technical abilities to collect and manipulate large amounts of detailed clinical data have created a new intellectual and technological basis for estimating outcomes from intensive medical care. We must strive to reduce uncertainty about difficult clinical decisions with the goal that physicians, patients, and society can reorient health care toward more scientifically and ethically defensible approaches.[13]

In the meantime, to avoid disputes, we must encourage all adults to prepare documents, including living wills and durable powers of attorney, that would provide guidance, if necessary, for their families and physicians; and encourage health care facilities to provide an opportunity for patients to prepare such documents on admission.[14]

Finally, those who urge drawing the line toward legalized euthanasia and assisted suicide remind us that, with the recently legalized concept of "self-determination," if a patient really wants to commit suicide, and is mentally competent to make such a decision, the means are there to do it without a physician's assistance.

The jury of our peers, brandishing polished weapons of wisdom and insight, further reminds us that in an era in which the discipline of medical ethics has become so widely publicized, we need to teach moral reasoning in medical schools and hospitals. It is easy to recognize that part of the public loss of faith in physicians is because of our paternalistic and sometimes cruel insistence on life at any cost.

The spiritual meaning of life and death is too complex to hold the rigid view that physicians should never assist in suicide. Death is not the enemy for many people, but instead is sometimes a welcomed relief to either a life fully lived or a life plagued with the ravages of incurable disease.

For the physician to arrive at an answer to this moral dilemma requires a deep exploration and definition of one's personal values. Nevertheless, our peers unanimously acquitted the defendant in this year's mock trial.

SURVEY REVEALS OPINIONS ON HEALTH CARE ISSUES

Forty-seven percent of Pennsylvania residents perceive high or rising costs as the main problem facing health care and medicine today, according to a study by the Gallup Organization contracted by the Pennsylvania Medical Society. The 1992 Public Opinion Poll revealed that cost issues significantly outweigh quality, access, and other issues among Pennsylvania residents. These results are fairly consistent with national data (see Figure 1).

The poll was primarily conducted to identify perceptions about the problems facing U.S. health care, to examine physician relationships, and to assess perceptions about health care costs. Questions addressed general physician care, physician communication, health care reform, and other topics. The following is a partial summary of poll results.

General physician care

Pennsylvania adults were asked their level of agreement with selected statements regarding physicians in general. Respondents felt most agreement for doctors being up-to-date on the latest advances in medicine and for doctors taking a genuine interest in patients. They were concerned, however, about access for the poor and elderly, and the cost of care.

Other results show that 87 percent of Pennsylvania residents have a personal physician, as opposed to 79 percent nationally; 67 percent visited a physician within the last six months, and 63 percent felt there were "the right number" of doctors in their community.

Physician communication

Regarding physician communication, consumers were asked whether or not they have discussed treatment options, fees, medications, preventive information, and the risks of selected behaviors. A majority (75 percent) reported discussing treatment options prior to treatment, and more than one-third (37 percent) reported discussing fees with their physician.

Nearly two-thirds (64 percent) of Pennsylvania respondents reported reviewing all drugs and medications they were taking the last time the physician recommended a treatment or prescribed a drug. This proportion was nearly identical to that found nationally (66 percent). Also, 73 percent of the respondents said they discuss preventive medical information with their physician.

Regarding the question, "Has your doctor talked with you about the health risks of any of the following,?" Pennsylvanians responded favorably as follows: smoking—60 percent; alcohol abuse—42 percent; and drug abuse—38 percent. One in eight Pennsylvania adults reported having discussed living wills or the removal of life support with their physician.

Health care reform

The health care reform section of the poll posed questions regarding awareness of and preference for specific reform proposals. Results show that Pennsylvania adults prefer government-financed national health insurance for everyone (48 percent) over approaches requiring individuals to buy insurance (20 percent) or employers to provide insurance (29 percent).

Few respondents could name specific health care reform proposals without help, but when proposals were listed, 37 percent said they had heard of Health America, 20 percent had heard of Health Access America, and 18 percent had heard of the Pepper Commission.

Look for a follow-up article in the October issue of PENNSYLVANIA MEDICINE.

FIGURE 1

Main Problem Facing Health Care and Medicine*

*Poll results are based on 408 interviews among adults in Pennsylvania in spring 1992. The margin of error is 5 percent.

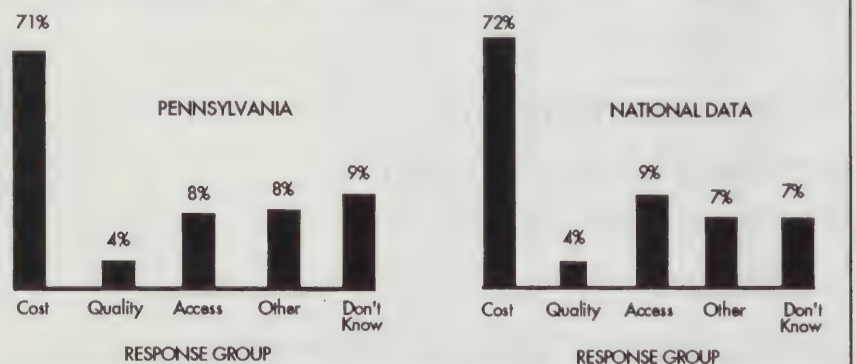

Figure 1 compares state and national responses to the 1992 Gallup Poll question: "Thinking about everything that has to do with health care and medicine, what do you think is the main problem facing health care and medicine in the United States today?"

Delegation News

PA "INFLUENTIAL" AT AMA ANNUAL MEETING

The Pennsylvania delegation to the AMA was at the forefront on several issues during the AMA House of Delegates' annual meeting in June. According to Howard A. Richter, MD, delegation chairman, "the delegation was enormously influencial on the floor of the House."

Of 16 resolutions proposed by Pennsylvania, three addressed significant issues of concern to physicians nationwide. In response to Pennsylvania's efforts, the AMA will develop: 1) policy regarding practice parameters, 2) mechanisms to study resource based relative value scale (RBRVS) problems, and 3) policy on concurrent care.

Practice parameters

The House of Delegates adopted an amended Pennsylvania resolution directing the AMA to work aggressively with the Agency for Health Care Policy and Research (AHCPR) and similar groups in developing, reviewing, and updating practice parameters. The first three clinical guidelines, designed to give physicians scientifically validated information which can positively affect patient outcomes, were released this summer (see Medical Economics, page 34).

The AMA has said it will support only those parameters developed by or in conjunction with physician organizations, and it will oppose the release of others to the public without physician review.

RBRVS

Physicians nationwide agree that a number of inequities exist in the implementation of the new Medicare payment system. Among those are reduction of allowances for new physicians, non-payment of EKG interpretations, and defects in cost indices and area designations, just to name a few. The AMA House of Delegates, through a Pennsylvania resolution, directed the AMA to take all necessary legal, legislative, and other action to address those and other RBRVS implementation problems.

Specific components in need of evaluation include clinical vignettes and other examples used to determine RBRVS values and payment levels; the work relative value unit (RVU) component; modifiers, including global descriptors; and global surgery fees.

The AMA, in response to the resolution, will also seek an additional comment period, support improving the accuracy of the Medicare geographic practice costs indices, support further study of refinements in the practice cost component of the RBRVS, and pursue adjustment of all RVUs to comply with increasing federal and state regulatory requirements.

Concurrent care

Confusion over appropriate and timely payment of concurrent care is an issue nationwide, as was apparent by four resolutions submitted on the issue at the House's annual meeting.

Pennsylvania's contribution requested that the AMA use all appropriate resources to 1) accomplish uniformity among carriers in the application of concurrent care payment policies in the Medicare program, and 2) allow physicians to be identified by the specialty as reported to the carrier rather than an arbitrary definition as established by a carrier for the purpose of concurrent payment policy.

The House of Delegates adopted Pennsylvania's resolve as part of a substitute resolution, which also directs the AMA to seek enactment of federal legislation and/or a change in HCFA policy to establish more equitable standards for fair and prompt payment for concurrent care for both primary care and specialist physicians, and seek uniformity among Medicare carriers and other third-party payers in application of concurrent care policies.

A report on concurrent care and related concerns will be presented to the 1993 AMA House of Delegates.

AMA-HMSS

Pennsylvania's Hospital Medical Staff Section (HMSS) representatives were also influential at the AMA level. Topping the list of timely resolutions submitted to and adopted by this year's AMA House is Resolution 156, Health Maintenance Organization (HMO) Establishment of All-Inclusive Reimbursment.

The resolution, as amended, calls for the AMA to investigate the legality of HMOs and any third-party payer reimbursing a hospital and its hospital-based physicians, including independent billing physicians, through an all-inclusive rate which would be paid to the hospital; and in the event it is determined to be legal, support legislation to assure patient and physician protection.

The AMA—in response to resolutions from several states, including Pennsylvania, and with the support of the HMSS—will also work toward a more rational definition of contaminated medical waste and a more rational policy for disposal. Additionally, the AMA-HMSS will urge hospital chief executive officers to seek modification of the American Hospital Association's health care reform proposal.

Women in Medicine

MONTGOMERY COUNTY PRESIDENT INDUCTED

Robert L. Schneider, MD, was inducted as the 145th president of the Montgomery County Medical Society (MCMS) for 1992-93 at the county society's annual dinner dance in June. Dr. Schneider has been a member of MCMS for seven years and active in the State Society since her residency days.

On a county level she has served as president elect, vice president, board member, delegate to the State Society, member of the Medical-Legal Committee, and board member of the Political Action Committee. On the state level, she is a voting delegate in the AMA, chairman of the By-Laws Committee, and vice chairman of the Task Force on Drug Abuse.

A board-certified emergency physician, Dr. Schneider completed her training at the Medical College of Pennsylvania, Philadelphia. She currently serves as director of clinical research at Sterling Winthrop Pharmaceuticals, Malvern.

Dr. Schneider

As for MCMS in the next year, Dr. Schneider plans the continuation and expansion of the society's role in support of public health initiatives to foster stronger ties between the medical and political communities.

County News

PHYSICIANS, LAWYERS DISCUSS "SAFE HARBORS"

More than 100 lawyers and physicians attended an annual medical-legal seminar, sponsored by the Montgomery County Medical Society (MCMS) and the Montgomery Bar Association, to discuss recently passed "safe harbor" (anti-kickback) rules.

W. Thomas Berriman, a hospital attorney, spoke about recent legislation designed to prevent hospitals and physicians from reaping excessive profits under the guise of providing patients with state-of-the-art medical care.

William H. Mahood, MD—a member of MCMS, the State Society, and the AMA's Council on Medical Services—reported that the AMA agrees with much of the "safe harbor" legislation. He made no apologies for the "greedy bad apples" in the profession and supports "weeding them out."

Finally, the seminar moderator, Lindly W. Cowperthwait, a past president of the Pennsylvania Trial Lawyers Association, declared empathy for physicians who found themselves accused of overmedicating and overtreating as rationalization for what is believed to be too high a cost for health care.

GASTROENTEROLOGISTS STUDY DEVELOPMENTS

Pennsylvania's gastroenterologists learned to apply recent developments in the medical and surgical

management of inflammatory bowel disease during the Pennsylvania Society of Gastroenterologists' Annual Scientific Meeting, September 11-13, in Harrisburg.

The meeting began with a welcome reception and banquet Friday night. Half-day scientific sessions presented Saturday and Sunday consisted of an inflammatory bowel disease symposium and a liver disease panel with case presentations. The seminar concluded with a session on "Managed Care: What Physicians Need to Know."

Program faculty included: Arthur B. Abt, MD, Hershey; Theodore M. Bayless, MD, Baltimore, Maryland; Robert B. Edmiston, MD, Camp Hill; Franz Goldstein, MD, Wynnewood; Graham Jeffries, MD, Hershey; Walter A. Koltun, MD, Hershey; William H. Mahood, MD, Flourtown; Thomas S. Mangan, MD, Danville; James C. Reynolds, MD, Pittsburgh; and David VanThiel, MD, Pittsburgh.

SOCIETY DISTRIBUTING LEGAL REFERENCE

The State Society recently began distribution of a reference created exclusively through Society resources, *Laws and Regulations Affecting Medical Practice*.

The volume is a 45-chapter reference on the legal rights and responsibilities of Pennsylvania physicians regarding such issues as abortion, antitrust, motor vehicle code reporting, medical records, withholding life support, and many others.

Written and carefully scrutinized by legal experts in the various areas, it provides insight and clearly described guidance specifically for physicians.

Because the Pennsylvania Medical Society Liability Insurance Company (PMSLIC) believes this fills an unmet need for Pennsylvania physicians, its board of directors unanimously voted to provide each PMSLIC insured with a free copy and all subsequently issued updates, as a policyholder service. Distribution to PMSLIC insureds began in August.

Non-PMSLIC Society members interested in obtaining a copy of *Laws and Regulations Affecting Medical Practice* should contact the State Society's Physician Services Department at 1-800-228-7823. The cost is $55 for Society members and $110 for non-members.

PMSLIC ISSUES SEMI-ANNUAL CLAIMS STATISTICS REPORT

The Pennsylvania Medical Society House of Delegates Resolution 86-17 requires that the Pennsylvania Medical Society Liability Insurance Company report certain claims statistics to the House of Delegates on a semi-annual basis.

In response to this resolution, PMSLIC published the first semi-annual report in the September 1987 PENNSYLVANIA MEDICINE. The data included in the following tables is an update of the most recent five year's experience of the data requested by the resolution.

Table 1: Joinders—Includes PMSLIC physicians joined by other parties and other parties joined by PMSLIC.

Table 2: Number of claims and suits filed by specialty, July 1, 1986 - June 30, 1991.

Table 3: Cost of claims and suits filed by specialty, July 1, 1986 - June 30, 1991.

Questions or comments should be directed to Lori A. Bartholomew, Acting Director of Governmental Relations & Research, PMSLIC, P.O. Box 8375, Harrisburg, PA 17105-8375.

TABLE 1

Number of cases in which a physician is joined as an additional defendant by a hospital or physician

Since beginning tracking joinder data on April 1, 1987, 95 PMSLIC insureds were joined by other parties through June 30, 1992, as follows:

* Claims and suits filed during this period resulted from policy years 1978-1988. PMSLIC's limit of liability is $100,000 per incident for policy years 1978-1982, $150,000 for 1983 and $200,000 for 1984-1991.

** Cases tried to verdict which are still open pending final resolution due to post trial motions, appeals, etc. are counted as open files.

PENN STATE GRADUATES BEGIN RESIDENCIES

Graduates of Penn State's College of Medicine at The Milton S. Hershey Medical Center, Hershey, began residency programs in 19 areas of medical practice in July.

Consistent with last year, nearly 50 percent of the graduating class will work in primary care fields, with the largest number pursuing family and community medicine residencies.

Forty-three of the 93 graduates will pursue residencies in primary care. Thirteen graduates will pursue family and community medicine, 12—pediatrics, 11—internal medicine, and seven—obstetrics/gynecology.

Meanwhile, 50 graduates will pursue residencies in specialty fields. Approximately 55 percent of the graduates will remain in Pennsylvania for their residencies.

CORRECTION

In the Medical Abstracts section of the July 1992 issue of PENNSYLVANIA MEDICINE, the byline for the "Clinical Use of Ambulatory Blood Pressure Recording: Value in Patient Care" abstract incorrectly identifies the first author as *Alan* P. Shapiro, MD. Dr. Shapiro's first name is *Alvin*.

NEWSMAKERS

Mark W. Shulkin, MD, Media psychiatrist, has been installed as president of the Delaware County Medical Society.

Thomas L. Kennedy, MD, residency director, Geisinger Medical Center, Danville, was elected president of the Pennsylvania Academy of Otolaryngology—Head and Neck Surgery. **Frank I. Marlowe, MD,** chief of otolaryngology, Medical College of Pennsylvania and Presbyterian Medical Center, Philadelphia, was elected president elect.

Hershey physician **Joseph W. Sassani, MD,** was elected president of the Pennsylvania Academy of Ophthalmology at its annual scientific meeting in July.

Dr. Sassani

Mia C. Bartuska, MD, a 1992 graduate of the Medical College of Pennsylvania, is an intern in family practice at Harrisburg Hospital. She is the daughter of **Doris G. Bartuska, MD,** Philadelphia.

Two members of the University of Pennsylvania Medical Center's Department of Dermatology—**Gerald S. Lazarus, MD,** chairman, and **Edward Bondi, MD,** associate professor—were recognized by the school of medicine class of 1992 for excellence in teaching.

Michael J. Moritz, MD, associate professor of surgery and acting director, Division of Transplantation, Thomas Jefferson University Hospital, has been named chief of the Section of Liver Transplantation in Jefferson's Department of Surgery.

Myron Yanoff, MD, chairman and professor of the Department of Ophthalmology, Hahnemann University School of Medicine, Philadelphia, was invited as visiting professor to the world-famous faculty of medicine of the University of Vienna, Austria. During his visit this month, Dr. Yanoff will conduct lectures and hold seminars on various current aspects of ophthalmology, surgery, and research for the prevention of blindness.

The Medical College of Pennsylvania (MCP) has dedicated the Alma Dea Marani, MD, Chair in Surgery in honor of the internationally known plastic surgeon and accomplished sculptor best known for her role in bringing art into the college's curriculum. This year's recipient is **Joel J. Roslyn, MD,** who joined MCP as chairman, Department of Surgery.

Scott D. Goldstein, MD, a member of the surgery staff at Pennsylvania Hospital in Philadelphia for seven years, has been named chief of the hospital's Section on Colon-Rectal Surgery, Department of Surgery. Dr. Goldstein also serves as assistant professor of surgery at Jefferson Medical College and is a clinical associate professor in surgery at the University of Pennsylvania School of Medicine.

Two University of Pennsylvania Medical Center physicians were honored by the Philadelphia Psychiatric Society: **Harold I. Lief, MD,** received the society's Lifetime Achievement Award in recognition of his career activities which advanced psychiatry in patient care, teaching, and research; and **Kenneth D. Cohen, MD,** was named Practitioner of the Year in recognition of his outstanding character, dedication, and committment to patient care.

Ajit K. Sachdeva, MD, associate professor of surgery, Medical College of Pennsylvania, was installed as the twelfth president of the Association for Surgical Education during its annual meeting in Canada.

David Nash, MD, director of health policy and clinical outcomes, Thomas Jefferson University Hospital, has been appointed to the Users Advisory Group of the Joint Commission on Accreditation of Healthcare Organizations.

Paul B. Gilman, MD, a member of the medical staff in the Divisions of Hematology and Oncology, Lankenau Hospital, Wynnewood, has been appointed to the Lower Merion board of directors of the American Cancer Society.

John C. Cutler, MD, MPH, public health specialist, Pittsburgh, received the National Family Planning Reproductive Health Association's International Award for his leadership in improving access to family planning.

Mark G. Graham, MD, FACP, FACOEM, a member of the Division of Environmental Medicine and Toxicology, Jefferson College, and medical director, the Philadelphia Comprehensive Occupational Medical Program, was elected president of the Philadelphia Occupational and Environmental Medical Society for a two-year term.

Stephen C. Silver, MD, chief of service, Colon and Rectal Section, Department of Surgery, Delaware County Memorial Hospital, Drexel Hill, has been elected president elect of the Pennsylvania Society of Colon and Rectal Surgeons.

Democratic presidential candidate Bill Clinton (third from left) and United States Senator Harris Wofford (D-PA, far right) visited the Intensive Care Nursery at Pennsylvania Hospital, Philadelphia, during a recent campaign stop. Jeffrey Gerdes, MD (second from right), neonatologist, Section on Newborn Pediatrics, Pennsylvania Hospital, looks on. After a tour of the facility, Governor Clinton discussed his plans for national health care with a press corps on the front steps of the hospital.

Malpractice rates too good to be true usually are.

You may have been told about lower rates offered by insurers new to the Pennsylvania market. Low rates will not benefit you if the company is not around to protect you or *your assets* if you are sued.

Physicians Insurance Company is an established Pennsylvania carrier who has continued to lower rates while protecting your future:

- 10% overall reduction in September 1991
- more for physician groups
- additional reductions for individuals who are claims free

Artificially low rates are a prescription for disaster... for the physician and the company. When selecting a malpractice carrier you should ask yourself what will happen in the future. Will they automatically surcharge my premium for claims experience? Will their policy provide me with the full Occurrence coverage I have enjoyed with Physicians Insurance Company or are they only providing a form of Claims-Made coverage—better known as Occurrence Plus or Permanent Protection? Why would a broker recommend this carrier... is the company only trying to buy my business by raising his commission? More importantly, will they be there when I need them?

At Physicians Insurance Company we have always maintained our rates among the lowest and we are committed to keeping this practice intact. When you take an honest look, *you can't do better.*

For more information on malpractice rates and coverage, please call or write today.

Why buy an office automation system that doesn't offer a long-term solution?

ACCLAIM™ from Sentient is the total system solution.

A lot of medical practices are planning to invest in an office automation system. But a lot of the systems out there just don't offer the comprehensive functions and long-term expandability that your practice may need.

IBM® and compatible hardware.

The ACCLAIM system operates on IBM and compatible hardware, so you know you're getting the quality standard of the industry. And it's completely expandable, so it can grow as your practice grows.

Long-term support.

ACCLAIM is the system solution that fits your needs today. And Sentient's software engineers, customer trainers, and telephone support people are always there to make sure your system fits your needs over the years to come.

Easy to operate.

Even if your staff has no previous computer experience, ACCLAIM is simple to operate effectively and efficiently. Complete training is included in the purchase.

When you're thinking about office automation, call Sentient first, and find out what ACCLAIM can do for you.

1-800-247-9419

With Princeton, you're in good company.

More than 19,000 medical and health care professionals have chosen Princeton Insurance Company for their professional liability insurance coverage. Here are some reasons why:

- **A solid track record.** Princeton has a decade of experience providing professional liability insurance coverage to physicians, and A.M. Best has ranked us (with our parent company) among the 20 largest medical malpractice insurers nationwide since 1983.

- **Financial strength.** Our loss reserves are carried at full value, not discounted in the hope of earning sufficient interest income to pay claims. We maintain a high quality/low risk investment portfolio, with no junk bonds, no common stock and no real estate speculation. And we've earned a claims-paying ability rating of "A" from Standard & Poor's.

- **Coverage options.** Tail coverage is included in the purchase price of Princeton's innovative *Occurrence Plus* policy. A standard claims-made policy is also available, and we offer excess liability coverage (limits up to $5 million) to Pennsylvania physicians regardless of which company writes their primary coverage.

- **Strong defense against claims.** In a typical year, more than 90 percent of the Princeton-managed cases disposed of by the courts are resolved in the policyholder's favor.

It may be easier than you think to change insurance companies. Call today to find out more or return the coupon to receive a copy of our brochure, "It's Princeton's Specialty."

Applicant should have experience in CT, MRI, ultrasound, mammography, nuclear medicine, angiography and interventional radiology. Potential for partnership. Candidate should be Board Certified/Board Eligible and licensed in Pennsylvania. Terrific area for family life, quality schools, recreational and civic activities. Address inquiries and current curriculum vitae to Box 381, PENNSYLVANIA MEDICINE, 777 East Park Dr., P.O. Box 8820, Harrisburg, PA 17105-8820.

AESA is seeking qualified physicians to develop an emergency department group at Hazleton St. Joseph Medical Center, a 190-

$30,000 BONUS OFFERED TO HEALTH CARE PROFESSIONALS

If you are a board-certified physician or a candidate for board certification in one of the following specialties, you may qualify for a bonus of up to $30,000 in the Army Reserve.

Anesthesiology • General Surgery • Thoracic Surgery
Pediatric Surgery • Orthopedic Surgery
Colon-Rectal Surgery • Vascular Surgery • Neurosurgery

A test program is being conducted which offers a bonus to eligible physicians who reside in certain geographic areas (Pennsylvania, West Virginia, Ohio, Michigan, Illinois, Indiana, Wisconsin, Minnesota and Iowa). You would receive a $10,000 bonus for each year you serve as an Army Reserve physician—for a maximum of three years.

You may serve near your home, at times convenient for you, or at Army medical facilities in the United States and abroad. There are also opportunities to attend conferences and participate in special training programs, such as the Advanced Trauma Life Support Course.

To learn more about the Army Reserve and the Bonus Test Program, call one of our experienced Medical Personnel Counselors:

In Philadelphia call Major Ernest Lyons or Captain Jules Fleischner 1-800-759-5462. In Pittsburgh call Captain Russell Flemming collect (412) 644-4432.

ARMY RESERVE. BE ALL YOU CAN BE.

bed facility with 19,000 annual visits. Excellent compensation package. Scenic location with access to the Pocono Mountains, Philadelphia and NYC. 1-800-779-1427.

OB/GYN, Urol, ID, Ortho, Neurology, Perinatal, FP. Local opportunities. Contact Yannelli, Randolph & Co., 994 Old Eagle School Rd., Suite 1020, Wayne, PA 19087; 215-964-1616.

ing students' health care needs. The University Health Service provides outpatient services, health education and wellness, chemical health consultations and nutrition counseling to a student body of approximately 14,500. Medical providers at the university health service include two physicians and two nurse practitioners. Applicants must be licensed to practice medicine in Pennsylvania. Preference will be given to applicants who have experience providing care to college-age students. For the 11-month contract the salary is $52,374, with excellent fringe benefits, including medical liability coverage. The anticipated starting date is August 24, 1992 or as soon as possible thereafter. Founded in 1875, Indiana University of Pennsylvania the Commonwealth's fifth largest university with more than fourteen thousand students from nearly every state and over sixty foreign countries. Located fifty miles northeast of Pittsburgh in the foothills of the Allegheny Mountains, IUP is one of fourteen universities in the State System of Higher Education. IUP is big enough to offer a diversity of high quality academic programs in professional and applied areas as well as five programs at the doctoral level. Within the community of Indiana is a 181-bed non-profit community hospital providing medicine, surgery, pediatrics, obstetrics, intensive care and emergency services. The medical staff consists of more than 90 physicians in the primary care and subspecialty areas. Send letters of application, resume and three references, including phone numbers, to: Rhonda H. Luckey, MSPH, Director, Administration, Pechan Health Center, Indiana University of Pennsylvania , Indiana, PA 15705-1083. Applications will be accepted until the position is filled. IUP is an affirmative action/equal opportunity employer.

Behavioral Medicine—Associate medical director seeks PT/FT BC/BE family practitioner to coordinate transdisciplinary health care team - diagnostic/treatment services to children, adolescents, adults with developmental, learning, behavioral disorders in Pittsburgh, PA. Unique opportunity. Salary and benefits negotiable. Send CV and statement of philosophy of health care to: Transact, 2566 Haymaker Rd., Monroeville, PA 15146.

Future Possibilities

Lynn Michele Lucas-Fehm, MD

Editor's note: This article is excerpted from Dr. Lucas-Fehm's presentation at "Diversity: A Workshop for the Future Leaders of Medicine," held during the Society's 1992 Leadership Conference.

In my personal experience, the future holds exceedingly different possibilities for young physicians versus female physicians versus minority physicians. For young physicians, the upcoming years are uncertain with the inevidability of massive changes in the health care delivery system in this country. We cannot turn on the news without hearing about the health care crisis, and it is almost impossible to keep up with the numerous reform plans being proposed almost daily.

As a female physician, I'm filled with optimism. Our ability to contribute to and positively influence the profession grows. Sure, there are problems; and indeed, inequities still exist. Yet, at the same time, an AMA report reveals that [the numbers of] female physicians increased at a rate almost four times as great as [that of] male physicians. If for no other reason, changes will occur because of our vastly increasing numbers.

However, when I turn my attention to the future for black and Hispanic physicians, the optimism I proudly display about the future for women is brought back down to earth by a healthy dose of reality. Despite the fact that both the black and Hispanic segments of our nation's population are growing at a faster rate than is the white segment, the number of minority students enrolling in medical school has been static for 10 years. The logical question is, "Why?"

While I have no intention of turning this into a sociological or philosophical discussion, I would like to relay some personal experiences I've had in speaking to Philadelphia's inner-city, public school students. At some point during the dialogue, I cannot help but ask, "How many of you have considered becoming a doctor?" I must sadly report that I've often seen no one put up a hand. I am then compelled to ask why no one is interested in the medical profession. Typical answers are, "Medical school is too expensive and takes too long," and "Scholarships are no longer available." Other students claim they are going to "make it" on sports scholarships and hope to become professional athletes.

As I said, this is no time for a sociology lecture; but it may be time for us as a profession to look at ourselves and determine whether or not the decision of these students not to *even consider* entering medicine is not only a loss to them, but also to the medical profession. On a greater scale, it may even be our nation's loss.

I recently contacted the AMA for statistics on minorities entering medicine, as well as where minority physicians go to practice upon completion of their training. I was sent a copy of a *New England Journal of Medicine* article which tracked minority graduates from U. S. medical schools to determine where they eventually practiced. The study showed that a larger portion of minority graduates chose primary care specialities, which government surveys show are desperately in need of more physicians. In addition the study showed that significantly more minority physicians practiced in locations designated as Health Manpower Shortage Areas by the federal government.

If the study is indeed correct, and if we accept that it is our humanitarian mission as healers to put forth our best effort and serve everyone in our nation, then the low number of minority students enrolled in medical school is not something we can afford to ignore or tolerate.

Despite the harsh realities of the above, I am still optimistic. Medicine has been, and will remain for me, the finest profession anyone can choose. For the profession's and future nation's well-being, though, all physicians must commit to assuring that opportunities exist for individuals from all socioeconomic backgrounds to join and contribute to medicine. In so doing, we will all benefit and better serve our patients.

Dr. Lucas-Fehm, a Philadelphia radiologist, was on the board of the Philadelphia County Medical Society and was chair of its Young Physician Section during 1991-92.

Most outpatient rehab facilities.

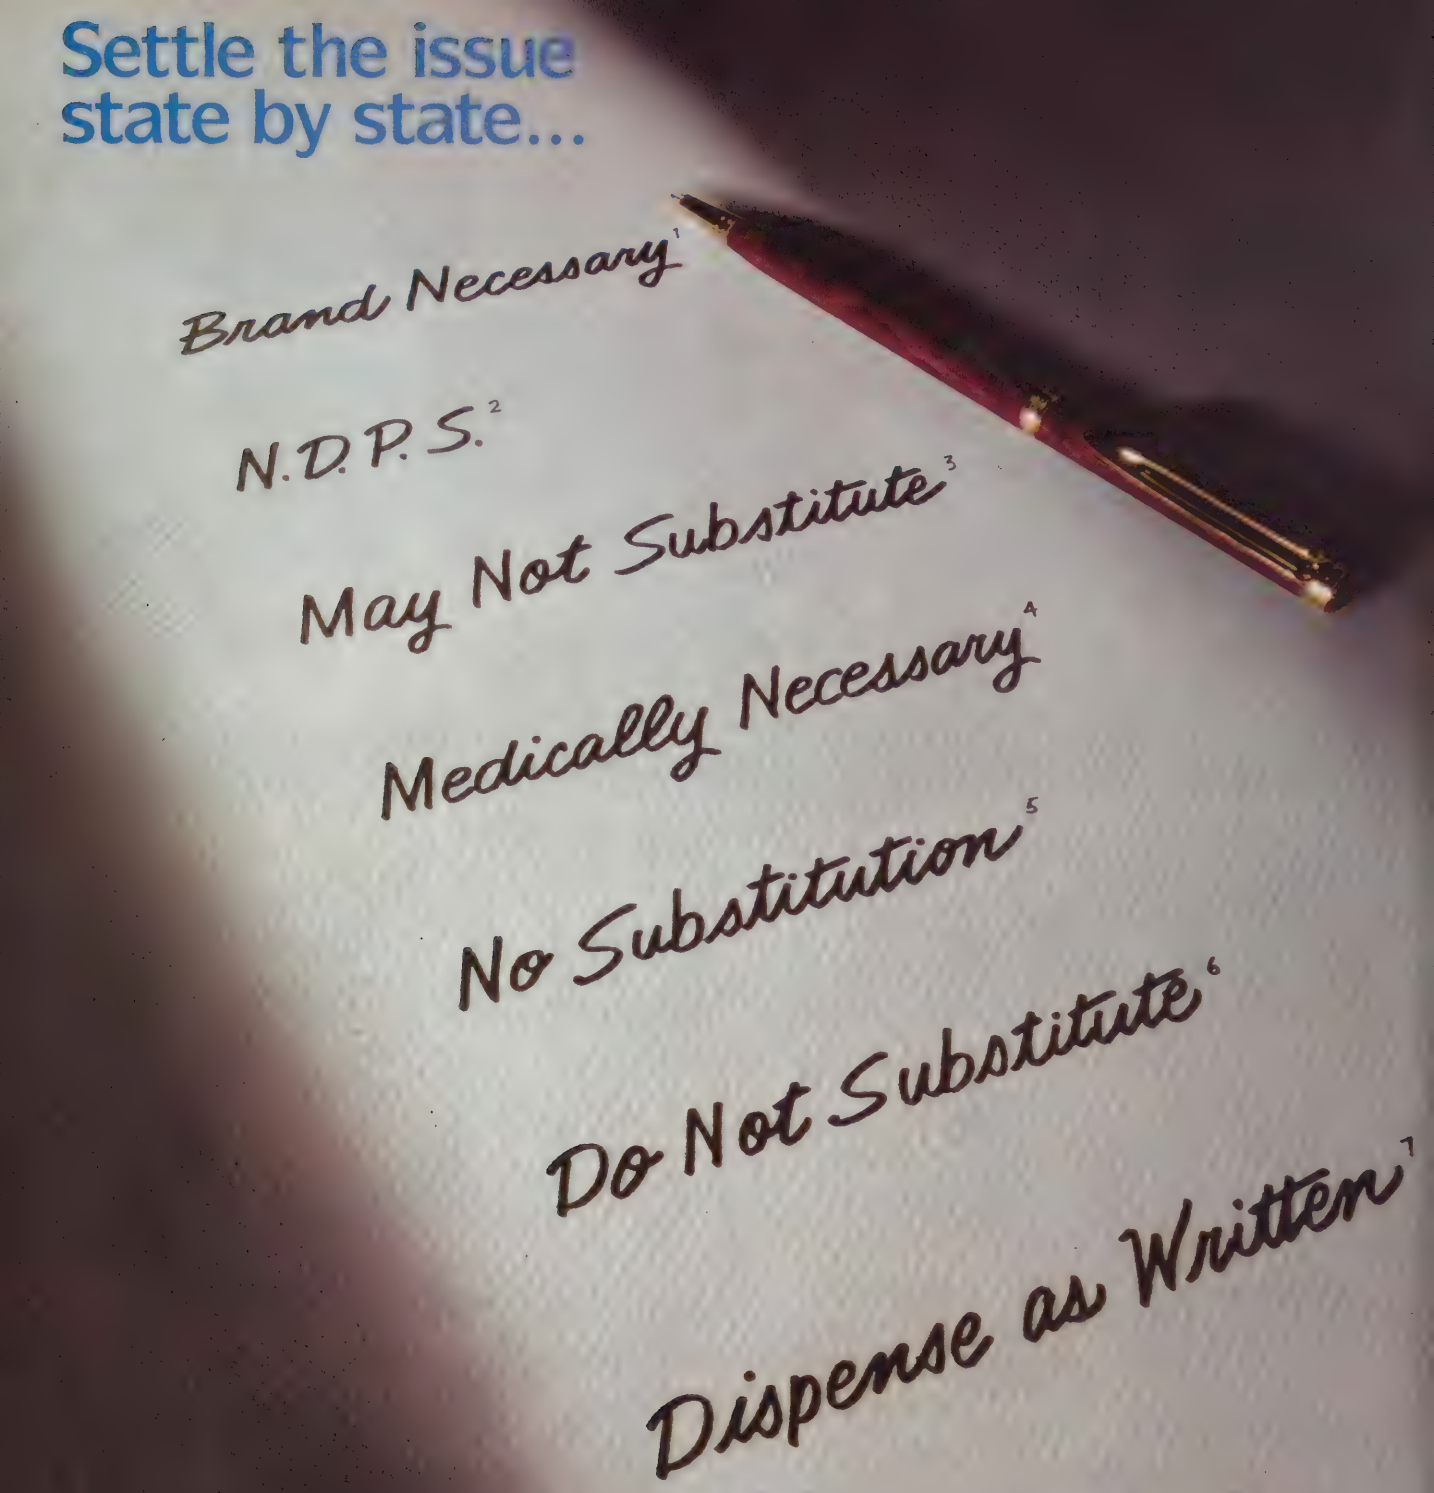
Bryn Mawr Rehab Outpatient Services.

Most outpatient rehabilitation facilities are single service providers, offering physical therapy to treat conditions such as sports injuries and back pain. At Bryn Mawr Rehab, we do this — and offer an array of individualized programs and specialized services.

A coordinated multi-service approach
Treatment might include a coordinated program of physical, occupational and aquatic therapies for a person with arthritis. Driver's evaluation and speech therapy for an individual who has sustained a stroke. A work hardening program to help someone get back on the job.

A collaborative process is the best process
Our focus is on maximizing outcome. Collaborating with you, your patient and, as needed, your patient's family, we are able to tailor a program to best suit the patient's individual needs.

Specialized services are a big part of our multifaceted approach
Unique, specialized services such as adapted driver education, aquatic therapy, equestrian therapy and rehab engineering assist patients in achieving the best possible outcome for their lifestyle.



Call our Outpatient Services Department at **(215) 251-5503** to learn more about our multifaceted outpatient programs.

YOU CAN IMPROVE TECHNOLOGY AND STILL BE STUCK IN THE SAME JAM

Technology is supposed to make your people more productive, your practice more competitive. We anticipate how technology will affect not only processes, but the structure of your practice as well. The Valley Medical Management concept revolves around a team of reimbursement specialists, managers, systems analysis and CPA's. This is the formula for our success. Our approach is scientific, comprehensive, and informative. Services provided include:

- ✦ Practice Reviews
- ✦ Administrative & Financial Management
- ✦ Billing
- ✦ Hardware/Software

Our objective is to make you a more successful professional.

SPECIALISTS IN MEDICAL PRACTICE MANAGEMENT

"Unfortunately,

he was already sitting in my examining room. This guy was a walking liability suit looking for a victim. He was angry, non-compliant. It was one of those rare, no-win cases and, well, I guess my number was up.

Then I remembered PMSLIC. So I stepped into the next room and gave them a call. They put me in touch with a member of their Risk Management team, who advised me of the relevant legal issues and the implications of each of my alternatives. Right on the spot. As a result, I was able to make the best medical recommendation with the peace of mind that comes from knowing my legal interests were also protected. I guess that's what it's all about. Peace of mind. The kind you only get from people who really take the time to help. That's excellent service. I'll never change carriers."

14 The Challenge Ahead

This month the State Society will inaugurate Donald G. Ferguson, MD, as its 143rd president. In this introductory interview, Dr. Ferguson describes his most significant challenge for the year to come and offers members insight into his objectives.

Cover photo by John Maietta, Harrisburg

Health Care Reform

Health care reform has quickly become one of the nation's most talked about subjects. Politicians and other groups are scrambling to develop a system suitable for America from various alternatives. Yet, the reform may require even more, including careful study of other health care systems and perspectives from the physicians working within them.

MEDIGRAM

SOCIETY OPPOSING RULES COMMITTEE CHANGES TO WORKERS' COMP: The State Society is strongly opposing House Rules Committee amendments to House Bill 2140 addressing workers' compensation. The amendments, approved September 23, reduce the cap on medical fees to 117 percent of Medicare, remove the annual update, provide a permanent tie to Medicare, and remove provisions allowing the negotiation of fees. At press time, the governor had called a special session of the legislature for October 5 to address the issue.

IRRC APPROVES GENERAL ASSISTANCE CUTS: Despite opposition from the Society and other health care providers, patients, and consumer advocates, the Independent Regulatory Review Commission (IRRC) on September 2 accepted as approved the governor's proposal to control welfare costs by cutting medical and dental benefits through the state's General Assistance program. IRRC notified the House Health and Welfare Committee of its decision on September 21. At press time, the committee, which originally opposed the proposal, was considering reporting a concurrent resolution calling for disapproval of the regulations.

RURAL HEALTH CARE BILL PASSED: The House of Representatives on September 23 unanimously passed House Bill 1633, which addresses rural and inner-city health care issues. Supported by the Society, the bill encourages health care professionals to practice in medically underserved areas. Specifically, it establishes a health care professional school and loan fund in the Pennsylvania Higher Education Assistance Agency.

SOCIETY SUPPORTING "YOUTH AGAINST TOBACCO:" The Society is joining the Departments of Health and Education as a partner in "Youth Against Tobacco," an on-going project aimed at reducing tobacco usage among teenagers. The three groups are planning a series of activities throughout the current school year, including a promotion in conjunction with the Great American Smokeout in November. For information call the Society's Department of Public Affairs at 1-800-228-7823.

AUXILIARY DONATES $5,850 TO AID HURRICANE VICTIMS: The Pennsylvania Medical Society Auxiliary to date has donated $5,850 to aid victims of hurricanes Andrew and Iniki. The money was distributed in consultation and cooperation with Florida and Hawaii medical auxiliaries. Physicians and county societies wishing to make donations may do so by sending a check payable to: The Educational and Scientific Trust, Pennsylvania Medical Society. Please specify that the donation is for the Auxiliary Emergency Assistance Fund.

SOCIETY, AGING JOIN TO BATTLE DEPRESSION IN THE ELDERLY: Society President Robert N. Moyers, MD, and Secretary of Aging Linda M. Rhodes in late summer announced a joint effort to improve the diagnosis and treatment of depression in the elderly. The Educational and Scientific Trust, on behalf of the Society, kicked off the program by sending surveys to 3,000 physicians in the state to determine their awareness of and treatment methods for depression in the elderly. Focus groups of physicians were also conducted by the Trust in September. A comprehensive report is expected later this month.

57 RESOLUTIONS RECEIVED FOR HOUSE OF DELEGATES: The October issue of the Society's *Executive Report* included summaries of the 57 resolutions submitted for the October 23-25 meeting of the House of Delegates in Philadelphia. Resolutions address AIDS/HIV issues, health care reform, tort reform, generic drugs, family violence, and a number of other important issues. Also, a special forum on health care reform will be held Friday evening. Coverage of the annual meeting will be published in the December issue of PENNSYLVANIA MEDICINE.

"**N**early ¾ of the malpractice lawsuits that doctors lose reflect poor patient communication," according to a recent article in the *Wall Street Journal* (March 17, 1992). Did you know something as simple as empathy could help protect you against medical malpractice litigation?

Curing and Caring—a half-day seminar sponsored by PMSLIC—addresses this vital component of medical care and how it could make a difference in your own practice.

And to demonstrate how important this seminar can be to your practice, PMSLIC is offering its insured participants a 10% credit on 1993 policy premium. Any other physician attending the seminar also is eligible for the discount upon obtaining 1993 malpractice coverage with PMSLIC.

Curing and Caring will be presented at the following locations, with a morning and afternoon session at each:

Harrisburg–
Wednesday, September 23

Erie–
Wednesday, September 30

Pittsburgh–
Thursday, October 1

Wilkes Barre/Scranton–
Tuesday, October 20

Philadelphia–
Wednesday, November 4

King of Prussia–

THE PRACTICE OF MEDICINE: KNOWLEDGE, SKILL, EMPATHY.

THE STRENGTH OF YOUR PRACTICE DEPENDS ON HOW WELL YOU COMBINE ALL THREE.

IF YOU'RE NOT PAYING ATTENTION TO EMPATHY, YOU MIGHT AS WELL HANG IT UP.

PMSLIC

Who's Setting Your Priorities?

John W. Mills, MD
Medical Editor

"Let's have some direction from the membership and delegates—and, unlike the public, if we feel it's important, let's ante up..."

At least once during my relatively brief stint as medical editor of this magazine, I've alluded to my own financial dilemma brought on by a number of circumstances in the OB/GYN specialty. Perhaps I was a victim of the changing face of medicine. Certainly the malpractice crisis of the late '70s was a major contributing factor coupled with the wild inflation of the early '80s.

I only mention this to set the stage, if you will, for this month's editorial, for I sense that the Pennsylvania Medical Society also finds itself in the midst of enormous economic pressures as it tries to deal with the complex issues facing health care in Pennsylvania.

The public and the legislature seem intent on controlling the practice of medicine statewide, and Congress is no slouch either in promulgating, through the Health Care Financing Administration (HCFA), ever more ominous "R&R" (Rules and Regulations in this case) for us to obey as we attempt to diagnose and treat older and sicker patients.

When budgets are tight, we must scrutinize them even more closely as we try to allocate decreasing funds to increasing costs. Meanwhile, the State Society is caught up in a legal maelstrom—spending large sums of money for legal expertise and waging our battles with government—frequently for naught.

Why do we do this? The answer simply is because our members expect us to. But, once the process is begun, many of these same members don't want to compromise—they want it "their way"—period. I really don't feel that the average Society member has any concept of the time and effort that goes into all these battles, along with the enormous sums of money. I submit that we may be digging our own financial grave.

We simply don't have the wherewithal to do "all" for all our members. Your board, between House of Delegates' meetings, spends countless hours debating our stances and our courses of action, and your staff at the Society does yeomen's service in carrying out those mandates.

To balance a budget weighted by these herculean legislative and regulatory affairs, the Society's Finance Committee has directed a very serious review of the proposed expenditures for 1993 and may cut some items.

Even though PENNSYLVANIA MEDICINE has won two awards in the past year—one national and one regional—for its new look and contents, it continues to lose money because advertising is down—a nationwide trend. Thus, your publication is one of the items that may be scaled back or eliminated.

My personal reaction to this is negative, and I'm not paid for my work at PENNSYLVANIA MEDICINE, so I have no financial ax to grind here. I feel it would be a serious mistake to limit or cut the primary regular means of communication the Society has with you—our members. It is a tangible return for our dues which strives to keep us all informed.

As a freshman trustee, I'm probably still wet behind the ears, but I truly believe the House of Delegates needs to address the Society's course over the rest of the decade so that we don't go broke trying to do the impossible. Let's have some direction from the membership and delegates—and, unlike the public, if we feel it's important, let's ante up and be willing to pay for it with increased dues.

Our primary focus should be good, humane medicine. We should attempt to practice the best medicine we are capable of with humility, despite the adversarial circumstances. That's the way you win public support, not by publicity campaigns!

Don't sweat the small stuff.

Perhaps most of our "tilting at windmills" is small stuff, after all.

The Shortest Year

Robert N. Moyers, MD

Thinking back over my year as president is a bit like trying to remember all of the stops on a nine-cities-in-six-days vacation. I've covered a lot of ground, and I am more aware than ever of the boldness of our enterprise. Our profession and our state are both impressively large, diverse, and influential.

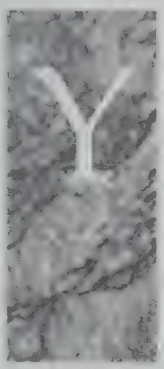
My goal, the same as that of our predecessors since 1846, has been to ensure physicians a place at the table where policies are being formulated. I have seized every opportunity to make the physician's voice heard above the general cacophony in public discourse. Together with other Society leaders, I have refused to allow our patients and their concerns to be ignored in the current debates that all too often start and end at cost control without considering the questions of access and quality. And thanks to the efforts of Society leadership and staff, we have had successes in many arenas.

I had the opportunity to turn the spotlight on our most critical concerns before congressional and state legislative hearings on health care reform and other matters in Washington, Harrisburg, Hershey, Pittsburgh, and Erie. Meetings with Vice President Dan Quayle, Presidential advisor Gail Wilensky, Senators Arlen Specter and Harris Wofford, and numerous congressional representatives served as occasions to bring the insights of Pennsylvania physicians to the national forum.

Within the state, we are continuing to strengthen our already well-regarded governmental presence as we deal with indigent care, auto insurance, workers' compensation, and tort reform.

The Society is now a member of a health care reform study group, convened by Representative Dwight Evans (D-Philadelphia), supported by the Pennsylvania Business Roundtable and including representatives from health care, insurance, and business.

We made it a point to involve ourselves in Governor Casey's Economic Development Partnership, even though the governor did not see fit to include physicians or other health care professionals in this group charged with creating the "ideal" health plan for Pennsylvania. We had representatives at every meeting, and we voiced our view of problems in the current system and identified serious flaws in the partnership's proposal for a mandated single-payer system.



Physician input in the public arena is not only desirable but absolutely necessary. This is true in many, many legislative and regulatory matters, but it has never been more critical than in the current and future debate over health care reform.

We are the advocates for our patients, and we derive much of our professional credibility from that role. We must also be strong advocates for our professionalism and guard against allowing ourselves to become mere pawns, i.e, "providers," in managed care systems created and controlled by others.

Our organizational strength will be crucial in the months and years ahead, as we represent our members and our patients in the restructuring of the health care system.

Our own Long Range Assessment Committee is developing a Pennsylvania Medical Society proposal for health care reform that we believe will gain physicians a prominent seat at the table as the debate goes on.

It has been a busy, challenging year, as I have tried to carry the message and mission of the Pennsylvania Medical Society to all who offered me the opportunity. My experiences served only to reinforce my respect for you—my honorable, hard-working, dedicated colleagues—and my commitment to unity. I am proud to be a member of this profession. Thank you for giving me the honor of serving as your president.

ou're on solid ground with the Dodson Plan.

More than 75 years ago, Bruce Dodson, Sr. pioneered the concept of the dividend plan for workers' compensation insurance. Dodson Group has been helping businesses like yours save on premium costs ever since.

The Dodson Plan gives you the opportunity to earn a dividend each year, depending on the claim experience of all insured members. We carefully select those who participate, creating the greatest potential for you to save.

Pennsylvania Medical Society endorsed the Dodson Plan in 1973. Since then, participating members have earned a total of **$2,309,240** in dividends. Share in the savings!

You're on solid ground with Dodson.

REACTING TO ACT 6

Editor's Note: The following is excerpted from a letter written by the physicians at Cumberland Valley Neurosurgical Consultants (CVNC), Chambersburg. The letter was originally sent to all Pennsylvania neurosurgeons and CVNC referring physicians, as well as other select legislators and individuals in the state.

It is with intense regret that we must inform you that Cumberland Valley Neurosurgical Consultants (CVNC) will no longer accept referrals of patients whose medical care is covered by automobile insurance except in true medical emergencies. This action is necessitated by the provisions of Act 6 of Pennsylvania law, which we hold is discriminatory, unethical, unfair, and restrictive to any reasonable standard of medical practice. We want to make it very clear that we will, of course, respond and provide care for cases where we are called to the Emergency Department or otherwise asked to see patients with medically emergent conditions. For non-emergent situations, however, we must ask that you refer patients elsewhere, preferably to a trauma center, where Act 6 provides for payment of the full reasonable fee schedule for automobile insurance covered care.

CVNC has been very fortunate to have our practice grow to the point that we must cut back on some services provided. Whereas we would like to provide full services, including services for automobile insurance patients, we do not have the manpower sufficient to do so. We have been trying for several months to recruit an additional neurosurgeon and an additional neurologist to join us, but the unfavorable environment for medical practice in Pennsylvania resulting from Act 6 in large part, as well as legislation preventing balance billing for Medicare services and the pending legislation tying workers' compensation to Medicare, has made it impossible to attract a thoughtful physician to join us....

To make it clear that the decision not to see patients under the provisions of Act 6 is not monetarily driven, we point out that we will still be pleased to see Medicare patients, Medical Assistance patients, and pro-bono patients, all of which pay less that Act 6 provides. Clearly, then, it is not the pecuniary aspect alone but the principle of the situation that compels us to cease seeing Act 6 patients. We hold that at best, Act 6 is discriminatory, unfair, ill-founded, and counterproductive to a reasonable standard of medical practice...We will not, we cannot, in good conscience, participate in such an ill-founded plan which, if allowed to continue, will lead to a deplorable degradation of medical care in this commonwealth.

Whereas physicians as a profession have recognized their responsibility to make a great contribution to the medical care of the elderly and have demonstrated their acceptance of this responsibility by caring for Medicare patients at a reduction in cost for this care to nearly one-half of the usual, reasonable cost, the profession cannot extend this reduction to automobile accident patients, workers' compensation patients, and on and on. Whereas the elderly cannot, in many cases, earn the required funds to pay for their medical care, people who desire the privilege of driving automobiles should be required to take responsibility for the reasonable cost of their medical care resulting from driving automobiles...To require physicians to pay a disproportionate amount of the cost of this care, as Act 6 does, is to teach abandonment of personal responsibility for each and every driver of an automobile in this Commonwealth...Our cessation of providing care for patients under Act 6 is our vote against abrogation of personal responsibility....

"We must react, [and] our cessation of seeing Act 6 patients is our first step in this reaction. What will be second? Workers' compensation?"

We have heard several different politicians say that they are not aware of any case of more difficult access to medical care because of Act 6. We have heard them say that they felt comfortable about putting workers' compensation care under the same type of coverage, because physicians had not reacted adversely to Act 6....

We don't want to be politically active, to have to react against ill-founded, harmful legislation. We'd like to practice medicine, to thrive on the gratitude of our patients and spend any time left over in upgrading our skills and knowledge. But the deplorable performance of our politicians has now made this impossible. We must react, [and] our cessation of seeing Act 6 patients is our first step in this reaction. What will be second? Workers' compensation?

Cost analyses demonstrate that the parasitic administrative cost of medical care is more than twice, and some analyses would indicate even three or four times the cost of physicians in providing medical care—and this does *not* include the administrative cost within the physician's office forced upon the physician by insurance companies, lawyers, and government. Cost analysis of physicians' practice overhead shows it to be in the 40 to 45 percent range. The physicians cannot make this cost go away, no matter how hard he/she might try. It is there, and it is steadily rising.

From talking with politicians, it is very clear that they have no concept at all that if you cut back a physician's fees by 40 percent, you cut his/her income by two-thirds, since the cut in fees must be taken from the 60 percent of office revenue left after overhead—it obviously cannot come out of the overhead....

If our legislators were really interested in solutions to the crisis in the cost of medical care, they would demonstrate some ingenuity in attacking the parasitic waste cost of medicine, rather than attacking the physician providers of medical care, whose cost pales in comparison to the cost of the parasitic administrative waste perpetuated by the insurance companies, the legal system, and the government....

When we started the practice of neurosurgery in Chambersburg, Pennsylvania could equal any state in the union in providing a favorable environment for the practice of medicine. Since then, our governor and politicians, devoid of any spark of originality, inventiveness, or reason, have only been able to copy from the example set by Dukakis' Massachusetts by enacting the Medicare balance billing law [and] Act 6, and now they are pushing towards a similar debacle with

workers' compensation. If this comes to pass, then we submit that the Commonwealth of Pennsylvania will have become at least tied (with Massachusetts and West Virginia) for the worst environment in which to practice medicine in these United States.

"As ye sow, so shall ye reap." The harvest, in this case, we fear, will be the loss of good physicians engaged in a reasonable standard of practice in this commonwealth. By ceasing to see Act 6 patients at this time, Cumberland Valley Neurological Consultants is trying to do what little it can to prevent this bitter harvest.

SPEAKING OUT ABOUT THE HEALTH CARE CRISIS

Editor's Note: The following Letter to the Editor is reprinted with permission from the September 1992 issue of Consumer Reports. *It was written by the State Society's president in response to the article, "Wasted Health Care Dollars," which was published in the July 1992 issue of* Consumer Reports.

"Physicians want meaningful reform, but they fear a "new" plan that merely trades one problem, such as the uninsured, for another, such as strict bureaucratic rationing of health care."

The U.S. can't afford continued health care inflation. But neither can we afford to be misled about the causes. Technology certainly has added to costs, but who wants to forgo those options when they or a loved one is a patient? Your report also ignored social problems as a major cause of massive increases in health care demand. The U.S. has higher per-capita rates of AIDS, violence, accidents, smoking, drinking, substance abuse, sexually transmitted disease, and poverty than do most nations. You cite high U.S. infant mortality as a quality-of-care problem. The truth is that our social ills kill more babies, while our advanced technology gives us the hope of saving even the tiniest. Babies deemed nonviable in other countries get treatment in the U.S. Also, malpractice litigation affects costs far more than your report suggests. Whether it's cesarean sections, MRIs, or fetal monitors, the threat of litigation drives utilization. One liability insurance company, for example, had 40 times as many claims over failure to do cesareans than claims for doing the procedure. Physicians want meaningful reform, but they fear a "new" plan that merely trades one problem, such as the uninsured, for another, such as strict bureaucratic rationing of health care.

The Challenge Ahead

Maria T. Montesano
Assistant Managing Editor

This month the State Society will inaugurate its 143rd president. This article offers an introduction to the physician who will assume that role and overviews his most significant challenge for the year to come.

"Someone in our profession has to work to keep the rest of us free to be able to take care of our patients as best we know how."

Donald G. Ferguson, MD, 143rd president of the Pennsylvania Medical Society

Children are often asked, "What do you want to be when you grow up?," and their answers vary and change as they grow. But that was not the case with Donald G. Ferguson, MD. He says that "from as early as I can remember, I wanted to be a doctor."

On becoming and being a doctor

Dr. Ferguson, a second-generation physician, grew up and was educated in the suburbs of Pittsburgh. He received his bachelor's degree and medical degree from the University of Pittsburgh; and after completing an internship at the South Side Hospital of Pittsburgh, he entered the Army: "At that time, everybody had to spend some time in the military, and I got away not only from Pittsburgh but from the United States for a while."

Upon his return from service, he headed to New York to train at the Memorial Center for Cancer and Allied Diseases, and then to Philadelphia where he joined the faculty of Jefferson Medical College. Eventually he returned to the "new" Pittsburgh, where he has been in private practice as a specialist in diagnostic radiology and nuclear medicine for most of his career.

"I think I continue to enjoy what I'm doing just about every day of my life," he says, "because I know that I'm trying to do something to build; something to help our profession; and something where, at the end of the day, I have a feeling of accomplishment and hopefully have made somebody feel a little better in the process." That sentiment, coupled with a genuine concern for the profession of medicine, has led Dr. Ferguson to his position as president of the Pennsylvania Medical Society.

Concern for the profession

Dr. Ferguson has been a member of organized medicine for a number of years: "I think it's a matter of giving something back to your profession for all that the profession has been to you," he says. He started by serving county and specialty societies, but "over the years that has evolved into becoming more interlocked with the State Society and the American Medical Association."

He joined the State Society in 1954 and has served as chairman of the Council on Governmental Relations; vice chairman of PAMPAC; and a member of the Executive Committee, the Council on Legislation, the Task Force on Medical Liability Reform, and many others. He has also served on the AMA delegation since 1987. For Dr. Ferguson, becoming president "was just a natural progression."

On organized medicine

The basic function of organized medicine, he says, is "to protect the patients that we serve and protect our ability to take care of those patients." Yet he believes outside forces have created added pressure over time, and the constraints physicians must work under have become more difficult each year.

The most significant of such constraints today, according to Dr. Ferguson, "is the increasing regulation and the increasing intrusion of government into physicians' offices—into the lives of not only our profession and our auxiliary professions, but the way in which we are able to treat our patients."

"It has been a gradual process of increasing regulation ever since I was aware there was such a thing as government and that it had any direct influence on the practice of medicine," he says. It certainly is becoming more difficult to face a patient one-on-one and do what you think is proper without having to be concerned about who else is interested in the process and who else will have an influence on the process."

The challenge ahead

Dr. Ferguson believes organized medicine does a great deal to keep the patient-physician relationship alive and protected. Yet, many challenges exist for any incoming

president, and he is also fully aware of that: "Challenges have always been there and they always will be. The nature of any challenge depends on the climate of the day, but the most significant challenge is still what it has always been—to be able to take care of our patients as best we know how with as little interference with good medicine as we can hope to achieve."

He explains: "More and more we're being faced with constraints—monetary constraints, budgetary constraints, regulatory constraints—such as those I was talking about before. The most significant thing [medical] societies are able to do for physicians is to minimize [outside] interference with relationships with their patients."

"Someone in our profession has to work to keep the rest of us free to be able to take care of our patients as best we know how," he continues. "That's what I will try to do, and that's what we have to work to do. That's what medicine is all about—taking care of people."

Message to the membership

Each year the president speaks to the House of Delegates about the year to come. Dr. Ferguson's message this year might very well resemble the following message he offered for the membership as a whole:

The one thing I'd like to tell the members of the Pennsylvania Medical Society is to stay in there. Continue to take care of your patients. We will help you do it, and please help us do it.

The best thing you can do for your patients is to speak up when you know that their welfare is being threatened. Speak up to us—the Pennsylvania Medical Society, the American Medical Association, your county society. Speak up to your legislators. Speak up to AARP. Speak up to anyone who will listen and help when you say, "I need this for the benefit of my patients." Stay involved. Get involved. Keep working to keep your profession free.

Dr. Ferguson resides in Canonsburg with his wife, Anne. He will be sworn in as the State Society's 143rd president on Saturday, October 24, during the Society's annual business meeting.

Patients Are A Virtue

Canadian Physicians Debate Reform and Repairs to an Eroding System

David Woods

Health care reform has become a concern of international proportion and remains a top issue of discussion, as seen in this article covering the Canadian Medical Society's annual meeting held in Newfoundland in July.

Canadian physicians must say no to further erosion of that country's health care system; they must help to restructure the system rather than dismantle it; they must educate the public—their patients—about the costs of the health care system and should expect that the public will bear some responsibility for its own health care; and, above all, physicians must continue to be advocates for their patients.

That was the message of incoming Canadian Medical Association (CMA) president, Ronald F. Whelan, MD, in his inaugural speech to some 700 delegates attending the CMA's 125th annual meeting and the first ever to be held in the province of Newfoundland.

Dr. Whelan went on to say that "the velvet glove is not working. Government is not listening. They do not believe that physicians are serious advocates for their patients. What they do believe is that physicians have only their own interests at heart. In becoming creditable advocates of our patients," he added, "we must show fang and claw."

Dr. Whelan, a St. Johns' radiologist and a former chairman of the board of the 46,000-member association, said that he was assuming the presidency at a time when the Canadian medical profession is undergoing a great deal of stress, when physicians see their role as changing. He urged that MDs must be the agents of that change rather than its victims.

In fact, delegates to the association's general council, or "Parliament," voted strongly in favor of a proposal that would allow for the injection of other forms of funding into the now totally government-funded (or monopsonistic, "single payer") universal Medicare system that has been in place in Canada since the early 1970s.

Delegates first of all defeated a Quebec resolution calling for the CMA to disassociate itself from any attempt to enshrine "the present monopolistic medical insurance model in the Canadian Constitution." They later overwhelmingly endorsed a somewhat similar resolution calling for the CMA to provide leadership in urging governments to amend current legislation to permit "the emergence and development of both alternative and complementary private health care insurance and health care arrangements to meet the needs of patients and physicians, particularly in matters of free choice, access, availability, and quality."

Speaking from the floor, Victor Dirnfeld, MD, a Vancouver internist who is vice chairman of the CMA's Council on Health Policy and Economics, said that this resolution was an idea whose time has finally come. He said that provincial governments have a monopolistic position so far as funding is concerned—a position that Dr. Dirnfeld described as uncomfortable, unreasonable, and all-controlling. He was careful to point out that the resolution, far from being an attack on Canada's publicly popular universal Medicare system, was rather an infusion of funds that will reduce fiscal pressures on the system and expand services.

In an interview, Dr. Dirnfeld said that he felt there had been a leftward drift in organized medicine in Canada. Some have despaired that there has been an abandonment of conservative economic philosophy by the mainstream leadership for what have appeared to be pragmatic reasons. The reason for this, he said, is a perceived need to achieve greater cooperation from provincial governments. In essence, organized medicine has tried to buy peace—and that, he added, hasn't worked.

Noting that a generation of Canadian MDs has known no other form of practice than the current universal government-sponsored approach, Dr. Dirnfeld said the

"...the evils of this kind of system have manifested themselves, and frustrated and angered the majority of the profession."

David Woods, a former editor-in-chief of the **Canadian Medical Association Journal**, *is vice president, publications, ECRI, Plymouth Meeting.*

evils of this kind of a system have manifested themselves, and have frustrated and angered the majority of the profession. Americans and their politicians should be very careful before they embark on a Canadian style health care system, he concluded, because such a system results in delays, rationing, and lowered standards.

Augustin Roy, MD, registrar and president of Quebec's College of Physicians and Surgeons, pointed out that Canada does not have the fiscal resources to offer unlimited, free health care. "We are living above our means," he said, and therefore can't enshrine "the present monopolistic medical insurance model" in the Canadian Constitution.

Warming to this theme, Dr. Roy said: "We have spent like crazy sailors for the past 20 years, but we are going to be in economic difficulties for a long, long time...the Canada Health Act has us in a straightjacket. It's too restrictive; it's not a religion, Medicare. It can be changed."

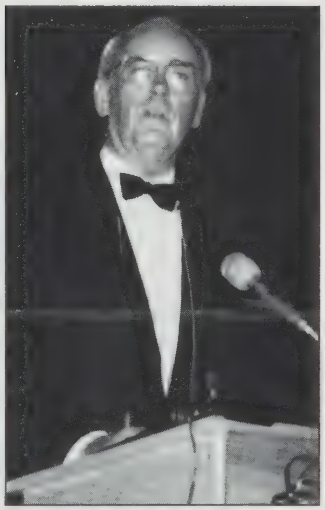
That same Canada Health Act—which precludes any form of patient payment, such as user fees—also removed the right of Canadian physicians to engage in so-called extra billing (i.e., billing above fee schedules negotiated by each province's physicians with their provincial government) because health care in Canada is a matter of provincial jurisdiction.

A further resolution, proposed by the British Columbia delegation, called for changes to the Canada Health Act "to allow creative problem-solving initiatives and to permit the additional funding measures that are necessary for the continued implementation of these principles—the survival of high-quality health care for all Canadians." The principles referred to are the five tenants upon which Canada's Medicare system was founded: that it be universal, comprehensive, portable, accessible, and publicly administered.

General Council approved the resolution. Hedy Fry, MD, a former president of the British Columbia Medical Association, had proposed the resolution and commented that funding cuts are compromising those principles.

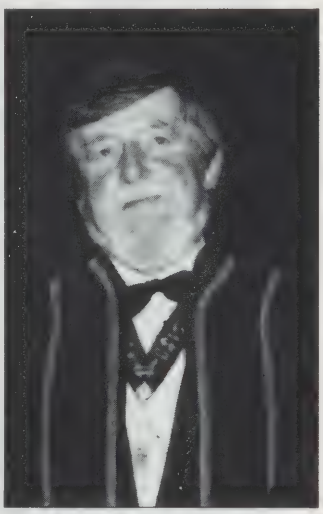
Physician remuneration

Concerning physician remuneration, General Council then passed a resolution calling for fair and reasonable remuneration for the full spectrum of professional activities, the liberty to choose among payment modalities, the paying agencies to fulfill the terms of agreements negotiated with legitimate agents of the medical profession, and any failure of negotiations relating to physician compensation to be resolved by a mutually agreed upon and timely dispute-resolution mechanism.



After presenting an addendum to this resolution calling for paying agencies (i.e., government) to be obliged to honor mutually agreed upon negotiated fee schedules, Dr. Fry said the addendum was intended to "stop the totalitarian behavior by governments," a reference to the present situation in British Columbia where that province's socialist New Democratic Party (NDP) government has allegedly reneged on a previously agreed upon fee settlement with the province's 6,000 physicians.

This state of affairs caused a number of British Columbia delegates to the Newfoundland convention to sport black, short-sleeved T-shirts bearing the inscription "I'm a mad Doc." Explaining this phenomenon, one of the T-shirt wearers, Bill Thomas, MD, a Vancouver gynecologist and a former CMA president, said it is a way of expressing outrage at the NDP government's reneging on election promises to treat physicians fairly and reasonably. In fact, said Dr. Thomas, it has done the opposite.



The NDP government has removed the master agreement on negotiated fee schedules between the government and the BCMA. It wiped out the agreement between MDs and the government on such shared responsibilities as accreditation and patterns of practice. Right now, he said, there is no fee schedule agreement, and so there is no basis for negotiation. Furthermore, said Dr. Thomas, the previous government had agreed to put in place a government-funded pension scheme for physicians, but the NDP canceled it.

As well as the "mad Doc" scheme, many British Columbia physicians have taken to placing in their offices photographs of provincial politicians bearing the caption, "This person may be dangerous to your health." Has the campaign worked? Well, the government gave itself the authority to cap the gross income for specialists and family physicians. In addition, there is a global cap on all health care funding.

To underscore this, former CMA president John O'Brien-Bell, MD, said everything physicians earn, they earn by hard work based on modest fee schedules. He pointed out that the ex-president of a British Columbia hospital earns $200,000

AMA President Elect Joseph Painter, MD

Ronald F. Whelan, MD, new Canadian Medical Association President

YOCON®
YOHIMBINE HCl

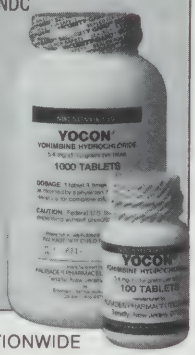
Description: Yohimbine is a 3a-15a-20B-17a-hydroxy Yohimbine-16a-carboxylic acid methyl ester. The alkaloid is found in Rubaceae and related trees. Also in Rauwolfia Serpentina (L) Benth. Yohimbine is an indolalkylamine alkaloid with chemical similarity to reserpine. It is a crystalline powder, odorless. Each compressed tablet contains (1/12 gr.) 5.4 mg of Yohimbine Hydrochloride.

Action: Yohimbine blocks presynaptic alpha-2 adrenergic receptors. Its action on peripheral blood vessels resembles that of reserpine, though it is weaker and of short duration. Yohimbine's peripheral autonomic nervous system effect is to increase parasympathetic (cholinergic) and decrease sympathetic (adrenergic) activity. It is to be noted that in male sexual performance, erection is linked to cholinergic activity and to alpha-2 adrenergic blockade which may theoretically result in increased penile inflow, decreased penile outflow or both.

Yohimbine exerts a stimulating action on the mood and may increase anxiety. Such actions have not been adequately studied or related to dosage although they appear to require high doses of the drug. Yohimbine has a mild anti-diuretic action, probably via stimulation of hypothalmic centers and release of posterior pituitary hormone.

Reportedly, Yohimbine exerts no significant influence on cardiac stimulation and other effects mediated by B-adrenergic receptors, its effect on blood pressure, if any, would be to lower it; however no adequate studies are at hand to quantitate this effect in terms of Yohimbine dosage.

Indications: Yocon® is indicated as a sympathicolytic and mydriatic. It may have activity as an aphrodisiac.



Contraindications: Renal diseases, and patient's sensitive to the drug. In view of the limited and inadequate information at hand, no precise tabulation can be offered of additional contraindications.

Warning: Generally, this drug is not proposed for use in females and certainly must not be used during pregnancy. Neither is this drug proposed for use in pediatric, geriatric or cardio-renal patients with gastric or duodenal ulcer history. Nor should it be used in conjunction with mood-modifying drugs such as antidepressants, or in psychiatric patients in general.

Adverse Reactions: Yohimbine readily penetrates the (CNS) and produces a complex pattern of responses in lower doses than required to produce peripheral a-adrenergic blockade. These include, anti-diuresis, a general picture of central excitation including elevation of blood pressure and heart rate, increased motor activity, irritability and tremor. Sweating, nausea and vomiting are common after parenteral administration of the drug.[1,2] Also dizziness, headache, skin flushing reported when used orally.[1,3]

Dosage and Administration: Experimental dosage reported in treatment of erectile impotence.[1,3,4] 1 tablet (5.4 mg) 3 times a day, to adult males taken orally. Occasional side effects reported with this dosage are nausea, dizziness or nervousness. In the event of side effects dosage to be reduced to ½ tablet 3 times a day, followed by gradual increases to 1 tablet 3 times a day. Reported therapy not more than 10 weeks.[3]

How Supplied: Oral tablets of Yocon® 1/12 gr. 5.4 mg in bottles of 100's NDC 53159-001-01 and 1000's NDC 53159-001-10.

and said, "We are being scapegoated for the problems of Medicare. [Physicians require a charter because] our liberties as a profession need to be attended to."

For some years, and at considerable cost, CMA mounted a legal challenge to the Canada Health Act, but withdrew that challenge provided that "the legitimate concerns of the public, the CMA, and its divisions with respect to the implementation of the act are addressed."

As far back as 1986, CMA issued a policy statement on physician remuneration, which read in part that "the Association upholds the rights of physicians to determine the methods of remuneration and to negotiate their fees with their patients. In determining their fees, physicians should be counseled by the fee guide approved by their provincial associations. CMA believes that the most responsible relationship exists when professional and financial agreements are between the physician and the patient, with fee-for-service as the best method of payment for the great majority of, but not all, medical services. CMA supports provincial medical associations in seeking recognition as the sole bargaining agents for physicians. Time protocols should be established in all negotiated agreements."

That much of this appears to have been eroded has angered many Canadian physicians. As retiring CMA president, Carole Guzman, MD, said in her valedictory address: "Canadian MDs are concerned about the apparent conflict between their role as patients' advocates and their responsibilities to the system, as well as the enormous demands being placed upon them in the area of continuing competence at a time of heightened expectations and increased complexity of medical science...I saw a profession that is angry—justifiably so—about unwarranted public criticism, unfair generalizations about appropriateness of medical services, and illogical conclusions that fee-for-service remuneration is the root of all evil."

An invited guest at the meeting was American Medical Association (AMA) President Elect Joseph Painter, MD, of Houston. According to Dr. Painter, it is clear that the costs of medical care are a concern worldwide, and the pressures in Canada are obviously a major concern. He said the proceedings of General Council were courtly and well organized, with the approach to deliberation on all topics clearly mapped out in advance and based upon comprehensive review and resource material. He added that the thrust appeared to be towards building bridges and forming consensus.

The French National Health Care System—Some Perspectives

Michael S. Marrone, MD
Sandra A. Marrone

When we left for Paris in December 1991, Pennsylvanians had recently elected Senator Harris Wofford largely because he supports national health care. Our country was abuzz with talk about how such a system would work.

Good health care for all citizens is certainly in the national interest, but to work well, a system must be studied and organized carefully. We had heard much about the benefits and the shortcomings of the Canadian and British systems. We thought perhaps France, too, had something to teach the U.S. Therefore, during a visit to Paris last year, we wanted to meet a family physician—a generalist to the French—and learn about that country's program.

Thanks to the efforts of our son's Parisian friends, we met Docteur Gilles Wilmouth at his office in the Montmartre section of Paris on a drizzly Friday afternoon. From him and some research we saw various sides of French national health care that bear careful consideration.

photo by Scott Marrone

Docteur Wilmouth

Dr. Marrone is a family physician practicing in Palmyra and medical director for the Pennsylvania State Police. He is a member of the State Society, past president of the Lebanon County Medical Society, and a diplomat of the American Academy of Family Physicians. Sandra Marrone is the office manager for her husband's practice and a freelance writer.

Learning *about* the French system

When we began to question Dr. Wilmouth, he prefaced his remarks in rough, but understandable English saying, "My own way of work is mine and absolutely mine. So, my answers are mine." He then said he was a "private" physician, one who works *outside* the French health care program.

In the U.S., physicians usually have patients from the public roles—Medicare and Medicaid patients—as well as private-pay patients. But in France one cannot have such a mix because "private is private, and public is public," Dr. Wilmouth explained. *American Medical News* reported in 1989 that 25 to 30 percent of French MDs practice independently from the social insurance system. Like them, Dr. Wilmouth, an osteopathic physician, "won't sign up" and accept the low government fee caps. Instead, he decides his own fees, and patients pay him directly.

Dr. Wilmouth feels strongly that low government fee caps incline participating physicians to do cursory physical examinations, because a physician must see many patients each day to make enough money to pay overhead and to live. The French government now pays 90ff ($18) for an exam. That amount, while low, equals what Pennsylvania pays a family physician for examining a public assistance patient. In France, where a cup of coffee costs the equivalent of $4, $18 for a medical exam seems especially meager.

So, rather than perform a comprehensive physical, the doctor performs a quick one and sends the patient off for a battery of tests and/or x-rays, which the government also pays for, in hopes that a diagnosis turns up in the results.

In Dr. Wilmouth's opinion, the French government wastes money paying for many tests that would be unnecessary *if* the doctor did a more complete patient history and examination, which is simply practicing good medicine. In sum, if public doctors were paid more, they would do a better exam, order fewer tests, waste less public funds, and give better care. As things are, there is no incentive. If a patient consults Dr. Wilmouth in the private sector, he or she pays between 200ff ($40) and 500ff ($100) for the consultation. He said it "takes a long time to examine each patient, and I am quite good. So, I think that good must be paid."

"You have to listen to the history, you have to think, and you have to be paid, be-

cause the work is to think." He added that only then, if you must, do you order x-rays or tests. "One test, not 20," he said, and only after you know what you are looking for, not as a shot in the dark.

Dr. Wilmouth said he sees many patients who are frustrated with the public system. They come to him after seeing public physicians "who did not find anything. The first one cuts like this. The second one cuts like that," he said as his hand sliced an X through the air. "And no one finds anything." Speaking of a particular patient, he said, "It was easy for me [to make a diagnosis], but no one [before] took the time [to do a good history and physical examination]." Dr. Wilmouth also said practicing medicine within the public system "is replete with filling out papers" and that the government can be slow to pay: "In a few days, in a few weeks, in a few months...."

In addition, public hospitals are problematic because patients must wait as long as three months for admission. The maximum wait to enter a private hospital is three days, and the length of stay is shorter than public hospitals. A private hospital staff does a complete exam and works hard to perform necessary tests as quickly as possible. They know the patient is paying, and the cost must be affordable.

Learning *from* the French system

On the other hand, public hospitals, said Dr. Wilmouth, stretch out the hospitalization to make more money. They do several tests over a longer time period. They do x-rays one day, blood tests the next, EKGs the next, and so on, so they can bill the government for each test and each overnight stay. According to *American Medical News*, "hospital stays account for 50 percent of total health care costs" in France partly because "lengths of stay are long." Meanwhile the line of patients waiting to get in grows longer.

On the brighter side, former Surgeon General C. Everett Koop, MD, reported on PBS last fall that French babies are among the healthiest in the world because of the French health care system. France has the ninth lowest infant mortality rate in the world, and the U.S. ranks twenty-second, according to the National Center for Health Statistics.

When a pregnancy is confirmed in France, the government sends the woman a manual about prenatal care and instructions to go for seven free examinations during pregnancy. If she keeps the appointments, she gets an outright gift of 5000ff ($1000) when the baby is born, said Dr. Koop. And the money is available to all French women, not just the poor. The philosophy is, "why stigmatize the poor by singling them out. Give the money to all. In the long run it is cost effective to have healthy babies."

As a result of this program, 95 percent of French women have received prenatal care for the last 30 years. In the U.S. in 1990, a half million women had no access to prenatal care.

The other cost-effective factor is that *sages-femmes* (midwives), not doctors, do most prenatal care and half of all deliveries.

Thinking about ways physicians might cut costs, we asked Dr. Wilmouth about malpractice costs in his country. His answer revealed much about French—and in contrast, American—attitudes toward physicians. He said malpractice lawsuits are rare in France. In fact, he doesn't "have to pay a special insurance for this problem...I can tell you that the total of my liability insurance for walls [office property] and my specialty is for one year 3500ff ($700)." That's cost effective.

It is easy to agree that America's health care system must be changed. But the revamping requires much thought, not to mention cooperation, among patients (the consumers), the government, physicians, hospital administrators, and insurance carriers.

With responsible input from *all* these sectors and careful study of other health care systems, including France's, our expensive and often unfair system may be revised to offer good care to all at reasonable cost.

Dr. Wilmouth's office is on the rue Caulaincourt in the Monmartre section of Paris.

Discussing the Issues with the Senatorial Candidates

Department of Governmental Relations and Maria T. Montesano, Assistant Managing Editor

Both of Pennsylvania's senatorial candidates were offered the opportunity to participate in a PENNSYLVANIA MEDICINE interview. The following interview with incumbent Senator Arlen Specter took place in his Philadelphia office in early September. Questions were posed by: Robert N. Moyers, MD, Society president; Howard A. Richter, MD, vice speaker of the House of Delegates; and Roger F. Mecum, executive vice president. Although Lynn Yeakel could not schedule an interview in time for publication, she did respond to several statements pertaining to positions held by the State Society and AMA, and provided her position on other health care issues.

"We have the greatest health care system in the world. I'm not prepared to scrap it, as some are, on titles which boil down to socialized medicine."

—Senator Arlen Specter

Interview with Senator Specter

Dr. Moyers: There is a great concern among the medical profession about where we're headed: the heavy increasing administrative burden takes us away from patient care; and at the same time everyone is concerned about the increasing cost of care. Also, we are concerned about some of the health care proposals that are out there...The system continues to encourage the high price of specialists—not that we don't need them, we do, but we have gotten out of balance...The end result, unless we change it, is that medical care will be delivered fragmented, system by system, by subspecialists, and that's very expensive.

Senator Specter: That's one of the reasons that I think we need to take a look at managed health care. I'm not an expert at it, but I have looked at it and I think it has possibilities.

Dr. Moyers: We also favor managed care, but one of the problems we see is that sometimes, if the wrong kind of incentives are built into the managed care system, they reduce care that may be appropriate.

Senator Specter: Well, it's a question of how you manage it and a matter of some experimentation. We know that the current system is in urgent need of improvement...I'm against rationing of care—I do not like the Canadian system. I don't want it for myself, my family, or America. The question of how you pay for care is something which the system has to work out, but the real question is whether you have the resources to do the job, and I think we do...We have the greatest health care delivery system in the world. Now, we have to build on it. I'm not prepared to scrap it, as some are, on titles which boil down to socialized medicine. We need preventative care, and we need to take a close look at cost containment and other issues and work on them from that point of view.

Dr. Richter: Senator, I look at this problem a little bit differently. The biggest problem that my colleagues who send me patients have is the "hassle factor"—dealing with the rules and regulations—and it is particularly bad in two areas—Medicare and Medicaid. The third-party payer's are intrusive, but the worst intrusiveness is from the government...The more that we can get rid of the "hassle factor," the better off we will be.

Mecum: Senator, we would appreciate hearing your thoughts on the whole area of Medicare. We have been trying to work with and struggle through the transition into the resource based relative value scale (RBRVS) payment system which began this past January, [and] we know there is, at least in Washington and other parts of the country, an attempt to try to mandate that the Medicare payment system be applied to private insurance.

Senator Specter: I have not been pleased with this outcome. Back in June of last year, approximately 1,000 Pennsylvania physicians contacted my office expressing their concerns with HCFA's (the Health Care Financing Administration's) proposed regulations for RBRVS. In response, I contacted [former HCFA administrator] Dr. Gail Wilensky to express these concerns, particularly the behavioral offset component which was modified in the final regulations.

Another issue brought to my attention which I'm trying to correct is the failure to

Senator Arlen Specter

pay some specialities for electrocardiograms (EKGs), which are a very basic research tool and very unfairly bundled into other payments. I am a co-sponsor of legislation introduced in the Senate which would provide for corrections with respect to separate EKG reimbursement, as well as equitable payments to new physicians and other issues related to the implementation of RBRVS and physician payment reform.

These issues are illustrative of the problems faced in the medical field...The whole regulatory system is out of touch. HCFA is an agency which is extremely difficult to deal with, but Dr. Wilensky comes before our appropriation subcommittee to justify the agency's budget request, and I am able to be helpful to Pennsylvania interests there...People don't understand how important experience is in fighting the bureaucracy. If I'm not in the Senate next year, Pennsylvania will rank 50 among the 50 states in seniority.

Mecum: What about tying the Medicare system to other issues? In Pennsylvania, auto insurance has been tied to Medicare, and along with that goes the Medicare "hassle factor," which Dr. Richter mentioned, and all the Medicare policies that come with it. Now the governor is trying to do the same thing with workers' compensation, and as mentioned earlier, at the national level there are proposals to mandate the Medicare system to the private health care insurance industry.

Senator Specter: There are too many problems in Medicare to use it as a role model, with all due respect...As for the "hassle factor," the only way I've seen to deal with that is on the specifics.

Dr. Richter: One other issue at the federal level we've got to at least mention is the Medicaid program in terms of letting the states have too much leeway...We need to set up a priority system in Medicaid, and I'm afraid that no state is going to do that without the federal government telling them.

Senator Specter: We are taking a stand on state practices in a number of ways. For example, one of the aspects of Senate Bill 1936, which I am co-sponsoring, supercedes state practices where you have health coverage. We want to see people able to buy specifically what they want without having a regulatory process in the states putting health care in a straightjacket.

Dr. Moyers: Senator, what future prospects do you see for significant tort reform?

Senator Specter: I see the possibility of some changes in the tort system arising from the legislation which we will take up the day we go back to the Senate. There are some provisions to expedite medical malpractice settlements, which I think can be done, and there is a requirement for states to develop voluntary alternative dispute resolution procedures. This is the first time in my 12 years in the Senate that we have approached tort reform quite like this, [and] I think it's going to be a very worthwhile experience....

Another medical issue I want to mention that is of great concern to me is that of infant mortality. I was appalled by [the

State Society President Robert N. Moyers, MD, and Vice Speaker of the House of Delegates Howard A. Richter, MD, questioned Senator Arlen Specter in his Philadelphia office.

fact that] in 1984 Pittsburgh had the highest infant mortality rate of any city in the country of African-American babies. Dr. C. Everett Koop made a suggestion, which I put in a bill, to pay teenage pregnant women $500 if they will get four prenatal care and one postnatal care check-ups, and undergo schooling on prenatal care and parenting. I know it's going to be controversial, but I've seen the figures and this would be a multi-billion dollar savings.

Dr. Moyers: To provide an incentive for them to *go* and get that prenatal care is important. In most cities, the clinics are there and available to be used, if you can get the people in to use them. It's not that there's not an availability.

Senator Specter: That's my point, doctor. You've got the greatest medical system in the world, and it's a question of how you use it.

Dr. Richter: I think solving the access problem is more than a medical problem, it is a social problem.

Senator Specter: And that's where the government can help, with things like the incentives.

Dr. Moyers: Senator, let me give you an example I think is meaningful in this conversation. When we talk about the underlying stimulus for all this heath reform, it's the cost...The new OSHA requirements apply equally to my little office as they do to a blood bank lab that may draw blood from hundreds of people a day. The cost to implement those regulations in my office is going to be maybe $3,000 or so. That is just one example of how the government's regulations and requirements keep adding to the cost of delivering medical care. And unfortunately, Medicare, Medicaid, and many of the third-party payers are not increasing their payments to reflect increased overhead. When we talk about cost, so much of it comes from requirements from outside forces.

Senator Specter: If you would give me a one-page memo on that, I will take it up with OSHA. Frequently the rule has some other purpose and stretches the regulation too far. It is possible to slice the apple in a way which will accomplish whatever it is they want and leave you out.

Responses from Lynn Yeakel

Following are responses from candidate Yeakel to questions posed by the Pennsylvania Medical Political Action Committee (PAMPAC) in a survey mailed to her office in June.

Society Position: Pennsylvania physicians should be granted an exemption from the federal Clinical Laboratory Improvement Act of 1988 because Pennsylvania regulations are as stringent as federal regulations.

Candidate Yeakel: Agree.

Society Position: The new resource based relative value scale (RBRVS) Medicare physician payment system should be fully implemented without further Medicare payment restrictions.

Candidate Yeakel: The five-year phase-in period for the Part B RBRVS Medicare physician payment system only began this year. While it may be premature to talk about actual changes in the fee schedule, I am aware that general and informal discussions to modify the payment scheme for surgical and non-surgical volume performance standards have arisen. Last month, Health and Human Services Secretary Louis Sullivan, MD, recommended changes in the transition fee. I have not had the opportunity to review the specifics of the proposal and consequently have no opinion on its merit.

Society Position: Medicare reimbursement mechanisms should not be expanded into the private sector.

Candidate Yeakel: I would have to study further the implications of expanding Medicare reimbursement mechanisms into the private sector and would want to know the extent to which such mechanisms are already being used as informal benchmarks by private insurers and what consequences follow from such use.

Society Position: The Medicare Physician Regulatory Relief Amendments of 1991 (H.R. 2695, S. 1332) should be adopted as they would greatly reduce the administrative burden of the practice of medicine.

Candidate Yeakel: I very much favor proposals aimed at reducing the administrative and bureaucratic burdens of our present system, as they contribute to the system's cost and inefficiency. According to a recent GAO study, however, fraudulent health care billing practices contribute as much as $70 billion to the cost of the system. It seems clear that the current level of burdensome paperwork does not serve as an adequate check on abuse. More paperwork is most certainly not the answer. These two issues should be treated as separate sides of the same coin, and I would want to satisfy myself that the Medicare Physician Regulatory Relief Amendments adequately promote reductions in both administrative overhead and fraud.

Society Position: As the state's Medicare Carrier, Pennsylvania Blue Shield should be required to re-evaluate in-state locality designations as part of Medicare payment reform.

Candidate Yeakel: I am unclear as to the actual need to mandate re-evaluations of in-state locality designations. Re-evaluation has arisen in the context of Lancaster County's bid for a locality fee change and also in reference to several hospitals. Whether these cases indicate the need for a federally legislated directive governing rural-urban fee differentials, or perhaps the creation of a statewide locality, is something I would need to consider in greater detail.

Society Position: Separate physician reimbursement for the professional component of EKG analysis should be restored.

Candidate Yeakel: Agree

Society Position: Medical liability reform could be a prominent factor in containing health care costs.

Candidate Yeakel: Agree

Society Position: Physicians should be allowed to test patients for HIV, maintaining the patients' privacy but without explicit consent, when a health care worker has been placed at risk by exposure to body fluids.

Candidate Yeakel: I disagree with the question because it represents a vague and incomplete statement of the issue, not because I dismiss the safety concerns of health care workers. We need to further investigate the issues of what constitutes a reasonable risk of exposure, when does the risk arise, and what reciprocal obligations are owed health care providers and patients. I am reviewing the recommendations developed by the Centers for Disease Control (CDC) for preventing transmission of HIV and hepatitis B virus (HBV). I note with interest CDC's recommendations that: 1) health care workers who perform "exposure-prone procedures" should know their HIV and HBV status; 2) health care workers who are infected with HIV or HBV should not perform exposure-prone procedures absent counsel and review from an expert panel; and 3) mandatory testing of health care workers for HIV is not recommended. I support CDC's conclusion that clearer definitions are needed of the nature, frequency, and circumstances of blood contact between patients and health care workers during invasive procedures, and that new "devices, protective barriers, and techniques" to prevent blood contact should be developed and evaluated.

"Whether the ultimate funding mechanism is the single-payer model, the employer-based method, or a hybrid of the two, we must get health care costs under control and get American health care providers on a budget."

—Lynn Yeakel

"MAKING AMERICA HEALTHY": Lynn Yeakel's Plan for National Health Insurance

The national debate about health care rages, especially with the upcoming election. Every candidate, from the president to the Senate, is being asked to present his or her viewpoint.

According to senatorial candidate Lynn Yeakel's position paper, "Making America Healthy: A Plan for National Health Insurance," "comprehensive health care can no longer be a privilege available only for the few who have the means to pay for it. Affordable health care is a right and must be accessible to every American, [and] reform of our health care system is an essential element of [my] economic recovery plan." Yeakel supports "universal health care coverage proposals which most effectively control escalating costs, emphasize preventive care, and preserve full customer choice of physicians and other care providers."

Yeakel also believes "on-balance, single-payer health care reform proposals in which *government serves as the insurer, though not the provider of services,* have the greatest potential for meeting [my] long-term goals," which include:

- Provide comprehensive and affordable health insurance for all Americans—emphasizing preventive care for the very young, cancer screening programs for adults, and nursing home care for the aged.
- Control spiraling costs by reducing wasteful administrative and billing overhead, and by establishing a national health care budget to guide in containing overall expenditures.
- Create *real* relief for the middle class, with a target of $1,000 to $1,500 in savings on out-of-pocket costs for the average family.
- Help American business be more competitive globally by reducing average payroll costs for health insurance from 13 percent (the average for 1991) to a target range of 7-9 percent.
- Reflect the special needs and problems of small business.
- Establish an adequate level of benefits and eliminate limitations on coverage for pre-existing medical conditions.

Realizing cost is one of the biggest concerns of any health care reform, Yeakel concludes, "We need to consolidate under one umbrella the various sources of revenue...and share those costs in an equitable manner. Whether the ultimate funding mechanism is the single-payer model, the employer-based method, or a hybrid of the two, we must get health care costs under control and get American health care providers on a budget. With comprehensive, affordable health care for all Americans, we can make our nation healthy again."

First Public Release of Physician-Specific Data by Council Is Imminent

John A. Malcolm Jr., MD

Only a scant two or three weeks remain until the expected public release of the first consumer report of physician-specific data from the Pennsylvania Health Care Cost Containment Council (PHC4).

Coronary Artery Bypass Graft (CABG) surgery is still the topic, and the Society's Task Force on Health Care Cost Containment and the Joint Committee on Health Care Data have worked long and hard to successfully convince PHC4 to take out the most onerous and statistically unsupportable sections, such as morbidity, from the originally proposed report.

The task force and committee have been very successful, and what remains in the report has been independently validated. All of Pennsylvania's approximately 200 operating surgeons who did CABG surgery during 1990 will see their names in print in the 50-page report.

The report is likely to be the prototype for future physician-specific reports, so it behooves all physicians to be aware of the types of data that will be included in the report. They should also be aware of projections for future types of data to be included in both the PHC4 report and in proposed proprietary published data soon to enter the scene in Pennsylvania.

The following data is expected to be included in the "consumer" edition of PHC4's physician specific report on CABG surgery due early next month:

- An alphabetical listing of Pennsylvania physicians performing CABG surgery, including: 1) hospitals where they performed CABG surgery; and 2) whether they are solo practitioners or in a surgical practice group.
- An alphabetical listing of Pennsylvania hospitals in which CABG surgery and other open heart surgical procedures are performed, including: 1) the total number of CABG surgery procedures performed; and 2) the total number of all open heart surgical procedures.
- An alphabetical listing of Pennsylvania hospitals in which CABG surgery was performed in 1990, including: 1) the total number of CABG surgery patients; 2) the actual mortality of CABG surgery patients; 3) the expected range of mortality for CABG surgery patients; 4) a statistical rating, indicating whether the actual mortality is above, within, or below the expected range; and 5) the average charge by the hospital, exclusive of physician charges.

"The report is likely to be the prototype for future physician-specific reports, so it behooves all physicians to be aware of the types of data that will be included."

- A bar graph of hospital average charges arranged from the lowest to the highest.
- Alphabetical listings of hospitals with their cardiac surgeons by geographic region (western, central/northeast, or southeast Pennsylvania), including: 1) the total number of CABG surgery patients for each operating surgeon and surgical practice group in each hospital; 2) the actual mortality of CABG surgery patients for each operating surgeon and surgical practice group that did 30 or more CABG surgery procedures at the hospital; 3) the expected range of mortality for CABG surgery for each operating surgeon and surgical practice group that did 30 or more CABG surgery procedures at the hospital; and 4) a statistical rating, indicating whether the actual mortality is above, within, or below the expected range.

Physicians are strongly urged to request the Technical Report as well as the Consumer Report, because substantial additions necessary for physicians and hospitals to understand the methodology behind the consumer edition are included in the technical edition. Physician and hospital comments to be included in the consumer edition should be prepared with the knowledge and understanding of the content of the Technical Report. Such information is important in order to answer questions from patients concerning the report and its contents. The communications media will also have the Technical Report and may be expected to use it in their coverage.

This report does not contain individual physician charges, physician training/certification data, or "morbidity" data. However, such information is likely to be included in future PHC4 reports since physician charge profiles already exist, physician training/ certification and specialty information is maintained and published regularly by the American Medical Association and American Osteopathic Association, and more accurate projections of "morbidity" are under development. Currently, a magazine publisher in New York is planning to publish such data—exclusive of morbidity—semiannually on a regional basis in Pennsylvania.

While still far from perfect, the report has been enhanced greatly due to the recommendations of the Society's task force and joint commission. They will continue to work to provide meaningful input in future reports.

Dr. Malcolm is chairman of the Society's Task Force on Health Care Cost Containment and physician representative on the Pennsylvania Health Care Cost Containment Council.

HCFA MONITORING E/M CODE USAGE

More than seven out of ten claims reviewed under the new Medicare payment system for Pennsylvania were coded at the correct evaluation and management (E/M) level, according to final results of an educational process implemented by the Health Care Financing Administration (HCFA) and its Medicare carrier, Pennsylvania Blue Shield.

Results of Medicare's Early Claims Review (ECR) process indicate that 77 percent of claims were coded correctly, and the remaining 23 percent should have been coded at a lower level of care. The process was designed to provide feedback to the physician community regarding the appropriate use of the new E/M codes. Blue Shield analyzed a random sample of 450 claims requested from physicians in Pennsylvania from February 10 through June 30, 1992.

State Society representatives met this summer with Medicare to review preliminary findings. The primary problem areas identified initially from preliminary results were codes 99214 and 99215 for outpatient visits, and codes 99223 and 99232 for inpatient visits. Reductions were made mainly because medical records did not substantiate the medical decision-making level of complexity and/or history.

Information is not yet available as to whether these are the only codes identified as problem areas from the final results. At the request of the Society, Blue Shield agreed to identify cases of undercoding by physicians. The preliminary results did not identify any cases where undercoding occurred.

The final Medicare analysis is specialty specific and shows regional and national comparisons. Though Pennsylvania results seem to coincide with national findings, according to Medicare, the state's physicians appear to have an overall higher rate of correct coding than regionally or nationally.

Medicare has asked for the Society's assistance in formulating an action plan to re-educate physicians as needed based on the final statistics. The Society's plan, which was approved by the Council on Medical Economics in early August, includes continuing communications with Medicare; determining where problems exist; working with specialty societies to address the greatest problems, including special training; and sponsoring reimbursement seminars later this year targeting problem areas.

Comparative Performance Reports

A second carrier activity of importance to physicians involves Comparative Performance Reports, which carriers first sent to approximately 3,500 physicians nationally in 1990.

The reports contained information about individual physicians' Medicare practice patterns—as compared to those of their specialty and locality peers—when their utilization was significantly higher than the norm. The 1990 information covered a broad range of services, including procedures as well as E/M services.

In August, 4,700 physicians who billed in the top five percent for specific E/M codes received Comparative Performance Reports with information solely about visits and consultations. The reports—much more specific than those mailed in 1990—contained information about the number of Medicare beneficiaries that the physician treated during the period analyzed, the number of E/M services billed per beneficiary who received an E/M service, and the average number of E/M services provided for all beneficiaries that the physician treated. Also provided was similar information for the physician's peer group.

The Visit Code Comparative Performance Report program is entirely educational, according to HCFA. Pennsylvania physicians are encouraged to contact Blue Shield to discuss reports. However, they are not obligated to do so, since the intent of the program is to provide physicians with information to help them evaluate their own practice patterns. Also, although these initial reports are informational, repeatedly identified physicians who have not provided an explanation of their utilization patterns could be subject to an audit at some time in the future.

SOCIETY PROTESTS BLUE SHIELD REQUEST

The State Society recently protested a Pennsylvania Blue Shield request for documentation when using monitored anesthesia care (MAC) modifiers.

MAC involves the intra-operative monitoring of a patient's vital physiological signs, in anticipation of the need for administration of general anesthesia or of the development of adverse physiological patient reaction to the surgical procedure. It also includes the performance of a pre-anesthetic examination and evaluation, prescription of the anesthesia care required, administration of any necessary oral or parental medications, and provision of indicated postoperative anesthesia care.

The Medicare program pays for medically reasonable and necessary MAC services furnished by a physician. When reporting MAC services, the "QS" modifier is added to the procedure code.

In mid-June, Medicare began requesting medical record documentation for claims where the "QS" modifier was used. The requirement was imposed on providers by Pennsylvania Blue Shield, the state's Medicare carrier, since MAC is not automatically covered but must be reasonable and medically necessary. To determine this requirement, Blue Shield began requesting documentation on every claim where a "QS" modifier was used.

The State Society protested the action to HCFA, and HCFA agreed that Blue Shield was overzealous in its attempt to determine reasonable and medically necessary by requesting medical records in every case. HCFA, therefore, mandated that Blue Shield refrain from this practice, which it did effective August 4. Blue Shield will automatically handle all claims inappropriately denied, and providers are not responsible to conduct reviews or make any resubmissions.

MEDICAID OMBUDSMAN PROGRAM EXPANDING

The Medicaid Ombudsman Program—an ongoing cooperative effort of the Department of Public Welfare (DPW), the State Society, and county medical societies—continues to expand throughout Pennsylvania.

The program was designed to help physicians and their office staffs address billing, policy, and

enrollment questions about the Medical Assistance (MA) program. Due to budgetary limitations and staff reductions at DPW, access to such information has been a problem.

DPW hopes to reduce program hassles by: 1) training county medical society executives and providers' offices staffs to handle program-associated questions; and 2) offering a hotline for questions which executives and staffs cannot answer.

A training session was held on June 12 for county medical society executives from Berks, Blair, Lycoming, Montgomery, Northumberland, Philadelphia, Schuylkill, and Union counties. DPW is now planning office training sessions for these counties.

The Society has sent letters to presidents of non-participating county medical societies encouraging their involvement in the program.

Note: even if a county does not employ an executive, options exist for participation.

For additional information about the program, call the State Society's Department of Medical Economics at 1-800-228-7823.

Dennis L. Olmstead, the State Society's director of medical economics, contributed to this page.

Pennsylvania Medical Society

Auxiliary

Physicians and Spouses of Physicians:

In this critical time for medicine, membership in the Medical Auxiliary is the avenue for physicians' spouses to become involved to help make a difference. We need your ***VOICES, SUPPORT,*** and ***COMMITMENT.*** Physicians are asked to share with their spouses this invitation to join the Medical Auxiliary Federation: county, state, and national.

The object of the Pennsylvania Medical Society Auxiliary is exclusively educational and charitable and to assist in programs of the Pennsylvania Medical Society that improve the health and quality of life for all people. Each community has different needs, and educational materials are provided for volunteers committed to health education and health care legislation. Programs and project ideas are available through the Project Bank catalog.

Physicians' spouses are encouraged to become members of the Medical Auxiliary in these changing times in health care and become knowledgeable so they can communicate with and help educate the community and patients when approached on health-related issues as well as legislation changing the way physicians practice medicine.

"Alone we can make a difference, but together, we can make a change."

Mrs. Jean Greco,
President, PMSA President

PAYMENT OF YOUR DUES WILL HELP THE PMS AUXILIARY CONTINUE ITS PROGRAMS:

Drug Education
Domestic Violence
Family Unity
AIDS Education
Health Care Education for Children
Leadership Seminars

Hahnemann's "Point of Light"

Maria T. Montesano
Assistant Managing Editor

The Homeless Clinics Project at Hahnemann University, once considered a "band-aid" program, expanded its scope of practice this year. In return, it received national media recognition, as well as designation as a "Point of Light" by the President of the United States. That, however, is not the point.

CNN noticed. *USA Today* noticed. And *American Medical News* noticed. More importantly, a growing number of homeless Philadelphians are noticing...that medical care is becoming available to them through the Homeless Clinics Project at Hahnemann University.

The project—now in its third full year of operation—couples eager-to-learn, first- and second-year medical school students with homeless shelter residents in need of medical attention. The result: hands-on experience for the students and the establishment of continuity of care for the patients.

"We are able to do something that is obviously needed," says Ed Kantor, second-year student and project director. "The homeless population has increased and continues to grow, and the program offers the students clinical exposure within their first two years at Hahnemann."

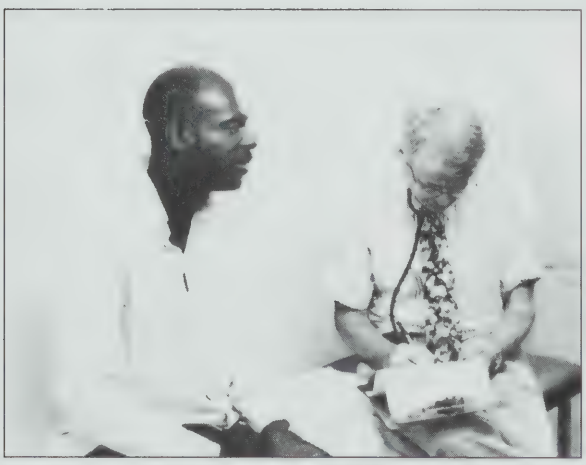

photo by David R. Boyer, Lebanon

Michael Johnson (left), Project Home resident, receives medical care from Wilbur Oaks, MD, professor of medicine at Hahnemann.

As project director, Kantor is responsible for overall administrative duties at the clinics, as well as publicity, fundraising, and motivation. Under him are a series of clinic directors responsible for signing up patients, overseeing the flow of the clinics, making patient referrals, and scheduling clinic volunteers, including students and physicians.

Committees of volunteers and medical students address the use of immunization projects and the computerized tracking of clinical data; the remainder of the volunteers work as student interviewers. All in all, according to Kantor, approximately 200 students volunteer to work in the clinics throughout the course of a year.

Hahnemann students manage the clinics at three city shelters. The original, St. John's Hospice, houses a young to middle-aged homeless population whose medical care needs widely vary. The two new clinics opened earlier this year offer more specialized experiences for physicians and students: the clinic at Project Home's Winter Emergency Shelter tends to men only, many in need of psychiatric care; and the medical care at Trevor's Place, a shelter for women and children, focuses on routine tests and gynecological exams, as well as health education and counseling.

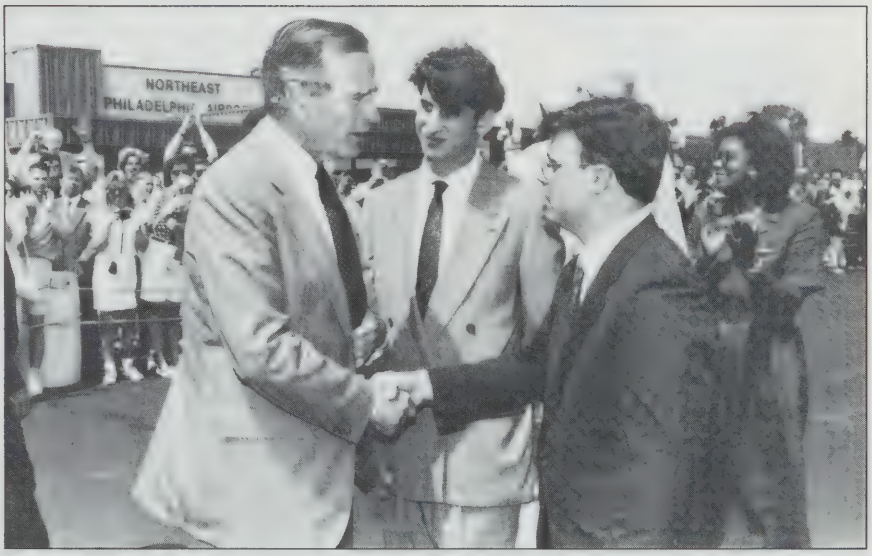
The new clinics also offer an opportunity for increased student involvement: "The main complaint we got from students last year was that they didn't get to volunteer enough," says Ashley Greenspun, director of referrals. "Now, with the three clinics, we're hoping that people get the chance to work more than once or twice a semester."

Visiting Project Home

PENNSYLVANIA MEDICINE's visit to Project Home occurred one hot and humid night in late July. A year ago the house was a Philadelphia crack house, but on this particular night, a number of men are occupying their time with house chores and free-time activities. Because the shelter is mainly a winter emergency shelter, its summer population is light, and the focus changes to one of sobriety.

Tonight's clinic staff consists of seven Hahnemann workers: Kantor; Greenspun; Ted Uroskie Jr., director of physician scheduling for the clinic; Timothy Reiter and John Williams, student interviewers; Mike Freedman, past project director; and Wilbur Oaks, MD, professor of medicine.

The procedure is well defined. Amy



Kaltenmark, director of Project Home, prepares a clinic sign-up sheet for shelter residents. When the physician and students are set up, Kaltenmark presents the patients one-by-one. Student interviewers talk with the patients to gather background information and medical histories, and to find out why they are seeking medical care. Patients then receive medical attention from the physician, referrals are made and medications prescribed as needed, and follow-up is completed by student interviewers.

Tonight, three residents are seeking treatment for skin problems, one possibly as the result of his HIV infection, and one patient referral is made to a surgical clinic. According to Uroskie, although the patient turnout is light due to the season—in winter, between five and 15 patients are treated in a night—this is a typical summer night. He explains that more people seek shelter at Project Home in winter, and the living conditions are "closer," causing colds and tuberculosis to spread quickly. In summer, however, there are a lot more rashes and skin problems.

While the actual patient portion of the night takes less than an hour, much is revealed during the discussion on the ride back to the university. Reiter, who worked a number of times last year as a first-year student, says he gained new insight from his conversation with his patient tonight: "My patient has been homeless for 11 years, is quite intelligent and a reader. He has some interesting views on being homeless...and I was amazed to learn that he has a group of homeless friends. I always think of the homeless as loners."

Kantor talks of both good and bad experiences he has had working in the clinics during the past year. One patient became violent and threatening, particularly toward a female medical student. Of that night, Kantor says, "It brought some reality to the situation—that people are not getting the care and medication they need, including those people who need help with mental problems."

Just as vividly, he remembers his best experience, which took place at Trevor's Place last winter: "A couple of weeks after we started the clinic there, the kids began to hang around us during the clinic visits. They wanted to wear our coats, play with the medical instruments, and learn all about what we were doing."

Ed Kantor (right), clinic project director, and Mike Freedman (center), past project director, greeted President George Bush when he arrived in Philadelphia on a recent visit.

"The children were reaching out for human contacts, and the students were all taken back by that," he says. "Aside from their medical duties, the students are providing positive role models for the kids. That's continuing, and it's good for both the students and the kids."

Receiving national recognition

The kids at Trevor's Place aren't the only ones who have noticed what Hahnemann's medical students have been up to. The students' work was recognized by President George Bush on June 22 as the 809th Daily Point of Light for the Nation. According to a While House release, "Daily Points of Light are those who successfully address our most pressing social problems through direct and consequential acts of community service."

In recognition, the students received a letter of recognition from the President saluting them for exemplifying his belief that, "From now on in America, any definition of a successful life must include serving others." In addition, Kantor and Freedman met up with the President during a summer stop in Philadelphia. Of that experience, Kantor says, "It was interesting. President Bush spent a couple minutes talking with me and Mike [Freedman] about the program. It was neat to meet and be recognized by the President...we hope the recognition will bring

the health care needs of the homeless to the public's attention."

Looking to the future

"We try to expand or add something to the program each year," according to Greenspun. For the coming year, she hopes a proposed outreach program will place clinics on the street for homeless people who don't live in shelters.

"The basic idea is that we would set up a table beside the meal van," says Kantor. "Preliminary contacts have been made for the new program, but there are still a lot of logistics to work out." Other initiatives include expanding educational programs, setting up an immunization program for children at Trevor's Place, and integrating volunteers from Hahnemann's physician assistant program into the overall project.

Kantor's efforts also extend to fundraising. The Homeless Clinics, sponsored by Hahnemann's Department of Medicine, have received grants this year from several sources, including Quaker Chemical, the Esther Gowen Hood Trust, and Sister Mary Scullion. Hahnemann continues to submit applications for other grants, and Kantor is working with Hahnemann's Development Office to expand its alumni support as well.

Benefiting all involved

Of Hahnemann's Homeless Clinics, Rick Anderson, MD, one of the project's founders, once said, "Right now, our program is just a band-aid." Asked to comment on that statement, Kantor jokingly responds, "We may have expanded to a pressure dressing." But the reality, he admits, is that "in terms of the homelessness problem, the program is still a drop in the bucket. The potential is much greater than the actual impact."

"Maybe, though, it's the first domino, [because] we are making a difference on a small scale," he says. "The program is helping three of Philadelphia's shelters, and it is helping to change the health behaviors and lives of the patients, as well as the lives of Hahnemann's future physicians. It's an invaluable experience for everyone. And there's good in that."

WHAT'S BEING SAID ABOUT THE HAHNEMANN HOMELESS CLINICS

"You see homeless people in the news every night, but it doesn't hit you face-to-face until you visit the shelters. The homeless are appreciative of the time given to them."

John Williams
Second-year Hahnemann medical student and clinic volunteer

"You see more of the human factor working in the clinics than you do in medical school, which is all classroom right now...it's really interesting to talk to the patients, it's like a whole different life."

Timothy Reiter
Second-year Hahnemann medical student and clinic volunteer

"I really hope, once I become a doctor, that I keep the knowledge I have gained through this experience—that I realize it's not all money and that you need to donate your time."

Ashley Greenspun
Second-year Hahnemann medical student and clinic director

"When I worked in the clinic, the program had just started, and it was exciting. It was my first experience with clinical medicine, and it gave me an excellent sense of how to work with people and these types of patients in the hospital setting...It threw me right into inner-city medicine."

Mark V. Caliendo
Fourth-year Hahnemann medical student and State Society trustee

"I saw a lot as a student in that clinic [St. John's] that still helps me now."

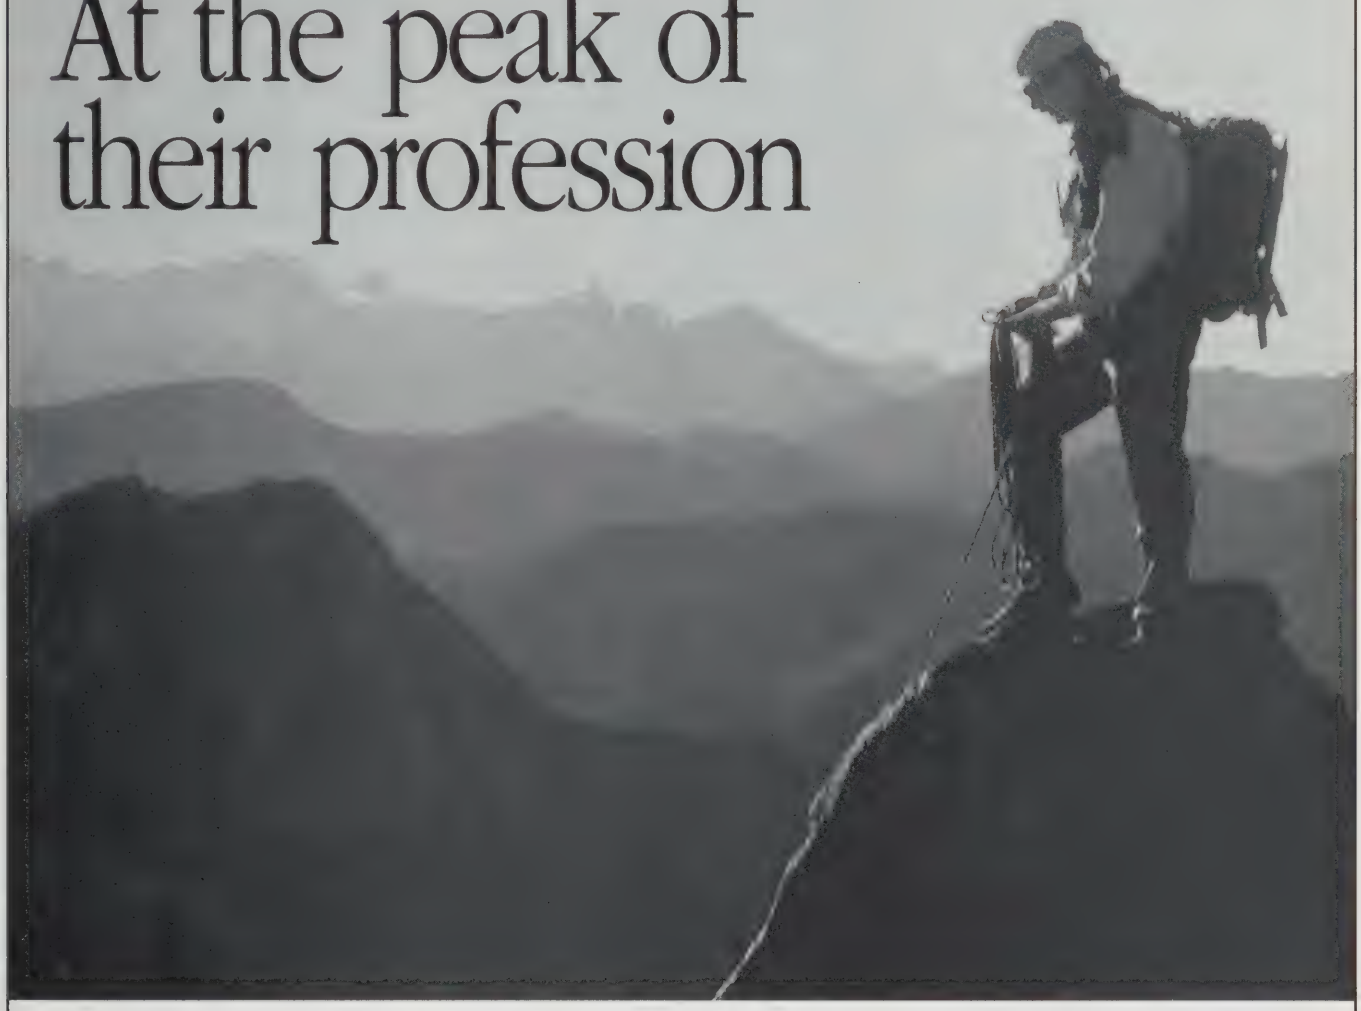
Rick Anderson, MD
Co-founder of the Hahnemann Homeless Clinics

"The hands-on experience our students receive at the clinics is incredible and helps round out their education. Our volunteers learn about the underserved population, while attending to their health care needs...The kids have done a phenomenal job, and they've made a difference, there's no question about it."

Wilbur Oaks, MD
Professor of Medicine at Hahnemann

"The clinic has been invaluable. This year we didn't have nursing support at the shelter, and our residents were in real need of medical care. The Hahnemann students were there for us."

Amy Kaltenmark
Director of Project Home's Winter Emergency Shelter



"Medical students like these who take time from their busy and hectic schedules to give of themselves, serving the homeless, are making a tremendous contribution to their communities. Providing health care to those who need it the most is one of the most serious public health concerns we have in this country. These men and women are part of the solution. I want to praise them and thank them for their efforts and commitment. I'm confident they'll look back on this experience during their medical school years as one of the most rewarding."

Allan S. Noonan, MD, MPH
Pennsylvania Secretary of Health

"As state and federal legislators continue to debate the best ways to expand access to quality medical services, Hahnemann medical students have confronted this problem at the most fundamental level by volunteering their time to provide for the public health. It has become a self-evident truth that Americans should have the right to basic health care, and the student volunteers work to make that right a reality for the homeless population in Philadelphia."

Harris Wofford
U.S. Senator

At the peak of their profession

Skill. Experience. And dedication. That's what EPA physicians bring to your emergency department.

Quality emergency services begin with quality physicians.

At EPA, we seek out the most qualified physicians available. Help them enhance their skills through continuing education. (We even publish our own medical journals.) And match those skills to your needs.

Founded by a practicing emergency physician, EPA understands the importance of giving close personal attention to physicians and clients alike.

Result? Strong and mutually rewarding relationships between EPA and its member physicians. And a source of highly-qualified ED professionals for you.

Let us help your ED perform at its peak.

Just call us at **1-800-848-EPA-1.**

AMA ADOPTS NINE MSS RESOLUTIONS

The AMA House of Delegates at its annual meeting in Chicago in June adopted nine of 11 resolutions sponsored by the AMA Medical Student Section (MSS).

Of the nine adopted resolutions, two were forwarded to the House requiring immediate action—both involved pending state and national legislation. The first directs the AMA to oppose the imposition of a selective revenue tax on health care providers by Congress and state legislatures to fund health care programs. Several states are currently considering or have already passed such legislation.

The second resolution directs the AMA to support federal action requiring rear and side impact guards on all new tractor trailers. The guards could prevent a number of fatalities each year caused when small passenger motor vehicles underride tractor trailers during traffic accidents. The National Highway Traffic Safety Administration of the Department of Transportation has similar legislation pending.

The House of Delegates also adopted a report examining trends in mortality and morbidity associated with abortions before and after the 1973 Supreme Court decision in *Roe v Wade*. Though some controversy arose, the delegates agreed the informational report did not diverge from the AMA's traditional non-position on abortion. It will be filed and disseminated to appropriate individuals, agencies, and groups.

Another report recommended amendments to the AMA Constitution and Bylaws regarding the MSS seat on the Board of Trustees. The amendments requested the right of the MSS to directly elect their trustee annually during the interim meeting. Previously, the board selected the student trustee from three names submitted by the MSS.

The amendments would also provide the medical student trustee with voting privileges on policy making issues, but not on intra-board elections or other board elections, selections, or nominations. These amendments were deferred for final action until the 1992 interim meeting.

TREATING FAMILY VIOLENCE

Violence among family members in the U.S. has now reached staggering proportions. Every year, more than two million cases of child abuse and neglect are reported, between two million and four million women are battered by their spouses, and as many as 1.1 million elderly are abused.

In the past, many physicians have felt uncomfortable dealing with domestic violence and consequently have been inadequate in that role. Much of this reluctance stems from the ethical and legal concerns that go along with identifying and counseling victims. In an effort to change past inadequacies in addressing domestic violence, the AMA has formed a National Coalition of Physicians Against Family Violence to involve physicians in activities that address the issue and better enable them to identify the symptoms firsthand.

In another effort, the AMA made "Treating Family Violence—Policy and Practice" the focus of educational seminars held during the AMA-MSS national convention in Chicago in June. Medical students participated in an informative discussion that identified the growing epidemic.

Students learned that while domestic violence is a growing public health problem, with increased awareness and involvement by physicians and medical students, many of the injuries that result from abuse can be prevented.

AMA-MSS COUNCIL HOLDS FIRST MEETING

The newly elected AMA Medical Student Section Governing Council held its first meeting August 7-9 in Chicago to set goals for the council and MSS, appoint new leaders to MSS committees, and meet AMA staff and departments.

The council determined its long-term, short-term, and immediate goals using the Strategic Plan from the MSS Committee for Long Range Planning as a framework. Specific priorities for the long and short term include: increasing communication from leaders to members, as well as between chapters; increasing membership; expanding availability of legislative information and education, and developing a Legislative Action Committee; developing and promoting chapter and community projects; and training leadership.

The council acted quickly to carry out its objectives. Already, a Legislative Action Committee is in place to mobilize the nation's medical students when legislation on Capitol Hill requires an expedient and massive grassroots effort. Also, the council is appropriating more leadership responsibility and visibility for appointed MSS leaders, and a publication from the AMA-MSS about successful chapter and community projects is underway to guide future activity at medical schools across the nation.

In other business, the council assigned leaders from a nationwide pool of applicants to several MSS committees, such as the States Leadership Steering Committee, which manages chapters in seven distinct geographical regions; the Committee for Long Range Planning, whose main task will be to reform MSS election procedures; the Advisory Panel, whose research will be central to council reports on specific resolutions; the Computer Projects Committee, which promotes the use of computers in medicine and medical education; and the newly formed Legislative Action Committee.

Among appointed leaders is Amber Chatwin, Hahnemann University, who will chair Section Six—encompassing Pennsylvania, Delaware, the District of Columbia, Maryland, New Jersey, and Virginia—on the States Leadership Steering Committee.

Finally, members of the governing council met with members of AMA staff representing several departments to discuss MSS issues. For example, AMA's Membership Department is working to make membership more accessible to medical students with extended curricula, such as MD-PhD students, as well as to preserve membership through the transition to residency by offering multi-year discounts and benefits incentives.

The council will convene later this month for media training and to plan for the AMA's interim meeting in Nashville in December.

Monitoring Impaired Physicians: A Tool for Relapse Prevention

Penelope P. Ziegler, MD

Physicians experience a broad spectrum of health problems which can disrupt their personal lives and impair their ability to function professionally. Some of these illnesses—such as alcoholism and other drug dependency, and certain psychiatric disorders—are chronic. While treatment usually results in remission of active symptoms, there is a risk of relapse if necessary steps are not followed. Therefore, the key to continued recovery and stable functioning lies in effective relapse prevention.

Monitoring has been shown to be an important component of relapse prevention for physicians in recovery from impairment.[1,2] Monitoring refers to the process of supervising and documenting the physician's participation in a structured plan of recovery activities.[3]

The Pennsylvania Medical Society, through The Educational and Scientific Trust, offers a variety of services under the Physicians' Health Programs (PHP). Pennsylvania physicians who are participants in PHP's monitoring program for impaired physicians enter into a "monitoring agreement." This agreement is individualized and specific to each participant's problems and needs. It is developed with input from the physician participant, the professional treatment provider(s), PHP staff, and, when indicated, other interested parties.

Elements of the monitoring agreement include:

• *A treatment plan*. This plan is specific to the participant's diagnosis and identified biopsychosocial needs. Treatment may begin in an inpatient, residential, or outpatient setting as indicated by appropriate level-of-care placement criteria. It may include individual and/or group therapy, family counseling, medication, detoxification, specialized testing, etc.

• *An assigned PHP monitor*. The monitor is a volunteer physician in the participant's home area who is often in recovery from a condition similar to that of the participant and who has been functioning well for several years. The monitor provides a role model and a sense of hope to the newly recovering physician, who may be struggling with devastating financial, legal, and emotional losses. The monitor offers support, direction, and encouragement, and also provides feedback to PHP about the participant's progress.

• *Abstinence*. Participants agree to abstain from the use of all brain-active substances, including alcohol, recreational drugs, and self-prescribed medications. If the participant develops a medical condition requiring the therapeutic use of such a substance (e.g., opiates for post-operative pain), the participant agrees to inform the treating physician of his/her history and to ask the treating physician to inform PHP when potentially high-risk drugs must be prescribed.

• *Analysis of body fluids*. Testing of urine, saliva, and/or blood for the presence of drugs is a helpful therapeutic adjunct in maintaining abstinence from mood-altering chemicals. Also, some psychiatrically ill physicians benefit from therapeutic monitoring of serum levels of prescribed psychoactive medications such as lithium carbonate and other mood stabilizers.

• *Attendance at mutual help meetings*. Utilization of 12-step programs—such as Alcoholics Anonymous (AA) and Narcotics Anonymous (NA), as well as other such groups—provides direction, structure, and support in maintaining stable recovery. Studies indicate that active participation in self-help groups enhances the likelihood of successful recovery and re-entry into medical practice.[4,5]

• *A personal physician*. Since drug dependence often begins in the context of self-treatment, it is essential that the recovering physician turn over his/her personal health care needs to an informed colleague. This should be a physician who is knowledgeable about the special issues facing persons in recovery from addictive

Dr. Zeigler is medical director of the Physicians' Health Programs of the State Society's Educational and Scientific Trust.

disease. The participant agrees to refrain from all self-prescribing since such behavior presents a significant relapse risk.

• *Advocacy*. When appropriate, other individuals and/or institutions can be involved in the communications network. In this way, PHP is able to provide progress reports and advocacy statements to the participant's hospital, group practice, professional liability carrier, and various governmental agencies (State Board of Medicine, Drug Enforcement Administration, etc.). Conversely, PHP encourages these other parties to maintain contact with PHP staff and express any concerns about the recovering physician's status immediately. This allows for early intervention in the event of a threatened or actual relapse.

The length of a participant's monitoring agreement varies, depending on the individual needs of the physician, the type of impairment, and the advocacy requirements. In most cases, an initial commitment of three years is suggested. However, both the length and the intensity of monitoring can be modified in response to the physician's progress in recovery. For example, as a participant demonstrates increased stability of function, the frequency of therapy appointments can be decreased. Alternatively, if a participant shows signs of resistance, denial, or impending relapse, the frequency of appointments, body fluids testing, and telephone contact can be increased.

Relapse of addictive or psychiatric disorders often can be predicted before the recovering person actually returns to chemical use or experiences a full blown episode of decompensation. Warning signs usually are present which, if recognized and responded to promptly, can prevent an actual recurrence of active disease. In fact, relapse is a dynamic process which is usually set in motion by a change in the individual's circumstances that increases perceived stress. The increased stress can lead to a return of denial, a shift in attitudes and behavior which draws the recovering person away from the path of recovery and back toward old patterns. For example, the recovering alcoholic in this type of situation may withdraw socially, become irritable, experience intense mood swings, etc. This is referred to as a "dry drunk."[6]

Some warning signs that a PHP participant may be moving toward a relapse include:

• *Noncompliance with the treatment plan*. Includes missed appointments, not attending AA or NA meetings, discontinuation of medication, not making scheduled telephone contacts.

• *Return of denial-based thinking and behavior*. For example, the physician minimizes the seriousness of past problems, rationalizes past drinking/drug use, or blames problems on spouse, family, partners, work schedule.

• *Substitute addictive behaviors*. These include compulsive overeating, gambling, shopping, and sexually acting out.[7]

If, despite monitoring and relapse prevention efforts, a relapse occurs, the participant's treatment plan must be revised to address the identified relapse triggers with the goal of re-establishing stable recovery and preventing future problems. The treatment provider(s), in consultation with PHP and other significant parties, should explore various questions with the participant about the relapse. For example, what were the warning signs that indicated the participant was headed for trouble? Were these signs recognized before the relapse by the therapist, by the staff? How were they responded to, and what was the participant's reaction?

In some cases, the relapse uncovers previously hidden issues—such as a co-existing psychiatric disorder, a family problem, or a shame-based secret—which need to be a focus of therapy. In other cases, persistent denial of the illness may be present in the physician or in significant others, such as family members, friends, partners, department heads, etc., which is undermining compliance with effective treatment and rehabilitation.

After a thorough re-evaluation has been conducted, a new treatment and monitoring plan will be developed. This may involve extended inpatient or residential treatment, intensive outpatient treatment, or additional modalities to address newly identified diagnoses, family dysfunction, etc. In many cases, the plan will need to address consequences which have resulted from the relapse, such as loss of employment, suspension of hospital privileges, marital discord, legal entanglements, and emotional reactions, including guilt, shame, and self-hatred. If the participant is cooperative and willing to follow through on the new recommendations, it is often possible for PHP to help the physician avoid some of these severe

"Relapse of addictive or psychiatric disorders often can be predicted before the recovering person actually returns to chemical use or experiences a full blown episode of decompensation."

consequences and continue or re-enter medical practice.

If a relapsing participant is not willing to cooperate with treatment or is unable to re-establish stable functioning, it may be necessary for PHP to refer the physician to the impairment consultant of the licensure board. The State Board of Medicine and the State Board of Osteopathic Medicine have designated PHP as their impaired professional program for physicians. Under this cooperative arrangement, most impairment cases can be handled in a therapeutic manner without formal prosecution. Disciplinary action is reserved for those physicians who do not cooperate with appropriate treatment and rehabilitation despite all efforts by PHP to engage them.

When impairing conditions are approached as medical illnesses requiring treatment and ongoing monitoring to achieve stable remission, the stigma and shame associated with these disorders is reduced. This encourages referral earlier in the course of the disease when the prognosis for recovery and re-entry into medical practice is favorable. The participant is encouraged to view PHP as "home base" and to work with program staff as part of a treatment team striving toward the common goals of stable recovery, professional re-entry, and personal satisfaction. Monitoring provides the structural framework around which the relapse prevention plan can be developed and implemented effectively.

HCFA AGREES TO CLIA EXTENSION

In response to lobbying by organized medicine, the Health Care Financing Administration (HCFA), agreed on August 31 to a 90-day extension on claims submission requirements for the implementation of the Clinical Laboratory Improvement Amendments (CLIA) of 1988.

Under terms of the extension, HCFA will not deny a Medicare claim for laboratory services submitted prior to December 1 for lack of a CLIA registration form or CLIA number. Physicians who have not already done so should use the 90-day period to submit their applications to HCFA and pay the registration fees. State Medicaid agencies were apprised of the HCFA extension and are expected to comply with the revised rules.

HCFA had been considering a six- to eight-week period but was not prepared to announce a "delay" in the effective date, due to the perceived congressional pressure for timely implementation of the regulations. When it became apparent that physicians were having difficulty registering with HCFA and getting their CLIA numbers, the American Medical Association (AMA) stepped up its lobbying activity to push for more time.

The 90-day extension follows a decision by Health and Human Services (HHS) Secretary Louis Sullivan, MD, that CLIA inspections of physician offices should be on an announced basis with three days' notice, rather than on an unannounced basis. In a letter to the AMA, Dr. Sullivan indicated that HHS is taking "great care to sensitize" the surveyors during their training about the importance of patient care in physicians' offices and of not disrupting the office by making extraordinary demands on the physicians. This decision was also a result of lobbying by the AMA and the State Society.

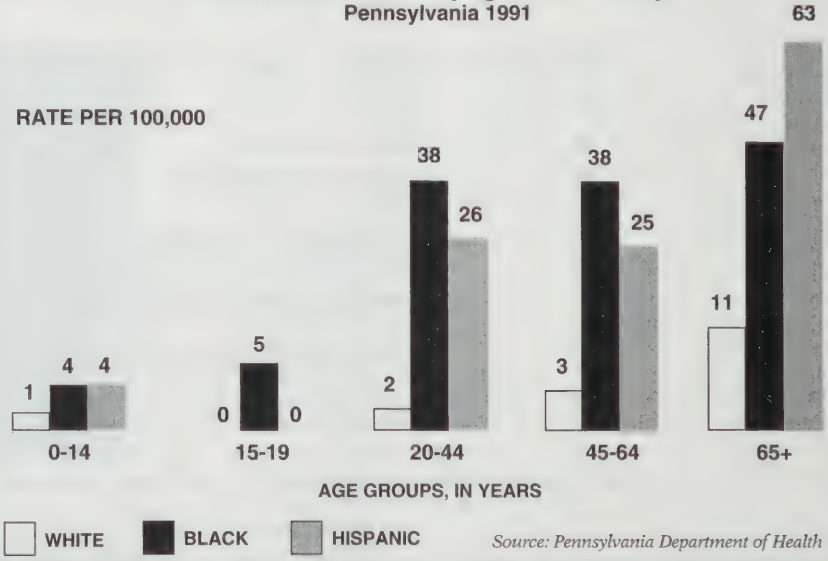
TUBERCULOSIS SPECTRE HAUNTS PUBLIC HEALTH

Although tuberculosis (TB) is both preventable and curable, it continues to be a public health problem in many cities and counties in Pennsylvania. From 1981 to 1986, the incidence of TB in the state decreased an average of 69 cases annually. In contrast, from 1986 to 1991, there has been an annual increase of 16 cases.

In 1991, 782 cases were reported in the state, or 6.6 cases per 100,000 people. That number is up two percent from the 767 cases reported in 1990. (For 1991 specifics by age and race/ethnicity, see Figure 1 below).

On a county level, Philadelphia reported 308 cases in 1991, compared to 253 cases in 1990, a 22 percent increase. Allegheny County reported 97 cases in 1991 and 78 cases in 1990, an increase of 24 percent. Pennsylvania's other 65 counties decreased from 436 cases in 1990 to 377 cases in 1991.

TB in children less than 15 years of age decreased from 29 cases in 1990 to 25 cases in 1991. Yet, since TB in children indicates recently acquired infection and transmission, these data are extremely important.



The incidence of TB is closely related to socioeconomic status, with the highest rates occurring among persons in low-income groups. Prevention and control efforts among lower socioeconomic groups present special problems because these groups usually have less access to care and less formal education, and are more likely to have coexisting diseases. Additional problems stem from a lack of shelter or transportation, higher rates of substance abuse, and more obstacles in complying with medical recommendations.

The Pennsylvania Department of Health's Tuberculosis Control Program has directed that all suspected or confirmed TB patients be assessed for the risk of acquisition of HIV infection. Since persons infected with both HIV and the tubercle bacillus are at high risk for severe clinical TB, and because the medical management of TB disease and infection must be altered in the presence of HIV infection, these cases are of particular public health concern. In 1991, 57 of the 782 state cases (7 percent) also had a diagnosis of AIDS. Of the 703 cases reported in 1986, only 6 (0.9 percent) also had AIDS.

There are wide variations in reports submitted to the Tuberculosis Control Program from around the state. Counties and districts should review their program reports to identify significant changes or deficiencies, investigate the cause of these, and implement local program changes. Elimination of TB will require coordinated efforts of public health agencies, voluntary health associations, and medical care providers.

From "Tuberculosis in the Commonwealth of Pennsylvania 1991," Tuberculosis Control Program, Pennsylvania Department of Health, May 1992

FIGURE 1
Rates of Tuberculosis by Age, Race/Ethnicity
Pennsylvania 1991

Source: Pennsylvania Department of Health

As seen in Figure 1, the highest rate of incidence of tuberculosis occurs in Pennsylvanians over the age of 65, regardless of race or ethnic background. According to the state's Department of Health, the incidence in that age group represents a decrease of one percent from 1990.

Malpractice rates too good to be true usually are.

You may have been told about lower rates offered by insurers new to the Pennsylvania market. Low rates will not benefit you if the company is not around to protect you or *your assets* if you are sued.

Physicians Insurance Company is an established Pennsylvania carrier who has continued to lower rates while protecting your future:

- 10% overall reduction in September 1991
- more for physician groups
- additional reductions for individuals who are claims free

Artificially low rates are a prescription for disaster... for the physician and the company. When selecting a malpractice carrier you should ask yourself what will happen in the future. Will they automatically surcharge my premium for claims experience? Will their policy provide me with the full Occurrence coverage I have enjoyed with Physicians Insurance Company or are they only providing a form of Claims-Made coverage—better known as Occurrence Plus or Permanent Protection? Why would a broker recommend this carrier... is the company only trying to buy my business by raising his commission? More importantly, will they be there when I need them?

At Physicians Insurance Company we have always maintained our rates among the lowest and we are committed to keeping this practice intact. When you take an honest look, *you can't do better.*

For more information on malpractice rates and coverage, please call or write today.

Why buy an office automation system that doesn't offer a long-term solution?

ACCLAIM™ from Sentient is the total system solution.

A lot of medical practices are planning to invest in an office automation system. But a lot of the systems out there just don't offer the comprehensive functions and long-term expandability that your practice may need.

IBM® and compatible hardware.

The ACCLAIM system operates on IBM and compatible hardware, so you know you're getting the quality standard of the industry. And it's completely expandable, so it can grow as your practice grows.

Long-term support.

ACCLAIM is the system solution that fits your needs today. And Sentient's software engineers, customer trainers, and telephone support people are always there to make sure your system fits your needs over the years to come.

Easy to operate.

Even if your staff has no previous computer experience, ACCLAIM is simple to operate effectively and efficiently. Complete training is included in the purchase.

When you're thinking about office automation, call Sentient first, and find out what ACCLAIM can do for you.

KePRO's Community Outreach Programs

Donald E. Harrop, MD

The Keystone Peer Review Organization board of directors and management have always taken pride in knowing that individually and as a group they have put forth extra effort to assure maximum efficiency and fairness in the review system. Another source of pride to the organization is our Community Outreach Program which we think is one of the finest and most progressive in the country. While such a program is required under our contract with the Health Care Financing Administration (HCFA), we saw the need to go beyond the HCFA requirements.

Peer review organizations (PROs) are expected to have an 800 phone "hot line" to answer Medicare beneficiary questions about PRO review, handle problems with individual cases involving PRO denials, and investigate complaints about quality of care. If the calls do not involve one of these items, PROs are under no obligation to take any further action.

However, as might be expected, the Keystone Peer Review Organization (KePRO) gets calls related to a full range of problems with which the elderly must deal. Many times, these callers have made no progress by talking to numerous agencies and organizations to which they have been referred. Rather than add to their frustration, our philosophy for the hot line is that callers should not have to make more than one more call. That is, if the call is not relevant to KePRO, and if we can't answer their question or direct them appropriately at the time of their call, we will find the correct agency, and sometimes the specific person within the agency, for them to call.

We also have an obligation to meet with beneficiary groups to explain the PRO program and beneficiaries' rights under Medicare. During a recent 12-month period, KePRO personnel addressed 86 groups representing nearly 6,000 Medicare beneficiaries and/or their advocates. Recent efforts have been directed toward the education of the beneficiary advocates, since these are the people who are often turned to when the elderly need assistance.

HCFA regulations provide that each PRO board of directors must have representation by a consumer who is a Medicare beneficiary. When this was mandated, the KePRO board decided to go one step further and appoint a Consumer Advisory Committee comprised of nine Medicare beneficiaries and a representative of the Pennsylvania Department of Aging. The charge to the committee is to advise the board on the best and most effective methods of educating the elderly public about the program. I can truthfully say that this group has provided the board with numerous novel ideas and suggestions which have certainly enhanced our educational efforts.

There are, of course, other HCFA required activities, such as printing and distributing educational brochures and providing informational releases to the media. But again, because it seemed that all of these efforts did not reach enough of the population in a state as large as Pennsylvania, it was decided that an educational videotape would be a good tool for public education. HCFA had no interest in funding such a venture. Therefore, the Pennsylvania Medical Society's Educational and Scientific Trust obtained a grant from the Pew Foundation, and an excellent 11-minute tape was produced. The tape is made available to Area Agencies on Aging, television stations, and other groups who have an interest in the elderly population. One commercial station in Philadelphia recently used the tape as source material for a favorable news brief describing KePRO's role in assisting Medicare patients.

Our emphasis on the Community Outreach Program is a constant reminder of what the Medicare program is all about and for whom it was created: the beneficiaries—our patients.

Dr. Harrop is president of the Keystone Peer Review Organization.

With Princeton, you're in good company.

More than 19,000 medical and health care professionals have chosen Princeton Insurance Company for their professional liability insurance coverage. Here are some reasons why:

- **A solid track record.** Princeton has a decade of experience providing professional liability insurance coverage to physicians, and A.M. Best has ranked us (with our parent company) among the 20 largest medical malpractice insurers nationwide since 1983.

- **Financial strength.** Our loss reserves are carried at full value, not discounted in the hope of earning sufficient interest income to pay claims. We maintain a high quality/low risk investment portfolio, with no junk bonds, no common stock and no real estate speculation. And we've earned a claims-paying ability rating of "A" from Standard & Poor's.

- **Coverage options.** Tail coverage is included in the purchase price of Princeton's innovative *Occurrence Plus* policy. A standard claims-made policy is also available, and we offer excess liability coverage (limits up to $5 million) to Pennsylvania physicians regardless of which company writes their primary coverage.

- **Strong defense against claims.** In a typical year, more than 90 percent of the Princeton-managed cases disposed of by the courts are resolved in the policyholder's favor.

It may be easier than you think to change insurance companies. Call today to find out more or return the coupon to receive a copy of our brochure, "It's Princeton's Specialty."

OPPOSITION TO RATIONING REVEALED IN POLL

Seventy-two percent of Pennsylvania residents would oppose rationing health care, according to a study by the Gallup Organization contracted by the Pennsylvania Medical Society. The 1992 Public Opinion Poll revealed that respondents under age 25 were more likely to favor rationing, and the uninsured and those without a personal physician were more likely to favor rationing than the insured or those with a physician.

The poll was primarily conducted to identify perceptions about the problems facing U.S. health care, to examine physician relationships, and to assess perceptions about health care costs. Questions addressed the cost of medical care, malpractice issues, health insurance coverage, and other topics. National comparisons are made using statistics from the 1992 Gallup Poll conducted for the AMA.

This article is a follow-up to "Survey Reveals Opinions on Health Care Issues," which appeared in the September issue of PENNSYLVANIA MEDICINE; it completes the summary of poll results.

Cost of medical care

Pennsylvania adults were asked: "Other than inflation, what do you think contributes most significantly to the cost of health care?" Top contributors listed by respondents include doctors' fees (26 percent), increases in technology costs (12 percent), hospital charges (10 percent), cost of medication (10 percent), and malpractice and lawsuits (8 percent).

Other results show that 57 percent of respondents would support a proposal to increase government spending to ensure access to care for the poor, even if it meant an increase in taxes; 59 percent were confident in their ability to pay for a major illness, a somewhat higher proportion than found nationally (55 percent); and 75 percent would be willing to pay more out-of-pocket for routine and less expensive care if they were confident that insurance would cover more expensive and long-term care.

Respondents were also asked to choose between several pairs of options regarding medical care. Their choices indicated they are more likely to:

- pay more and select a physician (83 percent), rather than pay less and have an assigned physician (15 percent);
- pay more and have an option on the hospital (80 percent), rather than pay less and be required to use a hospital selected by their insurance plan (17 percent);
- pay more and have care right away (74 percent), rather than pay less and have care delayed (22 percent);
- pay more and have technology available in their local community (55 percent), rather than pay less and have technology available only in regional centers (39 percent); and
- pay private doctors/hospitals (54 percent), rather than pay higher taxes for government care (41 percent).

Malpractice issues

In general, respondents believe the costs of malpractice suits need to be

FIGURE 1

Preferred Mechanism for Resolving a Complaint About a Doctor*

*Poll results are based on 408 interviews among adults in Pennsylvania in Spring 1992. The margin of error is 5 percent.

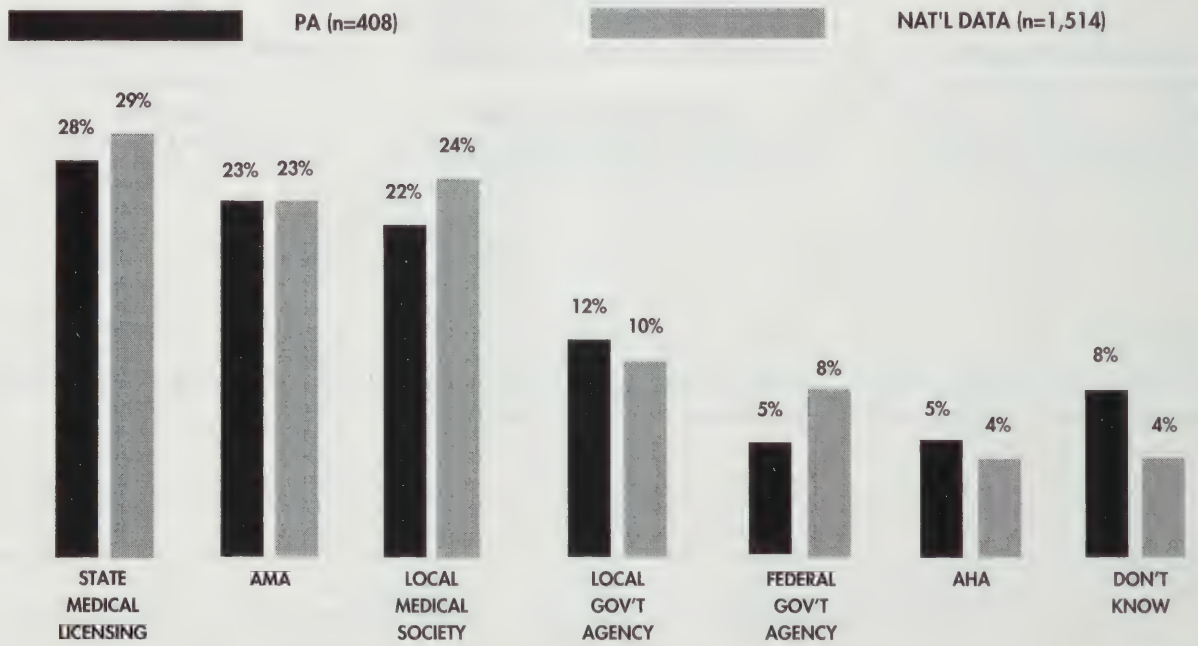

Figure 1 compares state and national responses to the 1992 Gallup Poll question: "Suppose you were dissatisfied with the way you were treated by a doctor and wanted to complain about it. If each of the following had a mechanism for resolving complaints about doctors, which *one* would you prefer to go to with your complaint?"

controlled. The majority of respondents (58 percent) felt that the number of malpractice suits against doctors was higher than justified, and 20 percent felt the number was about right. Also, 54 percent felt that too much money was being awarded in malpractice suits, 70 percent would favor setting a ceiling on pain and suffering awards, 68 percent felt malpractice suits have "a great deal" of effect on the cost of health care, and 77 percent would favor reducing malpractice awards if it would reduce costs.

The poll also asked: "Suppose you were dissatisfied with the way you were treated by a doctor and wanted to complain about it. If each of the following had a mechanism for resolving complaints about doctors, which one would you prefer to go to with your complaint?" The State Medical Licensing Board (26 percent), the American Medical Association (23 percent), and the local medical society (22 percent) were the preferred agencies (see Figure 1 for specifics and national comparison).

Health insurance coverage

Nearly nine in ten Pennsylvania residents (88 percent) are covered by some form of health insurance, according to the poll. That proportion is identical to the national figure.

Of those with insurance, 72 percent are covered through an employer, and 28 percent had health insurance through a government program, such as Medicare or Medicaid.

Further, 19 percent of respondents reported having had problems filling out insurance forms, and 65 percent agreed that Medicare patients should be charged for health services based on their ability to pay.

TRUST SPONSORING GRATEFUL MED® EXHIBIT

The Educational and Scientific Trust of the Pennsylvania Medical Society will sponsor an exhibit from the National Library of Medicine during the Society's annual business meeting at the Adams Mark Hotel, Philadelphia, October 22-25.

Attendees are invited to bring one or two questions they'd like to research in the National Library and have them answered free-of-charge through the on-line computer link known as GRATEFUL MED®.

GRATEFUL MED® is a menu-driven computer program provided by the National Library of Medicine which is available for both PCs and Macintosh computers. The software, when linked to the National Library by modem, permits individuals to search library files on demand. Bibliographies and abstracts are available on the screen and can be stored and/or reproduced on an office printer. The software also includes the LOANSOME DOC® ordering feature.

The Trust is sponsoring the exhibit to show physicians the ease with which research and patient support information can be obtained.

HAHNEMANN RECEIVES OUTREACH FUNDING

The Hahnemann University Library has been awarded $25,000 from the National Library of Medicine, Maryland, for a GRATEFUL MED® outreach project. GRATEFUL MED® is a computer program developed by the National Library to simplify on-line searching of the MEDLINE database; a recently added feature, LOANSOME DOC®, facilitates acquiring photocopies of articles.

The purpose of the project is to turn 200 health professionals who are minorities working in underserved urban areas, or who work with populations with high percentages of minorities, into active GRATEFUL MED® users. This will be accomplished through a combination of training, support services, and document delivery.

PITTSBURGH INITIATIVE GOES STATEWIDE

A Pittsburgh outreach initiative, supported by State Society involvement, is being expanded throughout Pennsylvania via public television stations this October during National Breast Cancer Month.

"The Breast Test"—a comprehensive project that provides women with practical information about breast cancer, self examination, and mammograms—is scheduled to be aired October 26 at 10:00 p.m. Funding will be provided by The Medical College of Pennsylvania and the Pennsylvania Public Television Network.

The model project, which was developed and tested in Pittsburgh by WQED-TV in 1991, included a television special; a viewer hotline; print and video resources; and outreach sites in a corporation, a public housing community, an African-American church, an elderly center, a women's group, and a neighborhood.

It was funded by the Jewish Healthcare Foundation with additional funding from the National Cancer Institute, and was the recipient of the American Cancer Society's award for "Best Public Awareness Campaign" and the Health Education Center's "Health Education/Media" award.

For additional information, check local listings. To receive a free copy of "The Breast Test" newsletter or an information packet on breast care, or to find out how to become involved, call (412) 622-6442.

County News

PHYSICIANS VOLUNTEER AT DELAWARE COUNTY CAMP

A number of Delaware County physicians volunteered their services on Sunday afternoons to provide medical exams to over 600 camp children throughout the summer.

For the fifty-eighth consecutive year, Camp Sunshine, located in Thornton, provided an overnight camp program for children from financially limited families in Delaware County. Ira H. Weiner, DO, has served as the "camp physician" for the past two summers, on call for medical situations that arise during the children's one-week camp stay. Several other county medical society members and area physicians assist the camp's administration each summer by performing "check-in physicals."

Specialty News

ORTHOPEDIC SOCIETY TO MEET IN NOVEMBER

The Pennsylvania Orthopedic Society will hold its fall meeting, "Orthopedic Update on Spine, Shoulder, and Elbow Surgery," November 12-14 at the Vista Hotel, Pittsburgh.

The meeting, which offers 12 Category 1 credit hours of continuing medical education (CME), will feature several national physicians:

- Neal S. El-Attrache, MD, Kerlan-Jobe Orthopedic Groups, Santa Monica, California, will present

"Elbow Arthroscopy" and "Medial Elbow Reconstruction in the Throwing Athlete."

• Richard J. Hawkins, MD, clinical professor, University of Colorado, and orthopedic surgeon, Steadman Hawkins Clinic, Vail, Colorado, will present "Update on Rotator Cuff Disease" and "Concepts of Instability."

• Harry N. Herkowitz, MD, chairman of orthopedic surgery and director of spine surgery, William Beaumont Hospital, Royal Oak, Michigan, will present "Surgical Treatment of Degenerative Lumbar Spondylolisthesis" and "The Role of Laminoplasty in the Management of Cervical Spondylosis."

• Michael R. Weitekamp, MD, associate professor of medicine, Penn State's Milton S. Hershey Medical Center, Hershey, Pennsylvania, will present "Update in Antibiotics for Orthopedics."

In addition to the scientific meeting, which runs from 1:00 p.m. on Thursday through 12:00 noon on Saturday, a Physician Leadership Workshop will be offered on Thursday from 8:00 a.m.-12:00 noon. The workshop, sponsored in conjunction with the Institute for Physician Leadership, will offer physicians in-depth training in communications and negotiations. It is approved for four Category 1 credit hours of CME.

For information or to register, call the orthopedic society at (717) 558-7750 or 1-800-228-7823.

AMA News

DOCTORS INVITED TO JOIN COALITION VS VIOLENCE

Concerned physicians across America are invited to join the National Coalition of Physicians Against Family Violence as one way of registering concern and willingness to help with the growing problem.

Upon joining, physicians will receive a set of guidelines on child physical abuse, child sexual abuse, and domestic violence which provide important information on diagnosis and treatment of abuse. Guidelines on elder abuse will be released later this fall.

To date, more than 1,200 individuals have joined the coalition. For information, call the AMA Department of Mental Health at (312) 464-5066.

PA AIDS ETC OFFERING HIV CLINICAL TRAINING

The Pennsylvania AIDS Education and Training Center (PA AIDS ETC) is offering a limited number of clinical mini-residency training programs for providers of direct patient care to HIV infected patients. The goal of the program is to increase the number of health professionals who are trained to care for HIV-infected and AIDS patients.

Qualified candidates may spend up to two days at a facility which provides specialized HIV care. Clinical settings for both pediatric and adolescent/adult care are available, and each candidate is matched with an expert clinical mentor at the facility which best meets the candidate's stated objectives.

Training is either one-on-one or small group, and rotations may include: multidisciplinary women's HIV service, laboratory medicine, pulmonary medicine, family medicine, inpatient and/or outpatient services, drug therapy and trials, dental medicine, pediatrics, private office, infectious diseases, and AIDS clinical research units.

PA AIDS ETC is one of a nationwide network of 17 centers established by the Health Resources and Services Administration, Bureau of Health Professions, Division of Medicine, U.S. Public Health Service, Department of Health and Human Services, to provide training for health professionals on HIV disease. PA AIDS ETC has 12 participating sites statewide, including sites in Hershey, Philadelphia, and Pittsburgh.

Continuing education credits and contact hours are available for clinical training participants. For additional information or to apply to the program, physicians in Philadelphia, Chester, Delaware, Bucks, and Montgomery counties should call Donna Donkockik at (215) 557-2101. Physicians in all other Pennsylvania counties should call Todd Harwell at (412) 624-1895.

INSTITUTE SEEKING FELLOWSHIP NOMINATIONS

The Institute of Medicine of the National Academy of Sciences is seeking nominations for the Robert Wood Johnson Foundation (RWJF) Health Policy Fellowships Program. The program, funded by RWJF and conducted by the institute with assistance from the American Political Science Association, is intended to provide opportunities for mid-career professionals working in academic settings to gain an understanding of major health policy issues and how they are addressed in the political system.

Six fellows participate annually in a one-year program of orientation and full-time working experience in Washington, DC. They are paid annual stipends with fringe benefits and are reimbursed for relocation expenses to and from Washington, within certain specified limits.

Nominations may be made by chief executive officers of eligible institutions, including all academic health centers and other institutions in the U.S. that have or are medical schools. Past fellows have been selected from faculty in medicine, dentistry, the biomedical sciences, nursing, public health, health services administration, the allied health professions, economics, and other social sciences.

For additional information, including nominee qualifications and a nomination timetable, call Marion Ein Lewin at the Institute of Medicine, (202) 334-1506.

CANCER PREVENTION TRIAL AT STATE SITES

Six Pennsylvania cancer facilities, along with more than 260 North American sites, are participating in the first nationwide trial to determine whether the drug, tamoxifen, prevents breast cancer.

Primary investigation sites in the state include: Fox Chase Cancer Center, Philadelphia; Delaware County Regional Cancer Center, Drexel Hill; Montgomery Cancer Center, Norristown; North Penn Cancer Program, Lansdale; Paoli Memorial Hospital, Paoli; and Saint Mary Regional Cancer Center, Langhorne. Research affiliates include: Polyclinic Regional Cancer Center, Harrisburg; and Reading Hospital Regional Cancer Center, Reading.

Tamoxifen is currently being used successfully to reduce tumor recurrence and improve survival rates in women with breast cancer, but previous studies have shown that the drug might be used to prevent the disease. Researchers also hope to

determine whether the drug reduces deaths from heart disease.

Approximately 16,000 women, 35 and older with certain risk factors, will be enrolled in the five-year study. They will take either tamoxifen or a placebo each day and be examined by a physician at regular intervals.

"Each year physicians find breast cancer in approximately 150,000 American women," says Mary Simmonds, MD, a cancer specialist and one of Polyclinic's principal investigators for the study. "If we prove tamoxifen prevents breast cancer, potentially we can save thousands of lives."

For additional information, call the National Cancer Institute's Cancer Information Service at 1-800-422-6237 or the American Cancer Society's Response System at 1-800-227-2345.

MCP AWARDED TWO-YEAR GRANT

The Medical College of Pennsylvania (MCP) was awarded a two-year, $134,000 grant from the Pew Charitable Trusts to fund the placement of 12 first-year medical students as interns in health and social service agencies in Germantown and East Falls.

The grant will promote a collaborative effort of faculty and students at the University of Pennsylvania, Jefferson Medical College of Thomas Jefferson University, and Hahnemann University School of Medicine. It will enable medical students at all the schools to develop coordinated outreach programs in their respective communities to address such problems as high infant mortality and inadequate prenatal care rates.

AMA News

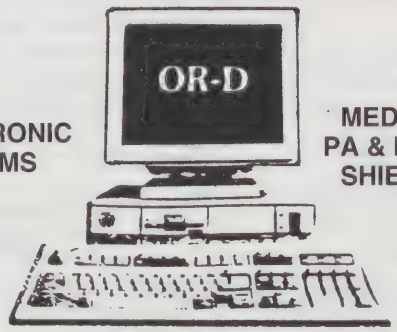
AMA RELEASES UPDATED PHYSICIAN CODE OF ETHICS

The AMA's Council on Ethical and Judicial Affairs has released the 1992 edition of *Current Options*, the publication generally regarded as the medical profession's code of ethics. Newly published opinions include:

- rules generally prohibiting referrals to health care facilities in which referring physicians have financial interests;
- a provision that it is unethical for physicians to deny treatment to HIV-infected patients or to those who refuse HIV testing, unless knowledge of HIV status is necessary for proper care;
- guidelines for gifts from industry prohibiting physicians from accepting anything of substantial value, including travel and lodging expenses for educational and promotional events;
- identification of gender and racial disparities in medical care and research as significant health care problems;
- rules strictly forbidding sexual harassment and misconduct, including prohibiting sexual relations with patients;
- recognition of a physician's right to associate professionally with a chiropractor if believed by the physician to be in the patient's best interest; and
- rules for reporting impaired, incompetent, or unethical colleagues.

GENEVA INITIATIVE SEEKS MEDICAL BOOKS

The Geneva Initiative on Psychiatry is seeking books and periodicals for inclusion in four libraries being established as part of a reorganization of the psychiatric service in the Ukraine.



In cooperation with the new Ukranian Psychiatric Association, which has applied for membership in the World Psychiatric Association, a number of psychiatric manuals and textbooks will be published in Ukranian and Russian, and four psychiatric-medical libraries will be established in the Ukraine.

Physicians interested in helping may mail any quantity of books and periodicals, contemporary or outdated, regarding psychiatry and other medical science fields, to the Geneva Initiative Library Project, c/o Freedom House, 45 East 21st Street, 5th Floor, New York, NY 10010.

The late **Richard A. Kern, MD,** 1964 president of the State Society, has been honored by the installation of a plaque in the Scottish Rite Museum of National Heritage, Lexington, Massachusetts.

Margarita M. Torres, MD, Newtown, has been named medical director at Moss Rehabilitation Hospital, Philadelphia.

Ed Benz, MD, a native of Pittsburgh, has been named chairman of the Department of Medicine at the University of Pittsburgh School of Medicine.

Francis J. Duggan, MD, Hershey urologist, has been re-elected chairman of the board of directors of the Capital Area Health Foundation.

William G. Kussmaul III, MD, Media, has been appointed director of the Cardiac Catheterization Laboratory at Pennsylvania Hospital, Philadelphia.

Dr. Kussmaul

Edibaldo Silva, MD, PhD, FACS, Danville, has received a three-year appointment as cancer liaison physician for the Hospital Cancer Program, Geisinger Medical Center.

James J. Flowers, DO, had been named chairman, emergency services, Saint Agnes Medical Center, Philadelphia.

Richard Finegold, MD, urologist at the Monongahela Valley Hospital since 1972, received a Dimensions in Performance Award from the hospital for his outstanding accomplishments and dedication to the hospital and to health care.

Alan R. Silverman, MD, Pittsburgh, has been appointed to the board of directors of the American Society of Dermatopathology.

Bruce Kevin Branin, DO, vice president for medical services, Marworth Chemical Dependency Treatment Program, Geisinger Medical Center, Danville, was named to the board of directors of the American Society of Addiction Medicine.

Alan J. Wein, MD, chief, Division of Urology, University of Pennsylvania Medical Center, has received the Lifetime Achievement Award of the Urodynamics Society in recognition of significant contributions and leadership in the field of neurology.

Bryan C. Donohue, MD, cardiovascular disease specialist, Pittsburgh, was one of five U.S. physicians to visit Japan and Taiwan in June as part of a trip sponsored by the American College of Cardiology and the Fulbright Program of the United States Information Agency. Dr. Donohue lectured on advanced clinical strategies in management of acute ischemic heart diseases.

Albert Einstein Medical Center surgeons **Richard Greenberg, MD,** and **Mark Kaplan, MD,** have performed Philadelphia's first laparoscopic splenectomy.

Anthony V. Coletta, MD, associate attending surgeon, Bryn Mawr Hospital, has been accepted as a member of the Society of Laparoendoscopic Surgeons and of the International Society of Minimally Invasive Therapy.

Thomas Sedlacek, MD, chairman of the Department of Gynecology at The Graduate Hospital in Philadelphia, received the Colposcopy Recognition Award from the American Society for Colposcopy and Cervical Pathology for his exemplary pursuit of education in colposcopy, lower genital tract neoplasia, and related subjects.

John G. Case Jr., MD, Doylestown, was appointed medical director of Progressions, the partial hospital and outpatient services division of the Northwestern Institute, Fort Washington.

Valluvan Jeevanandam, MD, has been named surgical director of cardiopulmonary transplantation at Temple University Heart Failure and Transplant Center.

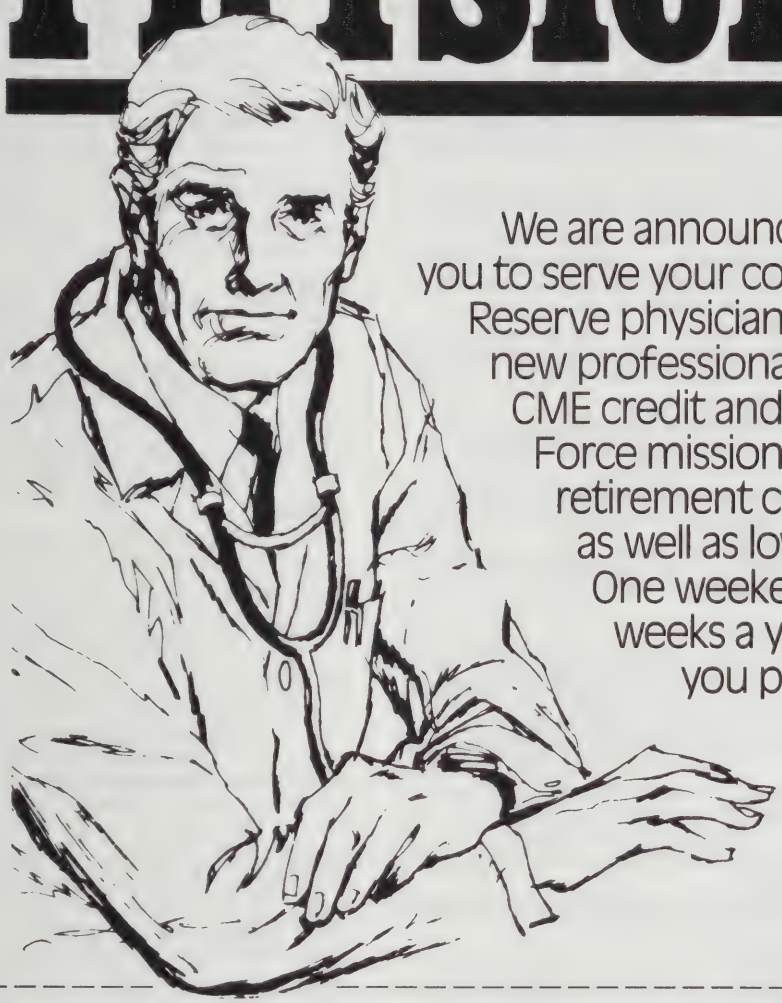
Alan M. Laties, MD, and **Richard A. Stone, MD,** professors in the Department of Ophthalmology of the University of Pennsylvania School of Medicine at Scheie Eye Institute, will share a $100,000 research award from Alcon Research Institute for outstanding contributions in the field of vision research.

Alan Richard Cohen, MD, Merion, was appointed division chief of hematology at The Children's Hospital, Philadelphia.

Fredric Jarrett, MD, Pittsburgh surgeon, was elected secretary of the Eastern Vascular Society.

Charles Fineberg, MD, professor of surgery and director of the operating rooms, Thomas Jefferson University Hospital, was elected president of the J. Aitken Meigs Medical Association.

Dr. Fineberg



Howard McC. Snyder III, MD, associate director, Division of Pediatric Urology, The Children's Hospital, Philadelphia, was appointed to the board of directors of the National Kidney Foundation.

Sarah S. Long, MD, chief, Infectious Diseases Section, St. Christopher's Hospital for Children, Philadelphia, has been appointed chairman of the American Board of Pediatrics Subspecialty Board of Infectious Diseases. Also, **David S. Smith, MD,** a member of the hospital's Department of Pediatrics, was named Pediatrician of the Year by the Pennsylvania Chapter of the American Academy of Pediatrics. **William Hammer, MD,** chairman, Department of Medicine, Chestnut Hill Hospital, Philadelphia, has been elected president of the Philadelphia Academy of Cardiology.

Adam E. Flanders, MD, assistant professor of radiology, Jefferson Medical College, is one of six radiologists nationwide designated a 1992 Scholar of the Radiological Society of North America. The scholarship program supports the research of promising young academic radiologists.

Two physicians have been appointed to positions at The Graduate Hospital, Philadelphia: **Michael Baime, MD,** Media, as chief of the Division of Internal Medicine; and **Eliot Nierman, MD,** Philadelphia, as vice chairman of the Department of Medicine.

PHYSICIANS

We are announcing opportunities for you to serve your country as an Air Force Reserve physician/officer. You can make new professional associations, obtain CME credit and help support the Air Force mission. For those who qualify, retirement credit can be obtained as well as low cost life insurance. One weekend a month plus two weeks a year or less can bring you pride and satisfaction in serving your country.

$30,000 BONUS OFFERED TO HEALTH CARE PROFESSIONALS

If you are a board-certified physician or a candidate for board certification in one of the following specialties, you may qualify for a bonus of up to $30,000 in the Army Reserve.

Anesthesiology • General Surgery • Thoracic Surgery
Pediatric Surgery • Orthopedic Surgery
Colon-Rectal Surgery • Vascular Surgery • Neurosurgery

A test program is being conducted which offers a bonus to eligible physicians who reside in certain geographic areas (Pennsylvania, West Virginia, Ohio, Michigan, Illinois, Indiana, Wisconsin, Minnesota and Iowa). You would receive a $10,000 bonus for each year you serve as an Army Reserve physician—for a maximum of three years.

You may serve near your home, at times convenient for you, or at Army medical facilities in the United States and abroad. There are also opportunities to attend conferences and participate in special training programs, such as the Advanced Trauma Life Support Course.

To learn more about the Army Reserve and the Bonus Test Program, call one of our experienced Medical Personnel Counselors:

In Philadelphia call Major Ernest Lyons or Captain Jules Fleischner 1-800-759-5462. In Pittsburgh call Captain Russell Flemming collect (412) 644-4432.

ARMY RESERVE. BE ALL YOU CAN BE.

Pennsylvania, Pocono-Northeast—Excellent career opportunity to practice quality

Do you know someone who needs nursing care in their home?

We have a special person to take care of your special person.

Are your patients entitled and/or eligible for Medicare benefits? If you are not sure call **MEDICAL PERSONNEL POOL** and we will help you get the answer. Bear in mind that a person need not be a Social Security recipient or over 65 to receive Medicare services. People who are disabled for 2 years or more are eligible as are people who are in dialysis for 6 months or longer. **MEDICAL PERSONNEL POOL** provides a full range of **HOME HEALTH SERVICES**, as well as private duty nursing. We provide most of these services in the home as well as in the hospital and nursing home.

Child and Adolescent Psychiatrist—To develop the creation of an exciting private practice opportunity in western Maryland. Our not-for-profit, private psychiatric hospital offers a broad range of psychiatric services to children, adolescents and their families. Established in 1946 the hospital has become a leader in pediatric psychiatry. We are looking for the right individual to help us expand our inpatient and community based services to young people. The practice will be financially and emotionally rewarding. Collegial atmosphere exists in a rich clinical environment. Inpatient and outpatient opportunities are available. The community offers the very best in rural living and close proximity to major east coast cultural centers. Moderate costs of living compare very favorably with other areas in the country. For more information about this exciting opportunity contact David Rutherford, Chief Executive Officer, Brook Lane Psychiatric Center, P.O. Box 1945, Hagerstown, MD 21742-1945; (301) 733-0330. Brook Lane actively solicits applications from minorities and people of various physical disabilities.

Adult Services Psychiatrist—To develop a private practice opportunity in beautiful western Maryland. Our private, not-for-profit psychiatric hospital established in 1946 offers an exciting opportunity for the right individual. Other psychiatrists on staff will welcome a new colleague who is willing to provide inpatient and outpatient care to adults with a variety of psychiatric dysfunctions. The community offers a stimulating living environment of agricultural and mountain surroundings combined with proximity to the nation's cultural centers. Housing and living cost compare very favorably. Knowledgeable assistance and financial considerations are available to help establish a viable practice. for more information contact David Rutherford, Chief Executive Officer, Brook Lane Psychiatric Center, P.O. Box 1945, Hagerstown, MD 21742-1945 (301) 733-0330. Brook Lane actively solicits applications from minorities and people of various physical abilities.

Internist or Family Practitioner needed. Full or part-time to join busy practice in busy county. Please call (412) 375-1005.

Pennsylvania—Seeking cardiologist to join two Board certified well-trained cardiologists practicing in 4,000 sq. ft. new state-of-the-art office and 200-bed community hospital in central PA. Urgent—Solo general practitioner needed to care for 48-year accumulation of patients. Brick home, separate office and rental apartment. On edge of small town. 10 miles off I-79 and 25 minutes from 3 hospitals. Write for appointment to Roy Jack, MD, 201 W. South St., Carmichaels, PA 15320. Include phone number.

Family Practice—5 excellent opportunities available in the Mid-Atlantic region. We have practices in extremely desirable community settings, including the Chesapeake Bay, the Delmarva Peninsula and suburban Philadelphia. All are within close proximity to popular Atlantic Ocean resorts and major metropolitan areas of the Northeast. Solo and group

Is your malpractice insurance being non-renewed or declined for any reason?

If your coverage is being refused, non-renewed or cancelled, professional liability coverage with a high-quality private insurance company may be hard to find. You're not alone. Every day, professionals like you find themselves ineligible for coverage through their current insurance carrier.

At Old Dominion Intermediaries we specialize in serving the professional liability needs of physicians and other health professionals. What others see as difficult or unusual is our specialty. We represent only U.S. based, financially sound companies who have served the medical community for over 10 years.

If you are having difficulty qualifying for your association or other standard market program, call us today for more information . . . in complete confidence.

Millions Victimized by Family Members Every Year!

Violence among family members has reached staggering proportions. Every year more than 2 million cases of child abuse and neglect are reported, between 2 and 4 million women are battered by their spouses, and between 700,000 and 1.1 million of the elderly population are abused.

The American Medical Association has formed a *National Coalition of Physicians Against Family Violence.* Through the *Coalition* the American Medical Association hopes to involve you in activities that address issues of child abuse, sexual assault, domestic violence, and elder abuse because you have the unique ability to identify the symptoms, first-hand. By joining the *National Coalition,* you will be showing your concern about the effects of family violence and victimization, and will become a committed advocate within your community for the prevention of family violence.

Yes, include my name in the *Coalition's* membership.

Health Care: Noble Profession or Merely a Business Enterprise?

Narayan Deshmukh, MD

It is troubling to see the bureaucratic description of physicians as health care providers, no doubt invented to save the trouble of describing doctors, dentists, chiropractors, podiatrists, etc., separately, and to save on print.

While the description may be scientifically accurate, it detracts from the dignity of being addressed as a physician or doctor. Most physicians and nurses enter their profession for its nobility and the satisfaction it gives them to help their fellow human beings in their suffering. If it was merely a business to earn a livelihood, there are many other ways, perhaps less arduous and demanding, to make money.

When a patient walks into my office, I do not view him/her as another customer who will bring more dollars, but as a person with perhaps a challenging health problem which I want to solve and whom I want to restore to a normal state.

When a surgeon takes a certifying examination for the American Board of Surgery, the latter requires submission of all of the major operations done during the previous year along with their outcome. The physician is never asked how much money was brought in.

On the other hand, when Wall Street evaluates IBM, AT&T, or GM, the evaluation is based strictly on how many dollars they earned in the past year.

Similarly, it is inappropriate to refer to patients as clients. It has not been shown to decrease their sense of uncertainty or insecurity. If we are truly concerned about the dignity and feelings of our patients, let us address them politely by surname (instead of taking the liberty of calling them by their first names), treat them with greater compassion, and show an understanding of their difficulties. [Guthrie Clinic] does business with many companies and individuals that supply goods and services. That is a business-client relationship. Calling patients clients further confuses this relationship.

When a potential client walks into an automobile dealership, the salesman is interested in selling the most expensive car at the highest profit. When a patient enters a medical center, the last thing the health workers have on their minds is how much money this person is going to bring.

"There is no equivalent to the Hippocratic Oath or the Nightingale pledge for car salesmen, insurance agents, and retail chain managers."

As it is, the American public has become suspicious that the health profession is only interested in making the most money from patients, the government, and private health insurance companies. By addressing the patients as clients, we will further enhance this erroneous belief.

Most hospitals in this country are non-profit organizations, as is the Guthrie Clinic. Have you heard of any businesses that deal with clients being not-for-profit?

If we want to continue to have the medical and nursing professions treated as noble occupations and attract young people with high ideals, we should abandon this business approach of calling ourselves health care workers and the patients clients. There is no equivalent to the Hippocratic Oath or the Nightingale pledge for car salesmen, insurance agents, and retail chain managers.

Dr. Deshmukh is a general surgeon at the Guthrie Clinic Ltd., Sayre.

One Of A Kind

Zantac®

ranitidine HCl/Glaxo 150 mg and 300 mg tablets

Zantac® 150 Tablets
(ranitidine hydrochloride)

Zantac® 300 Tablets
(ranitidine hydrochloride)

Zantac® Syrup
(ranitidine hydrochloride)

BRIEF SUMMARY

The following is a brief summary only. Before prescribing, see complete prescribing information in Zantac® product labeling.

INDICATIONS AND USAGE: Zantac® is indicated in:
1. Short-term treatment of **active duodenal ulcer.** Most patients heal within 4 weeks.
2. **Maintenance therapy** for duodenal ulcer patients at reduced dosage after healing of acute ulcers.
3. The treatment of **pathological hypersecretory conditions** (e.g., Zollinger-Ellison syndrome and systemic mastocytosis).
4. Short-term treatment of **active, benign gastric ulcer.** Most patients heal within 6 weeks and the usefulness of further treatment has not been demonstrated.
5. Treatment of **gastroesophageal reflux disease (GERD).** Symptomatic relief commonly occurs within 1 or 2 weeks after starting therapy with Zantac 150 mg b.i.d.
6. Treatment of endoscopically diagnosed **erosive esophagitis.** Healing of endoscopically diagnosed erosive esophagitis occurs at 4 weeks (47%), 8 weeks (71%), and 12 weeks (84%) of therapy with Zantac 150 mg q.i.d. Symptomatic relief of heartburn commonly occurs within 24 hours of therapy initiation with Zantac.

Concomitant antacids should be given as needed for pain relief to patients with active duodenal ulcer; active, benign gastric ulcer; hypersecretory states; GERD; and erosive esophagitis.

CONTRAINDICATIONS: Zantac® is contraindicated for patients known to have hypersensitivity to the drug.

PRECAUTIONS: General: 1. Symptomatic response to Zantac® therapy does not preclude the presence of gastric malignancy.
2. Since Zantac is excreted primarily by the kidney, dosage should be adjusted in patients with impaired renal function (see DOSAGE AND ADMINISTRATION). Caution should be observed in patients with hepatic dysfunction since Zantac is metabolized in the liver.
Laboratory Tests: False-positive tests for urine protein with Multistix® may occur during Zantac therapy, and therefore testing with sulfosalicylic acid is recommended.
Drug Interactions: Although Zantac has been reported to bind weakly to cytochrome P-450 *in vitro*, recommended doses of the drug do not inhibit the action of the cytochrome P-450-linked oxygenase enzymes in the liver. However, there have been isolated reports of drug interactions that suggest that Zantac may affect the bioavailability of certain drugs by some mechanism as yet unidentified (e.g., a pH-dependent effect on absorption or a change in volume of distribution).

Increased or decreased prothrombin times have been reported during concurrent use of ranitidine and warfarin. However, in human pharmacokinetic studies with dosages of ranitidine up to 400 mg per day, no interaction occurred; ranitidine had no effect on warfarin clearance or prothrombin time. The possibility of an interaction with warfarin at dosages of ranitidine higher than 400 mg per day has not been investigated.
Carcinogenesis, Mutagenesis, Impairment of Fertility: There was no indication of tumorigenic or carcinogenic effects in life-span studies in mice and rats at dosages up to 2,000 mg/kg per day.

Ranitidine was not mutagenic in standard bacterial tests (*Salmonella, Escherichia coli*) for mutagenicity at concentrations up to the maximum recommended for these assays.

In a dominant lethal assay, a single oral dose of 1,000 mg/kg to male rats was without effect on the outcome of two matings per week for the next 9 weeks.
Pregnancy: ***Teratogenic Effects: Pregnancy Category B:*** Reproduction studies have been performed in rats and rabbits at doses up to 160 times the human dose and have revealed no evidence of impaired fertility or harm to the fetus due to Zantac. There are, however, no adequate and well-controlled studies in pregnant women. Because animal reproduction studies are not always predictive of human response, this drug should be used during pregnancy only if clearly needed.
Nursing Mothers: Zantac is secreted in human milk. Caution should be exercised when Zantac is administered to a nursing mother.
Pediatric Use: Safety and effectiveness in children have not been established.
Use in Elderly Patients: Ulcer healing rates in elderly patients (65-82 years of age) were no different from those in younger age-groups. The incidence rates for adverse events and laboratory abnormalities were also not different from those seen in other age-groups.

ADVERSE REACTIONS: The following have been reported as events in clinical trials or in the routine management of patients treated with Zantac®. The relationship to Zantac therapy has been unclear in many cases. Headache, sometimes severe, seems to be related to Zantac administration.
Central Nervous System: Rarely, malaise, dizziness, somnolence, insomnia, and vertigo. Rare cases of reversible mental confusion, agitation, depression, and hallucinations have been reported, predominantly in severely ill elderly patients. Rare cases of reversible blurred vision suggestive of a change in accommodation have been reported. Rare reports of reversible involuntary motor disturbances have been received.
Cardiovascular: As with other H_2-blockers, rare reports of arrhythmias such as tachycardia, bradycardia, atrioventricular block, and premature ventricular beats.
Gastrointestinal: Constipation, diarrhea, nausea/vomiting, abdominal discomfort/pain, and rare reports of pancreatitis.
Hepatic: In normal volunteers, SGPT values were increased to at least twice the pretreatment levels in 6 of 12 subjects receiving 100 mg q.i.d. intravenously for 7 days, and in 4 of 24 subjects receiving 50 mg q.i.d. intravenously for 5 days. There have been occasional reports of hepatitis, hepatocellular or hepatocanalicular or mixed, with or without jaundice. In such circumstances, ranitidine should be immediately discontinued. These events are usually reversible, but in exceedingly rare circumstances death has occurred.
Musculoskeletal: Rare reports of arthralgias.
Hematologic: Blood count changes (leukopenia, granulocytopenia, and thrombocytopenia) have occurred in a few patients. These were usually reversible. Rare cases of agranulocytosis, pancytopenia, sometimes with marrow hypoplasia, and aplastic anemia and exceedingly rare cases of acquired immune hemolytic anemia have been reported.
Endocrine: Controlled studies in animals and man have shown no stimulation of any pituitary hormone by Zantac and no antiandrogenic activity, and cimetidine-induced gynecomastia and impotence in hypersecretory patients have resolved when Zantac has been substituted. However, occasional cases of gynecomastia, impotence, and loss of libido have been reported in male patients receiving Zantac, but the incidence did not differ from that in the general population.
Integumentary: Rash, including rare cases suggestive of mild erythema multiforme, and, rarely, alopecia.
Other: Rare cases of hypersensitivity reactions (e.g., bronchospasm, fever, rash, eosinophilia), anaphylaxis, angioneurotic edema, and small increases in serum creatinine.

OVERDOSAGE: Information concerning possible overdosage and its treatment appears in the full prescribing information.

DOSAGE AND ADMINISTRATION: (See complete prescribing information in Zantac® product labeling.)
Active Duodenal Ulcer: The current recommended adult oral dosage is 150 mg or 10 mL (2 teaspoonfuls equivalent to 150 mg of ranitidine) twice daily. An alternative dosage of 300 mg or 20 mL (4 teaspoonfuls equivalent to 300 mg of ranitidine) once daily at bedtime can be used for patients in whom dosing convenience is important. The advantages of one treatment regimen compared to the other in a particular patient population have yet to be demonstrated.
Maintenance Therapy: The current recommended adult oral dosage is 150 mg or 10 mL (2 teaspoonfuls equivalent to 150 mg of ranitidine) at bedtime.
Pathological Hypersecretory Conditions (such as Zollinger-Ellison syndrome): The current recommended adult oral dosage is 150 mg or 10 mL (2 teaspoonfuls equivalent to 150 mg of ranitidine) twice a day. In some patients it may be necessary to administer Zantac® 150-mg doses more frequently. Dosages should be adjusted to individual patient needs, and should continue as long as clinically indicated. Dosages up to 6 g per day have been employed in patients with severe disease.
Benign Gastric Ulcer: The current recommended adult oral dosage is 150 mg or 10 mL (2 teaspoonfuls equivalent to 150 mg of ranitidine) twice a day.
GERD: The current recommended adult oral dosage is 150 mg or 10 mL (2 teaspoonfuls equivalent to 150 mg of ranitidine) twice a day.
Erosive Esophagitis: The current recommended adult oral dosage is 150 mg or 10 mL (2 teaspoonfuls equivalent to 150 mg of ranitidine) four times a day.
Dosage Adjustment for Patients With Impaired Renal Function: On the basis of experience with a group of subjects with severely impaired renal function treated with Zantac, the recommended dosage in patients with a creatinine clearance less than 50 mL per minute is 150 mg or 10 mL (2 teaspoonfuls equivalent to 150 mg of ranitidine) every 24 hours. Should the patient's condition require, the frequency of dosing may be increased to every 12 hours or even further with caution. Hemodialysis reduces the level of circulating ranitidine. Ideally, the dosing schedule should be adjusted so that the timing of a scheduled dose coincides with the end of hemodialysis.

HOW SUPPLIED: Zantac® 150 Tablets (ranitidine HCl equivalent to 150 mg of ranitidine) are peach, film-coated, five-sided tablets embossed with "ZANTAC 150" on one side and "Glaxo" on the other. They are available in bottles of 60 (NDC 0173-0344-42) and 100 (NDC 0173-0344-09) tablets and unit dose packs of 100 (NDC 0173-0344-47) tablets.

Zantac® 300 Tablets (ranitidine HCl equivalent to 300 mg of ranitidine) are yellow, film-coated, capsule-shaped tablets embossed with "ZANTAC 300" on one side and "Glaxo" on the other. They are available in bottles of 30 (NDC 0173-0393-40) tablets and unit dose packs of 100 (NDC 0173-0393-47) tablets.

Store between 15° and 30°C (59° and 86°F) in a dry place. Protect from light. Replace cap securely after each opening.

Zantac® Syrup, a clear, peppermint-flavored liquid, contains 16.8 mg of ranitidine HCl equivalent to 15 mg of ranitidine per 1 mL in bottles of 16 fluid ounces (one pint) (NDC 0173-0383-54).

Store between 4° and 25°C (39° and 77°F). Dispense in tight, light-resistant containers as defined in the USP/NF.

YOU CAN IMPROVE TECHNOLOGY AND STILL BE STUCK IN THE SAME JAM

Technology is supposed to make your people more productive, your practice more competitive. We anticipate how technology will affect not only processes, but the structure of your practice as well. The Valley Medical Management concept revolves around a team of reimbursement specialists, managers, systems analysis and CPA's. This is the formula for our success. Our approach is scientific, comprehensive, and informative. Services provided include:

- ✦ Practice Reviews
- ✦ Administrative & Financial Management
- ✦ Billing
- ✦ Hardware/Software

Our objective is to make you a more successful professional.

SPECIALISTS IN MEDICAL PRACTICE MANAGEMENT

"Unfortunately,

he was already sitting in my examining room. This guy was a walking liability suit looking for a victim. He was angry, non-compliant. It was one of those rare, no-win cases and, well, I guess my number was up.

Then I remembered PMSLIC. So I stepped into the next room and gave them a call. They put me in touch with a member of their Risk Management team, who advised me of the relevant legal issues and the implications of each of my alternatives. Right on the spot. As a result, I was able to make the best medical recommendation with the peace of mind that comes from knowing my legal interests were also protected. I guess that's what it's all about. Peace of mind. The kind you only get from people who really take the time to help. That's excellent service. I'll never change carriers."

12 DER Revises Waste Management Rules

A number of improvements have been made in new Department of Environmental Resources regulations to help physicians manage infectious wastes more easily. This article summarizes those improvements.

20 Actions of the Board of Trustees, September 9, 1992

The Society's Board of Trustees is charged to discuss and take action on medical issues, ranging from public health and health care legislation to medical economics and electronic billing. Overviewed in this months' "Policy Briefs" section are actions from the Society's September board meeting.

(Insert) 24 What Have You Done for Me Lately?

The value of membership in your county society, the State Society, and the AMA is evident in several areas, such as in how you practice, in education, on Capitol Hill, and in your community. This special insert outlines what organized medicine "has done for you lately" in these areas and more.

ou're on solid ground with the Dodson Plan.

More than 75 years ago, Bruce Dodson, Sr. pioneered the concept of the dividend plan for workers' compensation insurance. Dodson Group has been helping businesses like yours save on premium costs ever since.

The Dodson Plan gives you the opportunity to earn a dividend each year, depending on the claim experience of all insured members. We carefully select those who participate, creating the greatest potential for you to save.

Pennsylvania Medical Society endorsed the Dodson Plan in 1973. Since then, participating members have earned a total of **$2,309,240** in dividends. Share in the savings!

You're on solid ground with Dodson.

MEDIGRAM

WORKERS' COMP RATES INCREASED, LEGISLATIVE CONTACTS NEEDED: While the governor and General Assembly remained deadlocked over legislation to reform workers' compensation, the Insurance Department on October 21 approved a 24 percent increase in workers' compensation insurance rates. Though the increase does not impact medicine, passage of House Bill 2 or House Bill 2140 would. The Society is supporting the Senate-amended version of House Bill 2140 which reimburses providers at 120 percent of the Medicare allowance for the remainder of 1992 and offers an annual update beginning in 1993 equal to the percentage change in the statewide average weekly wage. House Bill 2 permanently ties reimbursement to 117 percent of Medicare. PHYSICIANS ARE URGED TO CONTACT THEIR LEGISLATORS IMMEDIATELY TO SUPPORT HOUSE BILL 2140 (PRINTER'S NUMBER 3913).

SOCIETY DUES UNCHANGED FOR 1993: At its annual meeting in October, the Society's House of Delegates set 1993 Society dues at $430 for each full member, the same as in 1992. As in the past, $10 of that assessment will be given to the Society's Educational and Scientific Trust. Dues for other categories of membership are also unchanged.

SOCIETY NEGOTIATES PROPOSED 91 PERCENT CAT FUND FOR 1993: The State Society has again won substantial savings for Pennsylvania physicians by negotiating that the proposed physician CAT Fund for 1993 be set at 91 percent; it was originally proposed at 93 percent. The percentage is a surcharge to basic malpractice premiums and serves as insurance above the amount covered under basic plans. The two percent difference means an overall savings of approximately $3.6 million statewide. The Insurance Department approved percentage for 1992 was 90 percent. Final approval for 1993 is pending.

CHILDHOOD IMMUNIZATION INSURANCE ACT EFFECTIVE THIS MONTH: Act 35 of 1992, the Childhood Immunization Insurance Act, becomes effective November 21. The act mandates insurance coverage for childhood immunizations, including first-dollar coverage for all vaccines and professional fees to administer them. However, insurance coverage is *not* provided for the office visit or diagnostic laboratory tests unless preventive care and routine office visits are part of a company's medical insurance coverage. Deductibles and dollar limits may *not* apply to the immunization services. The Society and the Pennsylvania Chapter of the American Academy of Pediatrics cooperated in obtaining passage of this legislation.

IMMUNIZATION PROJECT KICKS OFF NOVEMBER 19 AND 20: The State Society, the Department of Aging, the Philadelphia Department of Public Health, the Philadelphia County Medical Society, and other organizations will kick off a joint immunization project November 19 and 20 at the North Broad Street Senior Center, Philadelphia. Several physician volunteers have already signed up through Project PA, the Society's referral network of physician volunteers. The project will continue on a quarterly basis for the next year and a half. For information, call the Department of Hospital Relations at 1-800-228-7823.

SOCIETY, PBA JOINING ON CHILD ABUSE PROJECT: The State Society is joining with the Pennsylvania Bar Association (PBA) to bring about public awareness of child abuse and give Pennsylvanians information on where to go for help. A program, being built around the PBA-funded video, "Children of the Lie," is tentatively scheduled to air on the Pennsylvania Public Television Network (PPTN) in early January. Watch this publication for further information.

AMA DELEGATE MEETING SLATED FOR DECEMBER: The interim meeting of the AMA House of Delegates will take place December 6-9 in Nashville, Tennessee. Pennsylvania delegates will present 15 resolutions addressing health care reform, AIDS, medical school loan interest, and other issues.

At the peak of their profession

Skill. Experience. And dedication. That's what EPA physicians bring to your emergency department.

Quality emergency services begin with quality physicians.

At EPA, we seek out the most qualified physicians available. Help them enhance their skills through continuing education. (We even publish our own medical journals.) And match those skills to your needs.

Founded by a practicing emergency physician, EPA understands the importance of giving close personal attention to physicians and clients alike.

Result? Strong and mutually rewarding relationships between EPA and its member physicians. And a source of highly-qualified ED professionals for you.

Let us help your ED perform at its peak.

Just call us at **1-800-848-EPA-1.**

Our doctors make the difference

Is Anyone Out There?

John W. Mills, MD
Medical Editor

Apathy at the county medical society level is on the increase. I don't think anyone would argue that point. Perhaps it is more widespread than that, but as a district trustee, I see and experience it first-hand.

To say the least, it's very discouraging. Not that my district is unique. Allegheny County, with about 3,000 members, may only get 100 out to a county society meeting. Indiana County, on the other hand, may see up to 25 members out of 87 at a meeting. Not bad, you say!

However, the problem goes deeper than members attending a county society meeting. It's the CME credit and pharmaceutical-sponsored program/meal that accounts for our good turnout. Try to get members to serve as officers, delegates to the House, etc., and you get a myriad of excuses. Many of these are legitimate, and I understand and appreciate these reasons.

"Members who care about these problems and have ideas to help solve them are urged to communicate with us. . ."

With unification, it should be obvious to any physician that whatever the AMA does nationally or the Pennsylvania Medical Society does statewide, all members and non-members alike are affected by the outcomes. So, whether a physician belongs and is active, belongs and is inactive, or doesn't belong at all, the benefits and the losses that organized medicine has orchestrated are shared equally by all of us. But even this reality doesn't help motivate our constituents to join or become more active.

It's also an accepted fact that you get as much out of an organization as you put into it. This may not be quite as evident in our scenario, but subtly, I believe it's true. There is personal growth, along with increased awareness and knowledge. Certainly, there is satisfaction in helping to guide and promote an organization that exclusively serves the medical "fraternity/sorority" to the best of its ability.

As I indicated in a recent editorial, we frequently have trouble filling leadership slots at the state level and certainly at the county level. Reimbursement for all six counties in my district is the lowest level—area IV. Thus, the average physician in this area has to see more patients and work longer hours than his/her cohorts in areas I, II, and III to make an equal living. I hear this when I ask colleagues to serve. When they tally it up—four to eight meetings a year out of town, with at least an additional day of travel (round trip), means a week or two out of practice—some can't afford it. Are their priorities wrong? Who am I to judge?

Your trustees recently voted to explore the idea of having board meetings in district settings, and perhaps regional district meetings, in an attempt to get closer to our grassroots membership. I believe this has merit. Local or regional meetings may serve to educate members as to what we really are all about and offer them a genuine way to participate with a minimal effort on their part.

One aspect of this issue, which I am calling apathy, has to do with family—especially for young physicians. They want to spend more time with their families, and I can't criticize that. Even if they strongly favor organized medicine, their practices and families come first—and that's the way it should be. I remember those days only too well, and realize that I really didn't know my oldest two children nearly as well as my younger two.

I don't have any answers to the dilemmas I have pointed to here. I only hope that the State Society's efforts to remedy them are fruitful. Members who care about these problems and have ideas to help solve them are urged to communicate with us—either a district trustee, the State Society, or this publication.

Physicians are all strong individualists, and each one has to decide how to partition his or her time between practice, family, leisure, and other activities, including community affairs and medical society involvement. Discouraged by this apathy as I am, I'll run for re-election as Ninth District Trustee, even though Indiana County will not be sending any delegates to the annual meeting.

It's 3:00 a.m.
You're worried about tomorrow's deposition.
Who can you call?

The Medical Inter-Insurance Exchange is available 24-hours a day, 7 days a week, to answer emergency calls about both claim and policy situations. No other medical professional liability insurer has this feature. It's just one of many services that make Medical Inter-Insurance Exchange better than the rest. Call **800-257-6288** now to find out how our Permanent Protection Policy and expert claim handling can give you peace of mind... and a good night's sleep.

Unity and Unanimity

Donald G. Ferguson, MD

Editor's Note: The October issue of PENNSYLVANIA MEDICINE featured Donald G. Ferguson, MD, who was inaugurated as the Society's 143rd president during the House of Delegates' Annual Meeting in October. This is Dr. Ferguson's first "President's Page."

We are hearing a lot about unity and disunity in our profession nowadays. We are being told, in the words of John J. Ring, MD, recent president of the American Medical Association, that we must take part—or be taken apart.

We are also being told that we are not holding together as a profession, that we are becoming fragmented and disunited, and that this disunity will be our downfall. Some see us as moving together; others see us inevitably moving apart. Which of these viewpoints is correct? I submit that both may be.

Unity does not mean unanimity. We can, and inevitably will, disagree among ourselves. One specialty may very well want something that another specialty does not, or that another specialty wants for itself—turf battles, if you will. These differences are real, and their solutions are sometimes difficult.

Certainly, our profession is becoming increasingly complex. As specialized knowledge accumulates, it is increasingly obvious that no one person can learn all the skills of modern medicine in any great depth. No one can stay current in all fields, especially those surgical and dexterous pursuits that not only require knowledge, but continuing experience, to maintain that unthinking smoothness of motion and of thought that is the mark of the true craftsperson in any field.

We can, and should, speak out for ourselves as the possessors of specialized knowledge in medicine. We should also work, and when necessary, fight to establish our own unique place as specialists in the mainstream of American medicine.

But we also can and must speak and work for all of medicine. We must be part of a united profession in the face of those who seek to divide us so that they may rule us—and our profession.

A lot of people are out there trying to divide us and hoping to rule us (starting with some in the government of our own commonwealth). To answer those who would divide us, we must speak up so that we are heard as one voice—speaking for ourselves, our profession, and above all the well-being of our patients.

"What is that one voice, without which we truly are disunited and vulnerable to professional disintegration and anarchy? I submit that it is the Pennsylvania Medical Society and on the national level, the American Medical Association."

What is that one voice, without which we truly are disunited and vulnerable to professional disintegration and anarchy? I submit that it is the Pennsylvania Medical Society and, on the national level, the American Medical Association.

As your new president, I am mindful and deeply respectful of the work of specialty organizations that have served their physicians well—on occasion far better than we more inclusive organizations have been able to on issues that cut through and divide our diverse membership.

There is a place for diversity. But there is also a place—many places—for unity. I ask you to join me this year in a unified Society, particularly in the capitals of our state and of our nation.

Malpractice rates too good to be true usually are.

You may have been told about lower rates offered by insurers new to the Pennsylvania market. Low rates will not benefit you if the company is not around to protect you or *your assets* if you are sued.

Physicians Insurance Company is an established Pennsylvania carrier who has continued to lower rates while protecting your future:

- 10% overall reduction in September 1991
- more for physician groups
- additional reductions for individuals who are claims free

Artificially low rates are a prescription for disaster... for the physician and the company. When selecting a malpractice carrier you should ask yourself what will happen in the future. Will they automatically surcharge my premium for claims experience? Will their policy provide me with the full Occurrence coverage I have enjoyed with Physicians Insurance Company or are they only providing a form of Claims-Made coverage—better known as Occurrence Plus or Permanent Protection? Why would a broker recommend this carrier... is the company only trying to buy my business by raising his commission? More importantly, will they be there when I need them?

At Physicians Insurance Company we have always maintained our rates among the lowest and we are committed to keeping this practice intact. When you take an honest look, *you can't do better.*

For more information on malpractice rates and coverage, please call or write today.

LETTERS TO THE EDITOR

READER TROUBLED BY "REFRESHING VIEW"

I am writing to comment on Leslie E. Morris, MD's, "A Refreshing View: The Oath of Hippocrates," in the July 1992 PENNSYLVANIA MEDICINE.

I am troubled that he quotes the phrase from the oath, "I will not give to a woman a pessary to produce an abortion," as if it were a sentence complete in itself, and worse yet, as if it were a paragraph in itself. Were this the case his comments would be apropos.

The phrase in question is the last part of a sentence which is, in turn, the last sentence in the paragraph he quotes immediately beforehand. The phrase proscribing abortion is one of a piece with the oath to follow "that system of regimen which, according to my ability and judgment, I consider for the benefit of my patients and [will] abstain from whatever is deleterious and mischievous."

The part of the sentence which Dr. Morris did not quote reads, "I will give no deadly medicine to anyone if asked, nor suggest any such counsel, *and in like manner* I will not give to a woman a pessary to produce an abortion." The latter phrase dealing with abortion is inextricably linked to the phrase prohibiting helping someone kill themselves, or even suggesting such a course. The key thought is that the physician is to entirely avoid any activities which end a human life.

As Dr. Morris stated, in ancient times abortion may have had a mortality of 50-60 percent to the mother, although this is a claim without any available historic data to support it. Of greater pertinence, from the point of view of the Oath of Hippocrates, is that abortion generally has a 100 percent mortality rate for the developing baby. Hippocrates prohibited abortion because it *always* ends a human life.

Hippocrates' proscription of abortion was a radical step for its time. He lived in an age when not only abortion was "legal," but also leaving unwanted children outside to die of exposure, thirst, or wild animals was an accepted part of that particular culture. It is only in the last 20 or so years since *Roe v. Wade* that physicians in this country have had trouble comprehending that Hippocrates really meant what he said.

Lastly, a hypothetical situation concerning a 14-year-old girl who is pregnant by rape is posed. The question is raised as to whether Hippocrates would deny such a person an abortion with the implicit reply that he, of course, would not. The phrasing of the situation implies that rape of 14-year-old girls and unwanted pregnancies were a problem unknown to the ancient Greeks. One need not delve very far into the classic writings of that age to discover otherwise. This makes the position which Hippocrates stated concerning abortion all the more astonishing in its respect for and protection of life within the womb.

Yes, much of the Oath of Hippocrates is archaic, paternalistic, sexist, anachronistic, and pantheistic. The paragraph prohibiting involvement in abortions is sadly now an anachronism, but that has only been by willful intent and not by any new discovery in human biology. Rather, what we now know concerning the development of a distinct human individual with his or her own set of unique chromosomes and behaviors would flabbergast the author of this oath and render him speechless when confronted with the 1.2 million abortions done each year in this country alone, 97 percent of which are done for social or financial convenience.

Why buy an office automation system that doesn't offer a long-term solution?

ACCLAIM™ from Sentient is the total system solution.

A lot of medical practices are planning to invest in an office automation system. But a lot of the systems out there just don't offer the comprehensive functions and long-term expandability that your practice may need.

IBM® and compatible hardware.

The ACCLAIM system operates on IBM and compatible hardware, so you know you're getting the quality standard of the industry. And it's completely expandable, so it can grow as your practice grows.

Long-term support.

ACCLAIM is the system solution that fits your needs today. And Sentient's software engineers, customer trainers, and telephone support people are always there to make sure your system fits your needs over the years to come.

Easy to operate.

Even if your staff has no previous computer experience, ACCLAIM is simple to operate effectively and efficiently. Complete training is included in the purchase.

When you're thinking about office automation, call Sentient first, and find out what ACCLAIM can do for you.

We set the standard in medical computing.

DER Revises Waste Management Rules

Jeff Greenawalt

The Pennsylvania Medical Society urges physicians to review the complete infectious waste regulations for more detailed information. For a complete copy of the regulations, call the Council on Education and Science at 1-800-228-7823.

A number of improvements were made in new regulations designed to help physicians manage their infectious and chemotherapeutic wastes more easily. This article summarizes those improvements.

The Pennsylvania Department of Environmental Resources (DER) on April 9, 1988, published regulations on the disposal of infectious and chemotherapeutic wastes. These regulations created a considerable burden for physicians and led to an increase in expenses.

At the time, the Pennsylvania Medical Society expressed numerous concerns in meetings with representatives of the department suggesting some provisions were excessively restrictive, did not protect the public health, and only served to increase the cost of medical care. In response, on April 21, 1992, the department's Environmental Quality Board approved new regulations to supersede the old. They were published in the *Pennsylvania Bulletin* in August and are now in effect.

Definition of infectious waste

The 1988 version of the infectious waste regulations did not give sufficient specific information to eliminate many classes of waste which were not truly infectious. The regulations mentioned body fluids without further definition, leading to the conclusion that any item which contacted a patient constituted infectious waste. The new regulations are considerably more specific (see "General Classes of Infectious Wastes" on page 14).

Two major changes in the definition of infectious wastes will greatly affect physicians. First, sharps are now defined as *used* sharps. Thus, any sharps which are clean and were never used on a patient could be rendered unusable and disposed of as part of the regular trash stream. Second, included is the following new definition of body fluids considered to constitute infectious waste:

> *Liquids emanating or derived from humans and limited to the following: blood; cerebrospinal, synovial, pleural, peritoneal, and pericardial fluids; semen and vaginal secretions; and amniotic fluids. The term also includes the following fluids if they contain visible blood: feces, sputum, urine, and vomitus.*

Any materials used in physicians' offices that contacted patient body fluids not covered by the new definition can be disposed of through the regular trash stream.

On-site processing

The department has introduced the concept of "permit by rule" in the new regulations. What that means is small generators of infectious waste are considered to have a permit from DER for certain methods of handling infectious wastes which previously required a formal permit; and as long as the small generator complies with DER requirements, no additional permit will be required in most cases.

A small generator of infectious wastes is defined as one who generates less than 220 pounds of infectious waste per month. Under the permit-by-rule concept, physicians could autoclave, sterilize through chemical means, or incinerate the infectious waste on site. Note, however, incineration requires an air quality permit from DER.

When the waste is processed and no longer infectious, it becomes part of the normal trash stream unless it has not been rendered unrecognizable through incineration, grinding, shredding, etc. Physicians could still disinfect their recognizable waste, but additional paperwork (manifesting) is required, and the waste can only be placed in a landfill authorized by the department to receive such waste.

Mr. Greenawalt is the Society's director of educational and scientific affairs.

Hahnemann University
presents A Medical Seminar

Diagnosis and Treatment of

BREAST CANCER

Wednesday
December 16, 1992
8:30 a.m. to 4 p.m.

Topics include:

- **Screening for breast cancer**
- **Indications for mammography**
- **Diagnostic evaluation of the breast mass**
- **Radiation therapy**
- **Chemotherapy**
- **Breast conservation surgery**
- **Psychosocial support**

For further information, please call 215-762-8263.

Hahnemann University
Breast Health Center

This program has been developed as a multidisciplinary project by the Departments of Diagnostic Radiology, Medicine, Neoplastic Diseases, Nursing, Radiation Oncology, Social Services, and Surgery, in conjunction with…

Hahnemann University Breast Health Center

GUEST FACULTY

Nancy Davidson, M.D.
Assistant Professor of Oncology, Johns Hopkins Cancer Center, Johns Hopkins School of Medicine, Baltimore, MD

Tish M. Knobf, M.S.N., R.N., F.A.A.N.
Assistant Professor, Yale School of Nursing, Clinical Nurse Specialist, Yale-New Haven Hospital, New Haven, CT

Michael P. Moore, M.D., Ph.D.
Assistant Professor of Surgery, Cornell University School of Medicine, Attending Surgeon, Memorial Sloan-Kettering Cancer Center, New York, NY

PANEL

Recognized experts from the Hahnemann University multidisciplinary team will participate in clinical case presentations and discussions.

Luther Brady, M.D.
Isadore Brodsky, M.D.
Pamela Crilley, D.O.
Nancy Davidson, M.D.
John Harding, M.D.
S. Benham Kahn, M.D.
Bizhan Micaily, M.D.
Michael P. Moore, M.D., Ph.D.
Arthur Patchefsky, M.D.
Jack Sariego, M.D.

INTENDED AUDIENCE:

Oncologists, surgeons, family practitioners, general internists, women's health care specialists, obstetricians, gynecologists, oncology nurses, social workers.

CONFLICT OF INTEREST STATEMENT:

All faculty participating in continuing medical education programs sponsored by Hahnemann University are expected to disclose to the audience any real or apparent conflict(s) of interest related to the content of their presentations.

ACCREDITATION:

AMA - Hahnemann University is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to sponsor continuing medical education for physicians. Hahnemann University designates each hour of attendance at Wednesday's activities for one credit hour of Category 1 of the Physician's Recognition Award of the American Medical Association for a maximum of six credit hours.

Continuing Nursing Education - Contact hours through PNA - pending.

LOCATION:

Classroom C (Alumni Hall) is located on the second floor of the College Building, 15th and Vine Streets. Entrance is off of 15th Street, just south of Vine Street. Discount parking available at the Philadelphia Gateway Garage, 15th and Spring Streets.

In order to operate a disinfection facility, several conditions must be met. The facility must: 1) have any necessary permits under any applicable environmental protection acts; 2) be operating in accordance with those acts, conditions of permits, and orders of the department; and 3) keep daily records of the infectious waste processed, including weight or volume, and the location and method of residue disposal. Further, the processing must not have an adverse effect on public health, safety, welfare, or the environment; and the waste must be disinfected in accordance with the standards established within the regulations.

Disinfection of waste must occur before or during processing, and DER requires that a log be maintained for each disinfection unit used. The date, time, and operator for each use—as well as the dates and results of required calibration—must be recorded. Also, if steam disinfection is used, post-disinfection color reading of temperature-sensitive tape and the results of biological indicators for testing must also be recorded; for incineration facilities, the results of ash testing using a methodology approved by the department must be recorded. Note again that an incineration facility requires an air quality permit from DER.

Storage

For the purposes of storage, infectious waste must be separated into three classes—sharps, fluids, and other infectious wastes. Each must be stored in its own container, although the regulations do permit transporting them together to a processing facility. Liquid waste can also be disposed of through discharge into permitted sewage treatment systems that provide secondary treatment of the waste.

Under the new regulations, infectious waste can be stored for up to 30 days at room temperature, except for sharps containers which can be used until they are full. The regulations state, however, that should waste become putrescent, it must be disposed of within 24 hours. Physicians should also note that these limitations on the storage of infectious wastes do not apply to waste which has been disinfected.

Transportation

The regulations set standards for transportation of infectious waste to off-site processing facilities. Containers used for transport must be leak proof, rigid, moisture resistant, and strong enough to resist puncturing, tearing, or bursting. Waste must be transported by a method which prevents unauthorized access and the spread of any infectious agents, and which protects the material from animals, insects, etc. The waste must also be kept in a non-putrescent state and packaged in a way that prevents odors from escaping.

The surfaces of any cargo compartment used to transport the infectious waste must be impermeable and easily cleaned, and infectious material cannot be kept in an unrefrigerated vehicle for more than 48 hours. The regulations also establish

General Classes of Infectious Wastes

The Pennsylvania Department of Environmental Resources, in its new regulations on the disposal of infectious and chemotherapeutic wastes, defines general infectious waste as *"any municipal or residual waste which is generated in the diagnosis, treatment, immunization, or autopsy of human beings or animals, in research pertaining thereto, in the preparation of human or animal remains for internment or cremation, or in the production or testing of biologicals...."* General wastes fall into one or more of the following categories:

- **Cultures and stocks** of infectious agents and associated biologicals, including cultures from medical and pathological laboratories; cultures and stocks of infectious agents from research and industrial laboratories; wastes from the production of biologicals; discarded live and attenuated vaccines except for residue in emptied containers; and culture dishes, assemblies, and devices used to conduct diagnostic tests or to transfer, inoculate, and mix cultures.
- **Human pathological wastes**, including tissue, organs, and body parts and fluids removed during surgery, autopsy, other medical procedures, or laboratory procedures. The term does not include hair, nails, or extracted teeth.
- **Human blood and body fluid waste**, including liquid waste; human blood; blood products; items saturated or dripping with human blood; items that were saturated or dripping with human blood that are now caked with dried human blood, including serum, plasma, and other blood components which were used or intended for use in patient care, specimen testing, or the development of pharmaceuticals; intravenous bags used for blood transfusions; items that have been in contact with the blood of patients undergoing hemodialysis at hospitals or independent treatment centers; items contaminated by body fluids from persons during surgery, autopsy, other medical procedures, or laboratory procedures; and specimens of blood products or body fluids and their containers.
- **Animal wastes**, including contaminated animal carcasses, body parts, blood, blood products, secretions, excretions, and bedding of animals that were known to have been exposed to zoonotic infectious agents or non-zoonotic human pathogens during research (including research in veterinarian schools and hospitals), production of biologicals, or testing of pharmaceuticals.
- **Isolated biological wastes** and waste contaminated with blood, excretion, exudates, or secretions from humans who are isolated to protect others from highly virulent (CDC Class 4) diseases, or isolated animals known or suspected to be infected with highly virulent diseases.
- **Used sharps** that have been in contact with infectious agents or that have been used in animal or human patient care or treatment at medical research or industrial laboratories. Includes hypodermic needles, syringes (with or without detached needle), Pasteur pipettes, scalpel blades, blood vials, needles with attached tubing, culture dishes, suture needles, slides, cover slips, and other broken or unbroken glass or plastic.

requirements for vehicles which transport waste, including equipment to be used in the case of a spill. However, these requirements are waived for small generators who transport their own waste, as long as the waste is handled as previously mentioned.

Manifesting

Manifesting is a system of record keeping required in some circumstances. Physicians who use commercial infectious waste removal companies will encounter the manifest system and be called upon to complete a form before the hauler removes the material.

Manifesting does not apply for small generators who transport their own waste, but they must keep a log or shipment record for the receiver. The log or shipment record must include the name, address, and telephone number of the generator of the waste, the quantity of waste, and the date it was transported and accepted. A copy of that shipment record must be given to the receiver.

The regulations also contain an exception for the mailing of used sharps by small generators. The exception is granted if the sharps are sent by certified mail in compliance with postal regulations. Physicians must maintain a log with information on the weight of the package of sharps, the date it was sent, and the name and address of the person to whom it was shipped.

Manifesting is not required, but a form of shipping paper is if a small generator processes material on site but leaves it recognizable. In such instances, the physician must maintain a log which includes the name, address, and telephone number of the generator of the waste; the quantity of the waste; the name, address, and telephone number of the person who transports the waste; and the date it was transported and accepted. Such records must be kept for five years.

For those who encounter a manifest, it will most often consist of four parts: the first part is kept by the generator of the waste, the second by the person who transports the waste, the third by the owner of the facility which processes the waste, and that person must mail the signed fourth copy back to the original generator of the waste. Additional copies of the manifest are necessary if multiple transporters are used.

An important requirement for physicians is: if infectious material is shipped to a disposal facility and the generator of the waste does not receive the fourth copy of the manifest signed by the receiver within 15 days of the time the material was transported, the physician must contact the transporter, the receiver, or both to see where the material is. The generator is then required to notify the regional DER office within 24 hours of the status of that material. Disposal facilitates are required to send a copy of the manifest to the generator within seven days.

If the generator still has not received the manifest copy within 35 days, the generator must notify the regional office of DER by telephone and send an exception report to the central office of the department. The exception report should include a legible copy of the original manifest and a cover letter signed by the generator saying what was done in an attempt to locate the material.

Though the manifesting requirements may create additional paperwork for physicians, on the whole the regulations now in effect are an improvement over the old regulations and will probably reduce the cost of compliance.

RISK MANAGEMENT - SAFEGUARDING THE FUTURE

February 2 - 6, 1993 at Keystone Resort, Colorado

The **MICHIGAN STATE MEDICAL SOCIETY** and **MICHIGAN PHYSICIANS MUTUAL LIABILITY COMPANY** invite you to participate in this informative risk management conference which will provide you with pertinent, timely information regarding medical-legal and quality management issues affecting you and your practice. Total Quality Improvement Strategies, Practice Parameters, Liability Associated with HMOs, and Effective Strategies for Resolving Claims will be discussed.

This four day conference includes 17 hours of education, and allows plenty of time for the many recreational opportunities at Keystone Resort. Conference tuition is $382.00, and spouses are welcome to attend at no charge. Excellent lodging accommodation rates have been negotiated with Keystone Resort.

You may be eligible for professional liability premium discounts - contact your professional liability insurance carrier.

For more information or a full brochure, contact MSMS Risk Management at (517) 336-5757.

MICHIGAN STATE MEDICAL SOCIETY 1906

KEYSTONE RESORT COLORADO

Restrictive Covenants in Physician Employment Agreements

Robert A. Auclair, Esq.
Diane Dallabrida, Esq.

Virtually all physician employment relationships are governed by employment agreements in which the physician and employer exchange promises. When embodied in contracts, promises are also known as "covenants." Certain covenants are restrictive in nature, including, most notably, covenants which prohibit competition ("non-competes"). Legal considerations regarding non-competes in particular center around the law of restrictive covenants in general. This article identifies legal issues which exist with respect to restrictive covenants under Pennsylvania law and offers certain caveats with respect to the negotiation of the non-competition components of the physician employment agreements.

Short of compensation and termination, promises which prohibit competition (non-competes) may be the most important provisions in physician employment agreements. Not surprisingly, they are generally among the most controversial items discussed or negotiated by the parties. The controversial aspect of the non-compete is understandable in that non-competition clauses and other restrictive covenants, such as non-disclosure of proprietary information and non-disturbance of employee, referral source, and/or contractual relationships, survive the termination of the employment relationship.

To further complicate the matter for all concerned, the courts have, in most jurisdictions including Pennsylvania, viewed restrictive covenant issues arising from physician employment agreements somewhat differently than restrictive covenant issues arising from other employment agreements. The root of the distinction is the goal of eliminating perceived or actual harm to the public which may be caused by placing restrictions upon the activities of physicians.

Restrictive covenants are, quite simply, a preferred means by which an employer may legally protect against the future loss of employees, clients, and/or customers. Certain courts outside Pennsylvania have gone so far as to recommend the use of such provisions as a preferred means of protecting client goodwill (which is incapable of protection as a trade secret) against potential interference by former employees.[1]

In health care employment contracts, it is generally referral sources and access to patients for which protection is sought. If the employee is a physician, the restrictive covenant will likely prohibit the practice of medicine in a specified area for a specified amount of time following the termination of employment.[2] The physician may also be prohibited from developing any relationships with entities or individuals with whom the employer contracts or to whom clinical or clinical administrative services are provided. In the case of a former employee who seeks to strike down such a covenant, the general rule of contracts which applies states that a "party who seeks to strike down his own written obligation must present evidence that is clear, precise, and indubitable."[3]

Simply stated, restrictive covenants should not be viewed lightly by the promisor/physician, nor should potential physician employees-to-be, when negotiating an agreement, blindly rely on lay opinions which declare that the actual covenants are "probably unenforceable."

Elements of restrictive covenants

The Pennsylvania Superior Court has determined that there are five primary issues that must be considered when the validity of a restrictive covenant is evaluated:

> *It is well settled in Pennsylvania that a restrictive employment covenant is valid if it is reasonably limited in duration of time and geographic extent, reasonably necessary to protect the employer, without imposing an undue hardship on the employee, ancillary to an employment relationship and supported by consideration. See e.g.,* Bettinger v. Carl Berke Assoc., Inc., *455 Pa. 100, 103, 314 A.2d 296, 298 (1974);* Jacobson & Co. v. International Environment Corp., *427 Pa. 439, 442, 235 A.2d 612, 619-20 (1967).*[4]

First, the general rule for the duration of a covenant is that it should be "no longer than necessary for the employer to put a new man on the job and for the employee to have a reasonable opportunity to demonstrate his effectiveness to the customers."[5] However, Pennsylvania

Mr. Auclair is an attorney in the Philadelphia office of Goldman, Marshall & Muszynski, P.C. Ms. Dallabrida is a recent graduate of The Widener University School of Law.

courts have differed greatly with respect to how long a time limitation will be allowed to stand. The allowable amount of time has ranged from a few months to up to five years.[6]

The duration of five years, in fact, was upheld in favor of a physician's employer by a Pennsylvania trial court.[7] The Pennsylvania Supreme Court in *Boldt,* stated that a five-year period was not unreasonable as a matter of law. Note, however, that such a period is unlikely to be viewed as "reasonable," barring compelling circumstances; durations of two years or less are usually determined by Pennsylvania courts to be reasonable without additional inquiry.

Second, the area protected by the noncompete must be reasonably necessary to protect the employer's interest, and must be restricted to areas in which the employee had client contact.[8] With respect to physician employees, courts in other jurisdictions have held that the geographic area of the restriction will be generally upheld as reasonable if it is limited to the area from which the employer largely draws patients.[9]

Some employers choose to restrict the physician-employees from affiliating with specific hospitals, programs, or competing practices rather than to impose blanket restrictions over a geographic area. In covenants in which the geographic area is subject to interpretation, the courts will attempt to formulate a reasonable interpretation in view of the attendant circumstances.[10] Both the Third Circuit Court of Appeals and the Pennsylvania Supreme Court have enforced covenants which were silent as to geographic limitations.[11]

Also, it has been stated that restrictive employment covenants are presumed reasonable, absent a showing that the covenant works an undue hardship upon the employee.[12] A determination of the reasonableness of the employer's protection and the consequential harm to the employee requires a "sliding scale" type of analysis. That is, the harm to the employer, seeking to protect its goodwill and other interests, is weighed against the harm caused to the employee by enforcement of the contractual obligation.[13]

Generally and absent mitigating circumstances, the terms which restrict the employee must be noticeably harsh before the courts will entertain stamping judicial approval upon an open violation of the covenant by an employee. Because the courts favor freedom to contract, they tend to favor the interest of the employer, once again barring unusual or mitigating circumstances. Employees are generally held to their contractual obligations provided they agreed to them knowingly and their agreement was reasonable under the circumstances.[14]

The courts will not, however, support the imposition of restrictions which are broader than reasonably necessary for the protection of the employer.[15] For example, a psychiatric practice could not reasonably prohibit a former employee from practicing family medicine, regardless of whether or not the family practice was located within the restricted geographic area. Likewise, a practice which exclusively provides in-hospital services could not reasonably preclude a former employee from providing outpatient services in his or her home or office or, for example, teaching at a medical school.

Finally, the act of accepting employment even if that employment is terminable at will, receiving broader responsibility and/or a promotion, or any other such change in status is sufficient to satisfy the requirement that the restriction be "ancillary to employment" and supported by consideration.[16] The imposition of restrictive covenants by an employer following the commencement of employment must be accompanied by the imposition of a corresponding benefit to the employee, either in the form of enhanced compensation, benefits, job status, or the like.[17]

Medical practitioners

As discussed earlier, compared to restrictions placed upon employees within traditional business arrangements, restrictions involving physicians and their activities have been carefully scrutinized by the courts in response to a concern that such restrictions run contrary to public health interest. With respect to such restrictions, the battle lines are clearly drawn.

On one side are physician-employees who frequently agree to the restrictions solely because they are woefully lacking in bargaining power at the time employment is originally negotiated. Employers, on the other side, feel entitled to restrict physician-employees because they invest time, effort, and money into the physician-employee's training and assimilation into the practice. The employers also feel compelled to limit competition from former employees in order to protect goodwill and other assets. Squarely in the middle of the battle lines lies the public's interest in unrestricted access to medical care.

The needs of the public have been advanced, to some extent, by the courts in Pennsylvania, which routinely inquire into whether or not a sufficiency or shortage of physicians exists in the area covered by the non-compete.[18] The sufficiency/shortage inquiry is performed by the courts because a shortage of physicians in a certain area may inflict harm upon society in general "by depriving the community involved of a desperately needed service."[19]

In *New Castle Orthopedic Associates v. Burns,* the court determined there was indeed such a shortage. In that case, the physician-employee presented four local physicians as witnesses who testified that they faced delays of up to four months when attempting to arrange appointments for their patients with orthopedic surgeons. Alternatively, the New Castle opinion cited numerous cases from other jurisdictions in which covenants were enforced against physician-employees who failed to present conclusive evidence of such a shortage.[20]

Without proof of shortage, physician employment covenants are subjected to the same inquiry of reasonableness as are all other restrictive covenants. Obviously, the outcomes of disputes involving the restriction of physicians' activities are difficult to predict. This is true not only in Pennsylvania, but in most other jurisdictions. The following cases are indicative of the unpredictable nature of physician/former employer disputes.

In *Canfield v. Spear,*[21] an Illinois Appellate Court found that a restrictive covenant in a physician's employment contract did not harm the public and that the terms of the agreement were reasonable. The agreement stated that the physician-employee could not, after termination, practice medicine within a 25-mile radius for a period of three years. The employee contended that, because his specialty was dermatology, not allowing him to practice in the area in question would considerably diminish the "dermatologist-patient ratio."[22] It was also asserted that the employer had failed to prove the damaging consequences of the former employee practicing within the 25-mile radius and that compelling the employee "to live up to his agreement would be a hardship."[23]

The court stated that the defendant had no patients when he came to the area, nor was he originally from the area. Further, at the time he signed the contract, he was more than competent to understand the provisions of the agreement. "He has accepted the benefits of the contract and must take the burdens as well," stated the court.[24] The Illinois court also contended that no public interest was violated. If a shortage of a particular type of doctor exists in a specific area, other doctors will move to practice there.[25]

The Idaho Appellate Court, by contrast, in *Dick v. Geist,*[26] took a different stance. The two physician-employees in *Dick v. Geist* had an agreement similar to the one in *Canfield v. Spear.* They were forbidden from practicing within a 25-mile radius for two years after termination. Both employees were pediatricians, and without their services there would have been only five pediatricians practicing in the restricted area. Although other pediatricians were available to take over the workload of the former employees, there was an apparent lack of interest in treating critically ill newborns displayed by at least one of the new (replacement) employee physicians.

> *Such an interest is important because providing care for even one critically ill newborn per month adds a tremendous burden to a doctor, in terms of time spent at the hospital and away from his office practice...the treatment of critically ill newborns involves an "intensive, exhausting type of care that requires long hours."*[27]

The court weighed the community's interest with the interest of the employers of physicians and found that the public interest would have been significantly harmed if the former employees were forced to abide by the restrictive covenant.[28]

Enforcement

An employer, once aware that a former employee is in violation of a non-competition provision, must act quickly so as not to suffer losses unnecessarily or otherwise give the appearance that the violation is not serious or damaging.[29] The relief generally sought by an employer is equitable and includes temporary restraining order(s) and permanent injunction(s) which serve to prohibit the restricted activities for the duration of the covenant. Pennsylvania courts have also granted partial relief, such that the enforcement of an overly broad covenant may be limited in scope to the extent reasonably necessary to protect the employer.[30]

Beyond equitable relief, actual damages incurred can be quite difficult to quantify. Possibilities and complications involved in establishing the dollar value of damages caused to an employer by virtue

of the breach of a non-competition provision are almost limitless and thus outside of the scope of this article. Suffice to say, however, that the risk of establishing or not establishing dollar damages, can be of great consequence to an unsuccessful party. Likewise, liquidated damages—those which are agreed to in the body of the employment agreement as appropriate compensation for a breach—should also not be viewed lightly.

Recommendations

The key to living (and working) with restrictive covenants following the termination of employment is to have properly negotiated the provisions in advance of entering into the agreement. The comment made earlier regarding disproportionate bargaining power is likely not lost on the bulk of physician employees, particularly those recently in residency programs. Irrespective of bargaining power, employees must carefully review all of the restrictive covenants prior to entering into an agreement, if only to evaluate the extent to which compliance after termination may create a hardship. For example, the employee must determine whether or not compliance with the provisions will require relocation after termination. If so, potential or likely future relocation should be factored into the evaluation of the employment relationship.

Also, the employee must look at the non-competition provision carefully to evaluate the occurrences which trigger its operation. For example, does the non-compete apply even if the physician employee is terminated without cause? A physician-employee should be reluctant to sign an agreement that may, without fault or reason, effectively require the employee to relocate upon the receipt of 60 or 90 days notice.

Employers, on the other hand, are advised to carefully and specifically determine the interests that require protection in advance of inserting restrictive language into the agreement. All aspects of the restrictive covenants should be directly related to the protection of a significant business interest. Though certain courts have ordered partial enforcement of restrictive provisions, there exists the possibility, if not probability, that an overly broad clause will be declared invalid and, as a consequence, unenforceable.

Employers are also advised to describe in the agreement, activities which are not prohibited by the restrictive covenants. For example, an agreement may state: "this agreement shall not be construed as precluding the employee from providing outpatient services and/or...," etc.

Finally, both employers and employees may benefit by the inclusion in the agreement of an arbitration or dispute resolution provision, if only to provide an alternative to costly state court litigation. However, employers are cautioned to retain the option of proceeding in state court to obtain restraining orders and other injunctive relief.

Evaluation reveals that although certain parameters have been established by case law, disputes regarding the enforceability of restrictive covenants are difficult to predict. Careful negotiation and contract drafting are the best tools available, to both employers and employees, to minimize the risks which are incidental to the divergent enforcement patterns which have emerged from restrictive covenant-related, post-employment litigation. Employers and physician-employees are advised to carefully scrutinize all restrictive covenants prior to executing the agreements in which the covenants are contained.

ACTIONS OF THE BOARD OF TRUSTEES, SEPTEMBER 9, 1992

SOCIETY TAKES ON DRUG PRESCRIBER EDUCATION

The State Society's Board of Trustees at its September 9 meeting approved the recommendation of the Drug Utilization Review Policy Committee to sign a contract with the Pennsylvania Department of Public Welfare (DPW) for the marketing and educational intervention aspects of DPW's Medicaid Retrospective Drug Utilization Review (RDUR) program.

Under mandate of the Omnibus Budget Reconciliation Act of 1990, DPW is developing the statewide RDUR program to educate prescribers about drug utilization issues and change prescribing patterns to improve the quality of medical care and lower health care costs. The program's primary audience is physicians treating Medical Assistance (MA) patients, but general education will target all Pennsylvania physicians.

While involving intervention strategies, the program is not punitive in any way. Under the contract, the Society will design, develop, and implement the program. Specific intervention strategies and educational materials, including a strong public relations and promotional component, will be developed using market research findings. Activities might include:

- presentations about the RDUR program and drug/prescribing topics at county medical society meetings;
- journal articles on topics relevant to program goals;
- presentations at medical schools;
- presentations at hospitals with high MA populations;
- paid advertising in appropriate medical publications, newspapers, radio, or television;
- educational seminars offering CME credits; and
- press releases.

The program, the first of its kind in the nation, will begin with a nine-month contract with DPW; yearly extensions are planned thereafter.

HIV PROCEDURES OPPOSED BY SOCIETY

At the recommendation of the Council on Education and Science, the Society will use all means available to prevent the implementation of the Pennsylvania Department of Health's "Procedures for Facilities Following Discovery of HIV-Infected Health Care Workers." The Society opposes the procedures on both scientific and legal grounds; litigation is being considered.

Presented by the department and the Hospital Association of Pennsylvania (HAP) at meetings of a joint Society-HAP Task Force formed to address this problem, the procedures outline steps to follow if a physician or health care worker is diagnosed HIV positive. Included are procedures to review the physician's practice and health.

Society leaders agree: 1) the procedures are inconsistent with Society policy, are vague, and violate Pennsylvania laws; and 2) the review is unnecessary. Society representatives were scheduled to meet with Secretary of Health Allan S. Noonan, MD, MPH, to discuss the Society's position.

At press time, HAP leaders had approved releasing the procedures, along with explanatory materials and supporting documentation, to its members.

ELECTRONIC BILLING AFFILIATE SELECTED

The Pennsylvania Medical Society will affiliate with Physicians Practice Management (PPM) to offer an electronic billing service to physicians.

The new service will: 1) provide leadership, information, and guidance on electronic claims submission; 2) minimize the risk for physicians who wish to develop the capability to submit claims electronically; 3) recommend proven vendors; 4) provide cost-effective recommendations to the membership; and 5) generate revenue for the Society.

PPM, a privately owned electronic billing company based in Indiana, has 126 medical practice sites in Pennsylvania enrolled in its Claim Net Clearinghouse.

For specifics about the program, call the Society's Department of Physician Services at 1-800-228-7823.

CHANGES SOUGHT IN LAW ON MANAGED CARE REVIEWS

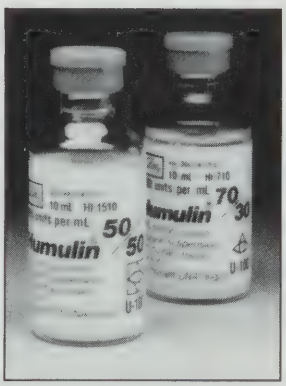
The Society plans to seek legislation to require managed care payors to allow participating providers the right to appeal adverse utilization review decisions regarding care provided or initiated.

Draft legislation approved by the board would mandate such an appeal option and allow managed care participating providers to challenge utilization review determinations in a judicial action.

Because the opportunity to appeal is meaningless without appropriate notice of the factual basis and rationale of the determination, the legislation would also require timely and complete notice of both the initial and reconsideration determinations.

KEPRO OVERSIGHT RECOMMENDATIONS APPROVED

The board approved several recommendations of the Ad Hoc Committee on KePRO Oversight. These direct:



- the Society's Hospital Medical Staff Section (HMSS) to encourage hospitals to assist physicians in transferring their office histories and physicals to hospital medical records in an acceptable manner;
- the Interspecialty Section to review the Health Care Financing Administration's ambulatory surgery generic screens to determine whether the requirements are appropriate;
- the Society—in response to a growing concern by members regarding the quality of KePRO reviews—to provide a mechanism for obtaining specialty society comment on potential physician advisors for KePRO; and
- the HMSS to investigate the advisability of advocating that hospitals that have appropriate emergency room procedures in place share them with those that do not, in order to curtail citations to physicians for not performing appropriate tests on patients admitted to the emergency room.

Because One Size Doesn't Fit All...

New Humulin 50/50 is the tailor-made answer to individual patient needs. A unique combination of equal amounts of Regular human insulin and NPH human insulin, it will be useful in situations in which a greater initial insulin response is desirable for greater glycemic control.

Like Humulin 70/30*, new Humulin 50/50 offers the convenience and accuracy of a premix. And it can be used in conjunction with an existing 70/30 regimen.

New Humulin® 50/50

50% human insulin isophane suspension
50% human insulin injection (recombinant DNA origin)

The Newest Option in Insulin Therapy

WARNING: Any change of insulin should be made cautiously and only under medical supervision.

* Humulin® 70/30 (70% human insulin isophane suspension, 30% human insulin injection [recombinant DNA origin]).

John W. Lehman, MD, Beaver Falls, served as the Society's 1991-92 Tenth District trustee.

SUPPORT WITHDRAWN FOR CRNP PRESCRIBING RIGHTS

At the recommendation of the Interspecialty Section, the board withdrew its support of the extension of prescription writing to nurse practitioners.

While there is no doubt that the certified registered nurse practitioner (CRNP) plays a positive and important role in caregiving, the section believes limitations on CRNP practice must be imposed since CRNPs are not physicians.

The board originally approved a conditional recommendation accepting nurse practitioner prescribing as long as it is controlled by the physician. However, after further consideration, the board decided it would at this time be inappropriate to support such a proposal.

TOXIC RELEASE INVENTORY POLICY ADOPTED

In response to an Environmental Protection Agency (EPA) request for Society support and involvement in a new Toxic Release Inventory (TRI) project, the Society's Board has adopted as policy a proposed plan recommended by the Commission on Environmental and Occupational Health.

While not specifically endorsing TRI, the commission agrees that the project may provide useful information on toxic releases for physicians, citizens, and corporations. The commission supports informing Society members of the availability of TRI. A summary of the commission's proposed plan is slated for publication in a future issue of PENNSYLVANIA MEDICINE.

PUBLIC HEALTH PLAN TO BE IMPLEMENTED

The Society will implement a public health plan, proposed by the Council on Education and Science, to guide its efforts in the public health arena.

The plan identifies priorities—education and community based programs, maternal and infant health, tobacco usage, alcohol and drug abuse, violent and abusive behavior, unintentional injuries, HIV, and environmental health—and outlines general actions which the Society could undertake.

The plan was created in response to recommendations by Society Past President Robert N. Moyers, MD, in a speech to the 1991 House of Delegates.

TRUSTEES AUTHORIZE MEETINGS, STUDY

The Board of Trustees authorized the development of regional meetings of Society leadership and members, and the study of regional board meetings, as recommended by the Committee on Organization and Operation of the Board.

In discussing ways the board could more effectively represent members, the committee pointed to the successes individual leaders and groups of leaders have had over the last year meeting with physicians throughout the state. According to the committee, formalizing that concept through regional meetings could improve communication between leadership and members.

As a second step in that process, the Society will also study the logistics, scheduling, and costs related to holding occasional board meetings in various regions of the state.

DR. AUSTRIAN RECEIVES AMA NOMINATION

Robert Austrian, MD, Philadelphia, has been nominated by the Society for the AMA Distinguished Service Award with a letter of endorsement from the board.

Dr. Austrian is director of the World Health Organization Collaborating Centre for Reference and Research on Pneumococci at the University of Pennsylvania. He is best known for developing the Pneumovax pneumonia vaccine.

ADDITIONAL ITEMS APPROVED BY BOARD

In response to several other committee recommendations approved by the board at its September meeting, the Society will:

- Make available to the membership and public another printing of the Society's living will brochure entitled, "Dignity in Death, Dignity in Dying." As previously offered, single copies are available to the public by sending a self-addressed, stamped envelope to the Society's Public Affairs Department; 100 free copies are available to each Society member; and multiple additional copies are also available.
- Educate members about managed care and how to cope with it; and assist members in establishing physician-owned and -controlled alternative delivery systems, physician networks, etc.
- Commission the Society's Trust to conduct a comprehensive study of the status of the types of insurance offered to Pennsylvania medical students and residents.
- Study the feasibility of reimbursement for patient management via telephone.
- Halt collections of past dues assessments from former Society members who rejoin. Past Society policy stated that any member terminating his/her membership to avoid assessment would be required to pay the outstanding assessment in order to rejoin.

Board members Howard A. Richter, MD (left), and John W. Lawrence, MD, 1991-92 vice chairman of the Board, participated in discussion at a recent meeting of the Society's trustees.

UPDATE: VIRAL INFLUENZA 1992-93

As influenza season sets in, the Department of Health again reminds Pennsylvanians and especially physicians of the need to consider influenza vaccination for high-risk persons. On the average, more than 10,000 persons per year in the U.S. die of this disease or its complications.

Vaccine recommendations

Because of the potentially serious effects of viral influenza, the Department of Health recommends that high-risk persons over the age of six months receive influenza vaccine every year, before the beginning of December. Vaccines are recommended for the following:

- Persons with chronic disorders of the heart, lung, kidneys or immune system, hemoglobinopathies, or diabetes mellitus.
- Anyone who is 65 years of age or older.
- Children from ages six months to 18 years receiving long-term aspirin therapy (because of the risk of Reye's Syndrome).
- Any person who has extensive contact with high-risk persons (i.e., health care providers or persons living in the same house or institution as a high-risk person).

The predicted influenza strains for this season are: A Beijing/353/89-like (H3N2), A/Texas/36/99-like (H1N1), and B/Panama/45/90-like. The current vaccine contains antigen against each of these strains.

Children from six to 35 months of age should receive one or two doses of 0.25 ml. of split virus. Children from three to eight years of age should receive one or two doses of 0.50 ml. of split virus. Children from nine to 12 years of age should receive one dose of 0.50 ml. of split virus. Persons over this age should receive one dose of 0.50 ml. of whole or split virus.

Anyone with a known history of anaphylactic reaction to eggs or influenza vaccine and anyone with febrile illnesses should check with his or her physician about the advisability of receiving the vaccine.

Amantadine recommendations

The anti-viral medication Amantadine is effective against influenza A, either used as prophylaxis or as treatment if given within 48 hours of illness onset. It is recommended as prophylaxis in high-risk persons under the following conditions:

- When exposure is likely in an unimmunized person, because the virus is known to be present in the community, and sufficient time for immunization to be effective does not exist—it generally takes two weeks following vaccine completion for full immunity to be achieved.
- When a poor antibody response is expected due to an immune deficiency condition such as HIV infection.
- When a vaccine is medically contraindicated because of anaphylactic hypersensitivity to egg protein or another vaccine component.

Dale Tavris, MD, MPH
Pennsylvania Department of Health

PITT TESTS NEW HIV/AIDS DRUG

Researchers from the Pitt Treatment Evaluation Unit (PTEU) at the University of Pittsburgh Medical Center are participating in a new multicenter study on an antiviral drug for the treatment of HIV infection and AIDS.

Preliminary clinical studies indicate that the drug, Stavuding or D4T, produced by Bristol-Myers Squibb, may increase the number of immune cells in the blood for a longer time than the FDA-approved drugs, Zidovudine (AZT) and dideoxyinosine (DDI).

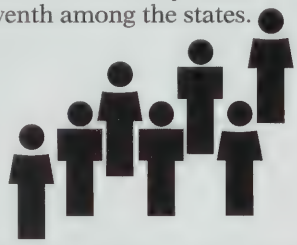
According to PTEU researcher John Mellors, MD, assistant professor of medicine, the study is designed to compare the safety and efficacy of D4T versus AZT in HIV-infected patients. Preliminary clinical studies indicate D4T is well-tolerated at the prescribed dosage intended for this study.

BUREAU LOOKING FOR AIDS-LIKE ILLNESSES

The Division of Epidemiology, Bureau of HIV/AIDS, Pennsylvania Department of Health, is culling its records as part of a Centers for Disease Control (CDC) national surveillance system set up to look for more cases of AIDS-like illnesses.

The CDC is also asking health care providers to report, through the Division of Epidemiology at (717) 783-0481, patients who have:

- CD4-positive T-lymphocyte depletion (absolute CD4-positive T-cell level less than 300 cell/uL or less than 20 percent on more than one determination),
- no serologic evidence of HIV infection, and
- no defined immunodeficiency or therapy associated with T-cell depletion.



Although no cases have been reported in children, HIV-negative pediatric cases with unexplained depletion of CD4 cells, as defined by age-adjusted normal CD4 counts, should also be reported.

For additional information on unexplained CD4-positive T-lymphocyte depletion, see the July 31, 1992, *Morbidity and Mortality Weekly Report.*

Excerpted from "HIV/AIDS Update" (Vol. 5, No. 7)
Pennsylvania Department of Health

Pennsylvania AIDS Status

Pennsylvania recorded 6,668 AIDS cases between January 1, 1991, and September 2, 1992. According to the state Department of Health, Pennsylvania ranks seventh among the states.

ALZHEIMER'S TOLL-FREE INFORMATION LINE OFFERED

The Alzheimer's Disease Education and Referral Center of the National Institute on Aging (NIA) is offering a toll-free number for Alzheimer's information.

Health professionals and the public may call 1-800-438-4380 to ask questions about Alzheimer's disease, identify resources and materials, receive a calendar of upcoming conferences, learn about NIA-sponsored clinical trials, and order free publications, including "1992 Progress Report on Alzheimer's Disease" and "Alzheimer's Disease Q&A."

Information specialists at the Disease Education and Referral Center are available weekdays between 8:30 a.m. and 5:00 p.m.

HOUSE PASSES TWO SPECIAL SESSION BILLS

The House of Representatives passed bills on workers' compensation reform and health care for uninsured children during a special session convened by Governor Robert P. Casey beginning October 5. Both bills were sent to the Senate for committee consideration.

Workers' compensation reform

House Bill 2, sponsored by Representative William Lloyd (D-Somerset), sets the fee schedule for workers' compensation at 117 percent of current Medicare allowance. Future updates, if any, would be dependent on changes in Medicare.

The bill excludes insurance companies from setting up coordinated care organizations (CCOs) and limits the aggregate reimbursement to CCOs for health care services to the 117 percent cap. It also includes changes in peer review, handling of medical records, and insurance reform.

Earlier the House defeated 93-106 an amendment which would have inserted the "Madigan-Mellow" language, including 120 percent of Medicare with an annual update. Meanwhile, the governor continues to meet with Senators Roger A. Madigan (R-Bradford) and Robert J. Mellow (D-Lackawanna) to iron out their differences.

The Senate was expected to return to Harrisburg on November 9, at which time House Bill 2 would move there for review. At press time, the Society was uncertain what the outcome of the issue would be, but it continued to adamantly oppose the permanent tie to Medicare.

Health care for uninsured children

House Bill 1, similar to House Bill 20 on indigent care and sponsored by Representative Allen Kukovich (D-Westmoreland), is a comprehensive plan for health care for uninsured children, from infancy to age 19. The House approved an amendment limiting the cost of the child health program to the two-cent cigarette tax revenue set aside for such a purpose, thus preventing the use of state General Fund monies.

Onerous language, included in early versions of House Bill 20, tying participation to medical staff privileges and licensure, was *not* included in House Bill 1. However, the bill requires joint action between hospitals and medical staffs to assure access to Medical Assistance recipients. Participation in county or state medical society referral systems meets this requirement. The state Insurance Department would have oversight responsibilities, with Blue Cross and Blue Shield providing administrative services under contract with the department.

House Bill 20, including a Society referral amendment similar to that in House Bill 1, remains in the Senate Appropriations Committee. A Conference Committee is likely to resolve differences between the House and Senate versions of the bill if new language proposed by Democratic legislators is not acceptable.

POLITICAL CAMPAIGN SEMINAR HELD

Fifty-one physicians and auxilians participated on September 30 in a day-long political campaign seminar in Allentown. The seminar was designed to introduce attendees to the world of political campaigns and enhance their desire to participate in a campaign of the candidate of their choice.

Toolbooks on fundraising, campaign tactics, and political leadership were used. The seminar also included a hands-on, fundraising exercise. R. William Alexander, MD, a member of the AMPAC board, spoke to the group during their luncheon. The seminar was jointly sponsored by the Lehigh County Medical Society, PAMPAC on behalf of the Pennsylvania Medical Society, and the Political Education Department of the AMA.

NO AX TO GRIND.

Our occurrence policy has been the industry standard for nearly a century. But some doctors want a claims-made policy. So we have it available. At the Medical Protective Company, we have no ax to grind. You can choose from a variety of programs, both occurrence and claims-made, that offer greater flexibility and savings. The choice is yours. Call us today.

THE MEDICAL PROTECTIVE COMPANY

HAVE YOU DONE FOR ME LATELY?

The value of membership in:

Pennsylvania Medical Society

Doctors physicians — working for you

American Medical Association

Your County Medical Societies

PUBLISHED FALL 1992

Here are just a few examples of what we've done in 1991/92. . . .

HOW YOU PRACTICE:

We helped you get a practice **started**, be more **efficient**, cope with **bureaucracy** and get all the **reimbursement** to which you are entitled. We pushed for **less hassle**.

Medicare Fee Schedule and **RBRVS** demanded tremendous attention. We were one of the first organizations to send a concise explanation of the new evaluation and coding system — exclusively for our members. More than 2,500 physicians and staff went to seminars we held across the state. We distributed 7,000 free pocket-sized reference booklets on new E/M codes — one of four publications created especially for members.

Medicare **payments nearly doubled** for code 99274. We got involved and Blue Shield, the carrier, admitted errors in calculating this under RBRVS. Payments were as low as $52.47 and went to as high as $100.39. The carrier also set up a separate P.O. box because your Society carried forward your complaints about "lost" documentation.

Members got **a dozen free publications** on topics like Blue Shield audit and review procedures, marketing, practice management, office automation software, practice options, retirement, quality management and the National Practitioner Data Bank. The Society's 45-chapter **reference** book "Laws and Regulations Affecting Medical Practice" became available to you at $55, half off the regular $110 price.

Numerous **Blue Shield issues** included profile updates, pathology codes, Special Care and Blue Choice contracting. We helped get less onerous provisions for physicians in Blue Choice.

The Society and AMA worked to provide members with an **OSHA** compliance kit, including a model control plan, for only $10 — comparable kits sold for $100 or more. 700 attended our seminars on OSHA compliance.

Members got **discounts on seminars**, like a $100 discount on the seminar "How to Get the Most Value for Your Practice."

We helped you comply with the Clinical Laboratory Improvement Act, the new Americans with Disabilities Act and safe harbor **regulations**, and we argued your case before **state regulators**.

In a state/AMA joint venture, a new **group practice** program was implemented to improve representation of and services to this rapidly growing sector.

Unique benefits included group insurance, referrals, a gold MasterCard with a $50,000 limit and placement services as well as liability coverage through the Pennsylvania Medical Society Liability Insurance Company (PMSLIC).

An **electronic billing service** was developed and slated to be available in November 1992.

"This is a truly democratic organization where all members have a voice."

Donald G. Ferguson, MD,
Pennsylvania Medical Society
president 1992-93

Work began on a guide book on **CCOs** and a paper on the ABCs of **managed care** to be available in 1993.

A Medicaid "**ombudsman**" program got up and running in 11 counties. A state-wide service to cut red tape was slated to begin in winter 1992.

IN EDUCATION:

Education is a basic function of organized medicine.

The Society's Educational and Scientific Trust provided more than $1/2 million in **student loans** and continued active counseling for troubled physicians.

In one of the best **CME** accreditation programs in the nation, the Society had 65 CME providers. The Society sponsored 11 Category 1 programs and jointly sponsored 13 more.

The state Society, county societies and AMA answered thousands of calls from physicians and their staffs. Members have access to these numbers for invaluable **information and service**:

1-800-228-7823
(Pennsylvania Medical Society)

1-800-262-3211
(American Medical Association)

ON CAPITOL HILL:

If we think legislation and regulation are bad now, what would happen without organized medicine?

The state Society complements AMA's aggressive presence in the nation's capitol the way our county societies complement our actions in dealing with the Pennsylvania General Assembly. Efforts include personal visits to elected representatives and appointed officials in Washington, D.C. and Harrisburg to carry your messages **"to the hill."**

Society and AMA efforts restored a significant proportion of the cuts in overall **Medicare** fees when a 16% reduction was threatened!

The Society began fielding physician "quick response" and "legislative action" or LAT teams to help deal with the ever-escalating attempts to regulate medicine. We looked at about **6,000 bills** in the state legislative session to identify those which might affect you.

In 1992, tremendous energy went into molding **workers' compensation** reform. Why? It has implications for you whether or not you treat workers' comp cases. Society efforts focused on arguing the hazards of a Medicare link. Hundreds of members wrote, called and even marched on the state Capitol. Countless hours went into negotiating and analyzing various plans.

State **living will** legislation, a high priority, was signed into law. We immediately responded with a new living will brochure — by September, 50,000 copies had gone to patients and physicians.

There are better ways to help patient access than by tying **Medicaid** participation to your hospital privileges or licensing. Your Society offered alternatives and got these punitive provisions deleted from House Bill 20.

We helped win higher Medicaid fees — that meant **$25 million** more reimbursed to physicians in the first half of 1992. The Society also worked to stretch the available Medicaid dollars further in the state's 1992-93 budget.

We drafted legislation on third- and fourth-party **review** and to reform the **liability system**.

The Society and the AMA fought attempts by **third-party payers** to limit reimbursements to hospital-based physicians via on all-inclusive rate.

Dozens of other state legislative issues included childhood immunizations, uniform claims, mammography, and keeping a physician at the helm of the Health Department, as the Society worked to help draft, amend, stop or move bills.

NEWS AND INFORMATION:

Members get up-to-date information such as two, free, monthly state publications (the Executive Report newsletter and the journal, Pennsylvania Medicine.) JAMA, American Medical News, county communications and other important professional news.

"Medicine has given me much. One way I repay medicine is participating in an organization which strives to maintain the high standards of medical education, practice and ethics. Just as medicine needs you, you need organized medicine."

Betty L.Cottle, MD, chairman, PMSLIC

IN THE COURTS:

We initiated a challenge to Medicaid's failure to pay co-payments for patients who also qualify for Medicare — a case which could mean **$40 million** to Pennsylvania physicians.

We filed amicus (friend of the court) briefs in several cases, such as those on **malpractice** and **peer review**, which could have long term effects on you and your practice or patients.

FOR YOUR PATIENTS & YOU:

Organized medicine continues working to bring informed and rational discussion to the **health care reform** debate. Your Society and the AMA are constant reminders that cost and access must be balanced with **quality care**.

In late 1992, the first **physician-specific data** was set to be released by the Pennsylvania Health Care Cost Containment Council (PHC4). While still less than perfect, the report is vastly improved because of Society efforts. Morbidity statistics, for example, were deleted at our urging.

Efforts continued to bring attention to **underserved areas** and how **hassles** contribute to higher costs. The Society pursued safeguards to protect patients and physicians in **peer review** and **managed care**.

DUR, **drug utilization review**, is the latest "buzzword" in cost containment. Pennsylvania's Medicaid DUR is unique, a first in the nation because of Society input. We've contracted to provide services which will lean heavily toward physician education. Your Society continued to dog the Department of Aging in 1992 to change its DUR procedures in the Lottery-funded PACE program.

We were active in helping set physical and mental criteria for **drivers' licensing** and led a forum on hazardous **waste incineration**.

A new **public health** plan was adopted to increase the Society's involvement and visibility. We were involved in public health on a number of fronts, from mammography to substance abuse. One Society public affairs program honored pharmacies which refuse to sell tobacco. The AMA continued its public health efforts such as the anti-smoking — "Joe Camel" — campaign that received national attention.

We've handled about 500 **media contacts** in a year and got positive headlines on issues like HBV and living wills in our efforts to enhance physician image.

We initiated pilot **Medicaid referral** programs for our counties and got state approval for a managed care/Medical Assistance pilot.

IN YOUR COMMUNITY:

Your county society served as:

- an effective way to communicate with area legislators, business and health-related groups;
- a broad referral base;
- a place to resolve ethical issues;
- a center for public health and other community programs;
- a peer reviewer, and
- a liaison with local media.

WHAT IS THE VALUE OF MEMBERSHIP?

"There is strength in unity and size. We're the only group that can represent and speak for physicians, regardless of their specialty or other differences."

Robert N. Moyers, MD,
Pennsylvania Medical Society
president 91-92

Membership brings you prestige, practice help, education, benefits and representation that extends from your home community all the way to our highest courts and the halls of Congress.

YOUR TIME IS AS IMPORTANT AS YOUR MONEY!

Get involved! Unity needs your time as well as your financial support.

Watch your publications for details on benefits, issues and activities.

Benjamin Franklin

REIMBURSEMENT QUESTIONS ANSWERED

A number of general questions have been raised by physicians regarding Medicare payment reform and third-party reimbursement. The following is a sampling of those questions, answered by Pennsylvania Blue Shield Medicare and amended *in italics* by the Society.

Is it appropriate to bill a consultation for new patient encounters?

A consultation is a type of service provided by a physician whose opinion or advice is requested by another physician regarding evaluation/management (E/M) of a specific problem. The request and need for the consultation must be documented in the patient's medical record. The consultant's opinion must also be documented in writing to the requesting physician and in the patient's medical record. A consultation is appropriately billed only if all the above guidelines are met. *It is appropriate to bill a consultation for new patient encounters, as long as the service being rendered during the encounter meets the criteria established for consultations.*

Can a confirmatory consult be initiated by a patient or only by another physician?

Confirmatory consultations are services provided by physicians to individuals seeking an opinion of the necessity or appropriateness of a previously recommended medical or surgical treatment. For confirmatory consultations, the patient may initiate the service and another physician need not be involved.

Is cerumen impaction lavage part of an office visit?

Procedure code 69210 (removal of impacted cerumen, one or both ears) is classified as a minor surgical procedure. An office visit on the day of the procedure would not be reimbursed unless the patient's condition required a significant, separately identifiable E/M service above and beyond the usual pre- and post-operative care associated with the procedure. If a separately identifiable E/M service is provided, the -25 modifier must be reported with the E/M procedure code.

How should a medical examination for the purpose of "clearing" a patient for surgery be billed by a non-surgeon?

The Health Care Financing Administration (HCFA) has recently clarified that a request of a surgeon to a patient's primary care physician to perform a "clearance" for surgery is not considered a consultation since the primary care physician is responsible for the overall management of the patient. The primary care physician should bill an appropriate E/M procedure code (inpatient or office). If the primary care physician has not seen the patient within the past three years, a consultation code may be used. *This policy change has raised objections among Society membership. These objections are being made known to the AMA, HCFA, and the Medicare carrier.*

What is the correct policy for billing multiple surgical procedures performed at the same operative session on the same patient by the same physician?

- Report the major surgical procedure code without utilizing the multiple procedure code modifier 51.
- Report the additional surgical procedures utilizing the 51 procedure code modifier.

Payment for multiple surgical procedures will be based on the following:

- 100 percent of the fee schedule amount for the highest valued procedure.
- 50 percent of the fee schedule amount for the second highest valued procedure.
- 25 percent of the fee schedule amount for the third through fifth highest valued procedures. Claims reporting more than five procedures are subject to manual review. Medical documentation, such as operative reports, must accompany the claim when billing for more than five procedures.

Payment for dermatology procedures, as defined by HCFA, will be based on the following: 100 percent of the fee schedule amount for the highest valued procedure; 50 percent of the fee schedule amount for the second through fifth; and 10 percent payment for services beyond the fifth. No additional documentation is required.

What procedure code is to be used for repeat pap smear with history of previous abnormal smear?

Effective for services performed on or after January 1, 1992, physicians should use codes 88151 or P3001 as appropriate. When reporting P3001, physicians must list a primary and secondary diagnosis code when billing Medicare for screening pap smears—report diagnosis code V76.2 or V15.89 as the primary diagnosis and V72.6 as the secondary diagnosis code.

Will Medicare pay for the administration of an injection on the same day as an office visit?

Payment for the administration of a therapeutic injection will *not* be made when the injection is performed in conjunction with an office visit on the same day. Payment will be made for the visit and the cost of the drug.

The appropriate level of E/M service should be reported in addition to the appropriate code for the drug. The administration service is considered to be part of the office visit.

Injection administration (procedure codes 90782-90784, 90788, and 90799) will be paid when billing independently, i.e., no E/M service is rendered on that day. In this case, one of the administration codes listed above should be billed in conjunction with the appropriate code for the drug.

Payment can be made for visits, the administration of the drug, and the cost of the drug for chemotherapy injections. Payment can also be made for the cost of the drug and a visit on the same day if the visit was for a separate and identifiable service, such as a history and physical to determine that arthrocentesis was needed.

*As reported in the August 1992 "Medicare Report," **payment will be made** for the vaccine administration and office visit for the pnuemoccal vaccine (90832) and the hepatitis B vaccine (90731).*

How should a major surgery performed within the post-operative period of a biopsy be billed to Medicare?

If a major surgery is performed on the same day or within the post-operative period of a biopsy, the major surgery should be billed with a "79" modifier.

"We've tried other
or exist—without

"The business of medicine has gotten so complicated, there's no way we could have continued to manage the practice without the right kind of automation. Now, with our Keystone system, the staff can respond to all our requests—patient requests, too—in no time flat. And **KMS is what you'd call user friendly...** *everyone's happy with it."*
Charles W. Kinzer, M.D., P.A.

The KMS practice management system enables you to streamline office operations quickly and realize dramatic increases in efficiency. Time spent shuffling papers can be devoted to patient care—and growing your practice.

"We're using **their intelligent Payment Posting module. It's saved us 16% in staff hours at one office, 25% at another.** *That's part of the reason we selected Keystone: efficiency. We also chose them for their flexibility, support and long-term commitment."* **Benjamin L. Levin**

Estate Planning: Some First Steps

Robert L. Lamb

After you've worked a lifetime to build an estate, it's possible for the federal government to snatch up to 55 percent of it away from your heirs, and this could happen even if you've made a will. Clearly, an estate not carefully and professionally planned is one destined for lawyers' pockets, the courts, and both federal and state taxes.

If you do not make a will, the courts, according to state law, will determine exactly who will receive funds from your estate and in what amounts. Generally the law of intestate succession applies to property not jointly titled. It provides for heirs through a formula which slightly favors the spouse and treats all children equally. In the event that the spouse is not a U.S. citizen, a different set of rules apply.

Why do some people fail to write a will? They mistakenly believe that the spouse automatically receives everything, or they speculate that joint ownership solves all problems. Many physicians avoid estate planning because they do not wish to deal with their own mortality while others simply procrastinate. However, when a person dies without a will, the heirs can expect to see the maximum amount of federal estate taxes levied on their legacy.

Objectives of estate planning

The objectives of estate planning usually begin with providing appropriate financial security for the surviving spouse and children. The plan which follows seeks to assure that the spouse will be able to maintain the accustomed standard of living and to educate the children.

• *Provide for liquidity to cover all death expenses and outstanding bills:* Today, as expensive as living is, it's a sad fact that the price of dying also has skyrocketed. This means that the surviving spouse will immediately need a significant amount of cash to cover funeral expenses, outstanding bills, and death taxes. Good estate planning assures access to some highly liquid assets.

• *Avoid probate:* While it's true that the cornerstone of estate planning is the will, it's also true that a will alone will not preserve a maximum amount of your estate for your heirs. Without additional planning, all of the assets of your estate will go through a lengthy and sometimes expensive court proceeding called probate. By the end of this process, as much as 10 percent of your estate can vanish into the legal system through administrative fees, executor fees, and legal fees.

• *Limit your estate to blood relatives:* In estate planning, through the use of trusts, it is possible to assure that intended funds only go to blood relatives, a detail which may be important in contemporary America with its serial families.

• *Protect your heir's inheritance:* Occasionally a parent detects a touch of the prodigal in a child, a condition which usually self-corrects given the passage of time. However, should this child receive a lump-sum inheritance too early in life, the entire legacy quickly could be squandered. In these situations a trust can manage the inheritance and pay it out in installments. Such an instrument also can be fine-tuned to give the trustee some discretion in the distribution of funds.

• *Provide for a handicapped person:* Unless special provision is made, the law will treat all children equally. But, in fact, there may be a special-needs child in your family, someone with a disability who will require expensive care for a protracted period. Estate planning can assure that assets are dedicated to this person's care. Alternatively, a carefully crafted estate plan will insure that a child's eligibility for government-funded assistance or programs is not affected by an inheritance from your estate.

• *Avoid or reduce estate taxes:* When Benjamin Franklin said only death and taxes are certain, he didn't go quite far enough. Not only are death and taxes certain but so also are death taxes. If ever there was taxation without representation, estate and inheritance taxes are it. While a surviving spouse usually can re-

ceive all of the assets of the estate free of estate taxes, the tax collector is assured of getting a portion upon the death of that spouse. Assets above the $600,000 exemption will be taxed before going to the heirs, and in the case of a physician's estate, will be taxed at the minimum 37 percent rate just on the federal estate tax. Depending on the size of the estate, the federal tax quickly climbs to a 55 percent tax rate.

An estate plan that utilizes two trusts—one which takes advantage of the federal estate tax credit and the other that preserves the marital deduction—can pass assets to your heirs at the least tax cost.

Establishing the estate plan best for you and your family requires time with your attorney and financial planner, but compared to not having a proper plan, the procedure is relatively inexpensive.

Reexamination of changes

Many physicians treat estate planning as a once-in-a-lifetime event. Such an attitude can produce disastrous surprises for the surviving spouse and heirs. For example, could a problem at the office affect the future of your family? Yes indeed!

Unresolved disputes among partners, particularly relating to buy-out provisions, could have a devastating effect on your estate and create grievous problems for your family. Examples of other common events which have an impact on estate plans include: receipt of a gift or inheritance, changes in property values, and/or changes in tax laws.

Life is a panoply of birth, death, marriage, divorce, illness, educational needs, maturity of family members, and practice change—any one of which can trigger a significant change in an estate plan. And when a change occurs, reexamination of the plan is essential.

Charity as an estate-planning tool

There is no right or wrong way to manage your estate; the options are numerous. What is needed is quality time for you and your spouse to plan the scenario you envision. Estate planning is not a euphemism for "death" inasmuch as some aspects of estate planning will become part of your retirement plan.

For example, it is not uncommon for a physician to own stock which has been held for a long time and which, although performing poorly in terms of dividends, has significantly appreciated in value. The challenge here is to avoid the capital gains tax. This can be accomplished by setting up a charitable remainder annuity trust or charitable remainder unitrust, or by purchasing a gift annuity from a charity such as the Medical Legacy Fund of the Society's Educational and Scientific Trust. You would establish a guaranteed income for life and avoid the capital gains tax.

In the transaction, the Medical Legacy Fund would sell the original stock and reinvest the proceeds in better performing instruments, thus assuring more income. In this scenario the charity is not required to pay capital gains tax on the sale and neither are you, the donor. Instead, in giving the stock you would take a substantial charitable gift deduction on your federal income tax and even receive some of your Medical Legacy Fund income tax free. Nor would the stock still be part of your estate for estate tax purposes.

In such a transaction, some donors choose to purchase a life insurance policy or establish a trust, funded by life insurance, in the amount of the contribution to the charity. The children are designated as owners and beneficiaries, and the savings derived from avoiding the capital gains tax are used to pay the policy premium. For the heirs, the death benefit replaces the money given to the charity.

Importance of using expert advisors

Like anything else, estate planning requires a serious investment of time and money. It is a joint enterprise for the physician and spouse in which numerous options must be weighed. Experts who contribute to a well-rounded estate plan include attorneys, tax advisors, financial planners, and life insurance experts.

This article is not intended to be a definitive guide to estate planning. Physicians should consult with professionals of their choice to formulate their own personal estate plans, and then review them periodically.

ASSESSING THE IMPACT OF RBRVS ON REVENUES

As the first transition year of the Medicare fee schedule under the resource based relative value system (RBRVS) comes to a close, physicians are focusing on key issues for the year ahead, including financial planning and participation status in Medicare.

In reviewing 1992, many physicians may be surprised to find that the effect of the fee schedule was not as dramatic as had been predicted. Depending on the specialty and patient mix, some practices felt its impact more than others. In preparing a 1992 budget, physicians can begin by basing financial planning on the existing conversion formula to estimate Medicare income. However, as of this writing, the final conversion formula is still being debated.

Keeping abreast of this decision and other RBRVS trends will be critical to physicians' planning throughout the year. A business plan or financial budget should not only be periodically reviewed, but should be updated to reflect any changes.

The impact

The following are examples of fee schedule changes that may have implications on a practice's income and—ultimately—the bottom line:

- Physicians will continue to receive less reimbursement when performing typical office procedures in hospital outpatient settings rather than in their offices. The Health Care Financing Administration (HCFA), having applied a special reduction in payment for these services because part of the overhead is absorbed by the hospital, has recently decided to exclude some 50 procedures when performed in ambulatory surgical centers rather than in offices. This rule could apply to some services physicians are currently performing. To account for such changes in a budget, physicians can refer to the carrier's Medicare bulletin for a complete list of such procedures.
- In response to physicians' objections that new reimbursement levels were not equitable, HCFA has recalculated fees for a number of procedures. If a practice is considering the purchase of major capital equipment for these procedures, the return on investment may be significantly affected.
- A new physician added to a practice in 1993 will be subject to reimbursement discounts if he or she does not have a billing history. As of this writing, a first-year physician is allowed 80 percent of the new par or non-par fee; second-year physician—85 percent; third year—90 percent; and fourth year—95 percent. HCFA has also clarified the definition of a "new physician." Effective January 1, 1991, the first year of practice is considered to be the first year during which services were rendered to Medicare patients during January of that year. This means that a physician must have been billing Medicare for a service rendered in January 1991 for 1991 to have been considered the first year of practice.

A physician's financial analysis should also include monitoring other practice trends, including changes in demographic data. Reviewing these trends can provide valuable information as to whether a physician's Medicare population is expanding or decreasing. One implication of changing demographics may be to bolster a physician's marketing efforts to expand his or her patient base in the younger population segment.

Participation decision

In designing a 1993 budget, physicians will inevitably be faced with the issue of their participation status. This year marked a record participation rate of 55 percent. In fact, according to a recent HCFA study, over the last five years the percentage of physicians electing to participate in Medicare has steadily risen in specialties such as internal medicine, orthopedic surgery, ob/gyn, general surgery, and family and general practices. This trend will most likely continue as the allowable non-par and par fees get closer each year.

Since the introduction of the Omnibus Budget Reconciliation Act in 1989, incentives for non-par physicians have increasingly diminished: this year, HCFA limited Medicare charges to 120 percent of prevailing charges; in 1993, the limit will drop to 115 percent. In addition, non-par physicians, opting to receive all reimbursement from patients, take on a greater risk of bad debts. Physicians electing not to participate may be giving up some intangible benefits as well, including public relations to patients and referring physicians or free government advertising.

When changing status from par to non-par, consider the ramifications of the alternatives: possible loss in patient volume and billing, and the need to assess options for generating income to compensate for lost revenues. Marketing strategies and communications efforts to attract new patients may need to take on heightened priorities. Central to this issue is the extent to which other insurance carriers will reimburse for the same procedures or services. Many third-party carriers are increasingly looking to the Medicare fee schedule as a model for their own reimbursement fees. Managed care contracts, for example, frequently do not offer a more attractive option.

The coding imperative

A key component of a physician's financial assessment should be a critical review of the practice's administrative routines—especially billing and coding procedures. With the constant changes imposed by HCFA, accurate and efficient coding has more than ever become an imperative. As the government continues to increase its staffing capacity to investigate physicians' compliance with Medicare, physicians should be dedicating resources to streamlining documentation routines.

To avoid claims of overpayment, a physician must ensure that coding procedures stringently comply with the HCFA guidelines. However, equally important is ensuring that all the Medicare revenues to which a physician is legally entitled are being received. A physician needs to know how to convert office procedures into CPT codes, and the billing staff must know how to convert that into prompt reimbursements.

As the first year of RBRVS comes to a close, physicians continue to be presented with multiple challenges—not only to make sure their paperwork is in order, but to streamline key practice management routines. As always, planning ahead is the key to meeting these challenges, and the time to start is now.

PRO Myths vs. Facts

Donald E. Harrop, MD

One thing of which the Keystone Peer Review Organization may be rightfully accused is that we are boastful about our efforts to communicate with physicians and providers. We think we do as good a job of education as can be done, and we don't mind saying so. However, certain myths have formed in the minds of some of our fellow physicians which seem impossible to dispel.

Based on correspondence I've received at the Keystone Peer Review Organization (KePRO), certain myths persist with physicians no matter how many times we have written or made presentations about the facts on these subjects. Although I hate to rehash the same old topics too many times, it may be worth trying once more.

Here are a few of the most prevalent erroneous beliefs and their clarifying facts:

Myth: PROs have quotas for denying admissions and for identifying quality problems.

Fact: As teenagers of today would say, "NOT!" PROs have no quotas, and the KePRO Board of Directors would probably tell the Health Care Financing Administration (HCFA) to keep their contract if they tried to force one on us.

Myth: KePRO physician advisors use criteria and generic quality screens to arrive at their review decisions.

Fact: Physician advisors are expected to use their own medical judgment and clinical experience to determine medical necessity of admissions and quality of care provided, and are strongly discouraged from referring to criteria and screens.

Myth: KePRO reviewers are not truly "peers."

Fact: During a recent study of statistics for a one-month period, review of inpatient cases was conducted by matching specialists better than 99 percent of the time for level I, II, and III reviews, and for reconsiderations. Specialty matches occurred in 81 percent of the ambulatory surgery cases reviewed, but one specialty, in which we have a shortage of physician advisors, accounted for approximately one-half of the cases in which there was no match.

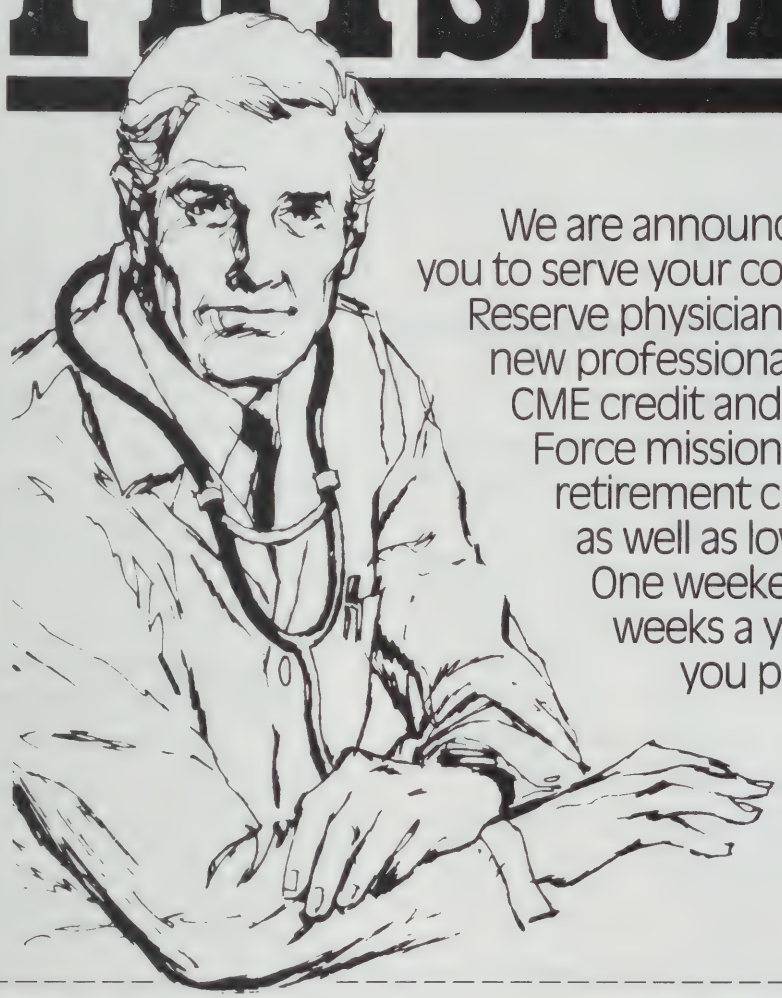
Myth: KePRO non-physician review personnel make medical judgment determinations.

Fact: Nonphysician reviewers may approve cases which meet criteria and pass generic quality screens, but they must refer all other cases to a physician advisor for a decision.

Myth: KePRO personnel consult DRG weight tables and only refer cases for review for a lower weighted DRG change.

Fact: The objectives of DRG validation are accuracy, consistency, and fairness, not cost containment; therefore, the number of cases which KePRO upgrades may surprise some people. For example, during the period of October 1, 1990, through September 30, 1991, DRGs that were changed were assigned a higher weighted level in 44 percent of cases as opposed to 56 percent that were downgraded.

Myth: KePRO reports findings to the National Practitioner Data Bank.



Fact: There are no requirements for PROs to report to the National Practitioner Data Bank. Actually, there have been no methods provided for them to do so even if they felt it was appropriate.

As you might imagine, these misconceptions cause some problems, but actually I feel sorrier for the physicians who believe them. It would certainly add to the frustration level to receive a letter from KePRO and be cited for a quality problem while believing that the review was conducted by someone who is not a peer or even a physician, or that an adverse decision was made to meet a quota.

Think about this the next time one of your colleagues is complaining about KePRO and is referring to one of the above myths. Perhaps you can help to reduce their frustration level by presenting the facts.

Dr. Harrop is president of the Keystone Peer Review Organization.

PHYSICIANS

We are announcing opportunities for you to serve your country as an Air Force Reserve physician/officer. You can make new professional associations, obtain CME credit and help support the Air Force mission. For those who qualify, retirement credit can be obtained as well as low cost life insurance. One weekend a month plus two weeks a year or less can bring you pride and satisfaction in serving your country.

A GREAT WAY TO SERVE

SOCIETY MEMBERSHIP INCREASES, '93 PLAN SET

Pennsylvania Medical Society membership is now 21,111, a 3.7 percent increase from this time last year. The increased figure can be attributed to the 1992 recruitment and retention plan of the Society's Council on Membership, which focused on 12 Pennsylvania counties. The 1993 plan, however, is taking a new approach.

"The 12-county approach has been used for several years now," said Wilma Light, MD, council chairman. "In order to address concerns and issues pertinent to segments of physicians that have not received as much attention in past recruitment efforts, we're taking a new approach." The 1993 recruitment plan places a greater emphasis on several groups—group practices, women physicians, and international medical graduates (IMGs), as well as residents and students—and focuses on the state's 31 staffed county medical societies.

Recruitment activities will include: direct-mail marketing, phone-a-thons, peer-to-peer contact at the county level, and communication on issues of concern to emphasized groups. County societies, which will play a large role in this plan, will also be focusing on communication of special-interest issues.

Group practice

Aware that approximately 40 percent of Pennsylvania physicians practice in group settings, according to AMA statistics, the Society plans to include recruitment of medical group practices as an integral part of its 1993 plan. These efforts, with AMA cooperation, actually were launched during 1992 with the hiring in June of a group practice coordinator to serve as a liaison between group practices and the Society.

The AMA's involvement with group practice membership has been on-going for the past few years. Because of the success of a pilot project in Wisconsin, the AMA is partially funding group practice coordinator positions in Pennsylvania and Ohio. Two other regions in the country will have coordinators by the end of the year.

The Pennsylvania Medical Society's group practice coordinator works closely with the Group Practice Advisory Committee, established by Society Executive Vice President Roger F. Mecum last spring. The committee—comprised of administrators from various groups, including Geisinger Clinic, Guthrie Clinic, Penn Group Medical Associates, University of Pittsburgh, Thomas Jefferson University, Bryn Mawr Medical Specialists, A.Z. Ritzman Associates, and Cowley Associates—has met three times to discuss their concerns, which range from differing group needs to communication issues.

> ***"The 12-county approach has been used for several years now. In order to address concerns and issues pertinent to segments of physicians that have not received as much attention in past recruitment efforts, we're taking a new approach."***
>
> *Wilma Light, MD*
> *Chairman, Council on Membership*

By analyzing the information and opinions which come out of the committee, the Society has gained a greater understanding of the needs of group practices. The Society will continue to work with county medical societies and the Department of Physician Services to create services to better address those needs.

Dues restructuring

One final area of focus by the Council on Membership in 1993 will be to study the Society's dues structure. The council believes that the collection process may need revision to be more effective and efficient, and that such revision could possibly save the Society money.

Specifically, the council will study the length and time of the billing cycle; the mechanisms within the cycle, including electronic funds transfer, credit card payment, and quarterly payment options; and the use of other mechanisms, such as various discounts and a corporate or institutional dues structure. The council hopes to present results of its study to the Society's Board of Trustees in the first half of 1993 and recommendations to the House of Delegates at its 1993 annual meeting.

SOCIETY, STATE DEVELOPING "YOUTH AGAINST TOBACCO"

The State Society and the Pennsylvania Departments of Health and Education are working jointly to develop a statewide "Youth Against Tobacco" campaign.

Tobacco is the leading preventable cause of death in the United States, killing nearly 500,000 Americans each year; about 90 percent of all smokers began smoking before age 18.

The campaign will focus on promoting a tobacco-free society and encouraging youths to take an active role in promoting a "no-use" message about tobacco. A variety of activities are planned throughout the school year, including:

- a pledge campaign, aimed at urging students to sign a pledge card against tobacco use;
- distribution of facts—suitable for classroom use—about smoking, smokeless tobacco, and second hand smoke;
- a tobacco control contest; and
- a media campaign.

Campaign promotional materials, such as bookmarks, book covers, flyers, etc., were sent to Pennsylvania's school superintendents in conjunction with the Great American Smokeout this month.

For more information about the Youth Against Tobacco campaign, call the Pennsylvania Department of Health at 1-800-692-7254.

COUNTY NEWS

SOCIETY LAUNCHING PILOT REFERRAL NETWORK

New efforts are being launched to link physicians with the state's Medicaid beneficiaries and uninsured patients. The Society in early October announced a program

to recruit physicians in Lackawanna County for a pilot physician referral network project.

The Society developed a computer network system to link participating hospital emergency departments and a list, by specialty, of local volunteer physicians. When Medicaid beneficiaries or uninsured patients need a physician or are in the emergency room for non-emergency services, hospitals can tap into the computer network to get a referral.

Patients, hospitals, and physicians will receive a paper copy of the referral to help track the program's effectiveness. To fairly distribute the uninsured and Medicaid patient base, physician's names are rotated to the bottom of the list after each referral. Physicians who volunteer to participate in the program agree to see patients within 72 hours, accept the discounted Medicaid payments, provide a reduced charge for the uninsured according to the patient's ability to pay, and stay in the pilot for six months.

The Lackawanna County Medical Society's role is two-fold: 1) joining the State Society in contributing financial, computer, and staff resources, as well as ombudsman services to complement the project; and 2) running the initial physician referral pilot, which is expected to be a prototype for the state.

Allegheny County is the next county slated to begin installation of a network. A more complex Lancaster County pilot program, which includes a managed care initiative, is awaiting federal approval to start up.

CANADIAN PHYSICIAN SPEAKS TO COUNTY GROUP

Nick Gettas, MD, a London, Ontario, family physician and president of the London Academy of Medicine, was the guest speaker at the September meeting of the Mercer County Medical Society. Dr. Gettas spoke about the deterioration of Canada's health care system.

According to Dr. Gettas, Canadian physicians and patients alike are frustrated with the system. Presently, the following has occurred:

- delisting of certain covered services, similar to Medicare's recent elimination of consultations for surgical clearance and/or management of established patients;
- curtailing health coverage for Canadians vacationing outside their country;
- capping physicians' incomes; and
- closing hospital beds.

For the future, Dr. Gettas has predicted: growing waiting lists, decreasing availability of physicians, increasing numbers of physicians leaving Canada, and increasing outpatient procedures.

The Canadian system of health care "has always prided itself on having availability equally to everyone," Dr. Gettas said, but he now sees that as changing.

Dr. Gettas also spoke about long term care as one of Canada's major problems. Coverage only lasts for 120 days, he explained, and waiting lists are up to a year long. According to Joseph A. Giordano, MD, specialist in internal medicine, Sharon, "His basic message was that Canadian health care is not covered 'from the cradle to the grave' as so many people believe." Dr. Gettas' hour-long speech "was received most positively" by approximately 100 attendees at the meeting, Dr. Giordano said.

YOCON®
YOHIMBINE HCl

Description: Yohimbine is a 3a-15a-20B-17a-hydroxy Yohimbine-16a-carboxylic acid methyl ester. The alkaloid is found in Rubaceae and related trees. Also in Rauwolfia Serpentina (L) Benth. Yohimbine is an indolalkylamine alkaloid with chemical similarity to reserpine. It is a crystalline powder, odorless. Each compressed tablet contains (1/12 gr.) 5.4 mg of Yohimbine Hydrochloride.

Action: Yohimbine blocks presynaptic alpha-2 adrenergic receptors. Its action on peripheral blood vessels resembles that of reserpine, though it is weaker and of short duration. Yohimbine's peripheral autonomic nervous system effect is to increase parasympathetic (cholinergic) and decrease sympathetic (adrenergic) activity. It is to be noted that in male sexual performance, erection is linked to cholinergic activity and to alpha-2 adrenergic blockade which may theoretically result in increased penile inflow, decreased penile outflow or both.

Yohimbine exerts a stimulating action on the mood and may increase anxiety. Such actions have not been adequately studied or related to dosage although they appear to require high doses of the drug. Yohimbine has a mild anti-diuretic action, probably via stimulation of hypothalmic centers and release of posterior pituitary hormone.

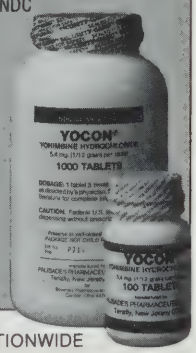
Reportedly, Yohimbine exerts no significant influence on cardiac stimulation and other effects mediated by B-adrenergic receptors, its effect on blood pressure, if any, would be to lower it; however no adequate studies are at hand to quantitate this effect in terms of Yohimbine dosage.

Indications: Yocon® is indicated as a sympathicolytic and mydriatic. It may have activity as an aphrodisiac.

Contraindications: Renal diseases, and patient's sensitive to the drug. In view of the limited and inadequate information at hand, no precise tabulation can be offered of additional contraindications.

Warning: Generally, this drug is not proposed for use in females and certainly must not be used during pregnancy. Neither is this drug proposed for use in pediatric, geriatric or cardio-renal patients with gastric or duodenal ulcer history. Nor should it be used in conjunction with mood-modifying drugs such as antidepressants, or in psychiatric patients in general.

Adverse Reactions: Yohimbine readily penetrates the (CNS) and produces a complex pattern of responses in lower doses than required to produce peripheral a-adrenergic blockade. These include, anti-diuresis, a general picture of central excitation including elevation of blood pressure and heart rate, increased motor activity, irritability and tremor. Sweating, nausea and vomiting are common after parenteral administration of the drug.[1,2] Also dizziness, headache, skin flushing reported when used orally.[1,3]



Dosage and Administration: Experimental dosage reported in treatment of erectile impotence.[1,3,4] 1 tablet (5.4 mg) 3 times a day, to adult males taken orally. Occasional side effects reported with this dosage are nausea, dizziness or nervousness. In the event of side effects dosage to be reduced to ½ tablet 3 times a day, followed by gradual increases to 1 tablet 3 times a day. Reported therapy not more than 10 weeks.[3]

How Supplied: Oral tablets of Yocon® 1/12 gr. 5.4 mg in bottles of 100's NDC 53159-001-01 and 1000's NDC 53159-001-10.

NEW PRESIDENT APPOINTS COUNCILS, COMMISSIONS

State Society President Donald G. Ferguson, MD, has appointed the following physicians as members and officers of the Society's councils, commissions, and committees for the 1992-93 term:

Council on Education and Science
Chairman Blairanne H. Revak, MD (Columbia); Vice Chairman Richard D. Baltz, MD (Dauphin); Mary Jo Bonner, MD (Berks); David R. Brill, MD (Montour); Gene L. Cary, MD (Dauphin); Charles J. Cattano, MD (Allegheny); Richard L. Decker, MD (Blair); John J. Dennehy, MD (Montour); Robert J. Fagioletti, MD (Washington); Joseph A.C. Girone, MD (Bucks); Stanley P. Mayers Jr., MD (Centre); John H. Moyer, MD (Cambria); Tomas A. O'Boyle, MD (Lackawanna); R. Douglass Ross, MD (Philadelphia); Morgan T. Smith Jr., MD (Montgomery) Russell J. Stankiewicz, MD (Union); Frederick S. Sunderlin Jr., MD (Montour); Carol Lynn Trippitelli (Dauphin).

Commission on Bioethics
Chairman Mary Jo Bonner, MD (Berks); Vice Chairman David Turkewitz, MD (Montour); Raymond A. Capone Jr., MD (Allegheny); James F. Crispen, MD (Dauphin); Francis C. Donovan, MD (Allegheny); George D. Hanzel, MD (Cambria); Russell J. Stankiewicz, MD (Union); Frank J. Tornetta, MD (Montgomery); Theresa A. Walls, DO (Lancaster).

Commission on Environmental and Occupational Health
Chairman David R. Brill, MD (Montour); Vice Chairman Nancy S. Nieland, MD (Allegheny); James L. Harrison, MD (Lycoming); Joseph Schwerha, MD (Allegheny); Thomas B. Scott, MD (Bradford); Theodore F. Them, MD, PhD (Bradford); Louis VandeBeek, MD (Philadelphia).

Commission on Licensure and Practice of Health Care Professions
Chairman Robert J. Fagioletti, MD (Washington); Vice Chairman Richard T. Bell, MD (Berks); Sucha O. Asbell, MD (Philadelphia); Bradley J. Bradford, MD (Allegheny); Frederick B. Doerfler Jr., MD (Armstrong); Christopher W. Fellin, MD (Montour); William W. Lander, MD (Montgomery); Robert G. Sanford, MD (Dauphin).

Commission on Medical Education
Chairman Charles J. Cattano, MD (Allegheny); Vice Chairman Bradford K. Strock, MD (Dauphin); Robert C. Aber, MD (Dauphin); Paul W. Dishart, MD (Allegheny); Carmela F. deRivas, MD (Montgomery); Joyann A. Kroser, MD (Philadelphia); Vahaken Tachdjian, MD (Philadelphia); Carol Lynn Trippitelli (Dauphin).

Commission on Public Health
Chairman John J. Dennehy, MD (Montour); Vice Chairman John P. Maher, MD (Chester); David M. Bishai, MD (Philadelphia); David W. Hawk, MD (York); Albert L. Pizzica, DO (Philadelphia); Lewis D. Polk, MD (Bucks).

Subcommittee on AIDS
Chairman John J. Dennehy, MD (Montour); John C. Cutler, MD (Allegheny); Robert J. Fagioletti, MD (Washington); Gilbert A. Friday Jr., MD (Allegheny); Robert G. Sharrar, MD (Philadelphia); Morgan T. Smith Jr., MD (Montgomery).

Subcommittee on Continuing Medical Education
Chairman Carl A. Frankel, MD (Dauphin); James L. Cosgrove, MD (Allegheny); Joseph M. Daday, MD (Clarion); Dean F. Dimick, MD (Lehigh); Walter I. Hofman, MD (Montgomery); Earl R. Miller, MD (Lycoming); Robert S. Pyatt Jr., MD (Franklin).

Council on Medical Practice
Chairman Diehl M. Snyder, MD (Lebanon); Vice Chairman Barbara E. Barnes, MD, (Erie); Alan J. Barnett, MD (Allegheny); Jeffrey H. Chaby, DO (Lancaster); Gordon H. Clark Jr., MD (Erie); Ronald J. Clearfield, MD (Westmoreland); Robert M. Haddad, MD (Montour); John P. Pagana, MD (Northumberland); James G. Pitcavage, MD (Allegheny); Fred Teichman, MD (Union); Ira H. Weiner, DO (Delaware); Edward M. Zimmerman, MD (Beaver).

Council on Governmental Relations
Chairman Andre C. Blanzaco, MD (Philadelphia); Vice Chairman Charles D. Hummer Jr., MD (Delaware); Lawrence L. Altaker, MD (Dauphin); Susan H. Bray, MD (Philadelphia); A. Craig Brown, MD (Erie); F. Dennis Dawgert, MD (Lackawanna); James F. Evans, MD (Montour); Joseph A. Giordano, MD (Mercer); John S. Parker, MD (Westmoreland); W. Gale Reish, MD (Union); Robert N. Robison, MD (Dauphin); Carol E. Rose, MD (Allegheny).

Council on Medical Economics
Chairman Michael J. Prendergast, MD (York); Vice Chairman John E. Devenney, MD, (Montgomery); Carl J. Forster, DO (Schuylkill); Carl A. Frankel, MD (Dauphin); Veryl F. Frye, MD (Clinton); Richard M. Gash, MD (Philadelphia); Barbara M. Harley, MD (Cambria); James J. Houser, MD (Venango); Howard G. Hughes, MD (Montour); Francis G. Hurite, MD (Allegheny); John A. Malcolm Jr., MD (Union); Anthony M. Perry, MD (Lackawanna); Bruce L. Thomas, MD (Huntingdon); L. Alan Wright, MD (Allegheny).

Commission on Access to Health Care
Chairman John A. Malcolm Jr., MD (Union); Jerold M. Aronson, MD (Philadelphia); Toni S. Casale, DO (Dauphin); Robert G. Doe, MD (Lancaster); James J. Houser, MD (Venango); Robert M. Kemp, MD (Lancaster); Robert S. McGregor, MD (Montour).

Council on Membership
Chairman Wilma C. Light, MD (Westmoreland); Vice Chairman Jaan E. Sidorov, MD (Montour); John H. Boal Jr., MD (Beaver); Robert E. Bowen, MD (Bradford); Rebecca Kunkel (Philadelphia); Lori L. Cherup, MD (Allegheny); John P. Deviney, MD (Montgomery); Mark S. Friedlander, MD (Montgomery); Richard P. Kennedy, MD (Monroe); Mary J. Kinosian, MD (Jefferson); James A. Morris Jr., MD (Delaware); Catherine M. Piontek, MD (Philadelphia); Arthur V. Stein, MD (Lehigh); Gloria J. Watkins, MD (Westmoreland).

Advisory Committee on Professionalism
Chairman Ferdinand L. Soisson Jr., MD (Cambria); Alan L. Dorian, MD (Montgomery); Syed R. Hussaini, MD (Allegheny); Matthew Marshall Jr., MD (Allegheny). *Note: State Society secretary serves as chairman of this committee.*

OBITUARIES

B. Irene Armstrong, *St. Marys*
University of Pittsburgh School of Medicine, 1947; age 74, died June 27, 1992. Dr. Armstrong specialized in ophthalmology.•

James A. Batts Jr., *Philadelphia*
Howard University, 1941; age 78, died August 22, 1992. Dr. Batts was a obstetrician/gynecologist.•

Russel A. Boykiw, *Clearfield*
Hahnemann Medical College, 1946; age 82, died September 4, 1992. Dr. Boykiw was a family practitioner.•

Gerald E. Callery, *Malvern*
Jefferson Medical College, 1943; age 76, died September 7, 1992. Dr. Callery was an orthopedic surgeon.•

Joseph S. Corba, *Pittsburgh*
Hahnemann Medical College, 1935; age 84, died August 18, 1992. Dr. Corba was a general practitioner.•

Hahnemann Medical College, 1951; age 68, died September 8, 1992. Dr. Harrison specialized in thoracic surgery.•

Gerald T. Lorentz, *McConnellsburg*
Hahnemann Medical College, 1943; age 77, died August 25, 1992. Dr. Lorentz was a general practitioner.•

Martin A. Myers, *Philadelphia*
Temple University, 1937; age 82, died June 21, 1991. Dr. Myers was a general practitioner.•

Joseph J. Newhouse, *Belle Vernon*
St. Louis University, 1953; age 66, died September 13, 1992. Dr. Newhouse was a general practitioner.•

Nathan W. Rubin, *Norristown*
McGill University, 1927; age 88, died August 25, 1992. Dr. Rubin specialized in obstetrics/gynecology.•

Morris H. Samitz, *Philadelphia*
Temple Medical School and the Penn Graduate School of Medicine, 1933; age 82, died August 22, 1992. Dr. Samitz specialized in dermatology.•

Edward J. Sarp, *Duncansville*
Georgetown Medical School, 1952; age 65, died August 29, 1992. Dr. Sarp specialized in geriatrics and was the medical director at Hollidaysburg Veterans Home.•

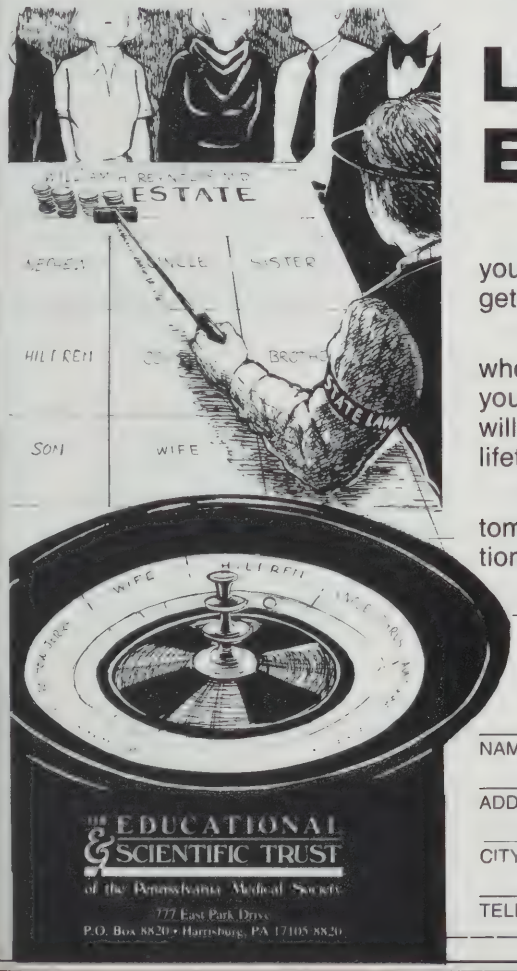
Spencer J. Servoss, *Williamsport*
Georgetown University Medical School, 1937; age 81, died August 29, 1992. Dr. Servoss specialized in urology.•

Jack R. Wennersten, *Pottstown*
Jefferson Medical College, 1939; age 80, died September 1, 1992. Dr. Wennersten was a general practitioner.•

Arthur G. Cannon, *Greensburg*
Pittsburgh Medical School, 1947; age 69, died September 7, 1992. Dr. Cannon was a pediatrician.

Thelma L. Dulany, *McKeesport*
Western Reserve and University of Pittsburgh, 1933; age 83, died August 18, 1992. Dr. Dulany was an ophthalmologist.

Thomas J. Lewis, *Cecil Township*
University of Pennsylvania Medical School, 1930; age 86, died August 11, 1992. Dr. Lewis specialized in urology.



George L Neumann, *Old Forge*
Columbia University School of Physicians and Surgeons, 1924; age 92, died July 23, 1992.

William L. Silverman, *Wynnewood*
Philadelphia College of Osteopathic Medicine, 1938; age 80, died August 10, 1992. Dr. Silverman specialized in pathology.

Calvin C. Weidner, *Peoria, AZ*
Hahnemann University Medical School, 1954; age 67, died August 6, 1992. Dr. Weidner specialized in occupational medicine.

J. Louis Wilkerson, *Newtown Square*
Bowman Gray School of Medicine, 1943; age 72, died June 28, 1992. Dr. Wilkerson specialized in urology.

• Denotes membership in the Pennsylvania Medical Society at the time of death.

Leaving Your Estate To Chance?

One of every two college educated adults dies without a will. If you are without a will, the state of Pennsylvania will determine who gets your property and in what proportions.

For example, the state may not give your youngest daughter who has not yet attended college her "fair" share. It will not give your coin collection to your nephew who treasures it most. And it will give nothing at all to the charities you supported during your lifetime.

For more information on how you can protect your family tomorrow through estate planning today, call or write The Educational and Scientific Trust.

For the free booklet on estate planning, please contact the Trust toll free 1-800-228-7823.

With Princeton, you're in good company.

More than 19,000 medical and health care professionals have chosen Princeton Insurance Company for their professional liability insurance coverage. Here are some reasons why:

- **A solid track record.** Princeton has a decade of experience providing professional liability insurance coverage to physicians, and A.M. Best has ranked us (with our parent company) among the 20 largest medical malpractice insurers nationwide since 1983.

- **Financial strength.** Our loss reserves are carried at full value, not discounted in the hope of earning sufficient interest income to pay claims. We maintain a high quality/low risk investment portfolio, with no junk bonds, no common stock and no real estate speculation. And we've earned a claims-paying ability rating of "A" from Standard & Poor's.

- **Coverage options.** Tail coverage is included in the purchase price of Princeton's innovative *Occurrence Plus* policy. A standard claims-made policy is also available, and we offer excess liability coverage (limits up to $5 million) to Pennsylvania physicians regardless of which company writes their primary coverage.

- **Strong defense against claims.** In a typical year, more than 90 percent of the Princeton-managed cases disposed of by the courts are resolved in the policyholder's favor.

It may be easier than you think to change insurance companies. Call today to find out more or return the coupon to receive a copy of our brochure, "It's Princeton's Specialty."

Joseph G. English, MD, chief emergency services physician, Williamsport Hospital and Medical Center, and vice president and charter member of the Emergency Care Physicians Association, has been appointed vice president/ medical director, Williamsport Hospital and Medical Center.

Dr. Regan

James D. Regan, MD, Society trustee and chairman of the Long Range Assessment Committee, served as a representative of the Society on a panel at the First Annual Legislative Health Care Forum held in Chester County in October by **Representative Elinor Z. Taylor** (R).

David Soll, MD, Rydal, received the Senior Honor Award, the highest honor bestowed by the American Academy of Ophthalmology for public and professional service.

Kenneth D. Cohen, MD, senior attending physician at Belmont Center for Comprehensive Treatment, Philadelphia, was named Practitioner of the Year by the Philadelphia Psychiatric Society. **Alexander D. Almeyda, MD,** Albert Einstein Medical Center resident, was named Resident of the Year.

Nathaniel H. Mayer, MD, founder and director, Drucker Brain Injury Center, Moss Rehabilitation Hospital, Philadelphia, and professor of rehabilitation medicine, Temple University, received the Individual Distinguished Service Award from the Pennsylvania Association of Rehabilitation Facilities.

Robert L. Boyd, MD, specialist in internal medicine and oncology, Delaware County Memorial Hospital, Drexel Hill, and **Donald D. Douglas, MD, FACP,** gastroenterologist, Evangelical Community Hospital, Lewisburg, have been elected to fellowship in the American College of Physicians.

Edwin D. Arsht, MD, received the Distinguished Service Award in Medical Education from Delaware County Memorial Hospital's graduating residency class of 1992, Department of Family Practice, for "excellence and outstanding service as a teacher in the specialty of family practice."

Lila Stein Koser, MD, a family physician in northeast Philadelphia, has been elected president of the Family Health Foundation of Pennsylvania, Inc., the philanthropic arm of the Pennsylvania Academy of Family Physicians. Her daughter, **Joyann A. Koser, MD,** a third-year internal medicine intern at The Medical College of Pennsylvania, was selected by the American College of Physicians to serve a two-year term on the National Council of Associates.

Alan M. Laties, MD, professor of ophthalmology, University of Pennsylvania School of Medicine, Scheie Eye Institute, Philadelphia, received the Paul Kayser International Award of Merit at the International Congress of Eye Research in Stressa, Italy, for his pioneering work in basic research on retinal neurotransmitters and the influence of the retina on eye growth.

Marvin Steinberg, MD, vice chairman of the Department of Orthopedic Surgery and director of the Hip Clinic and the Joint Reconstruction Center at the University of Pennsylvania Medical Center, presented "Effects of Electric and Electromagnetic Fields on Bone Formation, Bone Circulation, and Avascular Necrosis" at an Association Research Circulation Osseous post-graduate course in Brussels, Belgium, in September.

Edward Leonard Jr., MD, senior psychiatrist, Friends Hospital, Philadelphia, and clinical assistant professor of psychiatry and human behavior, Jefferson Medical College, was awarded the Daniel Blain Award by the Philadelphia Psychiatric Society for his dedication and service to the profession of psychiatry.

Robert Ryan Clancy, MD, associate professor of neurology and pediatrics, University of Pennsylvania School of Medicine, Philadelphia, and co-director, Comprehensive Epilepsy Center, Children's Hospital of Philadelphia, has been elected to the Professional Advisory Board of the Epilepsy Foundation of America.

David S. Smith, MD (second from right), professor emeritus of pediatrics, Temple University School of Medicine, received the First Annual Albert J. Finestone, MD, Award for Excellence in Continuing Medical Education for his commitment to lifelong learning in the medical profession. The award recognizes the contribution of Dr. Finestone (center), who retired as associate dean for continuing medical education at Temple in 1991. Pictured (left to right) are: Robert R. Smedley, EED, assistant dean for medical continuing education, Temple; Richard J. Kozera, MD, associate dean, Temple University School of Medicine; Dr. Finestone; Dr. Smith; and Iain F.S. Black, MD, Waldo E. Nelson professor of pediatrics, Temple University School of Medicine.

Is your malpractice insurance being non-renewed or declined for any reason?

If your coverage is being refused, non-renewed or cancelled, professional liability coverage with a high-quality private insurance company may be hard to find. You're not alone. Every day, professionals like you find themselves ineligible for coverage through their current insurance carrier.

At Old Dominion Intermediaries we specialize in serving the professional liability needs of physicians and other health professionals. What others see as difficult or unusual is our specialty. We represent only U.S. based, financially sound companies who have served the medical community for over 10 years.

If you are having difficulty qualifying for your association or other standard market program, call us today for more information . . . in complete confidence.

You'll love working with our locum tenens physicians and allied health care professionals.

WE GUARANTEE IT.

CompHealth has thoroughly credentialed physicians and allied health care providers from more than 40 fields of specialization available to provide locum tenens, or temporary, staffing assistance when and where you need it.

Plus, we have the standards and experience to guarantee your satisfaction each time we place a member of our medical staff in your practice or facility. It's the closest thing you'll find to a risk-free way to cover for absent staff members, "try out" a potential new recruit, or take care of your patients while you search for a new full-time associate.

Call us today to arrange for quality locum tenens coverage, or to discuss your permanent recruiting needs.

Considering Going Back to Clinical Practice?

The Medical College of Pennsylvania's Physician Refresher/Retraining Program provides an intensive eight-week review of general medicine, featuring daily lectures to update you on current medical practice and a variety of clinical rotations to reacquaint you with patient care. The program targets clinically inactive physicians or those who plan a shift to primary care. For more than two decades, the refresher course has been turning physicians back into clinicians.

Program Dates:

April 26, 1993 - June 18, 1993
October 11, 1993 - December 6, 1993
April 11, 1994 - June 3, 1994
October 10, 1994 - December 2, 1994

For information/application:

I'm a Doctor, and I'm Getting Tired

Irving Williams, MD

Author's Note: This article was originally written for the lay public.

I have been in private practice as a family physician and anesthesiologist for 30 years. I have cared for the elderly and the young, delivered my share of babies, and saved more than a few lives. I've lost sleep and shortened or missed vacations to provide consistent, quality care to my patients; and I have charged for my services fairly and provided care without question to those without financial means.

I have also spent 20 years working in organized medicine at the county, state, and national levels in an effort to allow my colleagues the ability to provide quality care to *their* patients. In those years I have watched with increasing concern the inroads made by regulators of all kinds which undermine those efforts.

The last decade of incredible medical advances has brought with it increasing criticism of those who use those advances to provide quality care to millions of patients. I agree that a way to provide care for *all* must be found. But the recent onslaught of political proposals to solve the ills of our "health system" has raised the level of criticism to new heights.

That is why I am getting tired. Not of physically caring for my patients, but:

- of the incessant bashing I take from the media;
- of being told physicians provide poor medical care;
- of reading that doctors are "rip-off artists" bilking insurance companies, Medicare, and Medicaid of millions of dollars;
- of hearing that I and my colleagues will not care for the poor, the uninsured, or HIV-positive patients;
- of being made to feel inferior by public figures whose own performance couldn't hold up to the scrutiny that I and all doctors must sustain;
- of being told I overcharge for expert care provided after years of training and experience;
- of having my profession over-regulated and blamed in part for the economic ills of a faltering economy;
- of watching politicians develop programs which will eventually lead to the demise of the finest medical system in the world;
- of being told that health care is excessively expensive, yet having demands placed upon me to provide the highest quality care possible;
- and, yes, of being told that neither I nor my hospital will be paid appropriately for those services after providing that necessary care.

In spite of all this criticism, I—and the majority of physicians—continue to try to provide the best care possible. The medical profession is one of the few professions which monitors itself in its performance. Medical professional associations demand continuing education as a requirement for membership. Not many other groups can honestly make that statement—certainly not the politicians and regulators who, if they had their way, would lead this country to medical mediocrity through restrictive and constricting laws and regulations...and certainly not the members of the media who seem to delight in the exercise of bashing the medical profession. It's time the doctor-bashing stop!

Many independent polls indicate that the individual patient is satisfied with his or her personal physician. We must be doing something right! Tens of thousands of physicians are out there doing the best they can in a hostile environment—providing excellent and, in many cases, free care to those in need. Before this country jumps on the bandwagon of some form of nationalized health care, it would do well to look closely at other government-operated systems. Do we really want a health system operated with the same standards and efficiency as the Postal Service, the Forest Service, or the IRS? I think not.

Let's begin to look carefully at the reasons for some of our health care delivery problems. Let's scrutinize the priorities of our people to see if health care is really a top priority, and if so, are they willing to pay for quality. And let's look at the funding provided. President Bush's "read my lips, no new taxes" may have been a slick campaign statement, but if implemented, it will lead inevitably to the reduction of both the quality and quantity of care provided by the medical profession. With fewer dollars we cannot provide increasingly sophisticated care to more people, many of whom live now longer with chronic illnesses.

Yes, I'm tired—as are thousands of physicians like me. Tired and discouraged. But we're still trying to do our best, even in the worst of circumstances.

Dr. Williams, a Lewisburg anesthesiologist and active member of the State Society, served on the Society's Board of Trustees for nine years and the Pennsylvania delegation to the AMA for 11 years.

Go electronic.

You'll never look back.

Turn claims into cash, fast. 7 days instead of 14, for the average claim.

Prepare claims more than twice as fast, and file them without cost over our toll-free lines. Eliminate postage and related expenses.

Get immediate confirmation of claims received.

Get information on claims status, so you can accurately project your cash flow, streamline your collections and avoid filing unnecessary duplicates.

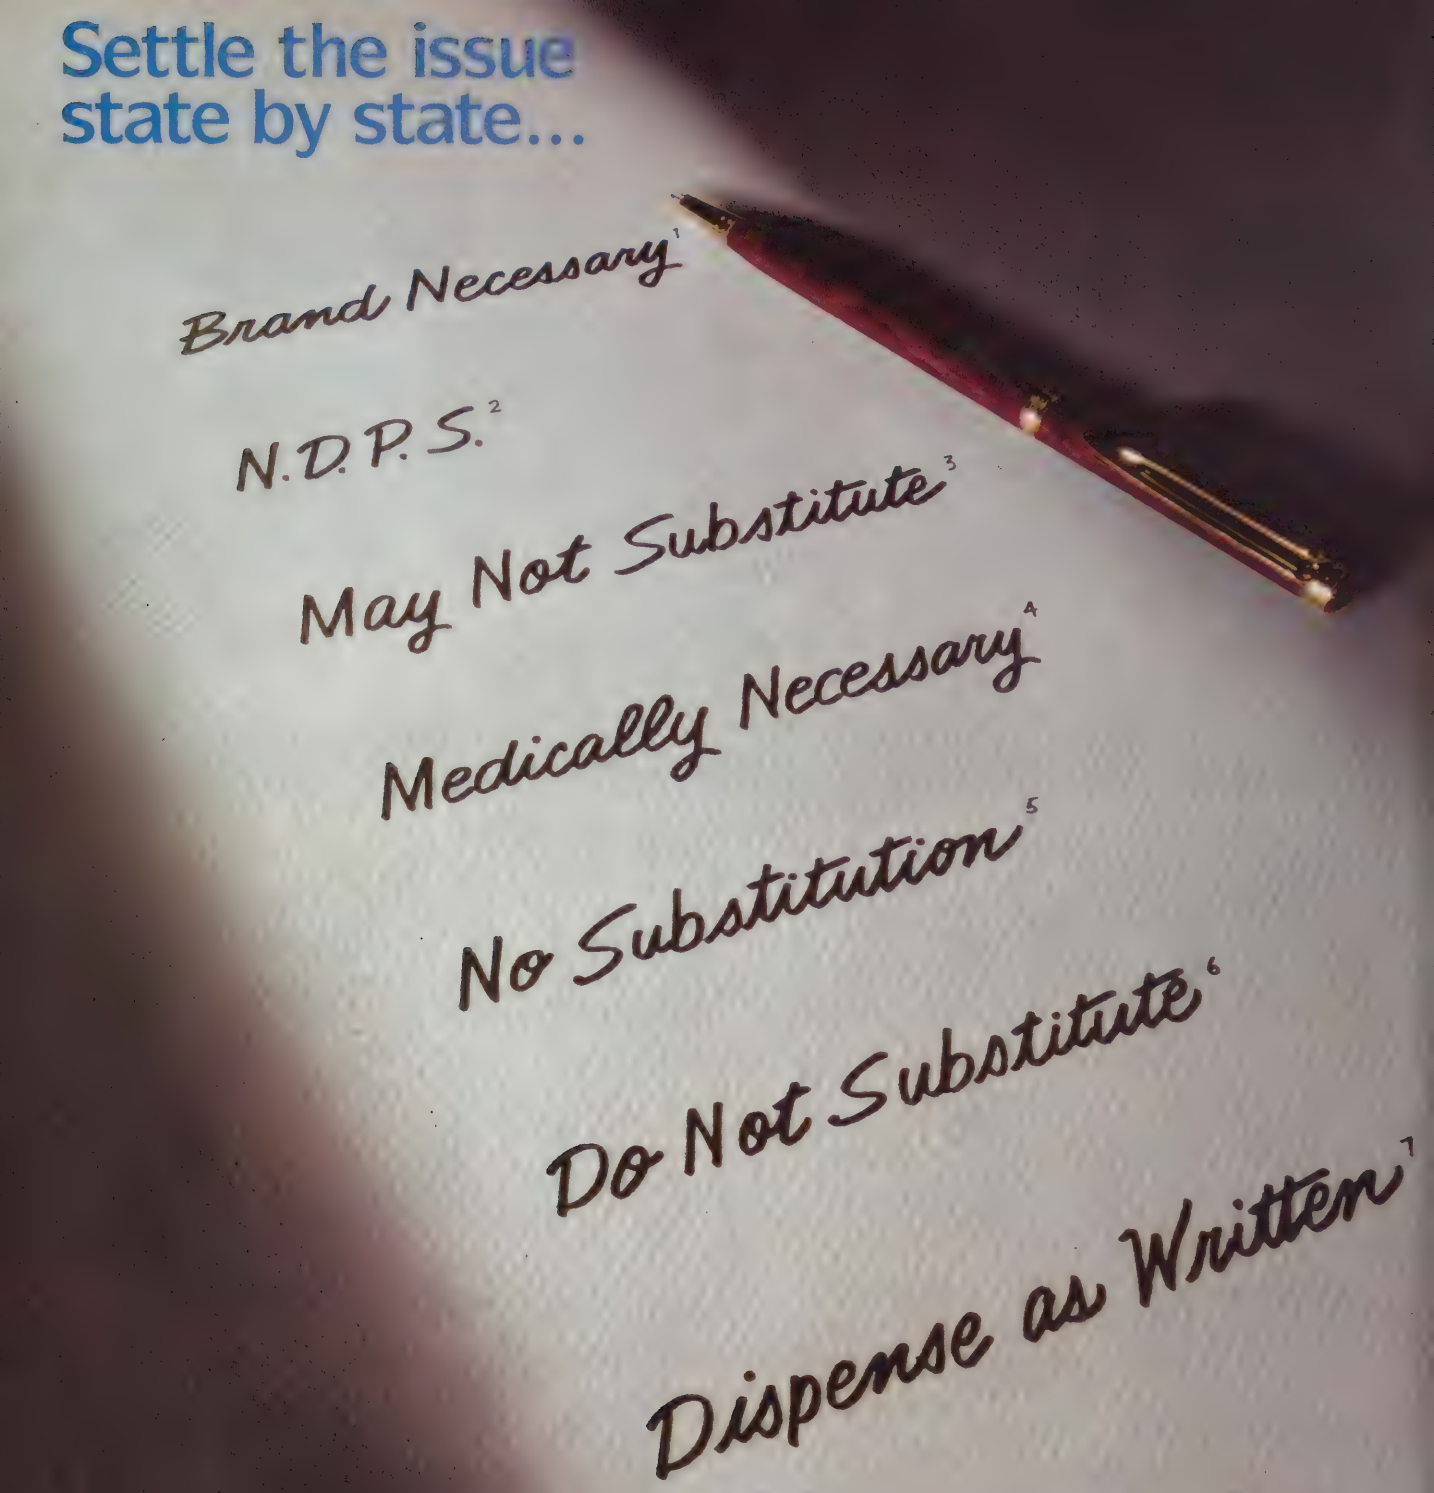
Access necessary patient information directly, including group number, coverage, eligible dependents, benefits explanations — and more.

Access reports to simplify and speed reconciling accounts and posting to accounts receivable.

But the best news is that the cost of getting started is low* for providers without computer automation — *no* cost to providers with a compatible computer system.

Find out how easy it is to go electronic.

For more information and expert advice, call Kathy Smith: ***1.800.992.0246***. She's got great news to share with you and your office manager.



Go electronic. There has never been a better time. There have never been better reasons.

**If you don't already have a computer, you need an IBM/compatible, DOS 3.3 or greater, MNP protocol modem and a printer. Estimated cost: $1,566. Software and technical support is FREE from Pennsylvania Blue Shield Electronic Services.*

SPECIALISTS IN MEDICAL PRACTICE MANAGEMENT

"Unfortunately,

he was already sitting in my examining room. This guy was a walking liability suit looking for a victim. He was angry, non-compliant. It was one of those rare, no-win cases and, well, I guess my number was up.

Then I remembered PMSLIC. So I stepped into the next room and gave them a call. They put me in touch with a member of their Risk Management team, who advised me of the relevant legal issues and the implications of each of my alternatives. Right on the spot. As a result, I was able to make the best medical recommendation with the peace of mind that comes from knowing my legal interests were also protected. I guess that's what it's all about. Peace of mind. The kind you only get from people who really take the time to help. That's excellent service. I'll never change carriers."

12 Health Care Reform: California Reform Plan Blends Strengths

As part of the Society's Forum on Health Care Reform, held during the House of Delegate's annual meeting, California Medical Association President Richard Corlin, MD, outlined the California association's proposed health care reform plan. His remarks are excerpted.

Dr. Corlin

18 Address of the President: Getting Involved

Dr. Ferguson

Dr. Moyers

20 Address of the Past President: Reaching Out

President Donald G. Ferguson, MD, in his inaugural address to the Society, discussed "what it means to be a doctor." Meanwhile, in an exaugural speech to the House during its annual meeting, Immediate Past President Robert N. Moyers, MD, suggested how to improve the Society's outreach efforts.

24 Delegates Consider Socio-Economic Issues

At their annual October meeting, State Society delegates lent their support to the organization's primary public health and legislative directions. Coverage of the meeting and election results appear in *Newsfronts*.

Because One Size Doesn't Fit All...

New Humulin 50/50 is the tailor-made answer to individual patient needs. A unique combination of equal amounts of Regular human insulin and NPH human insulin, it will be useful in situations in which a greater initial insulin response is desirable for greater glycemic control.

Like Humulin 70/30*, new Humulin 50/50 offers the convenience and accuracy of a premix. And it can be used in conjunction with an existing 70/30 regimen.

New Humulin® 50/50

50% human insulin isophane suspension
50% human insulin injection (recombinant DNA origin)

The Newest Option in Insulin Therapy

WARNING: Any change of insulin should be made cautiously and only under medical supervision.

* Humulin™ 70/30 (70% human insulin isophane suspension, 30% human insulin injection [recombinant DNA origin]).

MEDIGRAM

GOVERNOR'S PARTNERSHIP PROPOSES "MANAGED COMPETITION": The governor's Economic Development Partnership has proposed a system of "managed competition" to provide health care to every Pennsylvanian. The governor says the plan, which will be reviewed in a series of public hearings in the next several months, would reduce costs through a system of competing managed care networks. The Society is reviewing the document and plans to participate in the public hearings.

HEALTH CARE REFORM PROPOSALS AVAILABLE: A draft of the Society's health care reform proposals discussing how to break down the barriers to care, how to get escalating costs back under control, funding models, etc., is now available for review. Though a summary of the draft will be published in January in this publication, members may request the full document by calling the Society's Division of Communications and Public Affairs at 1-800-228-7823.

GENERAL ASSEMBLY PASSES HEALTH CARE BILL: Both chambers of the General Assembly in late November passed an amended version of House Bill 20 on children's health care. The bill provides state-paid or subsidized insurance to children—some 40,000 eligible—whose families cannot afford coverage but are not poor enough to qualify for Medicaid. It also includes primary care and rural/urban programs. The section addressing referral networks and hospital medical staff obligations—which at one time contained mandatory physician participation—was deleted entirely from the bill, but may be reintroduced next year. At press time the governor was expected to sign the bill.

LEGISLATURE PASSES RE-ENACTMENT OF PHC4, CON: The legislature in late November passed Senate Bill 1975 to re-enact the Pennsylvania Health Care Cost Containment Council (PHC4). The bill appropriates $1 million for the 1992-93 fiscal year which will extend the PHC4 law until June 30, 1993. After that the law will "sunset" unless again re-enacted. Also, the legislature passed House Bill 1982 to re-establish the Certificate of Need (CON) program. The Society successfully pursued "due process" protection and substantive amendments, as well as provisions requiring proposal of a policy for licensure of different levels of ambulatory surgical facilities. Both bills have been sent to the governor for approval.

WORKERS' COMP BILL STALEMATES: After several months of work to reform Pennsylvania's workers' compensation system, the legislature adjourned without passage of such legislation. This allows the Insurance Department to move ahead with a 24 percent increase in related insurance rates. A complete review of this and other legislative issues will appear in the January 1993 issue of PENNSYLVANIA MEDICINE.

CABG REPORT RELEASED: PHC4 released on November 19 its report on coronary artery bypass graft (CABG) surgery. The Society maintains that the report should not be ignored, but should be used with caution as a basis for asking questions and obtaining more information. For background, see the June, July, and October issues of this publication and the December issue of *Executive Report*. Also, for a Society analysis of the report, call the Division of Communications and Public Affairs.

WELFARE CUTS TO BEGIN JANUARY 1: The governor's plan to cut Medical Assistance benefits for state recipients of General Assistance is slated to begin January 1, 1993. The plan will institute an 18-medical-visit-per-year limit and a coupon payment system. Physicians should be aware, according to officials, that if they treat a patient without first receiving a voucher, they cannot be guaranteed reimbursement for services.

SOCIETY, PBA SPONSORING FAMILY VIOLENCE PROGRAM: The Society has joined with the Pennsylvania Bar Association (PBA) to sponsor "Breaking the Cycle of Family Violence," a public awareness program to be aired on Pennsylvania public television stations in early January. A video, "Children of the Lie," stars Martin Sheen, and a studio panel will discuss the issue. Check your local listings for date and time. For more information, call the Division of Communications and Public Affairs.

Most outpatient rehab facilities.

Bryn Mawr Rehab Outpatient Services.

Most outpatient rehabilitation facilities are single service providers, offering physical therapy to treat conditions such as sports injuries and back pain. At Bryn Mawr Rehab, we do this — and offer an array of individualized programs and specialized services.

A coordinated multi-service approach
Treatment might include a coordinated program of physical, occupational and aquatic therapies for a person with arthritis. Driver's evaluation and speech therapy for an individual who has sustained a stroke. A work hardening program to help someone get back on the job.

A collaborative process is the best process
Our focus is on maximizing outcome. Collaborating with you, your patient and, as needed, your patient's family, we are able to tailor a program to best suit the patient's individual needs.

Specialized services are a big part of our multifaceted approach
Unique, specialized services such as adapted driver education, aquatic therapy, equestrian therapy and rehab engineering assist patients in achieving the best possible outcome for their lifestyle.

Call our Outpatient Services Department at **(215) 251-5503** to learn more about our multifaceted outpatient programs.

BRYN MAWR REHAB
OUTPATIENT SERVICES

414 Paoli Pike, Malvern, PA 19355
A Member of Main Line Health, Inc.

Besides our primary facility in Malvern, additional outpatient clinics are available in Devon and Lionville.
Our Outpatient Services Representative can assist you in selecting the location that is most appropriate for your patient.

Random Thoughts After November 3

John W. Mills, MD
Medical Editor

It goes without saying that I was disappointed with the national election results. However, I'm glad it's over. With our modern communications we were "treated" to a saturating dose of political campaigning, unpalatable to many of us.

Historians tell us the presidential campaigns of the nineteenth century were much dirtier. Perhaps this editor is more sophisticated than our nineteenth century brethren, but I gather by the popularity of this election's "talk shows" that the average citizen literally eats this stuff up—we had 24-hour CNN coverage and all-night TV "ramblers" to do our thinking for us.

My analysis of this presidential election as it relates to our profession is fairly simple, therefore perhaps easily shot down. But then, it may provoke some letters.

"Choices have to be made—we can't do all for everybody."

In past editorials, I've alluded to the concept of behind-the-scenes staffers in the depths of Congress, who day-by-day, slowly as a cancer grows, push relentlessly toward enslaving the medical profession in this country—trying to reduce us to government employees, civil service category "X." I honestly believe this scenario.

My personal practice experience goes back only 32 years, but the first event I can pinpoint in this scenario is the Medicare legislation of 1964, under a Democratic president and Congress. Genuine concern for senior citizens and their health care culminated in that legislation. But many of us felt that the AMA let us down back then. In retrospect, I feel they only took the wrong tact—perhaps too late.

Since that time, we've come through evermore legislation, leading to the last few years' OBRAs [Omnibus Budget Reconciliation Acts]—each one more restrictive on medical practice. Then, in January of this year we received the resource based relative value system (RBRVS).

Ongoing problems with the peer review and 50 different state Medicaid laws, some of which are not even closely dovetailed to the federal Medicaid entitlements, have sunk us into a real quagmire.

RBRVS came with a Democratic Congress (Republican president), and most of the OBRAs were legislated in the same arena. Now our Democratic Congress, in railroad parlance, will have a "highball" or greenlight to continue their ways, blessed by the new Democratic presidency.

Jobs are first and health care second in President Elect Clinton's strategy. Both will consume money—lots of it. Where do we get the money? Taxes on wealthy Americans won't do it; more cuts in defense spending might help; but the bottom line will be higher taxes for *all*, and probably more national debt—already high enough to bankrupt us if we don't soon get a handle on it.

The American public really seems to think with their wallets instead of their intellects. It's time for them to seriously consider the indisputable fact that we can't afford all the medical care our profession is capable of delivering. Choices have to be made—we can't do all for everybody.

We're part of a world economy and global markets. We can be the greatest nation on earth, but our prosperity depends on the rest of the world—no longer can we isolate or insulate ourselves from what's happening anywhere on this globe or above it.

Elections usually do bring change. As we head for the changes of the twenty-first century, let us hope for the best, but let us not lose sight of our professional status. And let us implore and help the American people to recognize and deal seriously with the problems of access and cost while still maintaining everyone's freedoms.

Let's also declare all-out war on the four major social issues which sap the very life of this country: *HIV, illicit drugs, tobacco- and alcohol-related illness, and teenage pregnancy.* This is where our energy and resources need to be concentrated.

The AMA and your State Society are well-versed on health care issues. They will be at the table on both national and state levels as the debate continues. We must present a united front, for there are many players with self-serving agendas. Compromise will of necessity be the order of the day; we look to organized medicine to represent us with one voice.

It's 3:00 a.m.
You're worried about tomorrow's deposition.
Who can you call?

The Medical Inter-Insurance Exchange is available 24-hours a day, 7 days a week, to answer emergency calls about both claim and policy situations. No other medical professional liability insurer has this feature. It's just one of many services that make Medical Inter-Insurance Exchange better than the rest. Call **800-257-6288** now to find out how our Permanent Protection Policy and expert claim handling can give you peace of mind... and a good night's sleep.

Of Politics, Health Care, and Change

Donald G. Ferguson, MD

This is being written immediately after the national and state elections, and in the light of victory for the Democratic Party on the national ticket. It also appears that, on the state level, little change will occur. What does this mean to us, to our practices, and to our patients?

First of all, it means little or no immediate change in the political climate in Harrisburg—for better or for worse. Second, the promise of change in the administration means obvious change in the federal attitude toward health care. Whether this change will be fast or slow, major or minor, is yet to be known, but it certainly means increased vigilance on our part to continue to protect the rights of our patients—and our special relationship with them.

The vigilance, and the timely notice of impending changes to our patients' welfare, and our own, depends on our organizations—the Pennsylvania Medical Society, our specialty organizations, and the American Medical Association. Guiding those changes depends on *us*. We as individuals will determine whether presidential and congressional action will be onerous or bearable, sweeping or gradual.

This is the political process in the United States. We who have elected our governing officials must now talk to them. We must tell them what they need to know about health care: about the importance of being able to care for our patients without burdensome regulation, without spending our time on paperwork instead of people, and about our own plan as physicians to care for the people of our state and of our nation.

Last month, the Society began circulating for comment copies of our current health care reform policy. This draft was put forth by our Committee on Long Range Assessment, and adopted by our Board of Trustees and our House of Delegates.

It is not the same document that we have seen in the past, nor is it the ultimate statement of our purpose as a profession or as a Society. However, it is a remarkable document, representing the fusion of quite a number of opinions, some of them quite diverse. The final version of this health care reform proposal will guide our policy into the future.

There was, and is, considerable sentiment to support a "pure" consumer choice model, along the lines of the plan developed by The Heritage Foundation. This continues to be our goal for the long run.

Meanwhile, there is at the state level much activity that may lead to more immediate action. Given the need for a timely, workable plan to present to the Pennsylvania legislature *now*, when it is poised to tackle the issue, we have developed a series of intermediate recommendations. These recommendations assume that the most prominent plans to appear in the state legislature during its next session will be based on employers serving as the foundation for health care funding. Our short-term plan uses an employer-based system, with strong consumer-choice features.

If the terms I have used in this column are unfamiliar to you, I commend to your study your Society's health care reform position paper. It contains background as well as our recommendations.

On the other hand, if you are one of the many physicians who have been following closely the health care reform debate, I urge you to pay special attention to this document of your own Society and ask you to support our proposal as it takes shape in legislation.

You may obtain an advance copy of the entire draft for your consideration and comments by calling the State Society's Division of Communications and Public Affairs at 1-800-228-7823. Also, a summary of the plan is slated for publication in the January 1993 issue of PENNSYLVANIA MEDICINE.

ou're on solid ground with the Dodson Plan.

More than 75 years ago, Bruce Dodson, Sr. pioneered the concept of the dividend plan for workers' compensation insurance. Dodson Group has been helping businesses like yours save on premium costs ever since.

The Dodson Plan gives you the opportunity to earn a dividend each year, depending on the claim experience of all insured members. We carefully select those who participate, creating the greatest potential for you to save.

Pennsylvania Medical Society endorsed the Dodson Plan in 1973. Since then, participating members have earned a total of **$2,309,240** in dividends. Share in the savings!

You're on solid ground with Dodson.

LETTERS TO THE EDITOR

GROWING OLD AFFECTS UNDERSTANDING KEPRO

Somehow I thought it would never happen to me. Surely, I would never lose the ability to understand the process of decision making. I guess I was wrong. My understanding of this process has eroded as the result of growing old and out of touch with contemporary thought.

During my education, I was constantly challenged to answer two basic questions: "Why do you do what you do?" and "How do you know it works?" The answers to these questions were found by review of the literature and application of the scientific process—the process of recognizing a problem, forming a hypothesis, and validating that hypothesis. Apparently, this time-honored process is no longer in vogue at the Pennsylvania Medical Society.

In 1985, the Keystone Peer Review Organization (KePRO) was created as a subsidiary of the Pennsylvania Medical Society. The purpose of this bureaucracy was to ensure quality and appropriate utilization of health care in Pennsylvania—to protect the Medicare population from careless and incompetent practitioners, and to save our economy from greedy physicians. Seven years and $73 million later, have the goals of this organization been met? How does the KePRO experience stand up to the questions of scientific process that characterize my generation of physicians?

When KePRO is asked, "Why do you do what you do?" the answer is because the federal government mandates it. And when asked, "How do you know it works?" we learn that there is not one shred of evidence that seven years of KePRO review has improved the quality or utilization of health care in our commonwealth. In fact, a study to answer this question has never even been done! Seventy-three million dollars of taxpayer money has been allocated to a project with no measure of result. So much for accountability.

Well, I guess I just don't understand. But then, no one ever said growing old would be easy.

Philip D. Carey, MD
Carlisle

Editor's Note: This letter was forwarded to the president and administrators of the Keystone Peer Review Organization.

STATE PHYSICIANS "WELL SERVED"

I am writing to you to thank you for publishing the great practice management articles in PENNSYLVANIA MEDICINE. This afternoon as I was searching on a variety of computerized literature data bases for articles on personnel issues in physicians' private practice, I couldn't help but notice that all the best articles were in your journal. I finally decided to simply review the 800-some articles from PENNSYLVANIA MEDICINE, just in case I missed a few gems.

I couldn't help but think how well served the physicians of Pennsylvania were in having such a high-quality, state association journal. Unfortunately, when one routinely gets such a good publication, one might assume that this is the case from all state medical journals. From my vantage point, I'd like you to know that your journal is outstanding, especially in addressing some of the problems that physicians feel most vulnerable in—personnel issues in their private practices.

Keep up the good work!

Rya Ben-Shir, MLS, Manager,
Health Sciences Resource Center
MacNeal Hospital, Berwyn, Illinois

NO DICE.

For some malpractice carriers, easy come meant easy go. But not The Medical Protective Company. Our financial stability is a legend in our industry. And has been since we invented professional liability coverage at the turn of the century. Ninety years in business and a continual A+ (Superior) rating from A.M. Best prove it. Don't gamble your premium dollars. Put your money on a sure thing and call our general agent today.

THE MEDICAL PROTECTIVE COMPANY

Allentown, Gerald T. Frazer, (215) 395-8888; **Pittsburgh,** Donald C. Hoffman, R. Grant Stewart, David M. Gusic, (412) 531-4226; **Camp Hill,** Sidney B. Elston, Jr., Paul M. Fischerkeller, (717) 737-9900; **Plymouth Meeting,** Eugene P. Ziemba, William J. Carey, Robert J. Zucosky, James I. Frazer, Jr., (215) 825-6800

Malpractice rates too good to be true usually are.

You may have been told about lower rates offered by insurers new to the Pennsylvania market. Low rates will not benefit you if the company is not around to protect you or *your assets* if you are sued.

Physicians Insurance Company is an established Pennsylvania carrier who has continued to lower rates while protecting your future:

- 10% overall reduction in September 1991
- more for physician groups
- additional reductions for individuals who are claims free

Artificially low rates are a prescription for disaster... for the physician and the company. When selecting a malpractice carrier you should ask yourself what will happen in the future. Will they automatically surcharge my premium for claims experience? Will their policy provide me with the full Occurrence coverage I have enjoyed with Physicians Insurance Company or are they only providing a form of Claims-Made coverage—better known as Occurrence Plus or Permanent Protection? Why would a broker recommend this carrier... is the company only trying to buy my business by raising his commission? More importantly, will they be there when I need them?

At Physicians Insurance Company we have always maintained our rates among the lowest and we are committed to keeping this practice intact. When you take an honest look, *you can't do better.*

For more information on malpractice rates and coverage, please call or write today.

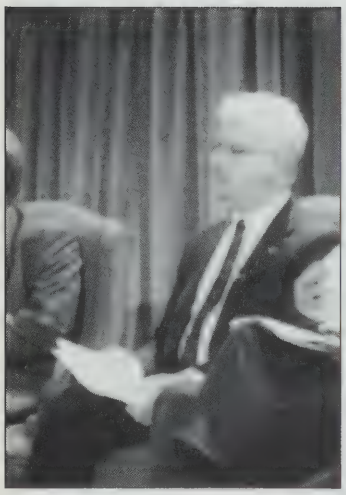
Health Care Reform: California Reform Plan Blends Strengths

Richard Corlin, MD



Dr. Corlin was part of a panel representing various sectors of the health care community at the Society's Forum on Health Care Reform, held October 23 in Philadelphia in conjunction with the Society's House of Delegates meeting. His remarks about the California Medical Association's health care reform plan are excerpted here. The California association's plan was, however, defeated in a ballot referendum.

Solving the problems of our health care delivery system is not going to happen in the first 100 days of the next administration, regardless of who is president. If the solution were easy, it would have been found a long time ago. What we need to do in the first 100 days of the next administration is be sure that we get the right start toward a solution that we get to as quickly as we can.

California is unique in certain ways; it's fairly typical in other ways. One [unique factor] is that by the end of this decade, we will not have the majority of any ethnic group in our population. We will be a state composed of several minority groups—some White, some Oriental, some Hispanic, some Black. This adds a tremendous diversity to our population, but brings with it certain health care and cost factors that we have to recognize.

Some fantastic work by Dr. David Battista at the UCLA School of Public Health showed enormous differences in the most effective way to provide health insurance to people in different ethnic groups. We've drawn upon some of that.

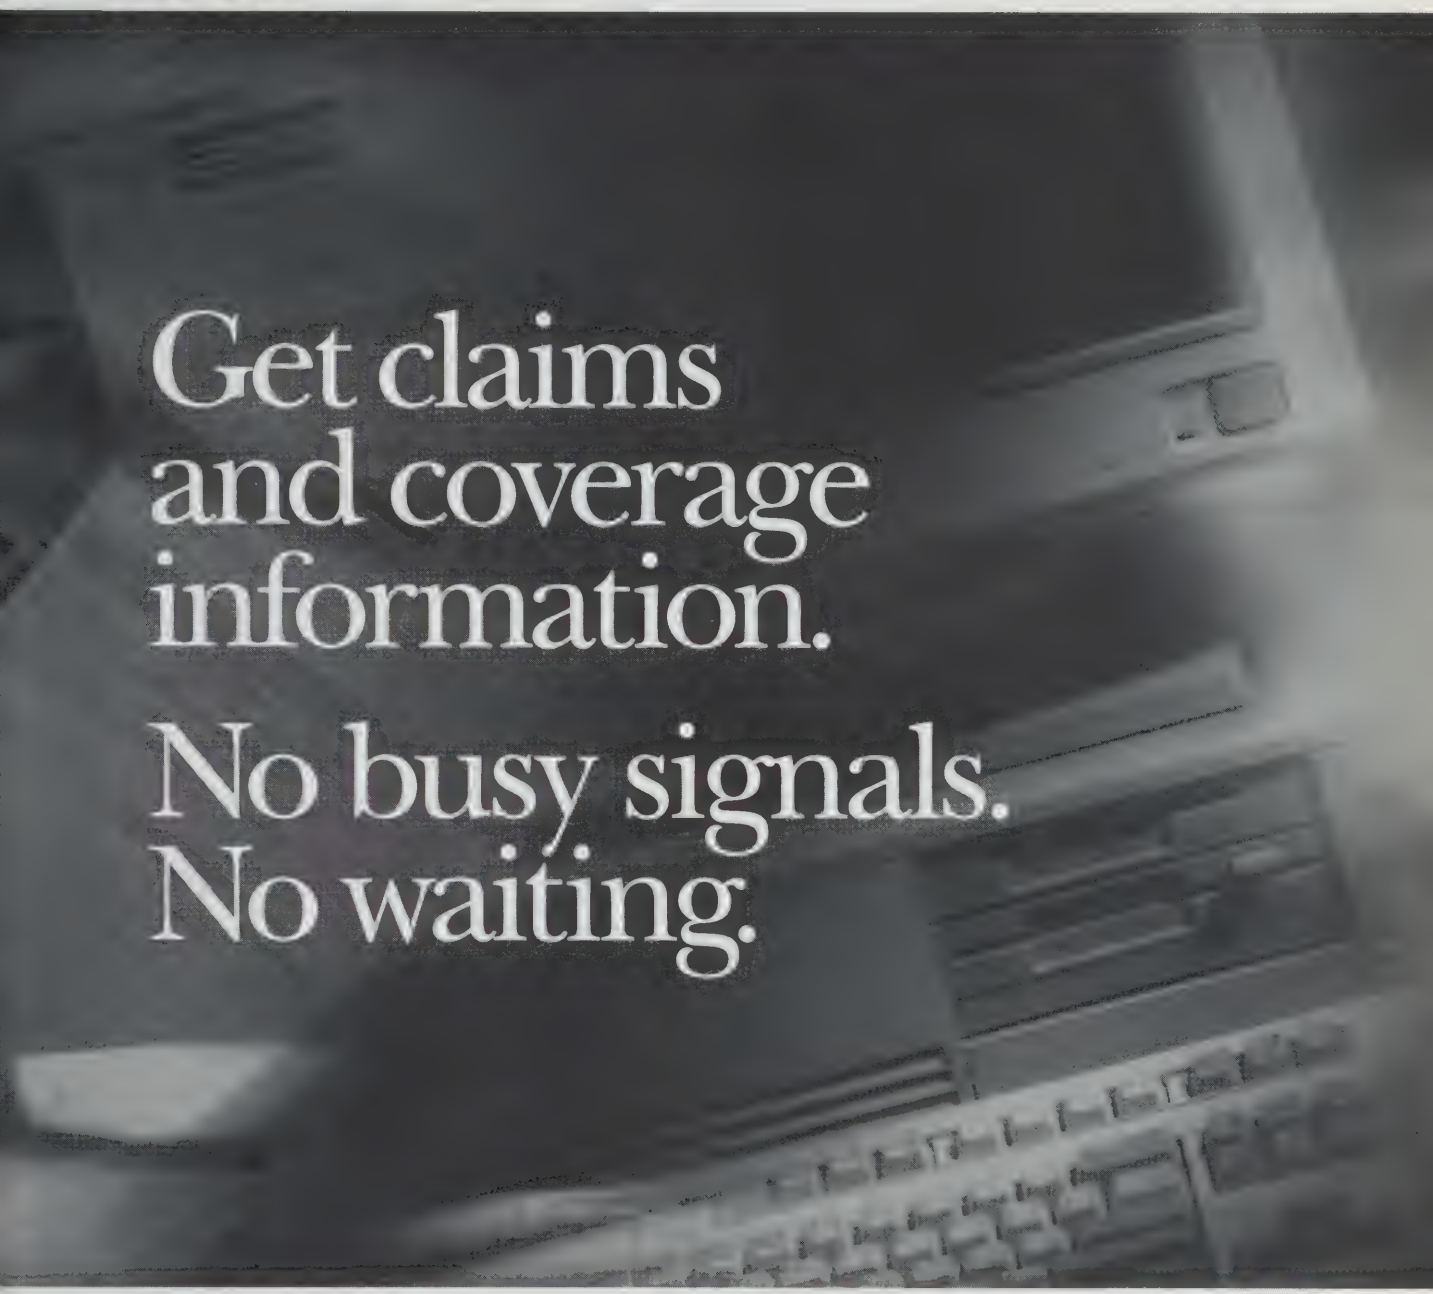
What follows is an outline entitled, "Principles of Health Care Reform." This is what the California Medical Association (CMA) went through as we decided that in a state like California—where we have six and a half million people without health insurance, and where we have had a cumulative state budget deficit of $25 billion in the past two years—that something had to be done *now*. We had waited long enough for health reform.

Dr. Corlin is speaker of the AMA House of Delegates and president of the California Medical Association.

Miller's Laws

Miller's Laws refers to some statements made by Dr. Stephen Miller, who, even though he was a physician, was a member of [Britain's] Parliament during the Labor Administration about 20 years ago. His position in Parliament corresponded to the position that Henry Waxman has in Congress.

[Miller] laid forth three principles for any government-run or government-mandated health care program. One, all decisions must be made at the most local level possible. Do not do central planning. I think our late experience with the HSAs [Health Services Administration] would confirm the validity of that. Secondly, physicians and hospital administrators with real experience treating patients and running hospitals must be involved in policy-making levels of the program. And thirdly, try not to make it a political football. Don't try to win or lose elections based upon health care. Recognize that we have got to work cooperatively to provide the best solution to the people.



Basic philosophy

The basic philosophy is one of three philosophies. Volunteerism and negotiations, which is the way we have tried to provide health care for the past 40 years, has worked for 85 percent of our population; it hasn't worked for the other 15 percent. We have a real responsibility to guarantee everybody in this country access to the health care they need at the time that they need it. And the pure voluntary approach has not worked and increasingly will not work.

We, therefore, have two other alternatives: one, for the government to set rules under which the private sector has to operate; or two, for the government to run the system. For a variety of reasons, we strongly favor government setting rules under which the private sector continues to operate to deliver health care.

At this point I want to divert a little bit. I do not think it is defensible to say, "I don't want the government to run the health care in this country because I don't want the government to do it." It is defensible to say, "We have studied health care delivery in this country. We have studied

E C S

Get claims and coverage information.

No busy signals. No waiting.

When it comes to getting the claims and coverage information you need, when you need it, Pennsylvania Blue Shield outperforms most health insurance companies. We set the standard for accuracy and speed.

And now, there's a new standard. We added convenience.

Now you can ask as many questions as you like, whenever you like, with no waiting.

Find out everything you need to know about patient coverage – everything you need to know about claims status and payment too, including check amount, check number, control number, the date the claim was paid and to whom.

You can even track multiple procedures for the same claim.

And you can document it all. Instantly.

All you need is a personal computer, a printer and a little help from Pennsylvania Blue Shield Electronic Services.

For more information, call Kathy Smith: ***1.800.992.0246***.

Pennsylvania BlueShield

ELECTRONIC SERVICES

Go electronic. There has never been a better time. There have never been better reasons.

the Hawaii system. We have studied the Canadian system. We have studied the Medicare and Medicaid programs. And we conclude that the government doesn't run the health care delivery system well in this country when they try to run it. Therefore, we don't want the government to run it." It's the same conclusion, but it's for a very different reason, and a reason I believe is defensible, as opposed to the ideology, which I believe is not defensible. Health care delivery is pragmatic; it's not ideologic.

Funding mechanisms

In terms of the funding mechanisms, again there are three items: honesty versus the "Unholy Trinity"; employer mandate *plus*; and tax based.

First is the issue of *honesty versus the "Unholy Trinity."* Honesty is to say, "While we need to get to universal coverage, we may not be able to afford to get there in one step. We may have to divide the problem into two steps—do what we can afford right now, and do what we can't afford now in the year or two down the road when we can afford it." It is much better to be honest than to claim to solve the whole problem now and deliver something that doesn't solve any of the problem.

The "Unholy Trinity" is the funding mechanism [of] how we got to Medicaid. And that is over-promise, under-fund, and shift the blame...we don't want to see it for everyone.

We strongly believe that an *employer mandate plus* is the funding mechanism that works. The *plus* is: we don't believe it is fair to saddle employers with the cost of providing health insurance for the unemployed uninsured. We think that should be a tax-based proposal funded out of general revenue tax, not a payroll tax.

And that's how we come down in California on dividing the problem into two steps. Seventy percent of the uninsured and 25 percent of the people on Medicaid are employees or dependents of employees. They can be covered now with an employer mandate system.

[For] the remaining 30 percent of the unemployed uninsured, we will come back with a second phase as quickly as we can—which has to be *tax based*—to provide health insurance for the unemployed uninsured. We reject a tax-based system in its entirety.

Insurance underwriting reform

In addition to the funding mechanism, insurance underwriting reform is crucial. We are finding out in California—and Governor Rockefeller mentioned that the Clinton people are aware—that the Health Insurance Association of America is the biggest enemy to health care reform in this country. They will fight as hard as they can to protect their profits, and their position is simply unconscionable. They are throwing into California $10 million in East Coast money to try to beat health care reform in California. When we tried to raise cigarette taxes, R.J. Reynolds threw $18 million into California, and we beat them, too.

Modified community rating is essential. The modification issue should still be allowed to rate for age. It makes no sense whatsoever, and indeed is counterproductive, to advocate a program where everybody in the same age group pays the same amount for health insurance. But we must not allow any exclusions for preexisting health conditions. We must not allow individual rating of one person's policy, or one small business's policy, depending upon the experience of that program.

We must, however, allow businesses to fold in the acute health care portion of workers' comp into the health insurance. That's a big cost-saving device.

Cost containment

• *Managed care*—Managed care, like it or not, is growing in this country. On the West Coast, it is the majority mode of care. We are not seeing new physicians go into fee-for-service private practice in any significant numbers at all. They are going into managed care private practices, usually in large multispecialty groups dealing with managed care contracts.

I'm not here to advocate it. I'm a reporter, not an editor. You may not like the news, but managed care is able to deliver health care, of a comparable quality in most cases, for less dollars per patient, and deliver it with greater efficiency; it's an effective cost-containment tool.

In reality, 95 percent of the insurance sold in the United States now uses one managed care technique or another—whether it's contracting of rates, utilization review, or whatever. But more organized systems of managed care are growing; as they become more common in Pennsylvania, taking a look at how physicians can effectively manage the managed care programs—not for our best interest but for our patients' best interest—is an essential item.

• *Basic benefits*—We need to see to it that we provide, in a universal mecha-

"You may not like the news, but managed care is able to deliver health care, of a comparable quality in most cases, for less dollars per patient, and deliver it with greater efficiency..."

nism, basic benefits and not unnecessary frills and whistles.

• *Fee review*—We need to petition the government, as the AMA is doing, to get back into the business of doing fee review. The federal Trade Commission forced us out of it several years ago.

• *Tort Reform*—Tort reform is absolutely essential. In California in 1975, when we passed our tort reform—which was a $250,000 cap on pain and suffering, collateral source rule, periodic payment of large awards, and a limit on contingency fees—we had the highest malpractice insurance rates in the country. We now have the twenty-seventh highest rate in the country. Obstetricians used to pay 50 percent *more* in California than in any other large state. They now pay 30 percent *less* in California than in any other large state. And doctors and hospitals don't pay malpractice insurance premiums, patients pay them.

You need only look at the Medicare system—which now has a specific reimbursement factor under RBRVS—and compare Los Angeles and Miami, and you'll find that the reimbursement factor in Los Angeles is half of what it is in Miami. Tort reform coupled with practice parameters, which will minimize defensive medicine, is an essential cost-containment device.

We're all aware of the statements that 25 percent of the tests and x-rays done are unnecessary. That comes from the speech that [Health and Human Services Secretary] Louis Sullivan gave in 1990. Nobody quotes his next sentence. I was there; I heard his speech. His next sentence was, "Many of these are ordered for defensive medicine purposes, and we need tort reform and practice parameters to eliminate the defensive medicine and put this cost-containment in place."

• *Cigarette tax and subsidy*—We now get to issue number five under cost containment, which is schizophrenia. I'm not a psychiatrist, but I define schizophrenia as any legislative body that complains about health care costs and subsidizes tobacco. The single most effective, simple, long-term cost-containment device in health care that we could pass in this country would be a $3-a-pack tax on cigarettes.

If you go to Montreal, or London, or Paris, or Düsseldorf, or anyplace else, and try to buy cigarettes, it's $5 a pack. And that's what it should be in this country.

• *Technology assessment*—Technology assessment panels to limit the inappropriate use of technology are also important.

More than 400 people attended the Forum on Health Care Reform held October 23 as part of the Society's annual business meeting in Philadelphia. Political insiders at the national and state level joined leaders of organized medicine for a frank discussion of the critical issues.

• *Anti-trust problems*—Correcting the antitrust problems that now prevent hospitals—even if they could get over their ego—from working together cooperatively in one town [is] important.

• *Manpower*—We have too many physicians in this country. We have far too many specialists. The fact that two-thirds of the residencies are specialty residencies is very counterproductive to cost-effective health care delivery. Managed care is exacerbating the physician surplus because it requires fewer physicians per thousand patients to deliver care. It is clear that for both physicians and lawyers, the normal laws of supply and demand do not work. A surplus of supply drives up the cost of care, and we need to recognize that and take action on it now.

• *Student debt and the NHSC*—Student debt is a major problem. The average student in 1990 graduated with $53,000 in debt. The average freshman medical student now will graduate with $70,000 in debt. The money to repay the debt drives up physician fee demands. We need to expand the National Health Service Corps (NHSC), provide extra physicians in medically underserved areas, and, in return for service in the NHSC, allow a conversion of medical school loans to scholarships. We solve three problems all at once.

• *Discussion of caps*—We now need to take a look at other items with regard to cost-containment; specifically, limiting how much money goes into health care—a discussion on caps. We believe very strongly that an artificial cap on "how much money we're going to spend on care, and no more" is a big mistake. It's a

Forum panelists included (see above photo, left to right):

Robert N. Moyers, MD, immediate past president of the Pennsylvania Medical Society, moderator

Robert A. Berenson, MD, faculty member, George Washington and Georgetown University Schools of Medicine, and member, President Elect Clinton's Health Advisory Group

Richard Corlin, MD, vice speaker, AMA House of Delegates, and president, California Medical Association

The Honorable Dwight Evans, chairman of the Appropriations Committee, Pennsylvania House of Representatives

George F. Grode, senior vice president, corporate affairs, Pennsylvania Blue Shield

Raymond Scalettar, MD, chairman, AMA Board of Trustees

Kenneth P. Yale, DDS, JD, Washington, DC, health care consultant with detailed knowledge of the Bush-Quayle health reform plan

The forum was sponsored by the State Society and the AMA.

mistake because it assumes that if you do that, the rest of the problems go away. They do not go away, and we need to correct the problems in the *system* of delivering health care.

We clearly have to budget effectively and, on an annualized basis, if we miss our budget targets, explain why, and make the necessary adjustments to understand it. But in approaching these limited amounts that we want to budget for health care, we need to recognize a few things.

Number one, the demographic changes in our population are enormously impacting our health care costs. If you take a look down the *important numbers* list below, $3,600 and $9,100 are two numbers that apply here—$3,600 is how much money it costs to provide health care for a 65-year-old; $9,100 is how much it costs to provide health care for an 85-year-old. And 85-year-olds are the most rapidly growing segment in our society right now.

We need to adjust our budgeted targets, not just for inflation and growth of population, but for growth in the population within each age group. We also need to recognize that we do not spend any money in this country on health care. We spend money for physicians' services, hospital services, pharmaceutical services, and so on, and we need to budget and adjust each one separately, and protect each one from caps on the others.

"I strongly urge the physicians to take the lead in this state in the health care reform debate."

CORLIN'S "IMPORTANT NUMBERS"

1 - $2.50

2 - $3,600 and $9,100

3 - $5 Billion

4 - $10 Billion

5 - $15 Billion

6 - $80 Billion

7 - $120 Billion

8 - 440,000

9 - 9%

10 - 24%, 48%, 15%, $3.50, $5.50, 38%

Long-term care

We decided not to include long-term care, for the simple reason that long-term care is not health care...never has been, and never will be. No country in the world includes nursing home costs in their health care budget. The single biggest reason why we spend a higher percentage of our Gross National Product on health care than Canada is that we include nursing home costs and they don't.

Nursing homes are essential; a program to fund them is essential. But it should be funded as a social service, separate from Medicare, not part of Medicare. The biggest risk to the integrity of the Medicare program is the fact that a nursing home benefit as part of Medicare will eat up all of the money available for the acute care of the elderly.

Important numbers

Finally, I want to go through the "important numbers"(at left), because I think they provide some perspective:

- $2.50 is how much medical cost is generated by each pack of cigarettes.
- $3,600 and $9,100 I've explained.
- $5 billion is malpractice insurance for doctors; $10 billion is malpractice insurance for hospitals; $15 billion is defensive medicine—so the tort system causes $30 billion of our medical care costs.
- $80 billion is the total amount of money that all the doctors in the country made last year; and $120 billion is the amount of money we spent last year on tobacco-related illnesses. That puts things into a little perspective.
- 440,000 is the number of people who died from cigarettes last year.
- Nine percent is the percent of the health care dollar that winds up in the doctor's pocket. That nine percent is on the table for discussion when we talk about limiting health care expenses and reducing them. But you don't correct the problems in a system that costs too much by concentrating on nine percent and ignoring the 91 percent. We are willing to put our nine percent on the table, but the other 91 has got to be there also.

The last line of numbers are the Canadian system. It's been the CMA's advocacy of our Affordable Basic Care proposal that has totally eclipsed any discussion in [California] of the Canadian-type system. The advocates of the Canadian system are now regarded as a fringe nuisance.

One of the enormous benefits of our proposal is all the discussion on health care reform in California is centered around the CMA proposal.

To explain number 10:

- 24 percent is the percent of [American] earned wages that are paid in income taxes—state and federal combined, all taxpayers averaged; 48 percent is what that number is in Canada.
- 15 percent is the sales tax in Quebec.
- $3.50 is a gallon of gas in Canada; $5.50 is a pack of cigarettes.
- 38 percent is the amount of the health care dollar in Canada that goes for health care—and in Canada, you cannot deduct mortgage interest from your taxes.

If you want a single-payor, government-run system—fine, put this tax structure in place to pay for it.

Conclusion

Going through this exercise has led us to the conclusion in California that an employer-mandate, insurance underwriting reform, workers' comp reform, and cost containment package is the essential component.

I strongly urge the physicians to take the lead in this state in the health care reform debate.

With Princeton, you're in good company.

More than 19,000 medical and health care professionals have chosen Princeton Insurance Company for their professional liability insurance coverage. Here are some reasons why:

- **A solid track record.** Princeton has a decade of experience providing professional liability insurance coverage to physicians, and A.M. Best has ranked us (with our parent company) among the 20 largest medical malpractice insurers nationwide since 1983.

- **Financial strength.** Our loss reserves are carried at full value, not discounted in the hope of earning sufficient interest income to pay claims. We maintain a high quality/low risk investment portfolio, with no junk bonds, no common stock and no real estate speculation. And we've earned a claims-paying ability rating of "A" from Standard & Poor's.

- **Coverage options.** Tail coverage is included in the purchase price of Princeton's innovative *Occurrence Plus* policy. A standard claims-made policy is also available, and we offer excess liability coverage (limits up to $5 million) to Pennsylvania physicians regardless of which company writes their primary coverage.

- **Strong defense against claims.** In a typical year, more than 90 percent of the Princeton-managed cases disposed of by the courts are resolved in the policyholder's favor.

It may be easier than you think to change insurance companies. Call today to find out more or return the coupon to receive a copy of our brochure, "It's Princeton's Specialty."

Address of the President: Getting Involved

Donald G. Ferguson, MD

This is an excerpt from Dr. Ferguson's inaugural address presented on October 24 to the Society's House of Delegates at its annual meeting.

I have been asked what the theme of this year of service to you in the Pennsylvania Medical Society will be, what I want to accomplish, and what my priorities will be. Yesterday morning, I spoke to this House of Delegates about what I thought *ought to be* some new directions and renewed emphasis on existing priorities of this Society (see "Recommendations of Dr. Ferfuson," next page). But...I am here to represent you, the 21,000 physician members of the Pennsylvania Medical Society, and above all, the interests of the patients whom we all serve.

"The words, 'my doctor'—that's what keeps us going."

We are, above all, advocates for our patients, and we must continue to place our patients' welfare above our own, as we have throughout our long history as a profession.

Ours is an honored profession; and as long as we keep our patients' welfare above our own, it will continue to be so. But to continue to be effective advocates for our patients, we must be increasingly willing to step out of the office and out of the hospital, and into the public's view.

When we prescribe a medication or recommend a procedure, we are doing our best to improve our patient's health and well-being. At the same time, those in government are making decisions about what kind of medication we can prescribe and whether we can recommend certain procedures at all. Clearly, our care for our patients cannot and *must not* stop in the examining room. We *must* speak out and protect our patients *wherever* their welfare is threatened.

Dr. Ferguson is the Society's 143rd president.

I don't want to be a vendor or a provider or an employee. *I am a doctor. That's what I started out to be. That's what we all started out to be.* We are all here because at some moment in the past, we knew we wanted to be *doctors*. And we wanted it more than anything else. We worked and studied for it, and we, and our wives, and our husbands, and our family and friends sacrificed time, resources, pleasure, and leisure!

Don't give it up—that professionalism that distinguishes us from others!

You physicians who are here are the elite of medicine. Not necessarily because you are distinguished scientists or teachers of medicine, but because you are here, working for your profession, when you could be doing so many other things with your time. Still, there are many, many more of our colleagues who *aren't* here. They are back home, doing the job that we are all about—*taking care of patients*. They—and we—and many other dedicated health care professionals are in what I call the front lines of medicine: doing our job; keeping our communities together; working with neighbors, friends, and all of society to help each other.

I promise you the best that I can give during the coming year. It's little enough return for what you have given me—the pride that I have seen in hundreds of you, working hard and selflessly for our profession. *Our patients,* not ourselves, are—and must be—the reason we exist as physicians. *We* are special, as long as we keep *them* special—as long as we keep the word *"doctor"* one that *they* keep special. *"My doctor"*—that's what keeps us going. Walking into a home or an office or a hospital and *seeing* that patient light up—in hearing those words—"That's *my doctor.*"

That's what I want to communicate to you here, to all those of our profession whom Anne [Mrs. Ferguson] and I will visit in the coming year, and to those in our community and in our state *who need to know our purpose.* I want to communicate that pride in our profession, that sense of the nobility of our calling, and my deeply held belief and conviction that a doctor is more than a person, more than just another technician in an increasingly technological society. And certainly more than the vendor, provider, or employee that some would have us be.

We are doctors! Ours is a calling, not a

trade! It's a special way of life and a ministry that has been honored by a special place in society through many years, indeed through most of recorded history. It is *ours*—it has been handed to us with honor by generations of dedicated, selfless practitioners of an art that is *more* than just technical competence and scientific knowledge. It is the *understanding* of our patients that makes us special. It is placing *our patients* at the center of our concern, and their welfare at the center of our lives, that earns our place in society—and sometimes the annoyance of our wives, husbands, and families.

It isn't the money, the social prestige, or the country club or athletic club that brings us out at two o'clock in the morning, any more than it's the money or the prestige that brings the minister, the priest, or the rabbi out at the same hours, essentially on the same errand. We're there because that's what we *do*, and that's what we *are*...that's what being a doctor is all about.

We make a living—a secure living, a *good* living by most people's standards. We have a position in our communities which is secure, honored, and recognized beyond most people's attainment. Yet, most of us are not rich, even by the standards of our communities. Many of us are as worried as our neighbors about the erosion of our savings, the increasing costs of educating our children, and of maintaining a practice.

We have to work harder and longer to maintain good patient service while spending more and more of our productive hours producing paper, working on forms, and meeting regulatory and coding requirements, instead of spending that time doing what most of us really want to do—what we are all about, as a profession—*taking care of people.*

When I was a child, I had a very comforting fantasy. I had a rich uncle. I didn't quite know who he was, but I knew he existed. I would hear little snippets of conversation among cousins and other family members about our rich uncle...It's a fantasy that I could wish for all of us, because it helped make my life and my future secure. Someday the rich uncle—who liked me, I was sure of that—would pass on to his reward and shower me with gold, so I would be secure for the rest of my life. This was during the 1930s, when most of us were far from secure about the present—or the future. Sound familiar?

Anyway, one of the disillusionments of growing up was finding out who this rich uncle was. He was real, but he was my father. He was a doctor—a family practitioner, later turned radiologist—who made a living, the kind of living that many of us still make, but we weren't rich. We got along on very little by today's standards. When he got paid, which was always problematical, the payment was often in barter or farm produce. As a family, we made do with what we had and tried to save for the future. Yet, to our neighbors and my cousins, we were the rich people on the block.

The "Doc" had a security that few had. He had a steady job. We were eating—the barter took care of that. And we had our home and the assurance that we would stay there as long as we wished. *That* was riches, and it still is—a calling which gives us security and the respect of our neighbors.

There is one particular doctor in this room, with whom I am proud to be associated. He has a family practice, and has had it throughout his career. It used to be a comfortable practice in a "good" suburb of Pittsburgh. It's now in an inner-city area that reminds me of the place where I grew up in the 1930s.

During the worst of the riots that followed the assassination of Dr. Martin Luther King Jr., when many of our inner-city neighborhoods were in turmoil and some in flames, this doctor's neighbors came to him and said, "We *want* you here. You're good for our neighborhood, and we *need* you here."

So while other neighborhoods were burning, his was cool. And so was his office. It was guarded by his neighbors. It was protected by his community, because it was needed there. All of us are needed, from the university researcher and specialist, to the rural and inner-city physician. We're needed, and we'll be there—if they will let us.

We're asking, working, and when necessary, battling to be allowed to do our job. It's sad that we sometimes have to battle with regulators and public officials who have the same job that we do—to take care of the people.

We in the Pennsylvania Medical Society are trying to help. We're doing our job: we, here in this room, by being here; your colleagues back home by taking care of the patients while we're away.

But, to keep doing our job, we need you to help. *Get involved!* Get your colleagues involved. Get your families and your friends and your patients involved. Tell the legislators and the regulators how we're being hassled and drowned in overregulation. Tell them, and work with them, and let us get on with our work.

Recommendations of Dr. Ferguson

The following recommendations were made by Donald G. Ferguson, MD, in his Address of the President Elect, presented to the Society's House of Delegates just prior to his inauguration as the Society's 143rd president:

- I recommend that this House of Delegates work with the entire Society to strengthen our legislative program by increasing membership in our Legislative Action Teams, by increasing support of our state Political Action Committee, and—together with the American Medical Association and their political action committee—by building on Pennsylvania's current participation in our federal efforts.
- I recommend that the Society continue to support the work of the Joint Pennsylvania Medical Society-Pennsylvania Bar Association Task Force and consider appropriate ways to expand this cooperation into other areas of family violence and neglect.
- I recommend that the Pennsylvania Medical Society search out opportunities to form alliances, political and otherwise, to continue the Society's work of advocating for the health and well-being of the people of Pennsylvania.

Address of the Past President: Reaching Out

Robert N. Moyers, MD

This is an excerpt from Dr. Moyers' exaugural address presented on October 23 to the Society's House of Delegates at its annual meeting.

During this past year, I have traveled well over 50,000 miles throughout Pennsylvania and our neighboring states. I have been impressed by one overwhelming observation: we colleagues belong to a great, caring profession. And I'm proud to be a part of it.

Everywhere I went, I found a warm hospitality that, frankly, I didn't expect. I was prepared to be shot at with sharp-pointed arrows labeled unification, RBRVS, and so on. But instead, I found genuine concern as to where we all are headed over the next few years.

I've had the opportunity to meet with thousands of fellow citizens, including colleagues, senior citizens, and key leaders from business, labor, and government at all levels. Also, you may remember from my talk last year that one of my goals for this year was to meet with as many hospital medical staffs as possible. The purpose was:

- to reach non-member colleagues as well as our own Society members;
- to help them to realize that there are better ways to deal with the onerous demands of government and others, rather than just by griping among ourselves; and
- to tell them that if we value our professionalism, and if we value the basic freedom to care for our patients as we have been educated to do so, then we must work together.

We must build our professional strength, and we must use our God-given intelligence to master the political process. To do any less is unacceptable, nonproductive, and—I am convinced—not in the best interests of our patients or our profession. I think we have made a beginning in this special outreach, but more personal effort is needed to attract and involve more of our colleagues throughout the state. I'm happy that Don Ferguson, [the Society's newly inaugurated president], plans to continue with and improve these outreach efforts.

Dr. Moyers is immediate past president of the Society.

As far as our organization is concerned, I am pleased to tell you that in my opinion the health of the Pennsylvania Medical Society is very sound. Ninety-one percent of those surveyed in our latest membership survey expressed satisfaction with our activities and our services. We, however, will not rest with that percentage of approval, but will continue to devote energies in strengthening the Society to deal with the challenges ahead.

As I have said, your Society is sound. We are reaching out to the growing areas of our physician constituency, but they are not growing as quickly as they should be. So far, we have focused on women physicians and graduates of international medical schools. We still have to work to involve physicians from diverse racial and ethnic backgrounds as well.

We in leadership and on the Board do all that we can to be responsive to the needs of our grassroots physicians. And we certainly do our best to represent the interests of *all* of the physicians of Pennsylvania. However, I must say to you that this is not enough. Too many of our colleagues are not members of our Society, [and] too few of our members are devoting enough time and energy to meet the important objectives in legislation, public health, and our practice issues.

Our physician constituency is changing rapidly, and the Society must also change if we are to be relevant to our members and to attract new members. It should be self-evident that our political strength is directly related to increased membership. *Therefore, I recommend that the Society create a task force to identify in detail the makeup of the Society's changing constituency, the needs of that constituency, and meaningful ways to meet those needs.*

I recommend that this group include participation from young physicians, medical school faculty, women physicians, graduates of international medical schools, physicians in group practice as well as in private practice and managed care, and finally, members and non-members. I further recommend that the members be appointed jointly by the president, chairman of the Board, and speaker of the House of Delegates.

And finally, I recommend that this group be charged with reporting its findings and recommendations to the House in 1993. In the meantime, I would strongly urge that the task force begin immediately to initiate grassroots involvement in Society activities.

I want to emphasize that my concern here is to find new ways of reaching physicians and involving far greater numbers in active participation in this Society. Outreach is *very* high on my list of concerns...our organizational effectiveness depends on a strong, active membership.

In recognizing the changing needs of membership, we recognize the need to develop new products and services, [and] we also need to focus on generating more non-dues income to diversify and strengthen our base.

In order to achieve both of these objectives, *I recommend that the Society embark upon a feasibility study to determine whether we should create a for-profit subsidiary to provide physician services and some other projects that will create new sources of revenue.* Other societies around the country have been very successful in these ventures, and our Society should be given the opportunity to derive similar benefits.

My third recommendation has to do with our Society's relationship with Pennsylvania's medical schools. As a result of our meeting with representatives of the six medical schools in Philadelphia, there was agreement that we [the medical schools and the State Society] would both gain much from a cooperative relationship on legislative issues. *Therefore, I recommend the creation of a task force with representatives from the Society and Pennsylvania's medical schools to explore and recommend collaborative activities that would be mutually beneficial.*

My fourth and final recommendation has to do with what I believe will be a major factor affecting our ability to care for patients in the future: managed care.

We recognize that the Society has already initiated efforts in this area, [but] *I recommend that the Society take a strong and active role in studying the implications of managed care.* I further recommend that we develop clear and definite recommendations for our members about how to deal with managed care programs.

I also believe that we must carefully evaluate the option of a statewide IPA [independent practice association] or other managed care activity. The Pennsylvania Medical Society must create for physicians a base of support and bargaining strength, and we do not have it now as individuals.

Now let me review for you some of our accomplishments over the past year. We have strengthened our legislative efforts across the board. In addition, we have developed better communications with the various players in the public arena—the AARP [American Association for Retired Persons], the Chamber of Business and Industry, various legislators, and even the state administration.

We have moved from an adversarial approach to one of developing working relationships to solve problems. This collaborative approach requires a pragmatic attitude. We can't always expect to be winners. When we sincerely work to solve problems, sometimes we have to give—as well as expect the other side to give at times. However, we do recognize that acceptable compromises are not always possible. And when it is not in our best interest, then we must draw the line, roll up our sleeves, and get tough.

I believe your Society has never been stronger or better prepared to meet the future than it is now. Physicians have never had a better opportunity to make a difference in the way things work. This is a time of change, and change can equal opportunity. But if we are to succeed, we must further strengthen our organization with greater numbers and more active involvement.

In this political environment, our perspective is critical in bringing the needs and concerns of our patients to the forefront. Many in health care reform say that they are speaking for patients, but only physicians know first hand what is involved in caring for patients' needs; only physicians know the full impact of governmental policies on our ability to provide quality care. We must be advocates for our patients.

I ask you to reach out to your colleagues who are not members, and also those who have not been active members, and encourage them to join us at this crucial time, this turning point in the health care system. I cannot state it strongly enough: unity is strength.

If we are to accomplish our goals, we must build our professionalism. And we must use our inherent abilities to master the ever-changing political climate. I am confident that Dr. Ferguson [as president], working with you as leaders, will provide the leadership and the successes that I know are possible.

It is time we change frustration into confidence and optimism. Our patients are counting on us.

"I cannot state it strongly enough: unity is strength."

Society to Recognize Physicians Involved in Their Communities

Richard T. Bell, MD

The Society's 1992 House of Delegates established the Physician Volunteer of the Year Award to recognize volunteer efforts of Society members. This editorial offers statistics on volunteer efforts nationwide, focuses on the importance and benefits of such efforts, and provides suggestions for physicians in getting started.

"The medical profession needs to project a more favorable public image."

Volunteering has been an American tradition since the colonial era when there was a need to help others for the common good and self survival. It fosters social bonding, which is seen in such diverse activities as Amish barn-raisings, volunteer fire companies, or the patriotic act of protecting the community during war.

Unfortunately, the spirit of activism and involvement of the 1960s gave way to a period of increased individualism. Ayn Rand's *Atlas Shrugged* spawned the conservative objective movement, which is blamed for inspiring the "greed is good" ethic adopted by the "me" generation. This relatively self-centered lifestyle produced a diminished community commitment because of a pervasive "What's in it for me?" credo. A concurrent philosophy of some politicians and economic advisors advocated that money came first and humanity, a distant second.

Since the Great Depression, there is a tendency to expect government to provide large-scale social services which now are taken for granted. However, when people complain about cutbacks or increased costs of these governmental services, they fail to consider what the economic situation would be if volunteers did not give their time to nonprofit organizations. Volunteerism decreases operating costs while maintaining or increasing delivery of human services. The value of volunteer services performed in 1990 alone is estimated to be worth billions of dollars.

Unfortunately, government-funded social programs are not enough, since one cannot hire educated Good Samaritans. Although money is important, nonprofit organizations cannot survive solely on financial support. They need people to implement their programs.

In the past, many Americans believed they had performed their civic duty solely through a financial contribution. But now they are increasingly committing their time as well. Volunteerism has increased to where the nonprofits have become America's largest "employer."

In 1987, 45 percent of the adult population volunteered. By 1990, 90 million Americans, or 54 percent of adults, worked an average of three hours a week for nonprofits. Experts project that within the next 10 years, 120 million or two-thirds of American adults will volunteer an average of five hours per week. This represents a doubling of the manpower availability for nonprofits over the next decade.

Recent data revealed that 56 percent of Americans over 30 years old volunteer, while only 37 percent under the age of 30 do so. It appears that after the age of 30, as many settle into a career and family, people are available to give their time and energies to nonprofits.

Because physicians have been criticized for not getting involved in their community, medical societies are perceived as self-serving organizations that represent people who take more from their community than they give. Although this is another unfounded stereotype, it can be dispelled by Pennsylvania Medical Society members. The medical profession needs to project a more favorable public profile. With the challenge of increasing governmental involvement in medicine, physicians must solicit and win community support in order to maintain quality health care (see "Focus on Physician Volunteers," next page).

State Society physicians who volunteer their time in community activities not only lend credibility to the Society, but also enhance the profession's image by

Dr. Bell, a practicing physician in the Reading area, is the pulmonary representative to the Society's Specialty Section.

gaining the respect of business and community leaders. Human service agencies may be reluctant to approach physicians because we are perceived as being too busy. In fact, physicians are probably no busier than other business executives who find time to volunteer. To facilitate community participation, county medical societies can establish volunteer placement programs for nonprofit organizations to recruit interested physicians.

Some physicians believe they already perform volunteer work by caring for welfare and indigent patients. However, other businesses incur bad debts for their goods and services, but still donate their resources to nonprofit agencies. Nothing is perfect in the real world, but human needs still remain perfectly real.

Physicians learn to be leaders through professional education. Although special training is usually not required to perform volunteer work, any that is necessary will be provided. Service organizations are delighted to work with intelligent, creative people who infuse fresh ideas. Volunteer even if it is just on a limited basis. You don't need to give a great deal of time unless you wish; any effort is appreciated.

Community service is said to be a form of enlightened self-interest. Psychologists believe that the need to be of service to others is as great as the basic needs for food and shelter. In fact, many physicians entered medicine to fulfill a desire to help others. One may find that helping others without the pressure of politics, competition, or people expecting miracles can be fun and relaxing. As a volunteer, you might even learn new skills and meet interesting people. The demands need not be great, most volunteer organizations are flexible.

Some volunteers no longer consider their work as charity but as a career parallel to their paid jobs. As they expect in their regular jobs, they wish to be trained, to be held accountable for performance, and to have opportunities for advancement to unpaid managerial positions in the nonprofits. Thus, volunteer work becomes a measure of achievement and effectiveness while providing self-fulfillment and meaningful citizenship.

Realizing the importance of volunteerism, the Society's 1992 House of Delegates established the Physician Volunteer of the Year Award. An excellent way of generating nominations is to establish similar physician volunteer awards at the county level.

Society recognition of members who have performed exemplary volunteer community service should not be viewed as unprofessional public boasting. It is honoring people who have made important contributions to their community and who just happen to be physicians. Since the motivation for most volunteers is not for glory, it is quite fitting to thank them for their faceless, quiet efforts. Such recognition is more appreciated and significant coming from one's peers.

Small improvements build the base on which larger goals are met. As physicians, we know that one can overcome many obstacles and still achieve a meaningful goal.

Make a commitment to an organization in which you believe. There are ample opportunities to provide non-monetary help for political campaigns, religious groups, the Chamber of Commerce, or other worthwhile organizations. You can show appreciation for the undergraduate or medical college which gave you access to your profession by getting involved in alumni activities.

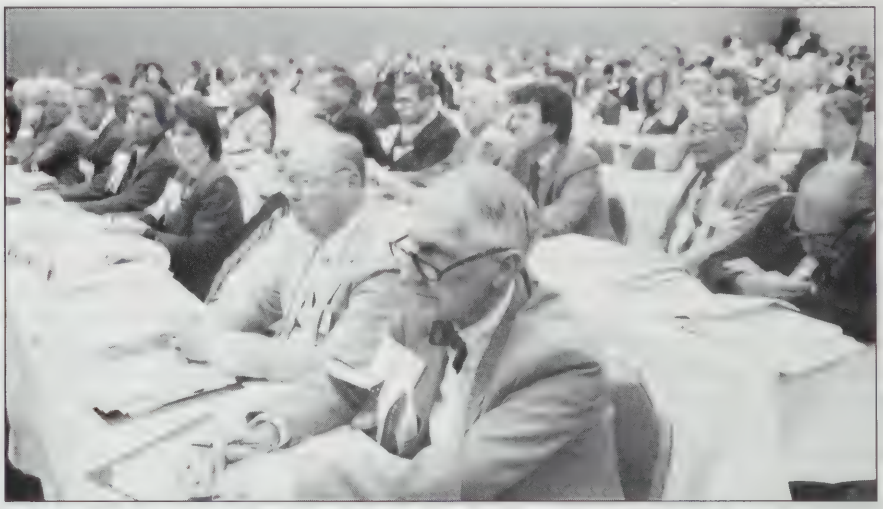
By volunteering before you are asked, you make the system work. But don't just become a passive member of a nonprofit organization—participate. Your input, whether in the planning or implementation process, will enhance the group as you achieve the self-satisfaction that comes from contributing to a worthwhile organization. As a volunteer, you may ultimately make your community a better place in which to live, and that's good for you, your family, and everyone!

Focus on Physician Volunteers

Beginning with the January 1993 issue, PENNSYLVANIA MEDICINE will feature a series of interviews with physicians involved in community public health initiatives. If you or a colleague play a role in such activities and would agree to an interview, contact The Educational and Scientific Trust, or this publication.

"Realizing the importance of volunteerism, the Society's 1992 House of Delegates established the Physician Volunteer of the Year Award."

Delegates Consider Socio-Economic Issues

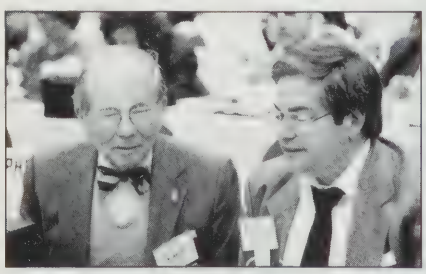


Maria T. Montesano
Assistant Managing Editor

At their annual October meeting, the Pennsylvania Medical Society's 254 delegates lent their support to the organization's primary public health and legislative directions. At issue were such complex socio-economic topics as defining health care prioritization, developing a viable health care reform stance, and evaluating HIV/AIDS confidentiality policies.

Delegates also wrestled with public health dilemmas, such as the resurgence of tuberculosis, concerns about hazardous waste incineration, and family violence. And they asserted the Society's goals in internal restructuring and in defending organized medicine: a thirteenth trustee district was added and efforts to aid the financial crisis in the state's medical schools were offered.

Prior to voting, delegates attend a series of hearings of the Society's seven reference committees, where advocates and opponents of each report and resolution air their views. This year the delegates adopted 63 reports and resolutions; the remainder were either referred for further study, not adopted, or filed.



Full proceedings of the annual meeting will be published in the January 1993 issue of PENNSYLVANIA MEDICINE.

Delegates at the Society's 1992 annual business meeting considered 138 resolutions and reports on such issues as health care prioritization, health care reform, HIV/AIDS confidentiality, tort reform, and workers' compensation reform. A total of 63 resolutions and reports were adopted. (For a complete overview of actions, see page 28.)

Redistricting decided

For several years, the delegates have debated options for rearranging the Society's trustee districts to more fairly distribute urban and rural representation. This year they considered three proposals and voted to add a thirteenth district, Allegheny County.

David M. Sklaroff, MD (left), and Robert B. Sklaroff, MD, father and son, were among the 44 delegates representing Philadelphia at this year's annual meeting.

Proponents of the adopted plan explained that in past years, Allegheny County, as part of the Society's Tenth District, overshadowed Beaver, Lawrence, and Westmoreland counties, also in that district. The delegates agreed that the number of members residing in Allegheny County supported the formation of the new district. Carol E. Rose, MD, of Pittsburgh, was elected to serve as the first thirteenth district trustee.

The other proposals recommended: 1) redistricting the state into six trustee districts of approximately 3,000 members each; and 2) distributing membership into 10 trustee districts, more equitably divided. Though the first proposal received little support at the reference committee, the committee did feel the second proposal showed some merit. The Society will continue to explore the issue.

Medical school financial woes

The delegates adopted several resolutions that seek to address the problems of cuts in state funding to medical schools, tax deductibility of educational loan interest, and loan repayment.

The Society will urge the governor and legislature to restore full funding for Pennsylvania's medical schools. All funding for non-state-related medical schools was cut from the 1992-93 state budget, and funding for state-related universities was cut by 7 percent in the past two years.

Members who spoke at the reference committee outlined the problems facing state medical schools in light of the governor's cuts and suggested that organized medicine and academia must speak with one voice on this issue since these cuts ultimately affect health care in Pennsylvania. Representatives of Pennsylvania's medical schools, who met with leaders of the Society in conjunction with the annual meeting, agreed that such an effort would be worthwhile.

To further aid medical students, the Society will urge the American Medical Association to encourage legislation to restore the tax deductibility of educational loan interest for primary care providers. Resolution 92-2 noted such action should be considered because of the rising costs of medical education,

the substantial debts of young physicians, the declining number of physicians entering the primary care field, and the proliferation of managed care programs which rely heavily on primary care practitioners.

Passage of such legislation may be difficult, some physicians said, but others told the reference committee they strongly support such efforts. At the House, a move to refer the action to the Board for further study was defeated, and in the end the resolution was adopted.

Also, the House adopted Resolution 92-42, which calls for the Society to support legislation to ensure that residents-in-training and others in post-graduate medical education will continue to have the option of deferment and forbearance of repayment of student loans throughout their training and for an additional three years in the event of hardship. The reference committee heard overwhelming testimony in support of the resolution.

Prioritization of health care

Prioritization of health care has been an on-going concern for the Society since the 1990 annual meeting. This year, the delegates adopted a board-recommended policy statement which reflects the belief that physicians should be involved in the prioritization of health care.

The statement also draws a clear distinction between "prioritization" and "rationing" of care. Prioritization of health care is defined as "a process that rank orders medical services, categories, and/or treatment options on the basis of value." Rationing is defined as "a process that restricts the application of resources to those medical services, categories of services, and/or treatment options ranked higher on a priority list and denies access to others by, in effect, drawing a line."

Supporters of the board recommendation argued that there are not enough resources to pay for all the medical care that society demands and that physicians must become involved in the prioritization process rather than letting government set priorities. Opponents, however, claimed that prioritization *is* rationing, which would be inherently unfair to the poor and minorities and would project a negative image of the State Society.

After hearing testimony, the reference committee recommended adoption, stating that it "believes that the policy statement is relatively general in nature and could serve as a useful guide for the Society as the health care reform debate evolves."

"The issue of health care is second only to an economic recovery, and the issue of health care bears very heavily on an economic recovery because of the factors of cost and competitiveness," according to Senator Arlen Specter (above). Senator Specter was one of two Philadelphians to speak at this year's annual meeting. The other was Philadelphia Mayor Edward G. Rendell, who offered welcoming remarks.

Annual Meeting Wrap-Up

Held: October 23-25, 1992, at the Adam's Mark Hotel, Philadelphia

Number of delegates in attendance: 254

Number of resolutions and reports submitted: 138

County medical societies reporting 100 percent attendance: Allegheny, Beaver, Berks, Cambria, Centre, Chester, Clearfield, Clinton, Columbia, Delaware, Elk/Cameron, Franklin, Lancaster, Lehigh, Mercer, Montgomery, Northumberland, Philadelphia, Tioga, Union, Venango, Westmoreland, York

Key issues discussed: Certificate of need, concurrent care, drug-resistant tuberculosis, HIV/AIDS, living wills, medical school issues, physician referral, prioritization of health care, redistricting, tort reform, workers' compensation reform

Guest speakers:

Raymond Scalettar, MD, Chairman, AMA Board of Trustees (see "Discharge Summary," page 48)
Senator Arlen Specter (R-PA)
The Honorable Edward G. Rendell, Mayor of Philadelphia
Mrs. S. Bruce Gerber, President, AMA Auxiliary
Mrs. Victor F. Greco, President, Pennsylvania Medical Society Auxiliary

The tuberculosis threat

The incidence of drug-resistant tuberculosis in Pennsylvania has become a growing concern to health care providers within the last year, even considered by some to be a "crisis." The delegates advocated that the Society become involved by: 1) studying appropriate recognition of drug-resistant tuberculosis as a threat to public health; 2) studying appropriate actions to protect health care workers and uninfected persons from the disease; and 3) seeking increased federal funding to develop drugs to treat the disease.

HIV/AIDS issues

Delegates reaffirmed Society policies on HIV/AIDS issues by adopting with no debate three HIV-related proposals. First, the Society will approve the principles of early, unencumbered testing for HIV so patients can benefit from early, non-toxic, and cheaper anti-viral therapy. Such action will allow the Department of Health to function in the best interests of all citizens. The Society will then seek legislation to make these principles law.

Second, the Society will assess the guidelines of each Pennsylvania medical school for management of HIV-infected students with regard to medical degree requirements and to

encourage each school to adopt policy that permits an HIV-infected medical student to complete courses and clerkship requirements to receive a medical degree.

Finally, the Society will support HIV-positive physicians by: 1) helping to protect them from discrimination; 2) reinforcing the need for confidentiality in testing; 3) promoting active involvement in the legislative arena; 4) developing disability guidelines that assist the HIV-positive physician in procuring appropriate fiscal support; and 5) aiding HIV-positive physicians in placement in alternate career tracks if necessary. The resolution also directs the Society to urge the AMA to take similar action.

Other key actions

Other key resolutions adopted direct the Society to:

- Support the physician's use of any facility providing procedural, laboratory, diagnostic, and other testing services which the physician determines to be in the best interest of the patient's health and well-being; and if the physician has a financial interest in the facility, that should be disclosed and alternate facilities offered.
- Seek a clear definition of concurrent care and uniform guidelines for the use and reimbursement of such care under Medicare.
- Continue its efforts in regard to workers' compensation, tort reform, and the certificate of need (CON) process. The Society maintains opposition to a permanent tie-in to the Medicare payment system for the workers' compensation bills pending in the state legislature; it advocates meaningful tort reform in Pennsylvania; and it supports abandonment of the CON process with no phase-out period.
- Create a living will kit containing relevant information concerning withholding or withdrawal of life-sustaining medical care. The kit will be publicized and offered free-of-charge to members and at a price to non-members.

SOCIETY SECTIONS HOLD ANNUAL ASSEMBLIES

Each year during the annual meeting, the Society's sections meet separately to review and discuss resolutions for consideration by the delegates, to elect new officers, and to conduct other business. Educational segments are often part of the program as well.

This year meetings were held by the Hospital Medical Staff Section (HMSS), the Young Physician Section (YPS), the Resident Physician Section (RPS), the Medical Student Section, and the Medical School Section.

Mrs. Edward (Sue) Pan was installed as president of the Pennsylvania Medical Society Auxiliary for 1992-93 during its annual convention, October 23-25, at the Adam's Mark Hotel, Philadelphia. The convention program included the Auxiliary's annual House of Delegates meeting, committee meetings, district caucuses, and a business session, as well as several fund-raising and social events.

Election Results

The State Society House of Delegates elected the following new officers and delegates during its October 1992 meeting:

President: Donald G. Ferguson, MD, Allegheny County

President Elect: Martin A. Murcek, MD, Westmoreland County

Vice President: John H. Hobart, MD, Northampton County

Speaker of the House: Jonathan E. Rhoads Jr., MD, York County

Vice Speaker of the House: Howard A. Richter, MD, Delaware County

New Trustees:
John J. McAndrew, MD, Third District
Carol E. Rose, MD, Thirteenth District
Rebecca Kunkel, Medical Student Section

Delegates to AMA:
R. William Alexander, MD, Berks County
Richard B. Baltz, MD, Dauphin County
Doris G. Bartuska, MD, Philadelphia County
Joseph B. Blood Jr., MD, Bradford County
Betty L. Cottle, MD, Blair County
James B. Donaldson, MD, Philadelphia County
Victor F. Greco, MD, Luzerne County
Lee H. McCormick, MD, Allegheny County
John S. Parker, MD, Westmoreland County
Howard A. Richter, MD, Delaware County
Roberta L. Schneider, MD, Montgomery County
Donald H. Smith, MD, Northampton County

Alternate Delegates to the AMA:
Elias Abrutyn, MD, Philadelphia County
Isadore Brodsy, MD, Philadelphia County
George F. Buerger Jr., MD, Allegheny County
Charles J. Cattano, MD, Allegheny County
Robert G. Doe, MD, Lancaster County
Thomas F. Freenock Jr., MD, Delaware County
Mark S. Friedlander, MD, York County
Jay L. Funkhouser, MD, Beaver County
Julian Katz, MD, Philadelphia County
Robert M. Kemp, MD, Lancaster County
John D. Lane, MD, Bucks County
John A. Malcolm Jr., MD, Union County
Carl A. Sirio, MD, Dauphin County
Ferdinand L. Soisson Jr., MD, Cambria County

AMA Delegate, Resident: Michael P. Moulton, MD

AMA Delegate, Student: James M. Brian

Committee to Nominate Delegates and Alternates to the AMA:
Wilma C. Light, MD, Westmoreland County

Judicial Council:
Betty L. Cottle, MD, Blair County
Henry H. Fetterman, MD, Lehigh County

Dr. John McAndrew

Dr. Carol Rose (left) and Rebecca Kunkel

Hospital Medical Staff Section

A total of 58 members attended this year's HMSS assembly October 22. During an open forum, the medical staff debated a number of important issues, including county society mini-internship programs, global fees, Medicare reimbursement, patient questionnaires, and physician apathy within the medical staff. They considered two resolutions, one dealing with RBRVS and another focusing on peer review.

Resolution 92-64—calling for the AMA to write a report outlining the specific RBRVS payment schedule for each year, for each physician category, and for each section of the country until RBRVS is fully implemented—was adopted by the HMSS and referred by the House to the Board for further study. Resolution 92-53—regarding Keystone Peer Review Organization (KePRO) quality issues and already in the House—was supported by the HMSS and adopted by the House.

The meeting concluded with a four-hour medical staff seminar, "Taking Surprises Out of Hospital Planning for Medical Staffs," cosponsored by the HMSS and the Institute for Physician Leadership of the Society's Trust.

Newly elected officers and members of the HMSS Governing Council are: James G. Pitcavage, MD, chairman; John W. Lehman, MD, vice chairman; Wilma C. Light, MD, secretary; and William W. Lander, MD, member-at-large.

Young Physician Section

Forty young physicians attended the Sixth Assembly of the Society's YPS, also held October 22. The section discussed two resolutions which they submitted to the House.

Though the House referred for further study Resolution 92-61, calling for the Society to develop guidelines for limitations on terminal patient care, it did adopt Resolution 92-63 addressing workers' compensation reform. The adopted resolution calls for the Society to oppose a permanent tie-in to the Medicare payment system for pending legislation.

YPS participants attended two educational seminars: "How You Can Make A Difference in the Legislative Arena,"—presented by Representative Ellen Harley (R-Montgomery); Karl Meyers, MD, Montgomery County physician involved in Representative Harley's campaign; and Larry Light, Society director of governmental relations—and "Effective Communications," presented by the Leadership Institute of the Society's Trust.

Newly elected officers and members of the YPS Governing Council are: John R. Martell Jr., MD, chairman; Robert M. McNamara, MD, vice chairman; Mary M. Haus, MD, secretary; and Aaron D. Bleznak, MD, member-at-large.

Resident Physician Section

The resident physicians were particularly concerned about funding for the state's medical schools. Resolution 92-62, urging the state to restore full funding, was adopted by the House.

Twenty-seven resident physicians and guests attended "Stress, Relaxation, and the Dynamics of Change During Residency Training," in which Timothy P. Brigham, PhD, of Thomas Jefferson Medical College, discussed the pressures, tensions, and strains inherent in residency training and practice.

Newly elected officers and members of the RPS Governing Council are: Jennifer Trottman, MD, chairman; Joyann Kroser, MD, vice chairman; Elizabeth Burns, DO, secretary; and Ajay K. Goyal, MD, Caren Kieswetter, MD, and Jerome S. Schroeder, MD, members-at-large.

Medical Student Section

Approximately 35 students attended the Medical Student Section assembly on October 22. Topping the agenda was discussion of Resolution 92-65 on medical student membership dues payments. Adopted by the House, the resolution directs the Society to offer one-time, multiple-year dues for medical student members.

Judy Linger, MD, of the AMA-RPS Governing Council, led the one-and-a-half-hour educational session, "Health Care Reform: A National and State Perspective."

Newly elected officers and members of the Medical Student Section Governing Council are: Amber L. Chatwin, chairman; Randolph B. Wood, vice chairman; Peter B. Kang, secretary; Rebecca L. Kunkel, trustee representative; and Kenneth W. Anderson and Kara M. Nakisbendi, members-at-large.

Medical School Section

Seven members attended the annual meeting of the Society's Medical School Section, held October 22. Discussion centered on membership and several education and science resolutions before the House.

Also, as a result of a meeting held between representatives of the state's medical schools and Society leaders, the section drafted, approved, and submitted for House consideration resolution 92-62 concerning medical school funding.

In other business, the section re-elected Klaus M. Bron, MD, as chairman. Doris G. Bartuska, MD, was newly elected as vice chairman.

John H. Hobart, MD, Easton, was elected vice president of the State Society, succeeding Martin A. Murcek, MD, who has become president elect. Dr. Hobart will become president in 1994.

House of Delegates Action on 1992 Resolutions

This is an overview of actions from the October 23-25 annual meeting in Philadelphia. Brief summaries of Resolutions 1-57 appeared in the October issue of *Executive Report*; summaries for Resolutions 58-66 have been incorporated into this update.

92-1: Prison health care. Adopted as amended.

92-2: Cost of medical school and educational loan interest. Substitute resolution adopted.

92-3: Arbitrary and unfair differential payment of physicians. Adopted as amended.

92-4: AIDS/HIV testing and reporting. Adopted.

92-5: Incineration of hazardous waste. Referred to the Board for further study.

92-6: Guidelines for certification of home health care. Referred for study.

92-7: Physician fee and service review. Referred to the Board for further study.

92-8: Opposition to the American Hospital Association policy for health care reform. Adopted as amended.

92-9: Identification of organizations and coalitions of which the Society is a member. Adopted.

92-10: Establishment of a registry for physicians. Not adopted.

92-11: Adequate reimbursement for medical services in accident cases involving Medical Assistance and settlement or trial awards. Adopted.

92-12: Family violence. Adopted.

92-13: Tort reform. Adopted.

92-14: Information on generic drugs. Referred to the Board for further study.

92-15: PACE requirements for prescribing. Referred to the Board for further study.

92-16: Appeals process for public health decisions. Referred to the Board for further study.

92-17: Society Auxiliary unification. Not adopted.

92-18: Society funding of Auxiliary. Not adopted.

92-19: Physician fee posting. Withdrawn.

92-20: Abortion. Not adopted.

92-21: Restructuring or redistricting of the Society. Combined (92-21 and 92-52), substitute resolution adopted.

92-22: Costs for pharmaceuticals. Adopted as amended.

92-23: Requirement for annual medical evaluations—clients of county MH/MR offices and service agencies. Referred to the Board for further study.

92-24: Study of Young Physician Section. Adopted.

92-25: Newly licensed physician status for dues payment. Adopted.

92-26: Standardized membership transfer process. Referred to the Board for further study.

92-27: Quarterly report on House actions. Adopted as amended.

92-28: Change in KePRO criteria for rejection of payment. Adopted as amended.

92-29: Managed care plans—patient's acceptance requirement. Adopted.

92-30: Continuity of care. Adopted.

92-31: Pilot program to increase membership by reducing AMA, State Society, and county medical society dues. Adopted.

92-32: Dues freeze and prioritization of Society activities. Adopted.

92-33: Installment payment of dues. Referred to the Board for further study.

92-34: Pesticide-herbicide toxicity instruction. Adopted as amended.

92-35: Misuse of hypnosis and other techniques of "memory enhancement." Adopted.

92-36: CLIA '88 Act. Adopted.

92-37: Physician referrals. Adopted.

92-38: OSHA regulations. Substitute resolution adopted.

92-39: Drug-resistant tuberculosis. Adopted as amended.

92-40: Provider-specific taxes. Adopted.

92-41: Laboratory panels. Adopted.

92-42: Student loan repayment. Adopted as amended.

92-43: Reimbursement for concurrent care. Combined (92-43 and 92-44), amended, substitute resolution adopted.

92-44: Concurrent care. Combined (92-43 and 92-44), amended, substitute resolution adopted.

92-45: Tax-exemption of health care expenses. Adopted.

92-46: Confirmed HIV positivity. Adopted.

92-47: Amphetamine usage. Adopted.

92-48: Electronic billing. Adopted.

92-49: Tobacco and smoking. Referred to the Board for further study.

92-50: Telephone services. Adopted.

92-51: Medicare statewide charge class. Not adopted.

92-52: Redistricting. Combined (92-21 and 92-52), substitute resolution adopted.

92-53: KePRO response information. Adopted as amended.

92-54: National Credential Verifying Service. Combined (92-54 and 92-56), amended, substitute resolution adopted.

92-55: Temporary license. Referred to the Board for further study.

92-56: Acceptance of NCVS for completion of licensure. Combined (92-54 and 92-56), amended, substitute resolution adopted.

92-57: Physician living will information kit. Adopted.

92-58: Child safety restraints in commercial aircrafts. Calls for the Society to support in principle laws governing mandatory infant and child safety restraints in commercial aircrafts. Not accepted as business of the House.

92-59: Referendum institution. Calls for the Society to permit referendums for the membership on legislative matters that have or may have deleterious consequences for physicians. Not accepted as business of the House.

92-60: Pennsylvania Medigap insurance. Calls for the Pennsylvania Insurance Department to permit the sale of 10 Medigap policies allowed by federal statute in the Commonwealth. Adopted.

92-61: Limitations of terminal patient care. Calls for the Society to develop guidelines for limitations on invasive or heroic treatment options for the terminally ill. Referred to the Board for action.

92-62: State funding for all Commonwealth medical schools. Calls for Society to urge the governor and the state legislature to restore full funding for all Pennsylvania medical schools. Adopted.

92-63: Workers' compensation reform. Calls for the Society to oppose a permanent tie-in to the Medicare payment system for the workers' compensation bills pending in the Pennsylvania legislature. Adopted as amended.

92-64: Projected physician reimbursement schedule for RBRVS. Directs the Society to ask the AMA to outline the RBRVS payment schedules for future years by physician category. Referred to the Board for further study.

92-65: Medical student membership fee. Calls for the Society to offer one-time, multiple-year dues for medical student members. Adopted.

92-66: Management of HIV-infected medical students. Calls for the Society to study Pennsylvania medical school guidelines on managing HIV-infected students with regard to the completion of medical degree requirements, and encourages each school to adopt a policy that permits an HIV-infected medical student to complete courses and clerkship requirements and receive a medical degree. Adopted.

Patients Are A Virtue

YOCON®
YOHIMBINE HCl

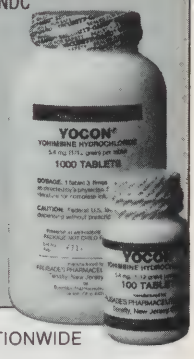
Description: Yohimbine is a 3a-15a-20B-17a-hydroxy Yohimbine-16a-carboxylic acid methyl ester. The alkaloid is found in Rubaceae and related trees. Also in Rauwolfia Serpentina (L) Benth. Yohimbine is an indolalkylamine alkaloid with chemical similarity to reserpine. It is a crystalline powder, odorless. Each compressed tablet contains (1/12 gr.) 5.4 mg of Yohimbine Hydrochloride.

Action: Yohimbine blocks presynaptic alpha-2 adrenergic receptors. Its action on peripheral blood vessels resembles that of reserpine, though it is weaker and of short duration. Yohimbine's peripheral autonomic nervous system effect is to increase parasympathetic (cholinergic) and decrease sympathetic (adrenergic) activity. It is to be noted that in male sexual performance, erection is linked to cholinergic activity and to alpha-2 adrenergic blockade which may theoretically result in increased penile inflow, decreased penile outflow or both.

Yohimbine exerts a stimulating action on the mood and may increase anxiety. Such actions have not been adequately studied or related to dosage although they appear to require high doses of the drug. Yohimbine has a mild anti-diuretic action, probably via stimulation of hypothalmic centers and release of posterior pituitary hormone.

Reportedly, Yohimbine exerts no significant influence on cardiac stimulation and other effects mediated by B-adrenergic receptors, its effect on blood pressure, if any, would be to lower it; however no adequate studies are at hand to quantitate this effect in terms of Yohimbine dosage.

Indications: Yocon® is indicated as a sympathicolytic and mydriatic. It may have activity as an aphrodisiac.



Contraindications: Renal diseases, and patient's sensitive to the drug. In view of the limited and inadequate information at hand, no precise tabulation can be offered of additional contraindications.

Warning: Generally, this drug is not proposed for use in females and certainly must not be used during pregnancy. Neither is this drug proposed for use in pediatric, geriatric or cardio-renal patients with gastric or duodenal ulcer history. Nor should it be used in conjunction with mood-modifying drugs such as antidepressants, or in psychiatric patients in general.

Adverse Reactions: Yohimbine readily penetrates the (CNS) and produces a complex pattern of responses in lower doses than required to produce peripheral a-adrenergic blockade. These include, anti-diuresis, a general picture of central excitation including elevation of blood pressure and heart rate, increased motor activity, irritability and tremor. Sweating, nausea and vomiting are common after parenteral administration of the drug.[1,2] Also dizziness, headache, skin flushing reported when used orally.[1,3]

Dosage and Administration: Experimental dosage reported in treatment of erectile impotence.[1,3,4] 1 tablet (5.4 mg) 3 times a day, to adult males taken orally. Occasional side effects reported with this dosage are nausea, dizziness or nervousness. In the event of side effects dosage to be reduced to ½ tablet 3 times a day, followed by gradual increases to 1 tablet 3 times a day. Reported therapy not more than 10 weeks.[3]

How Supplied: Oral tablets of Yocon® 1/12 gr. 5.4 mg in bottles of 100's NDC 53159-001-01 and 1000's NDC 53159-001-10.

ACTIONS OF THE BOARD OF TRUSTEES, OCTOBER 22 AND 25, 1992

SOCIETY EXPANDING LIABILITY REFORM EFFORTS

Medical liability reform has been a priority for the Pennsylvania Medical Society for the past few years. Now that health care reform has also become a "hot" topic, the Society will expand its efforts to promote the inclusion of medical liability reform as a major component of health care reform legislation.

With liability reform favored by President Bush and President Elect Clinton during the presidential campaign, and with Society polling showing public support for capping awards, there is evidence that the public is more receptive now than in recent years to changing the existing system. At the same time, the Trial Bar continues to fight tenaciously against reform, and battles over liability caps are shaping up in California, Indiana, and Washington, DC.

Aware that the public will be bombarded by contrary views on the issue, the Society is preparing to respond through ongoing media contacts and increasing public relations activities, and by building community coalitions to emphasize the need for medical liability reform, a major emphasis within the Society's health care reform proposal, currently under draft.

At its October 22 meeting, the Board of Trustees approved the development of a plan of action for the effort by the Society's Division of Communications and Public Affairs. Activities could include news releases, interviews, editorial board visits, media "events," public forums, public educational displays, and lobbying efforts.

SOCIETY TO STUDY CME JOINT SPONSORSHIP

The Society, with approval of the Board, will study the possibility of offering its services as a joint sponsor for hospital and other continuing medical education (CME) programs which lack the resources to become fully accredited sponsors.

In a joint sponsorship, the Society—as an organization accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide category 1 CME credit—would be required to participate in the planning of the program to assure that the program meets the essentials for CME as defined by ACCME.

Until recently, a number of medical schools and large institutions offered non-accredited sponsors the ability to jointly sponsor programs with them in order to secure category 1 credit. Many of those larger institutions have decided to drop their joint sponsorship arrangements for several reasons. Now, some hospitals that do not wish to become accredited sponsors themselves are looking for a joint sponsor, and a number of them have contacted the Society.

The study will seek to answer questions raised by the Society's Council on Education and Science addressing hospital interest in the program, the costs and benefits of such a program, what resources would be required, etc. Results of the study and further recommendations of the council will be presented to the Board upon completion.

BOARD AFFIRMS HEALTH CARE REFORM POSITION

The Board adopted for further development the positions and concepts reflected in a draft health care reform position paper developed by the Society's Committee on Long Range Assessment.

The draft incorporates a number of recommendations concerning such issues as tort reform, relief from administrative hassles, and the need for patient cost consciousness. As part of the finalization process, the Society will distribute the draft to consumer groups, specialty societies, and other interested organizations.

A summary of the Society's reform proposals will be published in a series of articles in PENNSYLVANIA MEDICINE, beginning with the January 1993 issue.

For additional information or copies of the entire position paper, members may contact the Society's Division of Communications and Public Affairs at 1-800-228-7823. Also, for a related story, see "Of Politics, Health Care, and Change," page 8.

BOARD APPROVES 1993 PRIORITIES

The Board of Trustees approved the following Society priorities for 1993:

- Health care reform
- Liability tort reform
- Managed care
- Membership
- Public health
- Third-party reimbursement

Priorities are determined each year as guidance for the Pennsylvania Medical Society's overall activities, but by no means limit the scope of issues addressed by the Society.

Dr. Lawrence

Dr. Greco

Dr. Soisson

BOARD LEADERS ELECTED

At a reorganizational meeting following the last session of the 1992 House of Delegates on October 25, the Board of Trustees elected the following leaders: John W. Lawrence, MD, chairman; Victor F. Greco, MD, vice chairman; and Ferdinand L. Soisson Jr., MD, secretary.

Dr. Lawrence, Second District, assumes the position held by John H. Hobart, MD, Third District, for three years. Dr. Greco, Twelfth District, has been a board member for seven years; and Dr. Soisson, Eleventh District, returns as secretary for his fourth term.

Revenue Optimization

What is Revenue Optimization?
Revenue Optimization addresses the fundamentals which govern your gross revenue and, therefore, your net income.

FEE ANALYSIS
- Your fees are converted to a relative value basis using the Systemetrics-McGraw/Hill relative value system.

CODING/REIMBURSEMENT ANALYSIS
- We analyze and evaluate your procedure code usage (and non-usage), including levels of service for the office, hospital, consultation and ER/Outpatient service as well as your use of modifiers.
- We review your insurance claim forms and your EOBs to find ways to maximize your reimbursements, minimize reductions and denials, and minimize the chance of audit.

MEDICARE/RBRVS
- The primary function is to protect your revenue under both par and non-par status, enabling you to make a rational and objective decision about your participation status with Medicare.
- In the process, we calculate your Medicare allowed amount and the co-payment amount for every procedure under both par and non-par status. RBRVS Analysis is included, showing you the effect of RBRVS on each code you use and on all codes collectively.

ON-SITE CODING/REIMBURSEMENT
- If your personnel needs hands-on help, we come to you. We "audit" your complete reimbursement system including: procedure coding, diagnosis coding, charges, claims filing, reimbursements, and chart documentation. If needed, we will provide classroom and hands-on training for individuals or your entire staff.

YOUR SATISFACTION IS GUARANTEED
- If we do not help or if you are not satisfied with the results of your analysis — your money will be refunded!

1992 ELECTION REVIEW AND ANALYSIS

While "vote for a change" was the keystone of many campaigns this year, in the political backrooms on election night there was a collective sigh of relief: the tide of change in Pennsylvania was much more shallow than expected.

The following is a brief review and analysis of federal and state races for the House and Senate. **Bold** print indicates candidates supported by the Pennsylvania Medical Political Action Committee (PAMPAC) and the American Medical Political Action Committee (AMPAC). In Congress, 86 percent of those candidates supported by PAMPAC won, while at the state level, that number reached 95 percent; PAMPAC supported a candidate in 84 percent of the contested elections.

Federal races: Senate and House

With a foundation of more than 1.5 million ticket-splitting voters, **Arlen Specter** (R) edged Lynn Yeakel (D) to win re-election to his third term in the Senate. The race was as close as most observers predicted.

The tide of change did reach the Congressional delegation as **James Greenwood** (R) defeated incumbent **Peter Kostmayer** (D-Bucks)* and Paul McHale (D) defeated incumbent **Don Ritter** (R-Lehigh/ Northampton). In both instances, the successful challenger had service in the state legislature. Greenwood is currently a state Senator and McHale served in the House. Both won by good-sized margins.

In two key Congressional races in the western part of the state, **Rick Santorum** (R-Allegheny) overcame a large voter registration deficit to win a second term, and **Austin Murphy** (D-Washington) escaped with a narrow victory. As expected, **Ron Klink** (D-Allegheny/Westmoreland) won election in the 4th District where he had defeated Congressman Joe Kolter in the primary.

There were two "open" seats where the incumbent had retired, both in the east. Tim Holden (D-Schuylkill) defeated **John Jones** (R) to keep the former Yatron seat Democratic. In a much closer race, with a preliminary margin of only 1,000 votes, Marjorie Mezvinsky (D-Montgomery) defeated **Jon Fox** (R). That seat had been held by Republican Lawrence Coughlin.

When the Congress reconvenes, the Pennsylvania delegation in the House will have 11 Democrats and 10 Republicans. Republicans lost a net of two seats in the delegation.

Senate remains under GOP control

With only one "open" seat at stake, the State Senate will be virtually unchanged. **Hal Mowery** (R) was elected to replace retiring John Hopper (R) in the 31st District (Cumberland). The only variables are: 1) the seat which will be vacated in the 10th District (Bucks) when Senator Jim Greenwood moves to the Congress in January; and 2) the status of Senator Frank Pecora. Previously a member of the Republican caucus, Pecora campaigned as a Democrat for Congress and lost to Rick Santorum. His district was moved across the state to Chester County.

All other incumbent candidates won re-election. Physicians were most active in the 49th District (Erie) where many had made individual personal contributions to **Steve Brooder** (R), a challenger to Buzz Andrezeski (D). Unfortunately the bid fell short.

If Pecora remains a part of the Republican caucus, the GOP keeps their 26-24 margin.

State House stays Democratic

In stark contrast to the upper chamber, the House of Representatives will have as many as 37 new faces. However, even with all of those changes, the balance of power will only shift slightly.

There were five incumbents who lost their seats outright. In Philadelphia **Connie McHugh** (R) lost to William Keller (D). The other defeated incumbents were Democrats. In Lebanon County Peter Zug (R) ousted Ed Arnold (D). Curt Bowley (D) of Warren County lost to James Lynch (R), and after a recount, Ken Cole (D) of Adams County lost by 10 votes to Stephen Maitland (R).

One race literally pitted two incumbents against each other. **John Wozniak** (D) defeated Leona Telek (R) in a battle set up by re-apportionment in the 71st District (Cambria).

Republicans did comparatively well in districts which were re-located by re-apportionment. Winners were Tim Hennessey (R-Chester), **David Steil** (R-Bucks), **Katie True** (R-Lancaster), **John Fichter** (R-Montgomery), and Todd Platts (R-York). The only Democrat to win a re-located seat was former Representative Frank Yandrisevits (Lehigh/Northampton).

The Democratic majority was protected by critical victories in four of the 29 seats where a member of the House had retired. Five of the seats changed party in this election, and the Democrats won four of them. In Delaware County Thaddeus Kirkland (D) and Greg Vitali (D) won seats vacated by Robert Wright and Steve Freind. Lawrence Curry turned the seat formerly held by Charlie Nahill in Montgomery County into the Democratic column, and Dante Santoni did the same with Paul Angstadt's former seat in Berks County. Only in Cumberland County was the trend reversed: Republican Al Masland was elected to replace Democrat John Broujos.

With one seat close enough to be decided by a re-count, the House Democratic majority slipped to 106-97 and may go to 105-98. Currently there are 107 members in the majority.

Statewide races

Although the incumbents won re-election in all three statewide races, there was more excitement than many would have expected just a few weeks before the election.

Ernie Preate (R) turned back a challenger by a narrow margin to win another four-year term as attorney general, and Barbara Hafer (R) did the same in the auditor general race. In both races the lead changed several times as returns were counted election night. State Treasurer Catherine Baker Knoll was re-elected by a much larger margin and is now seen by many as a strong candidate in the 1994 Democratic Gubernatorial primary.

** In the Bucks County congressional race, PAMPAC supported Greenwood and AMPAC supported Kostmayer.*

A Plan for State Society Interaction with Toxic Release Program

David R. Brill, MD

At the April 22, 1992, meeting of the Society's Commission on Environmental and Occupational Health, Deborah Williams of the U. S. Environmental Protection Agency (EPA) asked for the support and involvement of the Pennsylvania Medical Society in the EPA's newest project, the Toxic Release Inventory (TRI).

TRI was mandated under Section 313 of SARA (Superfund Amendments and Reauthorization Act, 1986). At issue was the unregulated and largely unappreciated release of significant amounts of toxic chemicals by manufacturers who, in many cases, had no concept of how much and what was going into the air, water, and land. At the same time, Title III of the same act authorized the emergency planning and community right-to-know programs into which TRI is closely tied. EPA's goal is to reduce toxic emissions substantially by collecting and publishing data which will induce manufacturers to voluntarily curb any questionable practices or enable citizens to "assist" corporations in so doing.

This is not yet a national program, but it will become one in several years. EPA wanted a trial run in a heavily populated, highly industrial state with a large volume of toxic releases, an active environmental community, and close proximity to Washington, DC. Pennsylvania, which ranks fifth nationally in industrial pollution, was an obvious choice for a pilot study. The state was chosen in late 1991, and the Society was quickly targeted because of its understandable concern for public health.

The TRI consists of a mandatory reporting program for large-scale, potential toxic waste generators. To be targeted by the program, an industry must be involved in manufacturing; employ 10 or more workers; *and* manufacture, import, or process more than 25,000 pounds of toxic chemicals per year. At present, over 22,000 users nationwide are enrolled. The chemicals to be reported are confined to just over 300 substances, which tend to be among the more hazardous. The program focuses on what substances are present, how they are used, amount and where releases occur, how much is shipped and where, and how much is treated and how.

The EPA readily admits to some significant shortcomings of the TRI. For one, large amounts of toxics can be released by manufacturers who do not meet the above criteria, such as dry cleaners. Automobile emissions and toxic substances used by private citizens are completely invisible to the system. In addition, the rate and timing of releases are not recorded.

From an epidemiological standpoint, a sudden, massive release has different effects than a slow, sustained release. Not all chemicals are studied. Moreover, atmospheric conditions and ecological pathways during releases are not available through the TRI. Finally, and very importantly, data such as these inherently cannot address issues of causality.

The Society commission recommended and the Board of Trustees has adopted the following stance:

- TRI may provide useful information on toxic releases for physicians, citizens, and corporations.
- Making this information available to members is consistent with the Society's position on issues of environmental and occupational health.
- The Society is concerned about the potential for inappropriate—even malicious—use of information.
- The Society is concerned about an unintentional, yet potentially deleterious effect upon hospitals, physicians, and manufacturers of pharmaceuticals, paper and x-ray products, and durable medical devices which may translate into unnecessary expense or curtailment of services of patients.
- The Society *does not* endorse the TRI, but agrees to make the availability of the TRI known to Society members via PENNSYLVANIA MEDICINE and *Executive Report.*

More information on the TRI is available from: the Society's Department of Educational and Scientific Affairs, (800) 228-7823; most county libraries; and the National Library of Medicine's TOXNET database, (301) 496-6531, which may be accessed by hospital libraries or a variety of computer network means (floppy disks, magnetic tapes, or microfiche). Members need to be aware that while some forms of access are free, others may involve substantial fees.

Dr. Brill is chairman of the Society's Commission on Environmental and Occupational Health.

NIH PANELS ISSUE REPORTS

Two National Institutes of Health (NIH) consensus development statements are now available from the NIH Office of Medical Applications of Research. The statements contain recommendations and conclusions concerning: 1) diagnosis and treatment of depression in late life; and 2) triglyceride, high density lipoprotein, and coronary heart disease.

Each statement was prepared by a panel of experts who considered scientific evidence on the subjects at consensus development conferences at NIH. Such conferences bring together researchers, practicing physicians, representatives of public interest groups, consumers, and others to carry out scientific assessments of drugs, devices, and procedures in an effort to evaluate their safety and effectiveness.

Free, single copies of the consensus statement on depression in late life or the consensus statement on triglyceride, high density lipoprotein, and coronary heart disease are available from:

Why buy an office automation system that doesn't offer a long-term solution?

ACCLAIM™ from Sentient is the total system solution.

A lot of medical practices are planning to invest in an office automation system. But a lot of the systems out there just don't offer the comprehensive functions and long-term expandability that your practice may need.

IBM® and compatible hardware.

The ACCLAIM system operates on IBM and compatible hardware, so you know you're getting the quality standard of the industry. And it's completely expandable, so it can grow as your practice grows.

Long-term support.

ACCLAIM is the system solution that fits your needs today. And Sentient's software engineers, customer trainers, and telephone support people are always there to make sure your system fits your needs over the years to come.

Easy to operate.

Even if your staff has no previous computer experience, ACCLAIM is simple to operate effectively and efficiently. Complete training is included in the purchase.

When you're thinking about office automation, call Sentient first, and find out what ACCLAIM can do for you.

SYSTEMS

We set the standard in medical computing.

MEDICARE CONVERSION FACTOR UPDATES SET

The 1993 Medicare physician fee schedule conversion factor update, which becomes effective January 1, 1993, is 3.1 percent for surgical services and 0.8 percent for non-surgical services.

The 3.1 percent increase reflects a 2.7 percent increase in the Medicare Economic Index (MEI) adjusted by performance under the Medicare Volume Performance Standard (MVPS) for surgical services. For Fiscal Year 1991 the MVPS for surgical services was 3.3 percent, and actual expenditures went up by 2.9 percent, or 0.4 percent less than the standard. This results in an update of 3.1 percent (2.7 percent increase in the MEI plus 0.4 percent).

For non-surgical services, the 0.8 percent reflects the MEI of 2.7 percent adjusted by the performance under the MVPS. For 1991 the MVPS for non-surgical services was 8.6 percent, and actual expenditures went up by 10.5 percent, or 1.9 percent more than the standard. The result is an upgrade of 0.8 percent (2.7 percent increase in the MEI minus 1.9 percent).

MEDICARE PAYMENT DEADLINES CHANGED

Under current Medicare rules, participating physicians who file "clean claims," as defined by the Health Care Financing Administration (HCFA), are to be paid no sooner than 14 days, but no later than 17 days from date of carrier receipt. For non-participating physicians the payment ceiling is 24 days. If payment is made on or after the payment ceilings, interest is added to the payment.

Under a new policy—which technically took effect in October, but won't be implemented until January 1, 1993—payment ceilings are no longer determined by the par/non-par status of physicians. Rather, payment ceilings for claims will be determined by the method of submission: electronic versus paper.

Physicians who file electronically will be paid no sooner than 14 days after carrier receipt of the claim, while paper claim filers will be paid no sooner than 27 days. Ironically, there is a good possibility that the government will have to pay interest on virtually every paper claim filed.

The new law did not eliminate the 24-day maximum carriers have to pay clean claims before having to pay interest. Therefore, there is at least a three-day interest payment which will be made on practically every paper claim filed. For electronic claims, if a carrier failed to meet the 14-day payment goal, Medicare would not have to pay interest on the claim until 24 days after receipt by the carrier.

MONITORING IMPORTANT TO PAYMENT REFORM

Early Claims Review and Comparative Performance Reports are two activities of importance in monitoring implementation of Medicare payment reform (see PENNSYLVANIA MEDICINE, October 1992, page 28). A third activity of importance is an educational program known as Global Surgery Monitoring.

Part of standardizing carrier payment policies was the development of global surgery package modifiers. These new modifiers include: **25**—significant, separately identifiable evaluation and management service by the same physician on the day of a procedure; and **79**—unrelated procedure by the same physician during a postoperative period. Modifier 79 may also be used to indicate that the procedure reported is a second or subsequent one, related but separate from the first in a series of staged procedures when CPT does not contain appropriate codes.

Medicare is monitoring the use of these two new modifiers. If a physician's modifier utilization places him or her in the 95th percentile (in an array of lowest to highest utilization), the physician is notified. Currently under review are second-quarter services—April 1-June 30, 1992. The utilization comparisons are neither locality or specialty specific. Therefore, all state physicians were compared against all other state physicians who met the following criteria:

- *For Modifier 79*—physicians who have been paid for a minimum of 15 surgical services with a global surgical postoperative period of 10 and 90 days, and one or more services or procedures where the 79 modifier was used.
- *For Modifier 25*—physicians who have been paid for a minimum of 15 surgical services with global surgical postoperative periods of 0, 10, and 90 days, and one or more services or procedures where the 25 modifier was used.

The number of global monitoring letters sent out for each Pennsylvania Blue Shield contract area is shown below.

A peculiar problem has been identified for the specialty of rheumatology. Rheumatologists have received a disproportionate number of reports. A large number of evaluation and management visits during which an arthrocentesis is administered, necessitating the use of these modifiers, is causing this distortion. Pennsylvania Blue Shield is discussing with HCFA the possibility of comparing rheumatologists against their peer group rather than all the physicians in the state.

Dennis L. Olmstead, the State Society's director of medical economics, contributed to this page.

Looking for Changes in Retroactive HCFA Directives

Donald E. Harrop, MD

One of the most difficult jobs we have in the peer review business is trying to explain that we *must* take a certain action on a case that may have occurred months (even a year or years) ago, when the rules of the game may have been just recently changed. This happens regularly with HCFA regulations, directives, policies, etc.

A perfect example of dealing with retroactive Health Care Financing Administration (HCFA) directives is when changes are made to the *Medicare Coverage Issues Manual.* Often, these revisions will modify coverage for a particular procedure, prosthetic device, etc. When this happens, a case may be denied, but the first occurrence can be paid under waiver of liability since the physician did not know or had no way of knowing that coverage was not available.

When HCFA issued new generic quality screens for ambulatory surgery review, it included the requirements for histories and physicals (H&Ps), and documentation of discharge orders. Because the Keystone Peer Review Organization (KePRO) selects its sample of cases from claims *paid* by the fiscal intermediary (FI), there is an inherent delay caused by the administrative and billing processes involved.

Cases reviewed by KePRO are, at the very least, a few months after the date of service. Sometimes a very minor error on the bill submitted by the provider may cause it to fail to pass an FI edit, and the bill will go back and forth many times before finally being paid. By the time the new generic screens were sent to the hospitals and the information was distributed to physicians, the screens were applicable to thousands of cases which occurred prior to physicians' knowledge of the new ground rules.

Of course, waiver of liability does not apply to what are considered to be quality of care issues. HCFA's position in matters such as this appears to be that the requirements for the H&Ps and documentation of discharge orders represent good medical practice and, therefore, should have always been followed. Sure, it's easy for us, when confronted with questions about the retroactive application of any of these types of new directives, to just point to HCFA with the standard answer that it was their idea. But this is getting a little old, and I'm sure that this repetitious answer does little to bolster KePRO's credibility with the medical community. Besides, we don't always agree with HCFA on policy matters, but as a contractor to HCFA, we are not in a position to criticize a policy of this nature. That type of questioning must come from outside sources.

A resolution by the Pennsylvania Delegation to the AMA was submitted to and approved by the AMA House of Delegates in 1991. That resolution called for the AMA to urge HCFA to publish in the *Federal Register* any proposed changes in processes or procedures which would affect physician practice patterns and/or delivery of medical care. We fully supported that position; however, there has been no indication to date that HCFA has taken any steps to implement it.

The 1992 Pennsylvania Medical Society House of Delegates passed a similar resolution which calls for the Society to request HCFA to provide PROs with timely notification of new or changed criteria to allow for 90 days' advance notice to physicians. We hope this meets with more success.

Dr. Harrop is president of the Keystone Peer Review Organization.

QUARTERLY REPORTS FROM KEPRO OVERSEERS

The House of Delegates, through Resolution 86-44 (Amended), has mandated the Society to provide regular reports on Keystone Peer Review Organization (KePRO) findings. The following report from the Ad Hoc Committee on KePRO Oversight covers the period July 1 through September 30, 1992. It shows the number of Medicare discharges, cases reviewed by KePRO physician reviewers, pending denials issued, final denials issued, and DRG changes made by KePRO.

KePRO Data for All Pennsylvania Hospitals—07/01/92 - 09/30/92

Medicare Discharges	▾192,762	DRG Changes	1,313
Cases Reviewed	41,383	PPS Hospitals Under IR	▾▾3
Admission Denials	735	Generic Screen Failures	33,329
Administrative Denials	143	Pending Quality Problems	6,527
Total Denials	878	Confirmed Quality Problems	436

▾ *Reflects total discharges received by KePRO for the reporting quarter.*

▾▾ *Proposed number of hospitals to begin IR.*

Robert B. Edmiston, MD, senior vice president, professional affairs, Pennsylvania Blue Shield, will retire at the end of this year after 18 years with Blue Shield. In his position, Dr. Edmiston developed and administers the participating doctor network, and is accountable for medical policy development and implementation. He also oversees utilization review, quality assurance, and Blue Shield's HMOs, and serves as medical director of Keystone Health Plan, Central, and chief executive officer of the Precertification Center of Capital Blue Cross and Pennsylvania Blue Shield. Prior to joining Blue Shield, Dr. Edmiston was a family practitioner in Harrisburg for 15 years.

Dr. Edmiston

Joseph C. Goldschmidt, MD, PhD, geriatric specialist, Delaware County Memorial Hospital, Drexel Hill, has been appointed to the Upper Darby Board of Health.

William H. Straub, MD, radiologist and nuclear medicine specialist, has been named as a fellow of the American College of Radiology.

Fred Baurer, MD, Overbrook Hills, has been named director of the Outpatient Addiction Treatment Services, The Institute of Pennsylvania Hospital, Philadelphia.

Dr. Marks

The Gerald J. Marks Professorship in Colorectal Surgery has been established at Thomas Jefferson University, Philadelphia, to honor **Gerald Marks, MD,** director of the Division of Colorectal Surgery at Thomas Jefferson University Hospital and internationally renowned colorectal surgeon.

Phillip J. Marone, MD, team physician for the *Philadelphia Phillies* and director of the Division of Sports Medicine, Thomas Jefferson University Hospital, received the 1992 Humanitarian Award from Magee Rehabilitation Hospital, Philadelphia, for his "championed and/or advanced rehabilitation medicine in the Delaware Valley."

The American College of Emergency Physicians presented **Steven J. Davidson, MD, MBA, FACEP,** division head, Emergency Medical Services, The Medical College of Pennsylvania, Philadelphia, with the Emergency Medical Services Award for his significant contributions to the field.

Albert M. Maguire, MD, ophthalmologist, has joined the faculty of the Scheie Eye Institute, Philadelphia.

Stuart L. Fine, MD, chairman, Department of Ophthalmology, University of Pennsylvania, Philadelphia, received a $75,000 grant from Research to Prevent Blindness, New York, to support research into the causes, treatment, and prevention of blinding diseases.

James Thomas Diehl, MD, Wynnewood, has been appointed chief of cardiothoracic surgery, Pennsylvania Hospital, Philadelphia.

Two national medical organizations, the Institutes of Medicine and the Federation of State Medical Boards of the United States, have selected **Darwin J. Prockop, MD, PhD,** chairman of the Department of Biochemistry and Molecular Biology and director of the Jefferson Institute of Molecular Medicine, Thomas Jefferson University, Philadelphia, to serve as a distinguished representative in the field of medicine.

Laurie Varlotta, MD, pediatric physician and pulmonologist, has joined St. Christopher's Hospital for Children, Philadelphia, as director, Disorders of Breathing/ Apnea Program.

Dr. Varlotta

CORRECTION

On page 20 of the September 1992 issue of PENNSYLVANIA MEDICINE, the On-Call advertisement incorrectly identifies the medical title of Dennis W. Rhoades as *MD*. Dr. Rhoades is a licensed *DO*.

Marilyn Tucker Quayle, wife of Vice President Dan Quayle, visited the Breast Cancer Center at Albert Einstein Medical Center, Philadelphia, as the hospital marked the 20th anniversary of Einstein's pioneering role in the development of the mammogram. Pictured (left to right) are: Harold Isard, MD, director, Gershon-Cohen Breast Clinic at Einstein; Robert Somers, MD, director, Einstein Breast Cancer Center, and chairman, Department of Surgery; Marilyn Tucker Quayle; Ellie Mack, MS, RN, MEd; Collette Sweitzer, RNS; Mark Kaplan, MD; Lisa Jablon, MD; and Angelica Montesano, MD.

Trends in Staff Compensation

The Health Care Group

Despite the very precarious health care environment of the '90s, the market for medical personnel appears to be stabilizing. For the second consecutive year, physicians have increased their employees' salaries by an average of four to seven percent—approximately mirroring cost-of-living increases.

According to The Health Care Group's Staff Salary Survey—an annual survey reporting practices' employee pay figures for 23 different job slots; reporting low, average, and high salary figures on a regional and national basis; and separating the data by experience levels—many positions showed no real increase, with some jobs even showing a slight decrease. For physicians, the trend toward stabilization in pay may be a welcome one; however, sustaining even minimal salary increases still presents a challenge for most medical practices.

In today's environment of lagging revenues and declining reimbursements from Medicare and other insurance carriers, physicians are feeling the effects of the sluggish economy and experiencing a drop in profitability. According to recent statistics released by the Society of Medical-Dental Management Consultants (SMD), family medicine, pediatrics, and internal medicine practices reported less profitability this year. Some subspecialties—including cardiology, gastroenterology, and oncology—saw an increase in profitability, but less than in previous years.

As a result of their relatively stable income levels, most physicians will continue to feel pressured to reduce labor costs and look to hold the line in their overhead expenses where possible. For example, many practices are increasingly sharing the burden of health insurance costs with their employees. Practices have adjusted their health insurance packages to include higher deductibles, increased co-pays, or benefits limited to employees instead of family members.

The good news for physicians is that they can now anticipate a more stable workforce with less turnover. With no significant increases in salaries, employees will be less tempted to "job hop." Because personnel costs have traditionally been the highest expense for medical practices to manage in order to maintain profitability, most physicians have had to struggle balancing expenses while maintaining quality staff. In a more stable market, physicians can take their time to recruit quality, experienced personnel at pay levels that won't set them back financially.

"As a result of their relatively stable income levels, most physicians will continue to feel pressured to reduce labor costs and look to hold the line in their overhead expenses where possible."

Nurse practitioners, PAs in demand

While most positions—including receptionists, file clerks, billing coordinators, registered nurses, and licensed practical nurses—showed no significant change, there were exceptions. Nurse practitioners and physician assistants (PAs) with two to five years' experience enjoyed salary gains of approximately 18 percent this year. This reflects an important change in how physicians perceive the value of these professionals.

More flexibility in benefits

In contrast to the stagnating salary levels among most positions, physicians have become more flexible with their benefits packages, offering options such as part-time positions, flexible hours, and dependent/child care benefits. According to The Health Care Group study, 26 percent of all medical practice employees are now working less than 35 hours a week.

The more competitive market has also provided impetus for doctors to more effectively manage their employees and evaluate performance. According to the study, more doctors (80 percent as compared to last year's 74 percent) are conducting formal review sessions, with 63 percent of them basing salary raises on a combination of merit and cost-of-living statistics.

"Right-sizing" your practice

Another important implication of the tightening market is the need for physicians to critically evaluate job duties assigned to each employee. With the growth in practice size, and the introduction of computerization and electronic claims processing in recent years, "traditional" job definitions may no longer be accurate. Moreover, the practice's division of labor may need to be reassessed. The trend today is toward "right-sizing," aiming to optimize the number of employees to meet the practice needs.

Right-sizing is only one aspect of the overall streamlining that needs to take place to stay financially healthy in today's economy. With staff compensation trends staying slow but steady, critically evaluating overhead expenses and labor costs will need to be bolstered by internal and external marketing efforts to ensure growth in the decade ahead.

The contributing authors, Dorothy R. Sweeney and Edward L. Grab, are consultants with The Health Care Group, a medical practice management consulting firm based in Plymouth Meeting.

"Ron's Rule—I give myself one week to meet new people and start having fun on a locum tenens assignment. It hasn't failed me yet."

Ron Richmond, MD, joined the CompHealth locum tenens medical staff when he completed his residency. He wanted to travel. He loves to meet people. A little time off sounded really good. And he thinks being exposed to different types of medical practice will serve him well when he returns to his hometown to establish a community health center.

A singer. A board-certified family practitioner. A soft-spoken New Yorker. Ron Richmond knows...

It's a great way to practice medicine

ANESTHESIOLOGISTS AND SURGEONS: COULD YOU USE AN EXTRA $9,000?

If you're a resident in anesthesiology or surgery, the Army Reserve will pay you a yearly stipend which could total in excess of $9,000 in the Army Reserve's Specialized Training Assistance Program (STRAP).

You will have opportunities to continue your education and attend conferences, and we will be flexible about scheduling the time you serve. Your immediate commitment could be as little as two weeks a year, with a small added obligation later on.

Get a maximum amount of money for a minimum amount of service. Find out more by contacting an Army Reserve Medical Counselor. Just call:

The Educational and Scientific Trust of the Pennsylvania Medical Society provides you with a way to make a significant statement honoring the memory of and paying tribute to your colleagues who are deceased. Send your tax-deductible memorial gift to The Educational and Scientific Trust of the Pennsylvania Medical Society, 777 East Park Drive, P.O. Box 8820, Harrisburg, PA 17105-8820.

Explore the opportunities.

Leonardo da Vinci did — everything from flight to anatomy — expanding his knowledge and potential. Think what he might have accomplished in today's world of high technology.

If you're a Family Practitioner, Physician Assistant, or Physical Therapist, explore the high-tech world of Air Force medicine — a world where professionals work hand-in-hand giving patients the best care possible without concern for the patient's ability to pay.

You'll enter a ready-made practice with none of the start-up and professional liability insurance expenses.

You can explore opportunities for advanced education to keep you abreast of new ideas in your field.

And chances are good you'll have more time to spend with family and friends, or to pursue a hobby. Plus, there are opportunities for you to explore other countries and cultures. You'll also have the prestige of being an Air Force officer and the pride of serving your country.

For more information, call 1-800-423-USAF. Or send your CV to HQ USAFRS/RSH, Randolph AFB TX 78150-5421.

Is your malpractice insurance being non-renewed or declined for any reason?

If your coverage is being refused, non-renewed or cancelled, professional liability coverage with a high-quality private insurance company may be hard to find. You're not alone. Every day, professionals like you find themselves ineligible for coverage through their current insurance carrier.

At Old Dominion Intermediaries we specialize in serving the professional liability needs of physicians and other health professionals. What others see as difficult or unusual is our specialty. We represent only U.S. based, financially sound companies who have served the medical community for over 10 years.

If you are having difficulty qualifying for your association or other standard market program, call us today for more information . . . in complete confidence.

Beware the Red Herring

Raymond Scalettar, MD

Editor's Note: The following is excerpted from a speech presented to the Society's House of Delegates at its annual business meeting just prior to the November presidential election.

It was in this state one year ago that Harris Wofford and the voters of Pennsylvania put health care reform smack in the center of the political stage, and it's stayed there ever since. It's no longer a question of *if* we're going to reform America's health care system; now it's a matter of *when* the change will occur and what form it will take. Literally every doctor—and all our patients—will be affected, because the very face of health care delivery in America is going to change. There are dozens of reform plans on the table [nationwide], but there's one aspect of the issue that hasn't been put to rest yet...the red herring.

A red herring has been smoked and cured, and it has an odor that's all its own. In Merry Old England, they'd drag a red herring across the trail to confuse the dogs during a hunt. Well, there's a red herring that's been dragged across the campaign trail right here in America that's been distracting voters from what's really going on. The red herring I'm talking about is the one that blames doctors for the high cost of health care in America today.

"There's a red herring that's been dragged across the campaign trail right here in America that's been distracting voters from what's really going on."

We hear it in the rhetoric of some politicians. We read it on the editorial pages of our newspapers. We sometimes even hear it from our own patients. What voters are not being told is that the escalating cost of meeting the country's health care needs is largely driven by illnesses and deaths among ordinary Americans themselves. Just take a look at what's happened with four health care hot spots in only the past year—smoking, violence, substance abuse, and AIDS.

- In the past twelve months, 400,000 smokers died. Caring for those smokers who did *not* die cost the health care system $52 billion.
- Violent assaults left 45,000 men, women, and children quadriplegic in the past year, requiring a lifetime of care that comes with a bill of as much as $600,000 per victim.
- About 375,000 drug-exposed babies started life with enough medical problems to cost almost $24 billion over the next five years.
- By the third quarter of this year, nearly 250,000 people had been diagnosed with AIDS—each costing about $75,000 for treatment.

Each is a serious health problem; each comes with an enormous price tag. Yet, in the face of facts as cold and hard as these, it's the doctors who are still catching the blame for the high cost of health care in America today. This is a dangerous allegation to let stand unanswered, [and] unless doctors respond, the allegation takes on a life of its own and becomes perceived as fact and not as the fiction that it really is. Once planted, the allegation grows in the fertile soil of public skepticism.

It's no secret this year that the American people are disappointed and angry with the leaders, institutions, and professions that serve them. They are frustrated that political leadership at all levels has failed to adequately address the social problems that affect life in every U.S. community.

This voter anger was part of Pennsylvania's election last year, and the same anger helped propel health care to the forefront nationally. The public knows that America's health care infrastructure is in trouble, but what the public may not yet fully realize is how big a physical price we've all paid as a result.

This, then, is what we have to tell them: that doctors are at the very front line of the health care system.

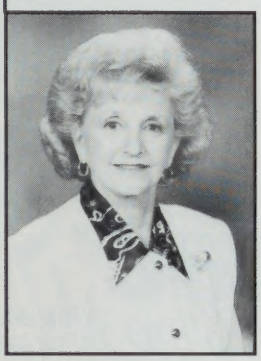
It could be said of the health care crisis that seldom has so much been written and talked about that affects so many and is understood by so few. What *is* understood by many, however, is that doctors are visible and tangible symbols of a threatening and complex issue. But, since antiquity, doctors have also been powerful symbols of help and healing. It's no accident that the majority of Americans continue to rank their *own* doctor as among the most honest and trustworthy of all the professionals.

That is our strength, and it is from that position that we can continue to remind our patients and our fellow citizens of the real truth of the matter: that the medical profession is not so much part of the problem, but instead, we're at the heart of the solution.

Dr. Scalettar is board chair of the American Medical Association.

Pennsylvania Medical Society

Auxiliary



Physicians and Spouses of Physicians:

In this critical time for medicine, membership in the Medical Auxiliary is the avenue for physicians' spouses to become involved to help make a difference. We need your ***VOICES, SUPPORT,*** and ***COMMITMENT.*** Physicians are asked to share with their spouses this invitation to join the Medical Auxiliary Federation: county, state, and national.

The object of the Pennsylvania Medical Society Auxiliary is exclusively educational and charitable and to assist in programs of the Pennsylvania Medical Society that improve the health and quality of life for all people. Each community has different needs, and educational materials are provided for volunteers committed to health education and health care legislation. Programs and project ideas are available through the Project Bank catalog.

Physicians' spouses are encouraged to become members of the Medical Auxiliary in these changing times in health care and become knowledgeable so they can communicate with and help educate the community and patients when approached on health-related issues as well as legislation changing the way physicians practice medicine.

"Alone we can make a difference, but together, we can make a change."

Mrs. Jean Greco,
President, PMSA President

Zantac® 150 Tablets
(ranitidine hydrochloride)
Zantac® 300 Tablets
(ranitidine hydrochloride)
Zantac® Syrup
(ranitidine hydrochloride)

CONDENSED
BRIEF SUMMARY

The following is a brief summary only. Before prescribing, see complete prescribing information in Zantac® product labeling.

INDICATIONS AND USAGE: Zantac® is indicated in:
1. Short-term treatment of **active duodenal ulcer.** Most patients heal within 4 weeks. Studies available to date have not assessed the safety of ranitidine in uncomplicated duodenal ulcer for periods of more than 8 weeks.
2. **Maintenance therapy** for duodenal ulcer patients at reduced dosage after healing of acute ulcers.
3. The treatment of **pathological hypersecretory conditions** (e.g., Zollinger-Ellison syndrome and systemic mastocytosis).
4. Short-term treatment of **active, benign gastric ulcer.** Most patients heal within 6 weeks and the usefulness of further treatment has not been demonstrated. Studies available to date have not assessed the safety of ranitidine in uncomplicated, benign gastric ulcer for periods of more than 6 weeks.
5. Treatment of **gastroesophageal reflux disease (GERD).** Symptomatic relief commonly occurs within 1 or 2 weeks after starting therapy with Zantac 150 mg b.i.d.
6. Treatment of **endoscopically diagnosed erosive esophagitis.** Healing of endoscopically diagnosed erosive esophagitis occurs at 4 weeks (47%), 8 weeks (71%), and 12 weeks (84%) of therapy with Zantac 150 mg q.i.d. Symptomatic relief of heartburn commonly occurs within 24 hours of therapy initiation with Zantac.

Concomitant antacids should be given as needed for pain relief to patients with active duodenal ulcer; active, benign gastric ulcer; hypersecretory states; GERD; and erosive esophagitis.

CONTRAINDICATIONS: Zantac® is contraindicated for patients known to have hypersensitivity to the drug.

PRECAUTIONS: General: 1. Symptomatic response to Zantac® therapy does not preclude the presence of gastric malignancy. 2. Since Zantac is excreted primarily by the kidney, dosage should be adjusted in patients with impaired renal function (see DOSAGE AND ADMINISTRATION). Caution should be observed in patients with hepatic dysfunction since Zantac is metabolized in the liver.

Laboratory Tests: False-positive tests for urine protein with Multistix® may occur during Zantac therapy, and therefore testing with sulfosalicylic acid is recommended.

Drug Interactions: Although recommended doses of Zantac do not inhibit the action of cytochrome P-450 enzymes in the liver, there have been isolated reports of drug interactions that suggest that Zantac may affect the bioavailability of certain drugs by some mechanism as yet unidentified (e.g., a pH-dependent effect on absorption or a change in volume of distribution).

Increased or decreased prothrombin times have been reported during concurrent use of ranitidine and warfarin. However, in human pharmacokinetic studies with dosages of ranitidine up to 400 mg per day, no interaction occurred; ranitidine had no effect on warfarin clearance or prothrombin time. The possibility of an interaction with warfarin at dosages of ranitidine higher than 400 mg per day has not been investigated.

Pregnancy: ***Teratogenic Effects: Pregnancy Category B:*** Reproduction studies have been performed in rats and rabbits at doses up to 160 times the human dose and have revealed no evidence of impaired fertility or harm to the fetus due to Zantac. There are, however, no adequate and well-controlled studies in pregnant women. Because animal reproduction studies are not always predictive of human response, this drug should be used during pregnancy only if clearly needed.

Nursing Mothers: Zantac is secreted in human milk. Caution should be exercised when Zantac is administered to a nursing mother.

Pediatric Use: Safety and effectiveness in children have not been established.

ADVERSE REACTIONS: Headache, sometimes severe, seems to be related to Zantac® administration. Constipation, diarrhea, nausea/vomiting, abdominal discomfort/pain, and, rarely, pancreatitis have been reported. There have been rare reports of malaise, dizziness, somnolence, insomnia, vertigo, tachycardia, bradycardia, atrioventricular block, premature ventricular beats, and arthralgias. Rare cases of reversible mental confusion, agitation, depression, and hallucinations have been reported, predominantly in severely ill elderly patients. Rare cases of reversible blurred vision suggestive of a change in accommodation have been reported. Rare reports of reversible involuntary motor disturbances have been received.

In normal volunteers, SGPT values were increased to at least twice the pretreatment levels in 6 of 12 subjects receiving 100 mg q.i.d. intravenously for 7 days, and in 4 of 24 subjects receiving 50 mg q.i.d. intravenously for 5 days. There have been occasional reports of hepatitis, hepatocellular or hepatocanalicular or mixed, with or without jaundice. In such circumstances, ranitidine should be immediately discontinued. These events are usually reversible, but in exceedingly rare circumstances death has occurred.

Blood count changes (leukopenia, granulocytopenia, and thrombocytopenia) have occurred in a few patients. These were usually reversible. Rare cases of agranulocytosis, pancytopenia, sometimes with marrow hypoplasia, and aplastic anemia and exceedingly rare cases of acquired immune hemolytic anemia have been reported.

Although controlled studies have shown no antiandrogenic activity, occasional cases of gynecomastia, impotence, and loss of libido have been reported in male patients receiving Zantac, but the incidence did not differ from that in the general population.

Incidents of rash, including rare cases suggestive of mild erythema multiforme, and, rarely, alopecia, have been reported, as well as rare cases of hypersensitivity reactions (e.g., bronchospasm, fever, rash, eosinophilia), anaphylaxis, angioneurotic edema, and small increases in serum creatinine.

OVERDOSAGE: There has been limited experience with overdosage. Reported acute ingestions of up to 18 g orally have been associated with transient adverse effects similar to those encountered in normal clinical experience (see ADVERSE REACTIONS). In addition, abnormalities of gait and hypotension have been reported.

When overdosage occurs, the usual measures to remove unabsorbed material from the gastrointestinal tract, clinical monitoring, and supportive therapy should be employed.

Studies in dogs receiving dosages of Zantac® in excess of 225 mg/kg per day have shown muscular tremors, vomiting, and rapid respiration. Single oral doses of 1,000 mg/kg in mice and rats were not lethal. Intravenous LD_{50} values in mice and rats were 77 and 83 mg/kg, respectively.

DOSAGE AND ADMINISTRATION: (See complete prescribing information in Zantac® product labeling.)

Dosage Adjustment for Patients With Impaired Renal Function: On the basis of experience with a group of subjects with severely impaired renal function treated with Zantac, the recommended dosage in patients with a creatinine clearance less than 50 mL per minute is 150 mg or 10 mL (2 teaspoonfuls equivalent to 150 mg of ranitidine) every 24 hours. Should the patient's condition require, the frequency of dosing may be increased to every 12 hours or even further with caution. Hemodialysis reduces the level of circulating ranitidine. Ideally, the dosing schedule should be adjusted so that the timing of a scheduled dose coincides with the end of hemodialysis.
